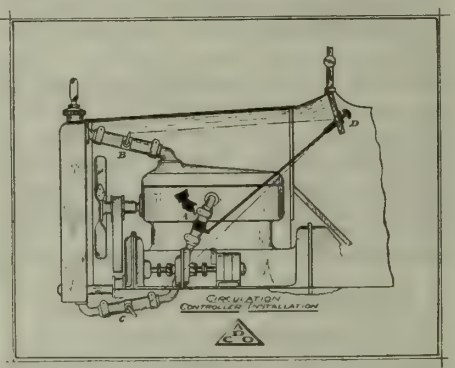
Frank Ready, of the sales staff of Mackenzie, Milne & Co., Limited, Sarnia, Ont., who has been ill at his home all week, is much improved.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

RED STAR WASHER

Beatty Bros., Limited, of Fergus, Ont., are manufacturing the B T Red Star washing machine. This machine is of the dolly type and, it is stated, it is made of cypress lumber with maple legs bolted to staves and braced with maple cross pieces and galvanized iron rods. All gears of the mechanism, it is stated,



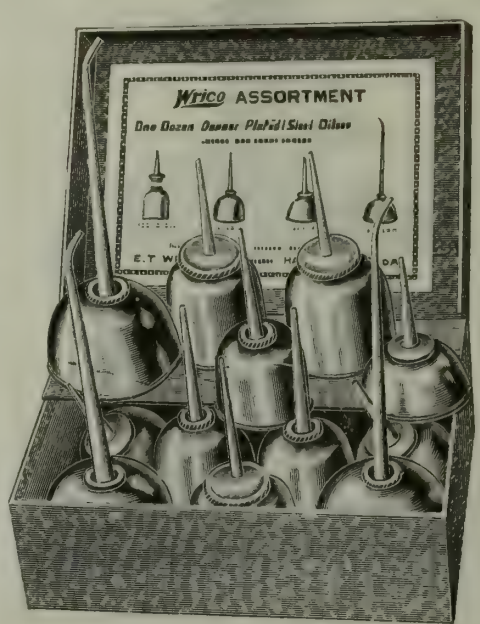
Red Star Washer

are closely guarded and the sides and bottom of the interior corrugated like a rubbing board to facilitate washing. A feature claimed for the washer is its easy working. The gentlest push, it is stated, starts the machine and slight pressure will, it is claimed, keep it going.

TEMPERATURE CONTROL

Realizing the absolute necessity of controlling the temperature of an engine to obtain proper operation and economical running of automobiles, trucks and tractors, particularly with the lower grades of fuel that have to be used, The Automotive Device Co., 98 Randolph Street, Detroit, has placed on the market a device for controlling the circulation of the water to regulate the temperature of the engine. It is stated that it permits the motor to reach 150° temperature in two minutes after starting, because only the water within the motor has to be heated, and it can be regulated, it is claimed, from the seat by the rod D shown in illustration to con-

Temperature Control



trol the temperature to any desirable degree regardless of atmospheric conditions.

Its use in connection with a motometer, it is stated, is ideal. The motometer indicates the temperature, and the A. D. Co. controller, it is said, regulates the circulation in accordance with desire.

A marked improvement in the operation of a car, it is stated, is immediately observed, and a saving of fuel, it is claimed, results.

OILER ASSORTMENT

The E. T. Wright Company, Limited, Hamilton, Ontario, is putting on the market an assortment of copper plated

Oiler Assortment

steel oilers. It is stated that the oilers are seamless one-piece bodies with spring steel bottoms and that they are coppered both internally and externally. The assortment, it is stated, includes oilers for farm, auto machine shops, cream separators and for general utility purposes.

NEW STEAM JOINTING

Docker's "Elastic" Steam Jointing is being introduced to the Canadian trade. It is claimed by the makers that this material is unique for the purposes of making an effective joint, particularly because of its elastic properties which are designed to allow for expansion and contraction. It is stated, it is well

Steam Joint Cement

suited to all descriptions of joint superheaters, flange, screw, and other joints. It is also claimed that it will never crack and that the jointing is indestructible.

The Canadian selling agents for the makers, L. J. Docker, Birmingham, England, are J. N. Warminton & Co., Montreal.

KENDALITE GAS MAKER

The Kendalite Company, 1211-13 Broadway, New York, has brought out the Kendalite gas maker which, it is stated, fits any stove or heater, and will, it is claimed, make its own gas by using kerosene and water. It is only necessary, it is stated, to lift the stove lid and set it in the fire box on the grate bars.

The device, it is stated, is very simple to operate. It is claimed that no alteration of the stove is necessary, and that it does away completely with coal, wood and ashes, also that there is no smoke or odor. The gas maker is recommended by the firm for standard size cooking and parlor stoves, also large heating and shipmate stoves, and grates.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

REVISED prices have again been made in linseed oil this week, and declines recorded range from 3c to 7c below levels of the past week. Lower flaxseed is again mainly responsible, although the market seems to have stopped in its downward course, as it has reacted slightly. Whether the bottom has been reached is still a question. Shipments of seed have been coming through very well, and crushers look forward to the coming months with a greater confidence as regards supplies of linseed oil.

Lower prices have been named on cut nails. The decline amounts to 50c per keg, and it is indicated is mainly the result of price-cutting which has been in progress. Authorities do not look for any immediate stimulus to business as a result. Wire nails are unchanged, and some business is being done on these, though not by any means a heavy tonnage.

Steel game traps are lower this week, the decline amounting to about 15 per cent. There was an advance made in these a comparatively short time ago, and the prices now named are, it is indicated, on same basis as that in effect prior to the last increase.

Pipe fittings have sagged and basis now established provides for a fairly substantial decline in some lines. Roll-rim sinks are lower, whereas flat-rim sinks are up slightly. Lead traps and bends show a weaker tendency, though no revision downward is yet reported.

Ingot metals have undergone a general revision downward, and dealers express the opinion that the bottom has been reached for the present. Copper, tin, lead, spelter and antimony have all been affected.

Prices for spring have been named on formaldehyde, and these show a marked advance over previous figures. Other lines to be revised upward are wire rope clamps, toilet clippers, brassed curtain rod, and paint and varnish remover. Lamp burners are lower, and cow ties and some lines of wrenches have also declined. Business generally is said to be very fair.

MONTREAL MARKETS

MONTREAL, Jan. 30.—Prominent among the declines made this week is that for cut nails. These lost 50c per keg, and the price is now $5.35. Other declines are those for ingot lead, copper and aluminum, game traps, glue, brass hinges, sash weights, cross-cut saw handles, and some auto accessories. Solder is reduced and fuel oil lost from 3 to 3½c in price. Steel hoops are likely to decline.

There is a steadily advancing hemp market, and as a consequence rope is firm. Coal oil is also very firm and an advance may be made. The state of trade is about what could be looked for in midwinter. Some think business would be heavier if the weather were more seasonable, and this is perhaps true. It is expected that there will be more doing in the course of a few weeks.

Game Traps Down; Glue; Brass Hinges

Montreal.

TRAPS, GLUE, HINGES.—A decrease in the price of various game traps has been effected, and while the new prices are not yet available, it is understood the prices obtaining last fall are again effective. A slight readjustment of 1c per package has been made for powdered glue, making the price for No. 3 size 36c, or 1c higher. Brass hinges are on a lower basis. The former discount of 40 per cent used by a large jobber has been reduced to 25 per cent.

Auto Tools Up; Some Parts Down

Montreal.

AUTO TOOLS.—Various wrenches and tools, particularly for Ford cars, wrenches, sockets, and socket sets, and all drop forged goods of Mossberg make are advanced about 15 per cent. The Edelman line of screwdrivers, grease cups, parts, etc., are also higher to the extent of about 10 per cent. Some Ford parts are on a lower basis, the changes being varied, and some of them from 10 per cent. to 15 per cent.

Sash Weights Less; Cross-cut Saw Handle

Montreal.

SASH WEIGHTS, HANDLES.—A reduction has been made in the price of sash weights. One jobber is quoting a price of $3.75 on solid pattern, and of $5.50 for sectional. Crosscut saw handles are revised in price, the following net prices applying: No. 2, $6 per doz.; No. 3, $5.30; No. 6, $4.05; No. 6½, $4.05; No. 7, $8.15; No. 9, $7.95, and Lion No. 2, $5.

Cut Nails Down 50c; Wire Steady

Montreal.

NAILS.—A reduction of 50c per keg was made in the price of cut nails. This makes the base price $5.35 per keg. Wire nails still hold at $5.50, and there is some business passing, though this is not great. Smooth steel wire is unchanged at $6.25 per 100 pounds.

Boiler Rivets Register Decline

Montreal.

BOILER RIVETS.—Lower prices have been named on boiler rivets this week, the decline amounting to 50c per 100 pounds. New prices have not yet been worked out, but these should be available at an early date.

Stoves and Wares Steady and Firm

Montreal.

STOVES AND WARES.—Notwithstanding the high prices the stove and range trade is seasonably fair. Production costs still are high, and there is no reduction in sight on some of these outlays. The volume of business received for wares and kindred lines is very well maintained, and the reports from salesmen on the road are encouraging.

Hemp Up More; Rope Very Firm

Montreal.

ROPE AND CORDAGE.—While there has been a steadily advancing hemp market, prices scoring an increase of around 4c in a short while, there is no advance yet in the price of rope; this may come. In the meantime there is a firm market with pure manila selling at a base price of 28½c; British manila 24c, and sisal 25½c per pound.

Fuel Oil Down 3-3½c; Coal Oil May Firm

Montreal.

OILS, GASOLINE.—A decline of from 3 to 3½c has been made in the price of fuel oil. The price here for this is now 9½c, and the reduction was caused by the desire of the trade to effect more business. Coal oil is steady and firm. It will not be surprising if there is an advance in this product, the same having firmed in the States. Royalite is 19c per gallon, and Palacine and Electroline 22c. Gasoline is steady and the sales are fairly good. Price 34c per gallon for motor grade.

Bigger Supplies Sheets Will Soon Come

Montreal.

SHEETS AND PLATES.—It is expected that there will be a freer delivery of sheets and plates from overseas' makers after a few weeks, and in the meantime the trade is being looked after fairly well. Supplies are not over heavy of some gauges, but there appears to be enough to go around. Prices are without change.

			Per 100 lbs.
BLACK SHEETS—			
10 gauge	7 25	$7 35	$8 50
12 gauge	7 35	7 40	8 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Steel Hoops to Decline; Bars Held

Montreal.

IRON AND STEEL.—While steel bars

Lower Prices on Boilers and Radiators May Come

THE announcement made by the American Radiator Co. on January 1, that new prices approximating a decline of 25 per cent. in boilers and radiators had been made has caused considerable comment in Canadian trade circles as to what action, if any, was contemplated by the manufacturers of similar lines here.

That lower prices will be reached seems probable but just how much the decline will be is still somewhat uncertain, probably in the neighborhood of 10 to 15 per cent. on boilers with a smaller amount on radiators. Comparison of prices prior to the issuance of this latest price in the United States markets favored the Canadian manufacturers. The object of this article then is to show the present disparity between the two and outline facts which may be expected to bring about a lowering of values on this market.

Starting with round water boilers there is no great difference in prices to the small buyer. American sheet prices on No. 4 round water boiler show a cost to this class of buyer of $128.80, which with a 35 per cent. duty would bring the laid-down cost to about $173.88. The present Canadian price is $171.00, a slightly lower figure.

However, when one comes to the usual export price to the larger buyers there is a different story to tell. With the extra discount allowed on this business there is a net difference of 10 to 20 per cent. between the United States and Canadian prices, the former being that much lower. The No. 7 boiler, however, does not show this difference, in fact, practically no difference at all. Usual prices to the larger buyers on these show a cost when imported from the United States of about $299.38 laid-down, whereas the Canadian price figures out at $303.24, so no reduction on these need be made. A factor in making comparisons that must be borne in mind is the one that Canadian boilers have to be supplied with branch headers, whereas imported boilers do not have these, so considering this point, the difference in price is not so marked. Figures show that probably 75 per cent. of round water boilers sold are Nos. 3, 4, 5 and 6, and on these it seems probable that a further discount of around 10 per cent. in Canadian prices may be allowed.

In round steam boilers, however, there is a greater difference in figures prevailing to-day. Owing to the Government regulations which apply in the various provinces it is difficult to make comparisons. American boilers are quoted without safety valves, whereas in Ontario special approved steam trimmings are necessary and a Government fee for registration is charged. In addition to special trimmings and registration, in Alberta it is necessary to have special brass plugs for clean-out purposes installed which means additional expense. However, considering all these factors, it seems that some very material reduction may be looked for amounting to anywheres from 10 to 15 per cent.

On the square type water boilers the larger type show somewhat greater difference than the smaller. However, it would appear that present figures may be revised to the medium and large buyer providing for a decline of from 10 to 15 per cent.

The difference in square type steam boilers seems to be much greater than that on square type water, but here again consideration must be given to the same conditions re Government equipment and registration as those noted in connection with the round steam boilers. This would seem to indicate that a net difference of 10 to 15 per cent. exists which Canadian manufacturers will undoubtedly adjust.

Radiators do not show such a big difference even on to-day's basis. The 2 col. steam, 38-inch, from the United States will cost the small dealer delivered in Canada $50.34, while the Canadian price is $50.85. The 3 col. water, 38-inch, from the United States to the small dealer figures out at $49.66 here, while the Canadian price is $52.80. To the carload buyer, 2 col. steam, 38-inch, will cost laid-down $45.97 from the United States, whereas comparative Canadian figure is $48.31. A 7½ per cent. reduction would not be out of line here. With the 3 col. water, 38-inch, carload buyers secure a laid-down cost from United States manufacturers of $45.38—this compares with a Canadian price of $50.16, so a 10 per cent. reduction would be quite in order.

There seems little doubt that Canadian manufacturers will bear these facts in mind and an announcement at an early date that lower levels have been reached seems a pretty safe hazard. An interesting point in connection with new prices named in the United States is that manufacturers there are guaranteeing their prices against decline. This would seem to indicate that they felt that the bottom had been reached for some time and that they are trying to exert a steadying influence on the building trade to encourage building operations. Whether Canadian manufacturers will adopt a similar selling policy along with any price revisions they may make is difficult to say, but it would not come as any surprise. Feeling that every encouragement to the building trade to start operations in a big way should be given may

Continued on page 72.

and iron are held there is likely to be a decline in the price of steel hoops. This may be around $1 per 100 pounds. The market is steady and a certain amount of winter business is being done, although the conditions are on the quiet side. It is thought from some of the larger centres in other places, that there will be no further reductions, production costs being high.

Winter Quietness on Old Materials

Montreal.

OLD MATERIAL.—The usual seasonable quiet conditions prevail. These are perhaps more acute than they have been for several seasons as there was a ready demand for some lines during the progress of the war. The basis is steady and the enquiry and movement very limited.

Pipe scrap	15 00	16 00

Copper, Aluminum, Lead Easier

Montreal.

INGOT METALS.—There is no movement of consequence and the changes of the week are limited and small with copper, aluminum and lead somewhat lower.

COPPER.—The volume of business is very confined and the selling light elsewhere as well as here. Quotations are based around 24c per pound.

TIN.—The trade is dull everywhere, and even large operators are offering to take on business in the States that they usually would scorn, in order to liquidate holdings. The basis here is unchanged at 66c per pound.

SPELTER.—Some enquiries are reported for spelter, and this may lead to some actual business. There is no change of price which holds at 9 to 9½c per pound.

LEAD.—Quiet prevails here as well as at outside points and the market is more or less nominal. A slight shading of quotations here makes the range 8 to 8½c per pound.

ANTIMONY.—No interest is manifest and the price remains fairly firm at 9½c to 10c per pound.

ALUMINUM.—On light demand and selling the price is easier at around 40c per pound.

TORONTO MARKETS

TORONTO, January 30—A decline of 50c per keg has been recorded this week in cut nails. Lower prices on practically all ingot metals have been named and dealers seem to feel that bottom has been reached for the present. Steel game traps are lower and roll rim sinks have also declined, while flat rim sinks are up slightly. Pipe fittings have undergone a further revision downward and solder is at slightly lower levels.

Jobbers report that very good movement of spring booking orders is in progress and figures for January are expected to show a very good total. Some manufacturers state that January business has been very good.

Game Traps Record Decline

Toronto.

GAME TRAPS. — Lower prices have been reached on game traps, the present basis, it is indicated, being the same as that prevailing prior to the recent advance recorded. The present scale of quotations is as follows:

Game Traps—Victor, with chain: No. 0, $1.90 per dozen; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.50; No. 3, $6.15; No. 4, $7.25.

Jump, with Chain: No. 1, $2.95 dozen; No. 1½, $4.40; No. 2, $6.45; No. 3, $8.55.

Hawley & Norton, with chain: No. 0, $2.95 per dozen; No. 1, $3.45; No. 1½, $5.15; No. 2, $7.25; No. 3, $9.65; No. 4, $11.35.

Newhouse, with chain: No. 0, $4.50 per dozen; No. 1, $4.70; No. 1½, $7.10; No. 2, $10.45; No. 3, $13.95; No. 4, $16.45; No. 81, $5.50; No. 91, $5.95.

Bear: No. 5, $10 each; No. 50, $7.05 each.

Cut Nails Down 50c; Wire Unchanged

Toronto.

NAILS, WIRE.—A decline of 50c per keg has been made in the price of cut nails this week, bringing the base price down to $5.35 per 100 pounds. No change in the situation on wire nails is reported. the base remaining at $5.50 per 100 pounds, though some price shading seems to be in progress.

Smooth steel wire is without change at a base of $6.25 per 100 pounds.

Waste to Decline; Oakum Holds

Toronto.

WASTE, OAKUM. — No price revisions have yet been recorded in waste, but indications point to declines of from 1c to 2c per pound, according to grades. Some expect new prices early next week, whereas others look for present basis to be maintained for another month or six weeks. Lower prices may be said to be on their way at any rate.

Oakum remains at unchanged levels. Some shading of prices on plumbers is reported, but this does not seem to be general, $10 being price most often heard. Range of prices on both waste and oakum appear in current market quotations.

Revised Prices on Enamel Sinks

Toronto.

SINKS.—Prices on sinks have been revised, the roll rim being down slightly whereas the flat rim are up a little bit. Quotations now being named to the trade on the roll rim are: 16 x 24 inch, $12 each; 18 x 24 inch, $12.30; 18 x 30 inch, $15.05; 20 x 30 inch, $16.15. The flat rim are quoted for the 16 x 24 inch at $16 each; 18 x 24 inch, $16.20; 18 x 30 inch, $15.05, and 20 x 30 inch, $16.15.

Wares Steady; Stoves Unchanged

Toronto.

STOVES, WARES.—No new developments in respect to wares is reported. The market is holding and business is said to be coming along fairly well with some sorting orders being handled.

Seasonable calm is reported in stoves, but manufacturers are looking forward to a good 1919 and making plans accordingly. Prices are steadily maintained.

Cordage Shows No Marked Change

Toronto.

CORDAGE.—The situation in cordage shows no marked change. There is some booking business coming and outlook is considered very fair. Primary points report a firm market. Quotations locally are unchanged, pure manila being based at 28½c per pound; British manila 24c; New Zealand hemp, 24c.: sisal, 25½c.

Oils Holding; Gasoline Steady

Toronto.

OILS, GASOLINE.—The market on oils is holding without change with a brisk demand already in evidence. Quotations on coal oil range from 18½c to 21½c per gallon according to grade.

Gasoline is maintaining its own, too, and sales are reported as bordering on the heavy mark. Prices rule unchanged at 33c per gallon.

Pipe Fittings Register Declines

Toronto.

PIPE FITTINGS.—A further general revision in pipe fittings, both malleable and cast, effective February 1, has been made and quotations now being made to the trade are: Cast iron fittings, 12½%; plugs, 22%; bushings, 28%. Standard unions are unchanged at 35%. Malleable fittings, Class A, black, are lower at 53c per pound; Class A, galvanized, at 66c; Class B, black, at 24c; Class B, galvanized, at 33c; Class C, black, at 16c, and Class C, galvanized, at 24c.

No change has been noted in soil pipe and fittings, the market holding quite steadily at unchanged figures. Discounts range at figures shown in current market quotations.

Bars Rule at Unchanged Figures

Toronto.

IRON AND STEEL.—New developments are lacking in iron and steel bars this week. Prices hold at unchanged levels and there is only a comparatively small amount of business offering at the present time.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	6 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Remain Unchanged

Toronto.

CORRUGATED SHEETS.—The market on corrugated sheets and other lines of manufactured sheet metals remains unchanged. Business is quiet, but seasonable. Range of quotations on corrugated sheets follow:

TORONTO— Corrugated Sheets	Per 100 Sq. Feet. Gal'zed	Painted
No. 28 gauge	$9 00	$7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Sheets on Lower Basis; Fair Sales

Toronto.

SHEETS, PLATES. — Sheet prices have shown revisions in some other quarters this week and the present range of quotations appears below. Business is reported as very fair—in fact is said to be much better than expected. More could be handled as stocks are good, but the outlook is considered very satisfactory.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$ 00
12 gauge	6 05

12 and 14 gauge	7 35	7 90

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Unchanged; Tubes

Toronto.

WROUGHT PIPE, BOILER TUBES, —The market on wrought pipe is unchanged this week at declines recently registered. A fair amount of business is coming to hand and being taken care of quite readily. Prices appear in current market quotations.

Similar conditions may be said to prevail in respect to boiler tubes, prices holding at figures shown below and sales being very fair.

Boiler Tubes— Toronto—	Per 100 feet Seamless	Lapweld

4 inch	80 00	67 00

Solder Declines; Traps and Bends Weak

Toronto.

LEAD AND ZINC PRODUCTS.—No further change has developed in lead and zinc products, although lead sheets are being quoted down to 11c per pound in some quarters. The marked declines in lead will, it is felt, work out in a lowering of values in traps and bends, though no revision is yet reported.

Lower price levels have again been reached in solder and the basis now prevailing is given as follows: Guaranteed, 38 to 40c per pound; strictly, 34 to 37½c; commercial, 31 to 33¾c; wiping, 30 to 31c; wire, 45½c. Full range of prices is shown herewith.

Lead pipe, lb.		$0 13
Lead waste pipe, lb.		0 14
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sqr. ft., in rolls, lb.	0 11	0 12½

Old Materials in Stagnant Condition

Toronto

OLD MATERIALS.—The scrap metal

WOODENWARE MANUFACTURER ENTHUSIASTIC OVER OUTLOOK

IN talking to a woodenware manufacturer this week, HARDWARE AND METAL was advised, when asking as to what might be expected in the matter of prices, that the outlook for the present year was that present level would be very well maintained.

"The woodenware industry was one of the last to undergo advances in prices and the conditions to be faced during the next few months do not tend towards any recession in values," stated this authority. "The cost of operations in the bush are exceedingly high and this is a factor which will be reflected in prices pretty well throughout the year. Labor determines very largely the scale of prices on the various lines. In the bush, the men are receiving this winter three times the wage of pre-war days. In the factory, the advance in wages is on a parallel, and with no possibility of a lowering of the scale of wages, which, in the case of the lumber, is directly reflected in the factory raw material cost.

"I can see no prospect of a lower level of prices on the manufactured goods.

"It may be said that metals have shown some declines, and that wash boards should react. It is true that metals are somewhat easier, but this is offset by an advance in the price we have to pay for lumber. In the case of wash boards, as with other lines, I look for little revision for some months to come."

Queried as to prospects for export trade and the general business outlook, the executive was most enthusiastic. Already numerous inquiries have been received from British interests with whom a connection prevailed prior to the war, and it is indicated that the Canadian manufacturer should be in a good position to meet any competition in overseas fields. Preparations are being made to extend manufacturing operations and a keen selling policy, which includes export trade, adopted.

market is no better. Neither is it any worse. Some of the larger yards claim to be losing money now, but contend that the present situation cannot last indefinitely. There is nothing in sight to indicate any betterment in the near future.

General Decline in Ingot Metals

Toronto.

INGOT METALS.—A general revision in ingot metals is reported this week and dealers express the view that the bottom has been reached for some time to come. Stocks are in very fair shape, it is said, and future prices will follow the market more closely. Copper, tin, spelter, lead and antimony have all been affected. Lower levels may develop in the coming months, but these are not an immediate prospect it would seem.

COPPER. — Lower price levels have been reached on copper, quotations now ranging from 25c to 28c per pound. There is some interest being shown in this metal, though demand is not exceptional.

TIN.—A decline in tin has been recorded of about 2c per pound, and the market is quite firm at present basis. Stocks are down to a very fair basis and fluctuations of market at primary points may influence prices here to a greater extent than they have done in the past few weeks. Quotations to-day range from 68c to 72½c per pound.

SPELTER.—A slight revision downward is noted in this metal this week. Quotations generally prevailing are at a basis of 9c per pound and a fair amount of business is reported at this figure.

LEAD.—The easier feeling in lead has developed into a decline in prices, but on the present basis the market seems to have touched bottom for a while at least. Quotations to-day range from 6¾c to 7c per pound; supplies are ample.

ALUMINUM. — There have been no new developments here. The price in the United States is set to March 1 and little variation from present price of 50c per pound here is looked for prior to that date.

ANTIMONY.—The price has sagged to 8½c per pound on antimony and conditions seem much steadier. Business is within a narrow compass at present, but a little better feeling seems to prevail as to the outlook.

LONDON MARKETS

LONDON, Ont., January 30—Numerous price changes have been made this week, some showing an upward trend, while other items show a decline from former levels. Among the items which have been revised upwards are wire rope clamps, brassed curtain rods, toilet clippers, and paint and varnish removers. The declines have been reported in the case of cut nails, soft copper wire, solder, tin roofing caps, and steel game traps. The traps are down about 15 per cent. to the basis in effect before the latest advance. Lamp burners have also declined, and a readjustment in the price of pipe fittings shows them to be down slightly.

Business here is reported as very good, it being indicated that sales compare very favorably with the same month of last year. Orders for sap supplies are coming along very well, and the jobbers report they are shipping a very good proportion of spring orders.

Wire Rope Clamps Register Advance

London, Ont.

WIRE ROPE CLAMPS.—New prices have been made this week on wire rope clamps which provide for a higher range of quotations than those formerly in effect. The new basis of quotations which are now being made to the trade are at the following levels: ¼-inch $6.00 per 100; 5/16-inch $6.00 per 100; ⅜-inch $7.50 per 100; 7/16-inch $9.00 per 100; ½-inch $10.00 per 100; ⅝-inch $13.50 per 100; ¾-inch $20.00 per 100; ⅞-inch $28.50 per 100.

Curtain Rods Up; Washing Machines

London, Ont.

CURTAIN RODS, WASHING MACHINES.—Latest quotations available on brassed rods reveal the fact that this line has gone to higher levels. On the new basis the ¼-inch is being quoted at $6.50 per 100 feet, and 5/16-inch at $9.00 and the ⅜-inch at $10.00.

Playtime washing machines have had the list advanced to $22.00 from the previous list of $19.50. The discount remains unchanged at 30 and 10 per cent.

Lower Prices on Pipe Fittings

London, Ont.

PIPE FITTINGS.—Prices on pipe fittings have been readjusted, and the new basis provides for a slightly lower range of figures. The present selling prices to the trade on fittings is given as follows: Malleable, class C black 16c per lb.; class B black 24c per lb.; class C galvanized 24c per lb.; class B galvanized 33c per lb. Plugs, 22 per cent. off list; bushings, 28 per cent. off list; iron stop cocks, 20 per cent. off list; unions, 35 per cent. off list.

Toilet Clippers Record Advances

London, Ont.

TOILET CLIPPERS, HORSE CLIPPERS.—Shipments of toilet clippers are now arriving, and new prices have been made on these which provide for slightly higher levels. On the present basis, the steed Nos. 0 and 1 are quoted at $1.65 each; the express Nos. 0 and 1, $2.25 each; shaver No. 20, $3.35; and Brown and Sharp and Bressant Nos. 0 and 1, $4.15.

Spring orders for horse clippers are already moving to the trade, and no change in price has been reported on these lines. The quotations which are now in effect for some of the bigger selling lines used are New Market hand, $2.75 a pair; Handicap hand, $1.95 a pair; Steward No. 1 power $9.75 each. Plates for the Stewart No. 1 power are quoted as follows: top, $1.01 each; bottom, $1.50 each.

Roofing Caps Down; Game Traps Too

London, Ont.

ROOFING CAPS, GAME TRAPS.—Lower prices have been made on tin roofing caps in this market, quotations in 100 pound sacks now being made at 9c per pound, and in smaller lots, 10c per pound.

There has been a reduction of about 15 per cent. named on steel game traps. New prices are not yet available, but it is understood that the basis now reached is the same as that prevailing prior to the recent advance.

Copper Wire, Solder, Lamp Burners Down

London, Ont.

COPPER WIRE, SOLDER, LAMP BURNERS.—A new discount has been issued on soft copper wire in coils which provides for net prices lower than former figures. The present discount from standard lists is 10 per cent.

A lower price has also been named on solder, half-and-half now being quoted at 40c per pound.

New prices have been named on lamp burners which provides for a decline. These quotations are not yet available, but they will probably be ready for next week's issue.

Sap Supplies Moving; Prices Firm

London, Ont.

SAP PAILS, SPILES, SYRUP CANS.

—Already there is a movement to the trade of sap supplies. The dealers are preparing to meet the demand from the points where the syrup is made and the possibility of a very early spring is influencing them to take delivery of their goods in time. Sap pails show no change in price, the 10-qt. flaring I C being quoted at $22.50 per 100 and the 8-qt. straight I C at $22.50 per 100

Eureka sap spiles are being quoted at $12.00 per M., or $1.35 per hundred, which represent unchanged figures. The quotations on syrup cans, I C given herewith are unchanged figures also; the one-half gallon is quoted at $15.00 per 100; a gallon at $22.50; 2 gallon at $40.00; 5 gallon at $65.00.

Cut Nails Down; Wire Holding

London, Ont.

NAILS.—A revision in the prices on cut nails has been made and the base established of $5.35 per 100 pounds provides for a decline of 50c from former figures. There has been no change made in the market on wire nails, prices to-day holding at a base of $5.50 per 100 pounds.

Paint and Varnish Remover Up; White Lead

London, Ont.

PAINT AND VARNISH REMOVER, WHITE LEAD IN OIL.—New quotations which have been established on universal paint and varnish removers, provide for an advance in the figures to the trade. The present basis of quoting is given as follows: One gallon cans $3.60 each; one-half gallon cans $2.00 each; quart cans $1.10 each; pint cans 60c each; and half-pint cans 35c each.

White lead in oil has settled into routine channels again after the substantial decline reported last week. The price of the pure white lead and oil in ton lots is $16.30 per hundred pounds, and in less than ton lots, $16.65.

Linseed Oil Down; Turpentine Down

London, Ont.

LINSEED OIL, TURPENTINE.—Linseed oil is lower by 3c per gallon this week. The recession in flaxseed prices is responsible though the market on seed seems to have firmed up the last day or so. Quotations to-day are: 1 to 2 bbls., raw $1.52 per gallon, boiled $1.55; 3 to 5 bbls., raw $1.51 per gallon, boiled $1.54; 6 to 9 bbls., raw $1.49 per gallon, boiled $1.52. Less barrels add 10c per gallon. Turpentine is holding at unchanged levels with the market generally somewhat dull: 1 bbl. lots $1.12 Imp. gal.; 2 to 4 bbl. lots $1.11; 5 gals. $1.22.

WINNIPEG MARKETS

WINNIPEG, January 30—Price changes during the week have again been very erratic with both advances and declines in many of the staple lines. The advanced lines include planes, try squares, levels and T bevels, carriage bolts, machine bolts, plow bolts, coach screws, rivets, agricultural wrenches, pipe wrenches, cow ties and linseed oil are among the lines to register declines.

Spring orders are now beginning to move and all jobbers are reported busy, while stocks generally, are reported very well assorted.

Bolts Revised to Lower Levels

Winnipeg.

BOLTS.—Manufacturers have just announced a reduction in the price of bolts and coach screws of from 5 to 15 per cent. while new discounts have been established for lengths over 6 inches on carriage and machine bolts. Nuts remain unchanged at former quotations. The following are to-day's ruling discounts on the complete line:

Carriage Bolts—⅜ and smaller up to 6 in. long, 20%; ⅜ and smaller over 6 in. long, 10%; 7-16 and larger, all lengths, net list.
Machine Bolts—⅜ and smaller up to 6 in. long, 25%; ⅜ and smaller over 6 in. long, 15%; 7-16 and larger, all lengths, 5%.
Plow Bolts—All sizes, 10%.
Stove Bolts—50%.
Shaft Bolts—5% on list.
Tire Bolts—25% off.
Sleigh Shoe Bolts—5% on list.
Coach Screws—25% off.
Nuts, Square, Blank—4½c on list.
Nuts, Square, Tapped—4¾ on list.
Nuts, Hexagon, Blank—4¾c on list.
Nuts, Hexagon, Tapped—5c on list.
For full cases of nuts deduct 1c lb.

Boiler Tubes Under Revision

Winnipeg.

BOILER TUBES.—Boiler tube prices have been revised on the local market during the past week and are now selling on the following basis: Boiler tubes, 1½-inch 32c ft.; 2-inch 32c ft.; 2¼-inch 34c ft.; 2½-inch 40c ft.; 3-inch 45c ft.; 4-inch 67c ft.

Planes, Try Squares, Bevels Higher

Winnipeg.

PLANES, SQUARES, BEVELS.—New prices are just to hand covering lines manufactured by the Stanley Rule & Level Co. These show advances in corrugated bottom planes which were formerly sold at the same price as plain bottoms. Try squares, T bevels are other lines to be included in the advance of from 2½ to 5 per cent. The following are the lines affected by the change together with prices now ruling:

Planes—No. 3C, $4.15; No. 4C, $4.50; No. 4½C, $5.20; No. 5C, $5.20; No. 6C, $6.65; No. 7C, $7.60; No. 24, $2.75; No. 603C, $4.70; No. 604C, $5.05; No. 605C, $5.80; No. 606C, $7.35; No. 607C, $8.45; No. 113, $7.10; No. 190, $2.80; No. 191, $2.65; No. 192, $2.50 each.

Try Squares—No. 12 x 6 inch, $7.25; 8 inch, $8.10; 10 inch, $10.65 dozen. No. 20 x 4½ inch, $5.15; 6 inch, $6.90; 7½ inch, $7.50; 9 inch, $9.65; 12 inch, $12.80 dozen.

"T" Bevels—No. 25 x 6 inch, $5.85; 8 inch, $6.60; 10 inch, $6.90 dozen. No. 18 x 6 inch, $9.45; 8 inch, $12.05; No. 10, $13.10 dozen.

Levels—No. 102, $6.15; No. 103, $8; No. 0, $13.25; No. 3, $23.30; No. 30, $32.80; No. 00, $11.90; No. 104, $8.95; No. 35, $28.55 dozen.

Pipe Wrenches Show Decline

Winnipeg.

PIPE WRENCHES.—Prices have been revised on pipe and agricultural wrenches during the week. These are now selling as follows, which prices represent declines: Stillson pipe wrenches: 6-inch $1.05; 8-inch $1.20; 10-inch $1.30; 14-inch $1.85; 18-inch $2 60; 24-inch $3 80; 36-inch $7.05 each. Agricultural wrenches 6-inch $6.70; 8-inch $8.00; 10-inch $9.40; 12-inch $12.00; 15-inch $16.80 dozen.

Cow Ties Decline 10 Per Cent.

Winnipeg.

COW TIES.—Following the reduction made by the manufacturers lower prices are now ruling on cow ties which decline approximately 10 per cent. from former quotations. These are now selling at 10 per cent. off list and reports indicate that further reductions may follow. To-day's ruling prices are given below:

Cow Ties, Open Ring—No. 1/0, $2.60; No. 2/0, $2.90; No. 3/0, $3.15; No. 4/0, $3.95; No. 5/0, $5.05 per dozen.

Cow Ties, "Special"—No. 1/0, $2; No. 2/0, $2.15; No. 3/0, $2.50 per dozen. "Three Chain"—No. 1/0, $2.60; No. 2/0, $2.90; No. 3/0, $3.15 per dozen.

Spring and Galvanized Wire Up Slightly

Winnipeg.

SPRING, GALVANIZED WIRE.—Plain galvanized and coiled spring wire show a slight advance during the week due to the heavy freight rates and are now quoted on the following basis:

Coiled spring wire, No. 9 $6.05 per 100 pounds Winnipeg basis; No. 12 $6.20 per 100 pounds Winnipeg basis. Plain galvanized, No. 9 $6.00 per 100 pounds Winnipeg basis; No. 12 $6.15 per 100 pounds Winnipeg basis.

Rivets Revised to Lower Levels

Winnipeg.

RIVETS.—Tinners' rivets, carriage rivets, wagon box and belt rivets have shown a slight reduction on the local market during the past week and are now selling at 15 per cent. off the list, making net prices as follows:

Tinners' Rivets	Black	Tinned
8 oz.	0 19	0 26
10 oz	0 20½	0 30
12 oz.	0 22	0 33
13 oz.	0 24	0 36
1 lb.	0 24½	0 40
1¼ lb.	0 27	0 46

1½ lb.	0 31	0 55
1¾ lb.	0 35	0 61
2 lb.	0 38	0 67
2½ lb.	0 48	0 85
3 lb.	0 53	0 93
3½ lb.	0 61	1 14
4 lb.	0 67	1 27
5 lb.	0 85	1 60
6 lb.	0 95	1 84
7 lb.	1 10	2 15
8 lb.	1 28	2 46

Carriage and Wagon Box Rivets—No. 6, ⅜ inch, 21c lb.; ½ to ⅝ inch, 19½c lb; ¾ to ⅞ inch, 18½c lb; 1 to 2 inch, 18c lb. Nos. 0, 1 and 3—½ to ⅝ inch, 18c lb.; ¾ to ⅞ inch, 17½c lb.; 1 to 3 inch, 17c lb.

Linseed Oil Holds; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices have held at 20c decline recorded last week. Prices have sagged substantially during the past month. Prices now ruling are given as follows: Raw linseed oil $1.80 gal.; boiled linseed oil $1.83 gal. in single barrel lots.

Turpentine prices show no change during the week with only a limited demand, to-day's selling price being as follows: Barrels, $1.30 gal.; ½ barrels, $1.33 gal.; 5 gal. lots $1.35 gal.; 1 gal. lots $1.35 gal.; plus the usual extras for containers.

Formaldehyde Prices Announced; Higher

Winnipeg.

FORMALDEHYDE.—Prices on formaldehyde for the coming season have been announced, and these show a marked advance over previous quotations. The new basis of prices established is given as follows: Barrels, 400 lbs., 50c per pound; barrels, 200 lbs., 51c per pound; barrels, 100 lbs., 52c per pound; jugs, 10 lbs., $5.50 each; jugs, 5 lbs., $2.90 each; jugs, 2 lbs., $1.25 each.

PITTSBURG MARKETS

PITTSBURG, Pa., Jan. 30.—Some of the mills claim that the majority of current estimates of the average rate at which mills are operating are too low, the usual estimates ranging from 60 to 70 per cent. of capacity. If the contention of these mills is correct, a mystery is created, for it is recognized everywhere that there is no market for a tonnage of steel at all approaching the productive capacity. If the present demand for steel is really absorbing an output almost equal to capacity, then if a general widespread demand for steel should develop the mills would simply be swamped. No one, however, would contend that this could occur, for throughout the steel trade, even among the more optimistic, doubts have arisen as to whether the steel industry can be fully supplied with orders even if business generally becomes good.

The mills could probably explain the discrepancy in reports if they would, but they are not any too communicative just now, feeling that the present is a very delicate situation. Possibly the explanation of there being such divergent reports as to the rate of operation is varying interpretation of the terms used in referring to operating rates. The common view of rate of operation of a steel mill is the actual tonnage output divided by the tonnage of which the mill is capable. A plant may report that it is "operating in full," however, when it merely has all departments in operation. Thus a plant containing ten open-hearth furnaces might be operating each of the ten, but by using a minimum of scrap, the charge being chiefly pig iron, might be getting only ten heats per week whereas when production is pushed the furnaces might be capable of 16 heats per week. This would be "full operation" in one sense but only 62½ per cent. operation from the tonnage standpoint

Whatever the rate of operation, it has been decreasing since just before Christmas, and the present trend is downwards, as the orders coming in are far less than the orders that are being filled. The mills are running chiefly on old orders, and most of them frankly admit that they could not come anyway near operating at their present rate, whatever that rate may be, if they depended solely upon current bookings of business. Obviously the old orders will tend to play out from week to week, and smaller and smaller production is in prospect, until there is a fundamental change in conditions.

Production in Detail

For several weeks past the report has been quite general that the sheet mills were experiencing about the best operation of any branch of the finished steel trade. If that were true at one time it is no longer true, for sheet mill operations have decreased materially. Several plants closed entirely at the end of last week, and one plant containing about ten mills is to close at the end of last week, having practically no further orders on hand. While sheet demand from the automobile trade is excellent the heaviest tonnage the automobile shops can take is but a small proportion of the total sheet capacity. To make a full demand for sheets it is necessary that there be a fair degree of building activity, but there is practically none at all.

The wire mills are doing fairly well, the majority at 60 to 70 per cent. of thier respective capacities. Their trade prospects are fairly good, moreover. The wire mills are much less dependent on the building trades for orders than are some other branches of the finished steel trade. They look rather to the farmer, who has great consumptive powers in wire of various descriptions, and nails. In merchant bars there is a fair degree of activity, and this is true also of pipe. The structural mills are running very light, while there is hardly any rail production at all.

The plate situation is rather cloudy. Several plate producing interests claim to be operating quite well, but refer to orders from the Emergency Fleet Corporation as their chief business. From the shipyards, however, come complaints of overshipments, and the Fleet Corporation's orders, recently curtailed from the rate obtaining in the late months of the war may, therefore, be further curtailed. At their highest level, the Fleet Corporation's plate requirements represented a tonnage equal to only five or six per cent. of the total finished steel capacity of the country, and not even one-half of the plate rolling capacity alone.

Prices

So far as can be ascertained, finished steel prices are holding very firmly. Mills, however, do not feel that it is any great trick to hold prices in present circumstances, because orders offered are very small and there is no temptation to cut prices in order to get the orders. Cut prices, indeed, might frighten away what little buying there is. One delicate point in the matter of price guarantees. Many buyers ask mills to guarantee prices to date of shipment, and although shipment as a rule would be made in from two to four weeks the mills refuse to give any guarantee. In this they feel they are exhibiting some strength, but buyers assert that this shows the mills have no confidence in their market.

For a short time after the reductions made about the middle of December, $4 to $6 a net ton under the former government maximums, there were predictions that the new prices would hold for quite a while, say to April 1. In the past few days less confidence has been manifested on this head, and there are some predictions that there will be further declines in February, without detriment to there being also some reductions about April 1.

Labor and Wages

There is not much idleness of labor in the Pittsburgh district, not as much as in some sections of the East, but there is some, and additional men are being let off from day to day, chiefly common labor. The branch of the United States employment service located in Pittsburgh reports a large surplus of common labor, but an actual shortage of all-round skilled machinists, not the kind of "machinists" that were produced during the war, however. The policy of the steel mills continues to be that there should be no reduction in wages in present circumstances, and none at all unless prices should come down very considerably. In some quarters the prediction is made that after about two more reductions in prices of finished steel labor will be asked to bear part of the burden of further price declines.

The use of japan as a protective, or decorative covering for metal articles, has since 1914 increased more than one thousand per cent. This was due in part to increased industrial activity, and to the shortage and high cost of tin.

Prepare Your Mailing Lists Now

Circulars Sent to Selected List of Prospective Customers Will Produce Results Later —Dealers Should Co-operate Closely With Manufacturers in Boosting Spring Business—How to Make Up a List

I HAVE an idea that an ice-maker would have little time or necessity for advertising in hades. With the coal man it may be different. The fellow making and selling vacuum bottles would only play up the 72-hour feature of his line, while the chap with asbestos insulation would reverse his selling argument from keeping heat within to keeping it without.

In brief, advertising should take into consideration the circumstances under which the goods must be sold.

All forms of paint advertising have some selling value under all conditions. Some advertising has greater selling value under certain conditions than under others. Certain classes of advertising are better adapted to given conditions than other forms, and a little sound advertising is better than no advertising at all.

By what standard do you determine or select your means of advertising?

By the same token, what methods of co-operation offered by your paint manufacturer do you utilize to the advantage of your paint department?

Determine and utilize these by their selling power just as you select or eliminate your selling help.

Keep the Good Ones

Eliminate all forms of advertising that have no definite selling value and possess only advertising vagaries, in so far as your business and conditions are concerned.

Select from those that have definite selling value the methods that possess this virtue to the maximum and in accordance with your aims and amount for expenditure.

For instance, if you are up against the necessity of choosing an electric sign for the front of your store and circular for enclosures in parcels or house-to-house distribution, choose the one that will bring customers into your store.

Don't choose the electric sign because some undertaker or shoe shop down the street has one, and you feel that you want to keep up with the Joneses in this respect. If, however, the electric sign beckons them to lifting your door latch more than circulars will induce them to do so—why, then the sign for yours.

But there is just this thought—that a circular very often works on your trade in the daylight when the tungstens are idle. And when the sign is blazing forth its glory, with your door locked after six, seven or eight p.m., the circular might also be getting in its fine work under the dome above a library table, or in the glow of some humble kerosene lamp possessed by a prospective home builder.

Unlike the above mentioned iceman or the chap with the vacuum bottle, the paint man is not favored with the force of everpresent, dominating and overwhelming conditions that set his customers a begging for his wares. He faces competition, indifference, ignorance and a thousand and one other detriments that advertising must be used to break down and create actual selling conditions out of.

"Business is business" is an axiom too often forgotten in choosing advertising methods. Advertising should be a feature of your business to bring business and sales.

Results Count

Choice of your own advertising methods, and of those offered in co-operation by manufacturers, should rest mainly on the power to interest, ability to suggest and maximum selling results.

All of which brings us to the mailing circular offered in co-operation by the paint manufacturers to those dealers who supply mailing lists.

Let us see if such circulars possess the necessary attributes we have mentioned.

Supposing you had a full line of paint in your store without a single color card or color slat; where would you be?

In about the same boat as the Israelites when the Egyptians required them to make bricks without straw.

Just here we can pertinently ask where the paint manufacturer is at, who has prepared these circulars for your use, when he has no list of your names to send them to?

Co-operation means two or more men working together in harmony to the same end. One man effort is not co-operation.

But, of course, you have your color cards on hand to meet your selling requirements within the store.

Will Help Draw

The manufacturer knows that if he, working in harmony with you, can get some of those color cards within the homes of your community, they will have strong drawing power towards your store.

But he doesn't know your community as you do; so he asks you or your clerks to take an hour or so off and furnish him with a list of names. He will do the rest, and foot the bill. He takes the long end of this co-operative method, yet it is amazing how few dealers will take the time and trouble to start this simple operation in co-operation.

It is surprising how many retail paint dealers will, with one accord, make excuses; considering the powerful selling force that such circulars will have in their own interests.

Actual experience in their use has proven one of the

Time to touch up the weather-beaten country home

As the sombre hues of winter disappear and give way to Nature's gorgeous tints of spring-time splendour, man's thoughts naturally turn to ways and means of enhancing the appearance of his dwelling place. The greatest factor in the accomplishment of this result is **Paint.**

Moore's Paint, mixed with a small amount of energy, will transform the most unsightly building into a thing of beauty and a pleasure to behold. That's why the **Hardware Dealer** everywhere is making such a success of his **Moore's Paint agency.**

The certainty of pleasing results so surely productive of customer's satisfaction forms such a characteristic of **Moore's Paints** that it has enabled the dealer to build up a profitable prestige for his store.

The same success is waiting you. Write us for our attractive agency plan.

Benjamin Moore & Co., Limited

West Toronto
Ontario

main factors in building up one of the largest paint manufacturing concerns on the American Continent. This is not hearsay, it is fact.

Considering, from a selling standpoint, what they have done, and what they will do for you; and all at the expense of a little time on your part in preparing a list of names.

Brings the Business

An attractive circular, lithographed or printed in colors, showing colored cuts of homes with color chips of the very lines you carry is delivered right into the home of the customer. The very selling help which is absolutely essential to your paint business over the counter is set to work making suggestions and causing family discussions which very often results in 'phone sales without the customer entering the store.

Time and again the writer has seen little Johnnie sent to the paint dealer with one of these circulars and told to ask for a can of the color marked off by his mother.

Men come into the store and draw a mailing circular from their hip pocket, or women dive into their hand bags for them, and without fuss or parley order the color they have selected at ease in their rocking chairs at home.

I have in mind a farmer's wife who came into a dealer's store with a full selection of paints and varnishes for her home, all pre-arranged from a mailing card that had been sent to her by a manufacturer who had received the co-operation of his agent in compiling a list of names.

Dealers have received letters from rural customers, containing the mailing circular with colors and quantities all worked out in mail-order fashion.

Should Not Grumble

Dealers who do not avail themselves of this ready-made mail-order business provided by the manufacturer free of cost have little or no reason to grumble at the mail-order house which snatches business from him with the catalogue.

For, after all, these mailing circulars are embryo catalogues, which induce mail, telephone, and other forms of long distance ordering.

Our brief for the mailing circular in this article does not seek the elimination of other forms of advertising. Though perhaps some comparisons will show stronger relative selling power and if money is available, back up, and supplement the mailing circular with whatever other means you may have at hand.

Your local newspaper "ad" can do little more than argue in your favor in plain black and white. It cannot catch, arrest or interest the eye with colors as will the mailing circular showing the colors you carry in stock. Colored plates are not possible by such means to draw the attention of the man or woman sitting at their ease in their home. Circulars can and do draw the family into a discussion of their likes and dislikes of color and bring up mental comparisons of what actually exists in the home with what might be done with the colors shown.

It might be said that the paint circular can sow seeds of discontent with actual home conditions and lead to sales of paints and varnishes to overcome and improve the neglect that is brought to mind.

The same comparison might be made with painted signs, bulletins, and a host of other advertising means, all of which have their selling value, but which lack in many respects the power of the circular in the home.

Has Staying Power

Another word as to the staying power of the circular. Not infrequently the attractive paint circular has been known to be stored away with the almanac and family recipe book for further reference. The local newspaper "ad" usually dies on the night of its birthday, unhonored, undiscussed and unreferred to.

The one great essential is for the retailer to supply a list of names for guidance in the distribution of such circulations. When a carefully prepared list of names is furnished to the manufacturer, I know of no nearer approach to exact science in advertising. Circulation is at a maximum. Lost effort and expenditure is at a minimum, and sales returns are not only sure but greater than through any other medium.

To the man who says he hasn't time, I only want to say that whole oodles of money and effort have been expended in other directions, with far less returns than the circular brings. No dealer could himself spend the time or have a clerk spend the time to call on the number of prospective customers that the mailing circular will call on. It is doubtful if either could do so as effectively.

Right to the Home

The very colors that, of necessity, you must show a customer when he drops in your store, are carried right into the home. They save clerk's time in explaining and talking up your line.

To the man who vainly tickles his pride in displaying his name boldly in big letters on the side of a building, let it be said that the quiet working of the mailing circular in the home will cause more coin to jingle in your cash register, and these observations have spoken from experience in watching the results that all forms of paint advertising bring in.

It means an hour or two, or perhaps half a day gathering these names—but it is worth it! I don't know of any other effort that can pack more results-getting returns into the same space of time than compiling a good list of names.

How to Do it

Now, as to getting up a list. Con over your list just as carefully as you would an invitation list to a daughter's wedding or to an annual lodge feast. Don't bundle up a voters' list from the last general election. There will be a lot of good prospects there no doubt, but there will also be a lot of deadwood that will be of no use to you. Nor is the local telephone book much better. It will contain likewise some good material, but there are a whole lot of people who can use paint and don't use a telephone.

Hand pick your prospects. You can do it where the manufacturer cannot. Good advertising is the kind that brings the greatest results, with the smallest expenditure, for remember that your interests are locked with the fellow that pays the bills. It is infinitely better to have a thousand names who are ripe for a good strong diet of paint advertising than ten thousand with 90 per cent. that will be of no use to you.

Quite true, every individual is more or less a prospective paint consumer. And welcome the day when the paint trade wakens up the Canadian people to the use of more paint individually and collectively. In the meantime, good judgment in selecting your list of names will bring better returns than any hit or miss methods of shooting away this form of advertising.

Do it Now

And another thing: Don't put off the preparation of your list till to-morrow. Give the manufacturer who wants to help you a chance. He is asking you and thousands of others to prepare these lists. He is only human, and if everyone comes at him at once, he can only get away with just so much at a time. The dealer who sends his list in at say 11.59 p.m. on the last day of April, can only expect to receive attention in turn.

We have advocated the mailing circular because of its known definite advertising and selling value. The paint manufacturer prepares them because he has definite knowledge of the returns they bring. He wants these returns to come through you. Now, if they benefit him—well, it's a cause of sauce for both the goose and the gander.

Just one last word:—do not let another day go by without making up your list if you have not already done so. Then send it along right away. It means money for you this spring, and there is no cheaper form of advertising investment. And, like the rest of us, you need the money.

Permission has been granted to change the name of Goodwin & Company Limited, Sarnia, Ont., to the Imperial City Heaters, Limited.

BOECKH TRADE MARK ESTBD 1856 TORONTO

A SOUND FOUNDATION

The only way to build a sound foundation for your brush trade is by recommending and selling----*the best*.

Over sixty years of brush-making experience places us in a position to claim this standard of perfection for

BOECKH'S

Steel Grip Rubber Set Brushes

The bristles in all Boeckh Brushes are in to stay; they **"can't come out"**—because they are set in hard rubber and firmly bound with compressed steel ferrules.

Think what this means to you!—satisfied customers—customers who will come back for more, and who will tell others of the merits of Boeckh's.

There is a Canadian-made Boeckh Brush for every purpose for which a brush is used in Canadian industry.

Become a Boeckh representative, and increase your sales and your prestige.

Boeckh Brushes are not only "better" brushes—they are **the best.** Push them.

How to Make An Effective Display of Brushes and Increase Sales

When Planning Window of Paint, Make Brushes Do Double Duty by Arranging Attractive Background—Square and Circular Effects Good—Arrangements Can Be Planned Before Window is Dressed

TO HARDWARE AND METAL a hardware man of many years' standing, who has sold hundreds of brushes and who has himself made much of the display feature in selling campaigns, outlined the following ideas which he has used to stimulate sales:

"I take sheets of beaver board and tint them with a delicate shade of water paint, preferably a cream or buff shade, and fasten a variety of brushes against the beaver board by using small snare wire. By placing the beaver board flat on a table or on the floor it is easy to arrange the brushes in circular form or in a square or oblong shape. By using a small pair of pliers, the wire, inserted through small holes made with a bradawl in the beaver board, may be twisted and drawn taut, so that when I lift the beaver board the brushes hold fast in position. They make an effective addition to a window display.

Placing These Panels

"These beaver board panels, for such they are, may be arranged to fit in at the back of the window so as to just fill up the background. Dividing strips may be placed at the back where the divisions come and there is little then to be done. By making up these units beforehand the window dressing is readily completed.

"I always make brushes an integral part of paint window displays. They are effective for this and do not in any sense detract from the impression which it is desired to make regarding the paint itself. As a matter of fact they improve, in my opinion, every showing of paints and painting materials which is made.

Important Points These

"It is important that brushes be placed in the windows and on the panels with care. This is something that one should not overlook. For instance, the bristles ought to be placed so that they will hold a natural position. Keep them from being pressed against the glass of the window, for if care is not taken the bristles will get out of shape and the chances are that the customer may demand a discount on brushes that appear imperfect in any way. To take full profits on brush sales one must keep stock in the best of condition always.

"Sometimes it may be necessary to drive small nails through the handles of brushes where they are being displayed against a board wall or backing. This I never objected to. But care must be taken to use a small brad. If a heavy nail of standard gauge be employed it will either split the handle of brushes or disfigure them so as to draw the customer's attention and perhaps make him ask for a special price on a given brush.

"In employing brushes in the forward part of the display these may be tastefully arranged near the glass. Sometimes it is well to use a plate glass shelf on a small pedestal for small lettering and camel hair brushes. Clever and neat designs may be worked out at will. In all cases I have found that the power of suggestion is very effective in stimulating sales in the brush department. The goods must be shown to best advantage always."

METAL AND PAINT MEN HONORED

There was keen competition this year for the office of councillors for the Montreal Board of Trade. Three successful candidates, representative of the metal and paint trades, were honored. Walter B. Ramsay, of A. Ramsay and Son Co., Ltd., manufacturers of paints and varnishes, being chosen by popular ballot by his many friends; also W. S. Leslie, president of A. C. Leslie and Co., wholesale metal merchants and importers, while Graham Drinkwater, of the Canadian-Fairbanks Morse Co., Ltd., was also elected. Competition this year is said to have been greater than during any year since the beginning of the war.

National Lead Company President Discusses Decline in Lead Prices

E. J. Cornish, president of the National Lead Co., speaking before the Master Painters' Association of the State of Pennsylvania, at Philadelphia, said that he was unable to forecast the probable consumption of paint and white lead during the spring months. Sales of dry white lead in oil for the first 17 days of January are 40% behind last year, when they were the lowest in the history of the white lead industry. No conclusion can be drawn from these facts, he pointed out. Owing to the decline in price of pig lead, there was a general expectancy of lower prices for white lead and paint dealers very properly delayed placing their orders.

Left on Their Hands

The unexpected stopping of the war left large quantities of pig lead in the hands of manufacturers having contracts with the Government. This surplus spot lead was a bear influence upon the market. The war demand for metallic lead had increased the United States production of pig lead, so that mines were producing about 130,000 tons annually in excess of the consumption of lead in the United States prior to the war. The result has been a very rapid decline in the price of pig lead.

For Spring Painting

Dutch process corroders carry in stock and process of manufacture about one-half of their annual consumption of pig lead. The cheap pig lead would not begin to come out of the plants in manufactured form for four months or about the time of spring painting. Therefore, National Lead Co. found itself in the dilemma that if it did not reduce prices, there would be no sales until the spring demand forced dealers to purchase, with the ever present danger that competitors would anticipate losses and demoralize business conditions.

Company's Dilemma

On the other hand, if it reduced the price of white lead to conform to the reduced price of pig lead, the company would have to stand an immediate loss of approximately $3,500,000. This loss, much as it would be to the company, was small compared to what would be suffered by the industry as a whole.

It is the custom of most dealers to inventory their goods at cost. Every customer of the National Lead Co. who expressed himself, without exception requested that there be no reduction in price, but these requests were not accompanied by an offer to purchase. National Lead Co. decreased its price for all lead products one cent a pound, announcing its intention to maintain that price until July 1, thereby attempting to equalize its losses, keep consumers from delaying their work until the spring period was passed in hope of lower prices, and prevent serious financial losses to its customers.

Varnish Buying

Even the occasional user has learned that quality and adaptability must be carefully considered when buying varnish, since it is an easy matter to ruin the appearance of a fine interior by using poor or inappropriate finishing materials.

When the dealer is consulted on such matters he can do his customers no better service than by suggesting or endorsing Berry Brothers' varnishes and paint specialties. They have a record of sixty-one years for complete efficiency for all finishing purposes.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 30.—Declining exactly another seven cents, linseed oil furnishes the feature of the week in paint markets, and thus making a reduction of fourteen cents within two weeks. There is nothing to indicate which way the trend will be in the days immediately ahead, but if weakness continues in the grain markets, flax seed will go the way of other grains, which has been the case the past while. Turpentine is steady here, but somewhat easier in the south under a quieter market condition. Putty, white lead in oil, mixed paints and varnish are all steady, and for the most part, firm.

Linseed Oil At One Thirty-eight

Montreal.

LINSEED OIL.—Against the expectations of the paint trade, linseed oil has recorded a further decline and a price of one dollar and thirty-eight cents is being quoted on raw oil for one to four barrels. This further revision of price has resulted from declining seed prices, which, within the past week, have shown a weakening to the extent of ten cents per bushel. The easier tendencies in the Argentine market have been a big factor also. Export business is developing, although there is not much local selling.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 38	$1 45
5 to 9 bbls.	1 37	1 45
10 to 25 bbls.	1 36	1 45
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 40½	1 48
5 to 9 bbls.	1 39½	1 48
10 to 25 bbls.	1 38½	1 48

Rosin Easier; Turpentine Held

Montreal.

TURPENTINE—The local situation is without change of consequence and the basis is held steady at $1.10 per gallon. Due to a reduced enquiry and dearth of business, prices in the south have ruled somewhat easier, but there has been no reflection here. Rosins have declined about 25c per barrel at primary points, and if these factors are maintained, there ought to be an easier position in this market very soon. Supplies are fair, but not large.

Turpentine—	Per Imp. Gal.	
1 to 4 barrels	$1 10	$....
Small lots	1 12	1 20

(Packages extra)

High Materials Hold Putty Steady

Montreal.

PUTTY.—The effect of lower-priced linseed oil has not reflected as yet in the putty market. The makers claim that materials, other than linseed oil, are so scarce and the prices thereof so high, that no recession of price can be looked for yet. If oil continues to recede, there may be a readjustment of prices. Sales are naturally light and the market is steady.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Steadier Basis For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The basis as arranged last week is steadily held and orders have been received in seasonable, though small numbers. Five ton lots are quoted at $15.50 per 100 pounds; ton lots at $16, and smaller quantities at $16.35.

Varnishes Firm; Paints to Move

Montreal.

PAINTS AND VARNISHES. — The basis for mixed paints is steady and without change. There is a good deal of business accumulating from week to week and the outlook continues to be encouraging.

The varnish market is steady and is expected to hold firmly. The various materials being used in the manufacture of this line have continued to be scarce and high in price. They may be more readily procured in the coming months, but for the present, prices are likely to hold.

TORONTO

TORONTO, January 30.—Lower prices on linseed oil feature the paint markets this week but with a firmer tone noticed in flax seed, it may be that the bottom has been reached. There is little business doing just at the present and the same thing is true in turpentine, though prices hold on this commodity. White lead in oil has settled down to lower price basis and unchanged conditions are noted in putty, mixed paint and window glass.

Linseed Oil Goes Still Lower

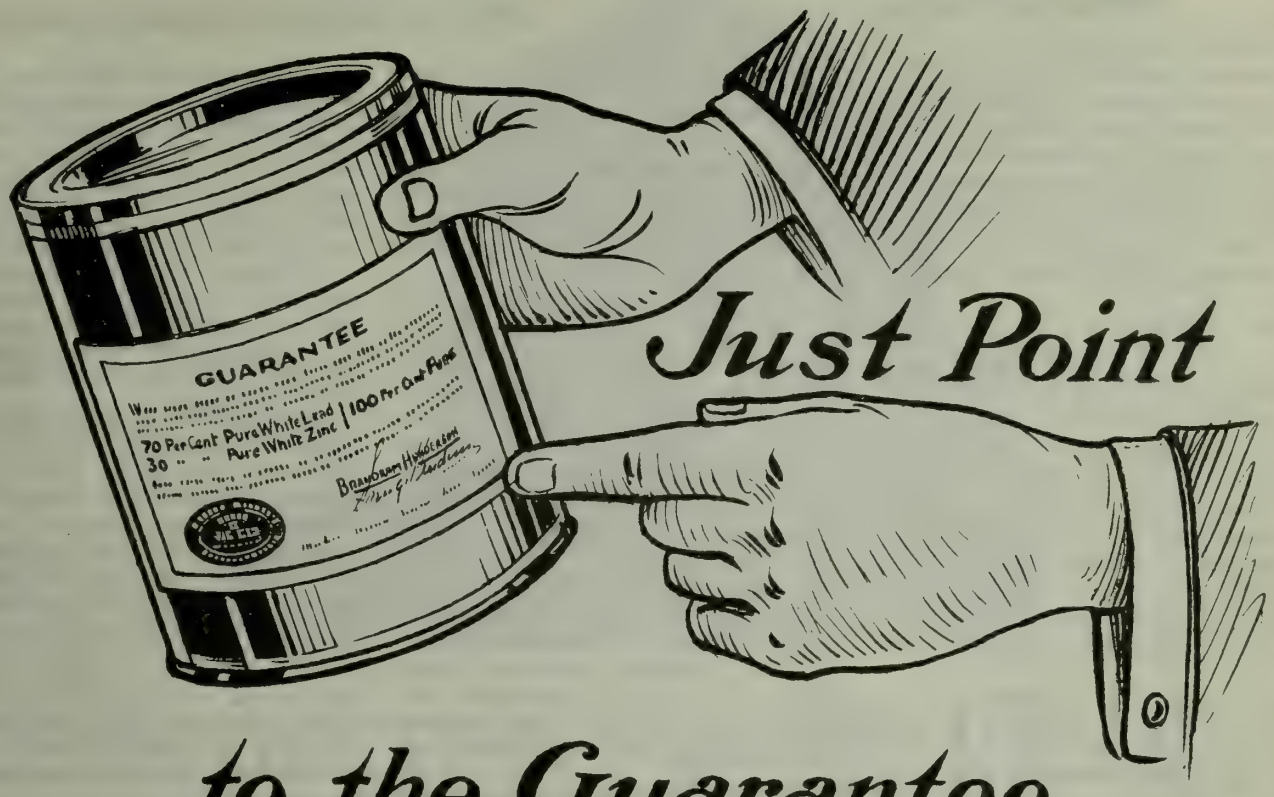
Toronto.

LINSEED OIL.—Prices on linseed oil have come in for still further revision this week and the declines range from 3c to 7c below last week's figures. Lower flax seed is again responsible along with lack of much business. The seed market seems to have strengthened again the last day or two, but whether this will continue is a little uncertain just at the present. The movement of seed has been very good and crushers are feeling better as regards the outlook for oil stocks when heavy movement starts in the spring. Quotations to-day are:

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1 41	$1 52
3 to 5 barrels, gal.	1 40	1 51
10 bbls. and over	1 38	1 49
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1 43½	$1 55
3 to 5 barrels, gal.	1 42½	1 54
10 barrels and over	1 40½	1 52

Turpentine Holds Without Change

Toronto.



TURPENTINE.—Prices locally hold without change although southern points show a slight revision downward. Business locally is within a narrow compass at the present time and there is not much moving out from southern points either. Rosin is being allotted export space and the movement overseas is a steadying factor in the question of prices. Supplies are ample and the outlook considered very good. Turpentine prices follow:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 10-$1 12
2 to 4 barrels (barrels included)	1 09- 1 11
5 gallon lots	1 20- 1 22

Mixed Paints Show No Revision

Toronto.

MIXED PAINTS.—Business coming to hand though not heavy is very fair. Dealers are buying carefully and the sorting orders this year are looked forward to as the big factor in the volume of business to be handled. Indications seem to point to real good conditions to come and a big paint business is expected.

Just Point to the Guarantee

WHEN you are selling B-H English Paint, you are saved the trouble of arguing about its quality. Conspicuously pasted on every can is the Guarantee Label, signed by the president of Brandram-Henderson, Limited, which places beyond question the goodness of

B-H "English" Paint

70% Pure White Lead
30% Pure White Zinc
100% Pure Paint

Just point to the guarantee. Better still, mention some customer who has used B-H "English" Paint on his house. He's sure to be a booster, like every other B-H user.

In spite of its superior quality, you can sell B-H "English" Paint at as low a price as any other standard line, and make as much profit. Considering its advantages in quality and its equality in price, B-H "English" Paint seems like the logical line for you to handle. And, when you add the outstanding publicity done for B-H "English" Paint, the reasons become overwhelming.

If there is no B-H Agent in your town, here's your opportunity. Do not let it escape you! Write at once to our nearest Branch, and let us lay our attractive proposition before you.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

White Lead in Oil Holds at Decline

Toronto.

WHITE LEAD IN OIL.—The market has settled down to the new basis of prices and is pursuing its natural course at the present time. Business is quiet but prospects are considered very bright. Prices ruling to the trade on pure white lead in oil are $16.30 per 100 pounds in ton lots, and $16.65 per 100 pounds in less than ton lots. The various brands are shown in current market quotations.

Glass Holds; Putty Quiet

Toronto.

GLASS, PUTTY.—No revision in prices on window glass have been made and the market seems quite steady. The outlook on plate glass seems to be tending downward, it being felt present level of prices is too high to lend proper encouragement to building operations from this field. A revision to lower levels seems to be on the way. Putty is quiet with no quotable change reported. The range of prices still in effect are:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

LOWER PRICES ON BOILERS AND RADIATORS MAY COME

Continued from page 58

mean that prices will be guaranteed against decline.

A sweeping reduction of 25 per cent. in Canadian prices cannot be made and is not necessary to conform to American quotations. There are some lines which undoubtedly will come down, whereas others again may be expected to maintain their present levels. Canadian prices prior to the recent drop in the United States were well below the American figures and may be expected to be adjusted to necessary lower levels now.

At the present time the tariff issue is a live one and should the tariff be altered it may mean some further readjustments. However, it is thought that in the meantime manufacturers will work along present basis and meet new conditions which may arise, as they develop.

COPPER EXPORT ASSOCIATION

The new Copper Export Association of New York has filed its articles of incorporation with the Federal Trade Commission in Washington and obtained permission to enter export trade as a unit under the Webb law. The incorporators are the American Smelting and Refining Company, the United Metals Selling Company, the Phelps Dodge Corporation and the Calumet and Hecla Mining Company.

Many Hardware Lines Are Put On Free List by British Government

THE British Trade Commissioners in Canada (G. T. Milne at Montreal and F. W. Field at Toronto) have received cable advices from the Department of Overseas Trade (Development and Intelligence), that the following wide range of British manufacturers have been placed on the free list, and now require no export license:

Artists' materials, athletic goods, bicycles but not tires, bicycle accessories (various), buttons (except military), horn and vegetable ivory, cigar and cigarette holders, china and earthenware, china clay, clocks, cutlery, drugs (various), fancy goods of paper, ivory, leather, etc; films subject to censorship, flower seeds, fountain pens, furs (dress, dyed or manufactured); glassware, hardware (iron and steel builders); hats, household effects of wood, iron or steel, ink, jewellery (imitation or pearl), laces, laundry machinery, ledgers, marble, mineral waters (unsweetened), musical instruments, office furniture, pictures, paintings, phonographs, photographic materials (not chemical), razors (safety and blades), ribbons (silk), spectacles, sewing machines, wallpaper.

List of goods for which expert licenses are still required for shipment from the United Kingdom will shortly be in the hands of the British Trade Commissioners noted above. They will also be advised weekly, by cable, by their department in London of the goods removed from such list and any alterations thereto.

The British Trade Commissioners will be glad to take up these matters with local importers and others interested.

The following are some of the principal commodities for which licenses are still required:

Abrasives, agricultural machinery, cement, chemicals (various), coal and coke, oils, pipes (cast iron), packing cases, railway material, resins, coal tar products, copper (wrought and unwrought, including wire); alloys, dyes, foodstuffs, food for livestock, glue, iron angles, bars, billets and constructional material, steel angles, ingot plates and similar raw materials, textile machinery, textile yarns, fibres and waste; tin plates, war material, wire rope, wood and timber.

The prohibition of the exportation of raw materials does not extend to goods manufactured from such materials.

BRANDRAM-HENDERSON, LIMITED, SENDING CHARLES H. GRATTON OVERSEAS

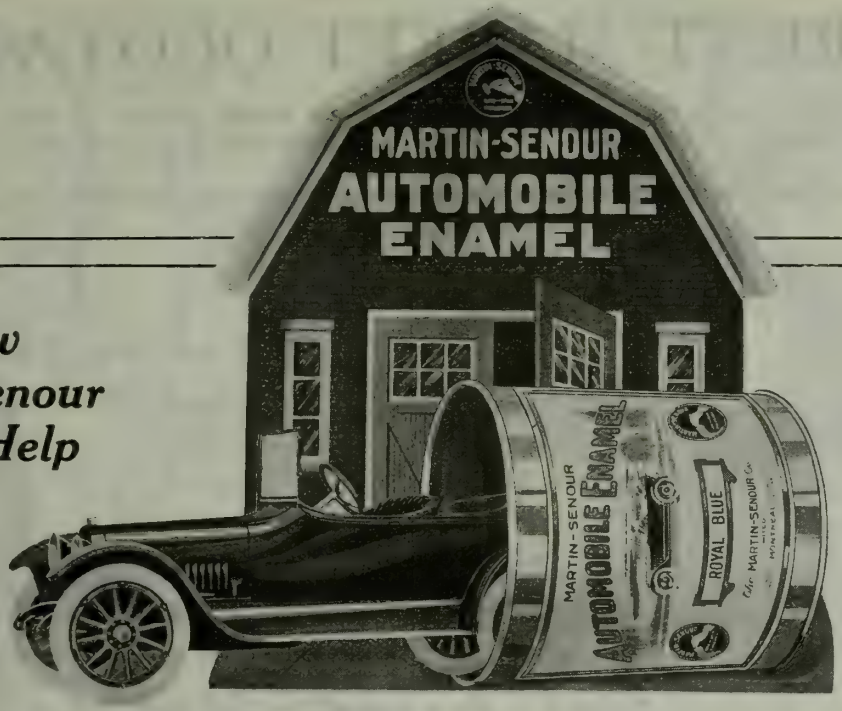
The firm of Brandram-Henderson, Ltd., has arranged representation overseas at the Lyons fair through their Eastern Townships representative, Charles H. Gratton. Mr. Gratton speaks French fluently and will be in charge of the special exhibit, which his firm is making at Lyons. This has been specially selected to meet the expected requirements of the big International Exposition at Lyons, and after this event is over, Mr. Gratton will proceed to Milan, Italy.

W. S. McLennan, sales manager for the company, stated to HARDWARE AND METAL that the firm has been developing overseas trade considerably, and particularly during the past few years, having direct connection with South America, Asia, New Zealand, Australia, South Africa, West Indies, etc.

NOVA SCOTIA STEEL COMPANY TO MAKE EXTENSIONS

Following telegraphic advices from New Glasgow, Nova Scotia, to the effect that the Nova Scotia Steel & Coal Co. had temporarily closed its steel plant and ceased coal mining operations at North Sydney, President D. H. McDougall issued this statement at New Glasgow:

"As to the truth of the rumors that the Scotia Co. contemplated the closing down of its steel-making department at Sydney Mines, and the curtailment of its operations at New Glasgow, it is well known that the several plants of the company have, during the past four years, been operated at high pressure. The present moment, when the cancellation of munitions contracts has left the tonnage of the company's order books at a lower point than at any time during the past four years, is considered an excellent opportunity for carrying out necessary repairs and renewals which could not be done during the strenuous years when all efforts were bent on increased production without consideration of cost.



"New business is offered to a very limited extent and at prices which are not at present attractive to the Scotia Co.; consequently, now is the time to make the necessary preparations for the future. With this in view, certain extensions of plant which have been contemplated for some time will also be planned and undertaken where possible during the shut-down."

KEEPING THE STOCK TURNING OVER

Right on the heels of its recent special sale of galvanized ware, the Fraser Hardware Co. of Galt has come back with a special graniteware sale, which started Thursday and continued until last Saturday. In spite of the fact that there was a series of sales in Galt, there being no less than nine in various lines, this hardware firm reports business good. The firm by its special sales is gradually reducing its large stock and turning the goods into ready money.

The Chartered Trust and Executor Co. is now in charge of the hardware business of E. E. Berry, Toronto.

A New Martin-Senour Selling Help

Tasty and Effective

DISTINCTIVE SELLING HELPS

That describes the Martin-Senour kind. You will always find Martin-Senour selling helps just a little different—a little better than the average. The one reproduced above shows our new display feature for Automobile Enamel. It is made from heavy cardboard, with easel back, and is lithographed in very attractive colorings. Can be used either as a window trim or counter display.

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA---SOLD ON MERIT

Are the easiest and most profitable to sell. Because, aside from the fact that our Dealer-Agents are rendered every possible assistance in the way of selling helps, mailing campaigns, newspaper and magazine advertising, etc., the goods themselves are of the very Highest Qualilty—100% Pure. Sold under a guarantee that protects both the Dealer-Agent and his customer.

CROWBARS, $10.50 per 100 lbs.

It's Music to their Ears!

THE "Song of the Sale" bursts forth early and often from the P&L dealer's cash register, because his store is identified with that 24 carat, quick-sale line — "61" Floor Varnish in Colors!

It's music to the ears of the dealer because it means a quick turnover! It's music to the ears of the customer because he knows he is getting one hundred cents worth of durable, satisfaction-giving varnish for every dollar he invests.

"61" in Colors is the same reliable "61" Floor Varnish that has made good with P&L dealers and consumers for 30 years. It is backed up with a nation-wide advertising campaign to increase its already far-reaching popularity.

Let this advertising boost your store and link it up with that 70-year-old P&L reputation for quality varnishes. Write today for full particulars of Introductory Assortment.

Lowe Brothers Paints

Paint is Made to be Seen—A good paint is its own best Advertisement

NO man can paint the outside of his house without his neighbors being aware of the fact.

He cannot decorate the interior without his friends seeing it.

If he uses Lowe Brothers Paints—if the work is carefully done—if the color combinations are artistic and correct—people are sure to ask the name of the paint used, and of the dealer who sold the paint and recommended the colors.

The fineness of texture of Lowe Brothers Paints, their depth of tone, their brilliancy and permanence of color always attract attention and provoke enquiries.

When you sell a can of Lowe Brothers Paint over your counter you put out a strong advertisement for your store—you send out a silent salesman that will bring you in repeat orders and new business.

We have an interesting proposition for the live dealer who wants to increase the profits of his paint department this coming season.

Drop us a card for full particulars

What Varnish Do You Sell?

There is just as big a difference in varnishes as in paints. Cheap varnishes will not stand the test and cause dissatisfaction and disappointment to the user.

Dougall Varnish

is the line of entire satisfaction. Every user is a pleased customer. There is a Dougall Varnish for every purpose and our reputation and guarantee stand behind every gallon sold.

Our Proposition to the dealer is a good one. Write for it.

Be Ready for the Spring Rush

Stock Up Now

¶ The coming season promises to surpass any that has yet gone by in the Paint Trade. Don't be caught unprepared!

¶ There will be an unprecedented demand for Sherwin-Williams products. You know what satisfaction they give. Don't be without a full and ample line. There's sure to be a great call for S-W Paints; Flat-tone (for interior wall and ceiling work); for S-W Varnishes, Varnish Stains, etc., and for "Commonwealth" Barn Red.

¶ This Victory year will find most people brightening up their dwellings, barns, etc., so don't disappoint your customers when they ask for S-W Paints and Varnishes.

¶ Order to-day. Remember, transportation difficulties may cause some delay in delivery. And that's another reason for giving an ample order.

All Patriotic HARDWARE DEALERS Should Sell THRIFT Stamps

SELL Thrift Stamps, not because there is any immediate profit for you in such sales, but because the Dominion of Canada needs your patriotic co-operation in its plans to ensure Prosperity.

If the smaller savings of the people can be made available to finance Government expenditure, then the larger public investments will be free for industrial securities, thus promoting general Prosperity, in which every storekeeper is vitally interested.

Get your customers to take a Thrift Stamp in place of 25c change whenever you possibly can. Display your sign. Explain that Thrift Stamps are a means to acquire War-Savings Stamps, and people should strive to fill their Thrift Cards as quickly as possible.

"Wanted—A National Plan"

An article of unusual importance, by Sir George Bury, formerly vice-president of the C.P.R., appears in the February issue of MACLEAN'S. He points out that Canada must more definitely shape her destiny if that destiny is to be as glorious as all Canadians hope. It is a stirring demand for Canadians to get together in the formation of a national plan, accompanied by many practical suggestions from his experience in transcontinental railroad building. An article of national importance.

"Germany From Within To-day"

The funniest thing that he has perhaps written appears in February MACLEAN'S from the pen of Canada's great humorist, Stephen Leacock—an imaginary visit to Berlin under the Bolsheviks. He finds Von Tirpitz planning a new navy, an *inland fleet;* Frau Krupp, an apple woman; Von Bethmann-Hollweg, a cab driver; Bernstorff, a Bolshevik and president of the Scavengers Union. He finds a *Get From Under* committee planning a trade war on the world and half the population of Berlin in English clothing or Scotch kilts. He finds—

But read the article. There's a long laugh in every line. It is farce, however, built up on pretty shrewd truths.

You will find this a remarkably interesting number. The bold, fighting face of Admiral Beatty is on the cover and inside are the following big features:

The Campaign Against Britain, by Agnes C. Laut.
The Farmer in Politics, by J. K. Munro.
The Strange Adventure of the Thumb Tap Clue, by Arthur Stringer.
Old Times in Canada, by Walt Mason.
Lend Me Your Title, by Onoto Watanna.
The Three Sapphires, by W. A. Fraser.
Wild Miners I Have Met, by E. Ward Smith.
The Anglicization of Katrina, by Mary Josephine Benson.
Saturday's Child, by Mary E. Lowrey.
The Minx Goes to the Front, by C. N. and A. M. Williamson.
The Veins of the War God, by Corporal Herbert Forder.

Stephens'
REGISTERED TRADE MARK

The Paint That Stands Up In All Kinds Of Weather

is the kind of paint users of paint in these Northern Climates require—and buy.

A close study of the effect of the extremely variable climate on painted surfaces has enabled us to evolve a paint that shows exceptional wearing qualities.

Wherever Stephens' Paint has been used in Canada it has made instant and permanent friends. It goes on so smoothly, is so true to shade, and wears so wonderfully.

Give your trade the paint best suited to their needs—that's Stephens'.

If there is no one selling Stephens' Paints in your locality, lose no time in applying for the agency. It will help your whole business.

It is Cheaper to Prevent Trouble than to Cure it

The BOYCE MOTOMETER installed on a car insures safety in operation. No driver, not even an expert, can absolutely guess at motor temperatures. And a Boyce Motometer installed on a car absolutely demonstrates this fact the first day it is installed.

It immediately detects motor troubles, such as overheated engines, lack of oil, radiator leaks, any defects in the circulating systems, improper carburetor adjustment, and like troubles, and gives warning in ample time to avoid serious injury, with its consequent expensive repairs.

WHEN THERE IS TROUBLE THE MOTOMETER SAYS—STOP!

Send for descriptive booklet, "What Every Car Owner Should Know," and complete information.

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Obtain The Good Will Of Your Customers By Recommending PENBERTHY COMPODISK BRASS VALVES

No Hardware Dealer or Plumber should overlook the good qualities possessed by this valve. Valve users are quick to recognize its merits. The **External Thread Construction** common to all **Penberthy Valves** meets with their enthusiastic approval.

PENBERTHY

COMPODISK

Compodisk Valves
Magnifying the **"big idea"**
"Outside Threads"

PENBERTHY

"Something Better In Valves"

Penberthy Compodisk Valves have a record of long and efficient service, taking second place to none. Sell the **Penberthy All Quality Line** of Brass Valves. Made by a concern with a reputation for **the best** in valves.

Dealers are making splendid profits and increased sales with them. If your jobber hasn't them, write us direct.

Loss—Danger—Inconvenience Without the BOWSER.

Profit—Safety—Convenience With the BOWSER.

No question about which is preferable

The two illustrations above are from actual photographs and vividly picture the advantages of a Bowser equipped oil room.

You can install this modern equipment and handle your paint oils with profit—safety—and convenience, and know that in the Bowser you get the best that money, expert workmanship and the experience of 32 years can produce.

Interesting literature will be sent on request. No obligation.

WINTER BUSINESS—Cold Weather Made Profitable

Presto
All-Weather Protector

For Ford cars. In insulates the floor and protects the driver from cold draughts entering the car through the pedal slots. Prevents colds and sickness. Keeps the lever slots closed and does not interfere with the action of the levers in any way. Easy to install. No mechanic necessary. Anyone can attach the Presto All-Weather Protector in twenty minutes.

Dealers everywhere find Presto Products the foremost and fastest selling line of accessories manufactured.

Write immediately for complete catalog of Presto Heaters and over 100 real, live automobile accessories.

SIMMS
SET IN RUBBER

BRUSHES

GUARANTEED
FOR USE IN ANYTHING

Soaked in paint remover or boiled in water, the setting composition in these brushes remains as solid as concrete.

Try this test on some of the OTHER kinds.

Why sell your customer CEMENT-SET brushes or those set in some imaginary SECRET COMPOSITION that won't stand use in alcohol, spirit varnishes, lacquers, paraffine, crude oil, grease, paint removers and a dozen other things, or

A GLUE-SET brush that cannot be used in water, kalsomine, paste, glue sizing, etc., and dries out if carried on the shelves over the season?

Why not sell him a

SIMMS
SET IN RUBBER

Brush and tell him to use it in any old thing? He can drive nails with it if he wants to; he can't harm the setting.

Samples and Prices through our jobbers on request.

JOSEPH DIXON CRUCIBLE CO.—Crucibles, Graphite-Paint and Plumbago, Etc.
ASBESTOS PROTECTED METAL CO.—Corrugated Siding and Roofing.

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Watches and Clocks

We have built up a large trade in this line owing to the fact that in these particular goods the merchant appreciates service. The popular priced watch that sells for $1.75 carries the following guarantee. They are guaranteed to be running right and keeping good time when you sell them to the customer. If they cannot be adjusted or fail to give satisfaction, in say, one week's time, the customer can return the watch and have it replaced, and we in return replace it free of charge to the dealer. But the customer cannot use his watch until it is worn shabby and then have it replaced. We will have it repaired for him if he wishes at a slight charge. On clocks the guarantee is two years, and if they do not keep good time for that period we will have them repaired free of charge provided they are not abused.

MERCHANTS HARDWARE SPECIALTIES, LIMITED
CALGARY

Indurated Ware

Far superior to metal and will last many times as long. Will not split, warp, crack or come apart. Eddy's washtubs, washboards, household pails, milk pails, butter tubs, cuspidors, etc., are made from this granite-like substance and will last indefinitely. Eddy's washtubs and pails will never show a leak—Eddy's butter tubs will never taint the product as wood is apt to do.

These goods being light, economical and practically unbreakable, are favorites in every home. Therefore, it will pay you to display them prominently in your store.

The Greatest Hour of the Dairy Farmer

"There are no substitutes for dairy foods"

Now that the war is over, the farmer's responsibility and opportunity are greater than ever—for the American farmer and dairyman must literally feed the world. It means greater production and getting the *most* out of that production. Waste is as unpatriotic now as it was during the war.

But there is many a farmer who would not think of planting a hundred rows of corn and only harvesting 95 rows, who is now using a fixed feed separator and wasting a good part of his butterfat through turning under speed. Even though the proper separating speed is marked on the handle, tests show that 95 per cent. of *all* separators are turned below speed. But when a Sharples Suction-Feed Separator is turned below speed, it skims clean just the same—due to the patented suction feed. No other separator has this principle.

Sharples is the pioneer American Separator—invented, perfected and preferred in America. It is the product of the greatest factory of its kind in the United States — and all American owned.

Above is part of a **full page** Sharples advertisement appearing in national dairy papers. It points the way to the Greatest Year for the Sharples Dealer—and a great opportunity for any dealer. Write for details on the Sharples contract—the fairest, squarest, liveliest proposition for dealers. Address nearest office.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

The Peterboro Lock Mfg. Company, Limited

Peterboro, Canada

Established 1885

MANUFACTURERS OF

BUILDERS' HARDWARE

Ship Hardware, Saddlery Hardware, Padlocks, Door Checks, Brass and Iron Castings, Stampings and other Hardware Specialties.

CANADIAN ROLLING MILLS CO., LIMITED

WORKS: LACHINE CANAL, MONTREAL

MANUFACTURERS OF

BAR IRON and STEEL: Rounds, Squares and Flats.

ALSO

Twisted Steel Bars for Reinforcing

SELLING AGENTS:

CANADIAN TUBE & IRON COMPANY, Limited, MONTREAL

Hardware and Metal Subscribers

Buy for business as well as for private consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL reach only the cream of the trade—the best and biggest buyers in Canada.

The Financial Post
THIS WEEK

ON BANK MERGERS

"IN conclusion, let us repeat that THE FINANCIAL POST stands against bank mergers or other business or industrial combinations which will permit of restriction of public service or the exaction of undue profits, but favors such consolidations as tend to reduce costs of production or service rendered, which is in the last analysis in the interests of the whole people."

ON THE TARIFF PROBLEM

"THE FINANCIAL POST does not now and never has defended a 42½ per cent. tariff; it does not stand for any specific tariff, but it does stand for the intelligent and adequate protection of national industries so that Canada may secure the full benefits of the developments of all her natural resources. That this may be accomplished and that at the same time the necessities of a tariff for revenue may be carefully considered, we have time and again advocated the appointment of a tariff commission to treat scientifically with the whole situation and to provide a meeting ground for the divergent opinions of labor, industry and agriculture."

ON THE PORK SITUATION

"The newspaper contention that Mr. Hoover is getting the British business for American firms, and that the British Government is discriminating against the Canadian product, is hardly a correct or a fair one. The embargo is absolute, against both Canadian and American pork products."

Besides the important articles from which the above quotations are made, THE POST this week deals with the following, amongst other

Let Canadian Firms Fill Your Orders

"Made in Canada" Goods Are Giving Greatest Satisfaction All Over the World—Canadian Manufacturers in Splendid Shape to Supply High Quality Products Promptly—Export Trade Expanding Steadily

NO country in the world to-day is so well equipped to supply the immediate demands of those whose stocks are low, as Canada. The manufacturers of the Dominion have again proven their capacity for adaptibility. They have made the change from a war basis to a peace footing quickly and thoroughly. Less than three months ago the majority of firms in the Dominion were working night and day to furnish munitions or war supplies of one kind or another for the Allies, who were driving the Hun before them in all directions. Then came the signing of the armistice much sooner that was expected. Canadian firms set about equipping their factories for supplying the peace time needs, not only at home but in all parts of the world. They have accomplished this feat so quickly that in spite of the magnitude of their war efforts and the problems of reconstruction, they are now filling orders from all parts of the globe and looking after the large home needs as well. Firms which three months ago were turning out huge shells in thousands are now turning out farm implements, hardware goods, automobile parts, tractor equipment, and dozens of other lines which will build up rather than destroy.

Made Great Record

In four years of bitter war and urgent need for production for the Allies, Canada found herself. The Dominion rose to the occasion and factories were speeded up and outputs increased to such an extent that all Canadian records were shattered. Not only this but the world was surprised to find that Canadian plants could produce as they were producing. It was not alone the quantity but the quality of the goods that attracted attention everywhere. Canadian goods won a place for themselves wherever they were shown and manufacturers found inquiries coming to them from quarters where they had never secured business before. All through the years of war these inquiries came and with the cessation of hostilities still more came. The Canadian firms have been in the happy position of being able to take care of all this business and they are in a better position now than ever before because the war needs are all supplied and their factories are at the highest point of efficiency they have ever been.

Do It Now

Buyers in all parts of the world will find that it will pay them well to get in touch with Canadian firms. The whole vast resources of the Dominion, mineral, lumber, unlimited water powers, and so on are at the command of Canadian manufacturers. No country in the world has such supplies of materials to work with to-day and nowhere are the factories better equipped to deliver high quality goods in a short time.

Just how Canadian trade has been expanding may be gathered from the fact that the exports for the past year totalled $1,229,708,244. Of this amount Canadian goods valued at $594,250,690 went to British ports. The rest went to all parts of the world.

The Great Factors

The two great factors that made this enormous export business possible were that Canada had the raw materials to work with and by sheer hard work speeded up her industries as they were never speeded up before. Factories were enlarged, the latest machinery and equipment installed and every effort made

One of the huge grain elevators on the G reat Lakes. Millions of bushels of wheat were sent from these big storehouses to f eed the soldiers and the Allies.

to respond to the urgent calls for more and yet more production for the Allies. Now that the war is won the rest of the world will benefit from the efficiency which Canadian industry developed. Raw materials were a vital issue in winning the war. In spite of all that Canada supplied her rich resources are comparatively untouched. This is especially true as far as metals go. The enormous development that has been made in producing metal goods of all kinds has merely served to show what can be done and has stimulated mining and manufacturing. Everywhere in Canada now there is the greatest activity in these lines. Factories are making new lines as well as all the old ones. They are extending their plants and adding the latest machinery. Always the aim is to produce high quality goods and to produce them at a cost which will enable Canadian firms to meet competition anywhere. In order to supply the raw materials needed for this steadily growing business as well as to look after the needs of others, the general development has kept pace with industrial progress.

Big Development

The largest nickel refining plant in the world is now located at Port Colborne, Ontario. The great steel plants have added and added to their capacity and still further additions are planned. In the north country copper production is being greatly increased and at the same time gold, silver and nickel production. In Western Canada, especially in the rich ore deposits of British Columbia, millions of dollars are being spent in developing new properties and in increasing the facilities of those already producing.

It should not be thought that production is all in one direction or that Canada is only developing industrially. With all the steps that are being taken to maintain and increase the Dominion's industrial progress agricultural pursuits are in no way diminished. Canada will do her full share this year, and next year, and as long as it is required of her to send foods overseas to the stricken people of France, Belgium, Serbia and other countries. The Dominion is in no way slackening its railway construction program or its shipbuilding activities or its progress along other lines.

Great Activity

In both shipbuilding and railway construction there is great activity. At many points along the eastern and western coasts and also on the Great Lakes ships are being turned out as fast as possible. These are to be used not only in looking after Canada's increased export trade, and in supplying the quickest possible service to buyers in distant parts of the world, but also in developing business between Canadian ports and Europe. To provide the shipping facilities and not to provide railway equipment, terminals, etc., to move the goods would be foolish and this is in no way being neglected. Large orders for rolling stock have been placed and new railways and improvements are projected and the call is for still more.

Look After Credits

In building up a steadily expanding export trade not only Canadian manufacturers, but the bankers and the Government have given the question of arranging all necessary credits the most careful consideration. In the work of reconstruction in the devastated sections of France and Belgium and other parts of Europe, the granting of credit is an essential in order that the people who have lost everything may be enabled to help themselves. All details for helping these war sufferers have been arranged and Canadians have gone even further. They have appointed a special Canadian Trade Commission, representatives of which are now in Europe, to arrange for supplying the needs of the countries which were hit hardest. It is reported that the largest order ever received in Canada for lumber has been placed and that it will take a billion feet of material, valued at $40,000,000.

Manufacturing Groups

Canadian firms after going thoroughly into the question of supplying Europe's needs decided that groups of manufacturers working with the Trade Commission could secure the best results. With the object of helping in every way to supply as quickly as possible various lines of goods they are selecting representatives who will go to Europe and look after business. The Canadian stove manufacturers are one of the first organizations to select a representative. They are taking up with the Government the question of securing the necessary cargo space, the lowest possible freight rates between

	1916	1917	1918
Mineral Products	$ 81,281,244	$ 77,389,963	$ 75,708,425
Fisheries	24,349,835	28,323,877	33,577,772
Forest Products	55,224,919	52,280,875	65,436,204
Animal Produce	117,909,753	170,561,884	176,407,332
Agricultural Products	364,605,703	531,300,259	320,524,859
Manufactures	440,477,143	682,431,692	552,683,692
Miscellaneous	7,857,806	5,052,305	5,369,960
Total Exports	$1,091,706,403	$1,547,340,855	$1,229,708,244

Shipbuilding has made tremendous strides in Canada since the activity of the submarines. The illustration shows a shipyard on the Pacific Coast. Similar plants are to be found on the Atlantic Coast and at many points on the Lakes.

Canadian and European ports and other matters of importance in building up trade of this kind.

Looking After All

While taking care of all business that will offer from Europe, the Canadian firms will not in any way neglect other parts of the world. With their ample facilities for production and rich stores of raw materials to draw from, they are prepared to take care of all trade inquiries. Firms abroad who have not yet got into communication with Canadian business houses, or obtained their prices, are losing an opportunity for extending their trade, or replenishing stocks, that cannot be equalled anywhere. "Made in Canada" on any product now is a sufficient guarantee of quality to sell goods anywhere. Foreign importers often fail to realize the importance of getting in touch with sources of supply quickly. This was never more essential than right now. As a result of conditions many of the old world firms have been unable to handle any export business. As far as Germany is concerned hundreds of millions of dollars' worth of her commerce has disappeared. The Allies will try to see to it that this business is never recovered and Canada among the others is out to get a share of it. Foreign firms whose stocks are low or depleted can get many lines of goods quicker by getting in touch with Canadian houses than anywhere else. It should be remembered that it takes weeks, and in some cases months for the transmission of inquiries by mail, and the quotation of prices in return or shipping of goods. This is an important point for dealers abroad to keep in mind. The sooner they get in touch with Canadian manufacturers the sooner they can complete their stocks.

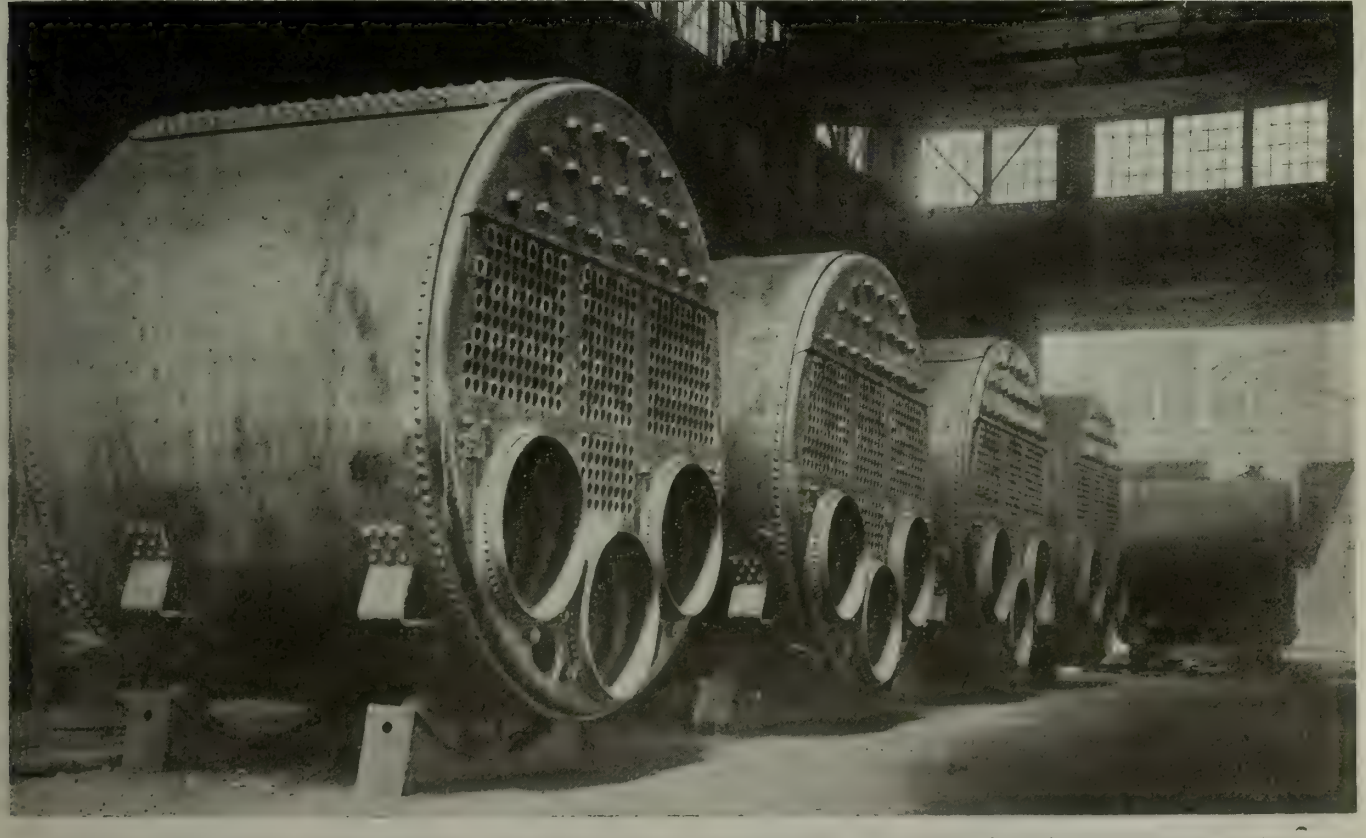
Shows The Figures

The figures in the table on page 110 show some interesting details regarding Canada's export developments. In many cases where decreases are noted it was caused not by any less production but by lack of shipping to send the goods overseas. The figures also show to some extent the manner in which some lines of agricultural production were diminished by enlistments and by farm workers going into munitions factories.

British and American capitalists who have been attracted to Canada have after investigating the country's rich natural resources expressed themselves enthusiastically regarding the future. Great as have been the advances in steel making and in electrical power development much greater things are looked for now that the possibilities are being realized.

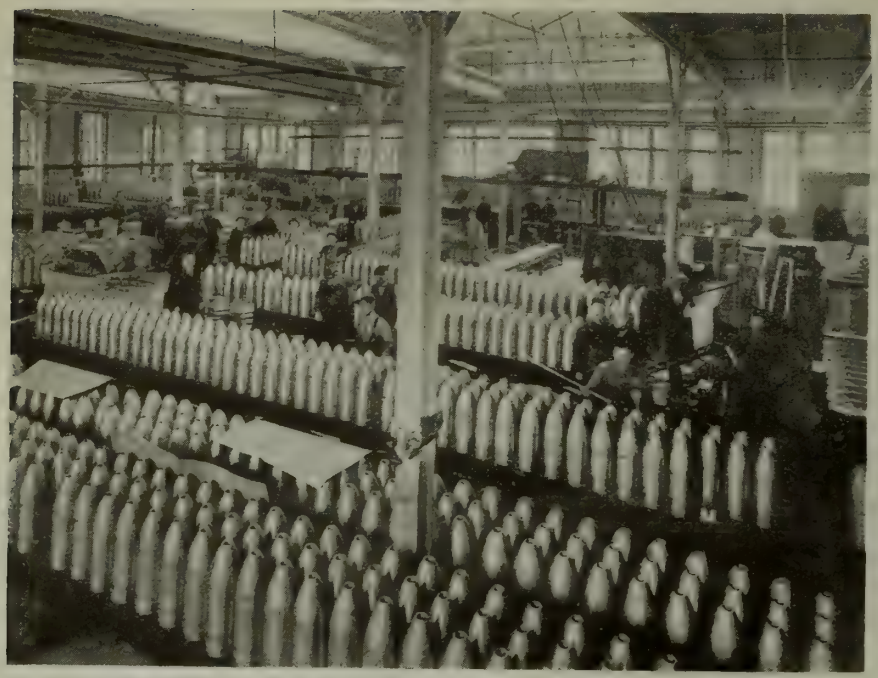
Sees Great Future

In the course of an address to the Canadian Manufacturers' Association, Toronto, on prospects for trade with Great Britain, France and Belgium for Canadian iron and steel products, Colonel David Carnegie of the Imperial Munitions Board said: "We have fine deposits of magnesite in Canada, developed during the war, which is of excellent value for our furnaces, making it unnecessary to import as hitherto; our carbon electrodes are second to none and cheaper than are produced in England; we have nickel in abundance; everything, in fact, calls for Canada to rise to the first rank as a producer of high quality steels. She has the opportunity by sustained and wise propaganda of displacing much of the heavy, cumbersome, short-lived, common carbon steels used in our rolling stock, ships, dredges, docks, mines and general machinery, and of becoming one of the principal exporting countries in the world. The things I have named —power, electrodes, magnesites and nickel—enter so much into the vital cost of producing high grade steels that Canada portunities in this direction."
portunities in this direction.



A Big Increase

He said Canada had increased her steel production per annum from one million tons before the war to two and a quarter million tons at present. U.S. steel production had increased from 32 million tons to 45 million tons, and Britain's from 7½ to 12 million tons per annum.



Touching on Britain's high cost of production compared with pre-war costs, Col. Carnegie said that while Britain has a capacity to supply her domestic requirements, she will have a struggle to maintain both her home and export trade against American and Canadian competition.

Canada's Opportunity

"What are the prospects of utilizing the capacity for iron and steel production in Canada? The facts show that Britain has a capacity for steel production exceeding her pre-war capacity of 62 per cent., while Canada's capacity has in-

Some of the big boilers which are being turned out in an Ontario Plant. Canadian firms have made record time in meeting requirements in varied lines and are filling orders from all parts of the world.

Canadian Factories surprised the world with their output of munitions. The illustration shows a section of a Canadian plant where large quantities of munitions were turned out. Canadian plants which only a short time ago were working to capacity on war production are now busy turning out peace time products to go all over the world.

creased 125 per cent. If Canadian manufacturers will follow Britain's example by determining to supply her domestic trade more fully than in the past, Canada will go a considerable distance in using her surplus steel capacity.'

"The growing demands for alloy steels for motor cars, tractors and all kinds of engines and high-class machinery where excessive wear calls for a better and more enduring steel, should arouse the more earnest attention of the makers of electric and crucible steel."

More Hardware Lines Are Needed in Belgium

A large number of hardware lines will be needed for rebuilding Belgium according to a survey of requirements prepared by the Belgian Section of the Interallied Commission. Some of the goods and estimated quantities are as follows:

Probable immediate requirements for building (tons): Copper, sheets, bars and ingots, 39,000; brass, sheets and tubes, 3,500; machine tools, 60,000; vegetable oils, 3,630; mineral oils, 4,269; hawsers, steel cables, belting, electrical power plants for colliery requirements, pig iron, 1,012,050; iron and steel, worked and semi-worked, 825,000.

Transport materials for railroads, locomotives, trucks, etc.; automobile transportation material, trucks, trailers, cars; depot material, turn-tables, forges, pits, drilling machines, jacks, etc.; working material for reconstruction of destroyed buildings and public works; builders and constructional work, crushers, mixers, hoists, cranes; bridges, locks, etc., pontoons, chain and accessories; dredging material, dredges, tugs, sand carriers, lighters; canal equipment, lighters, pumps, compressors, tugs.

Machines for road and construction work, scrapers, graders, rollers, etc., boilers, engines, pumps, steam shovels.

Railway construction materials, rails and accessories, tools, machine tools, motors, signalling apparatus.

Agricultural machinery requirements (tons): Plows, single, 40,000; plows, two or more shares, 20,000; skimmers, scarifiers and cultivators, 20,000; harrows, 75,000; ordinary rollers, 20,000; disc rollers, 10,000; horse hoes, 10,000; potato plows, 10,000; seed drills, 2,000; reapers and binders, 2,000; mowers, 2,000; horse forks, 2,000; horse rakes, 2,000; winnowing machines, 50,000; root cutters, 10,000; chaffers, 15,000; churns, 50,000; carts and vans, 100,000.

Hides and skins, tanning material, tanned hides and skins (tons): For belting and industrial purposes, 500; for boot making, sole leather, 300; uppers, 450; leather belting, 500.

Programs not yet received:

Plant for textile industries; plant for tanneries; plant for chemical works, etc.

In addition to the above advice has been received from Ottawa that to anticipate requirements, groups should be formed to deal with such commodities as the following:

Stoves: Plain light type suitable for bituminous or anthracite. Knock-down form. Standard sizes.

Cooking utensils: Plain strong kitchen utensils, cheap and durable.

Furniture: Wooden tables and chairs, metal bedsteads, cheapest materials shipped knock-down.

JAMES SMART PLANT

Brockville, Ont.

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.

MOSSBERG

ALL STEEL WRENCHES AND TOOLS

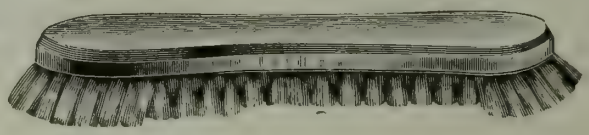
The strong, sturdy construction of Mossberg All-Steel Wrenches and Tools makes them absolutely dependable even on the toughest, roughest kinds of work. They are designed right to do every job right.

The special construction of the pressed steel jaws of Mossberg "K" series Wrenches insures a rigid grip and strength and durability far greater than malleable one-piece jaws.

TRADE MARK

MOSSBERG ALL STEEL WRENCHES and TOOLS

because of their correct designing to meet actual needs, have proven that whether the need be for an adjustable, socket, or open-end wrench, there is a Mossberg type as the favorite for the job.



Dealers everywhere are building sales on the adaptability and dependability of the Mossberg line. They are calling the attention of their customers to the Mossberg types that fit their particular need by using the various Mossberg Display Boards. We have an interesting dealer proposition. Ask for it, and the complete Mossberg catalog.

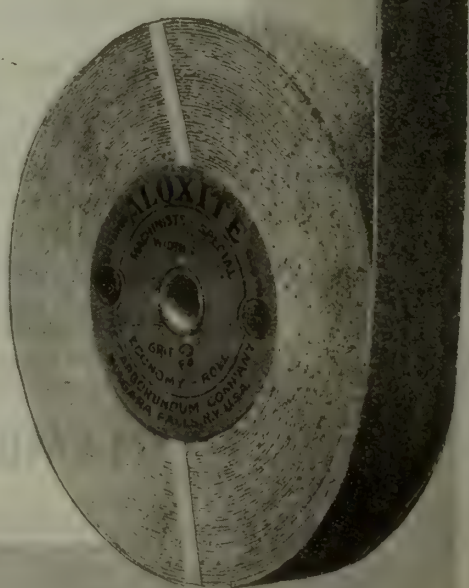
Aloxite Cloth in Economy Rolls Will Help You to Develop More Business

THE men who use Aloxite Cloth in the garages, general machine and repair shops and in the factories need tools, Carborundum sharpening stones, wheels and supplies.

When you introduce Aloxite Cloth in Economy Rolls you will have made friends. You will have opened the way for more business.



Aloxite Cloth in Economy Rolls

Saves time—saves cloth. The user just snips off a piece in the desired length and width. He doesn't waste time and spoil good cloth tearing a strip from a sheet.

Aloxite Cloth does the work of the old-time emery cloth. It cuts cleaner and faster—gives a finish in less time. It is flexible and is uniformly coated with accurately graded Aloxite grains. And there are a hundred and one uses for it.

Study these talking points—they will help you make sales

Aloxite Cloth in economy rolls is just one of the many Carborundum products that keep the cash registers busy.

TRUE PATRIOTISM

Demands That We Heed Our Country's Call For

INCREASED FOOD PRODUCTION

The Horse is a vital factor in such accomplishment. His efficiency is measured by the degree of fitness for constant use.

STUFFED COLLAR PADS

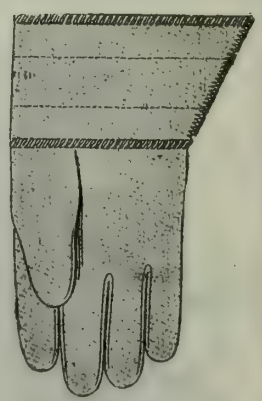
Are the Only Guarantee Against

Bruised, Galled and Chafed Shoulders. They are better than other kinds, being soft, springy and absorbent. They make possible the continued use of a horse collar long after its worn condition would otherwise compel its discontinuance.

NEW PATENTED HOOK ATTACHMENT

(Found only on Pads Made By Us)

Consists of wire staple with felt washer. It gives the hook a firmer hold and prevents pulling off, even though fabric is weakened by long usage. Life of pad is thus materially lengthened. This is the greatest improvement since we invented the hook.



THIRTY-SEVEN YEARS MAKING PADS

Look for the Felt Washer

Sell these comfortable, long-wearing, working gloves to the men of your town

TAPATCO
REGISTERED TRADE MARK
BRAND

TAPATCO GLOVES are just ideal in every respect for those little household jobs that would otherwise mean a grimy pair of hands or perhaps a skinned knuckle.

And it's not to the men alone but to the women as well that TAPATCO GLOVES appeal. In fact, every good housewife needs a pair of TAPATCOS for the several occasions where an easy fitting working glove is called for.

The styles are varied enough to cover everybody's requirements. **Gauntlet, Knit Wrist and Band Top styles in heavy, medium, and light weights. Leather Tip, Leather and Leatherette Faced Gloves, Jersey Gloves and Mitts in Tan, Slate and Oxford.**

TAPATCO GLOVES are handled by the jobbing trade.

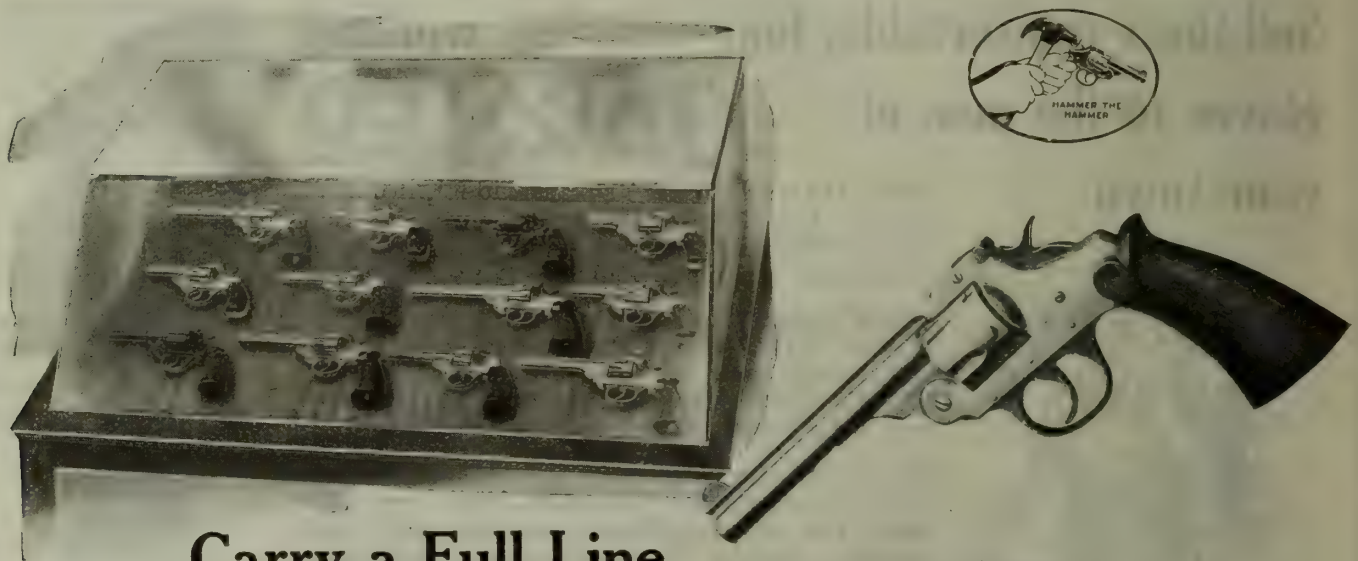
The Eureka Cyclone Seeder

Modern methods are rapidly replacing the old wasteful and laborious way of doing things. We are living in an age of keen competition when to be wasteful means failure.



The Eureka Cyclone Seeder is a modern apparatus that is abreast of the times. The old method of hand seeding has been superseded by it. It's a decided improvement. Scatters the seed over the land in an even spray, thereby, producing a greater yield to the acre.

A Light Weight Device, Yet Durable

Now is the time to educate the farmer on the advisability of using the **Eureka Cyclone Seeder.** It will result in many more sales in the spring.

Write us for detailed information and prices

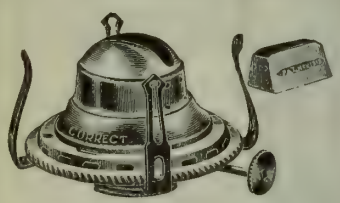
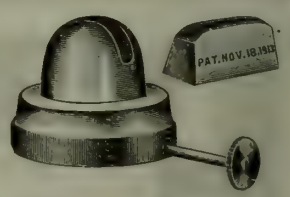
New Prices on Bissell Sweepers
Guaranteed to June 30, 1919



¶ While the present cost of production does not warrant any reduction in our prices at this time, and even though the great demand through the reconstruction period will probably preclude any great reduction in these costs, it is in anticipation of the tendency toward slightly lower prices on materials during the next six months, that we have concluded to issue a new price list at this time.

¶ Also, to protect the trade in ordering for their usual Spring requirements, we guarantee these lower prices against our own decline to June 30, 1919, inclusive.

¶ The new list prices will naturally entail lower retail prices, which will stimulate the sale of the goods.



¶ Copies of the new price lists on request.

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

Canada's National Hardware Weekly

will appear on

March 22

The advertisements in HARDWARE AND METAL'S Annual Spring Number are salesmen who are right on the job when Canadian hardware merchants are placing the biggest orders of the year.

Hardware buyers in Canada hang up their copy of HARDWARE AND METAL'S Spring Number, close beside their desk. A cord is inserted in the upper left-hand corner for this purpose.

Impress buyers with the importance of your firm and the quality of your goods! Make the impression strong and lasting by using big space in the biggest and best annual issue of any Canadian trade paper.

There is scarcely a hardware store of importance in any part of Canada where you will not find HARDWARE AND METAL.

MANUFACTURERS' AGENTS AND BROKERS' DIRECTORY

The service department of Hardware and Metal will gladly assist manufacturers at home and abroad in making arrangements with the firms in all parts of Canada whose announcements appear on this page.

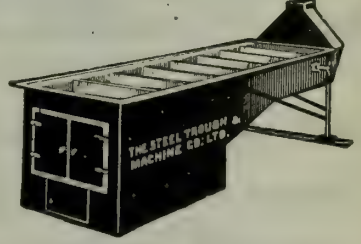
Welded Steel Sap Pan and Maple Evaporator



Many farmers throughout the country have small sugar bushes and would like to make Maple Syrup, but they do not want to go to such a large expense as an evaporator.

We can now supply you with a welded steel sap pan, a ready seiler, practically one piece. No solder about it to melt and leak if it is allowed to boil dry. Finished around top with heavy angle steel, a pair of handles on each side to lift it off the fire.
Standard sizes: 6" x 24" x 5',—6" x 30" x 7',—9" x 30" x 7', any size to order.

Sold through the hardware trade.

Write for Pamphlets and Prices.

The Steel Trough and Machine Co.

Getting Results

A large firm in a Western Canada city recently advertised in Hardware and Metal Want Ad. Page for a man to fill a responsible position—result 21 replies. This indicates that the want ad. page is followed closely. The man YOU want to reach is reading this page.

Wanted

POSITIONS WANTED

TORONTO MANUFACTURERS' AGENT wants to add one or two good builders' supply lines for Ontario. Excellent wholesale and retail connection in hardware and lumber, also architects. Covering territory four times yearly. Box 177, Hardware and Metal.

YOUNG, RELIABLE MECHANIC WISHES TO change his position to a hardware salesman with a busy firm. Number of years salesman, experienced with general merchandise. Box 174, Hardware and Metal.

HARDWARE SALESMAN, TEN YEARS' RETAIL experience, desires change of position this spring. Ontario preferred. First-class salesman, window dresser. Fair knowledge advertising. Best of references. Box 179, Hardware and Metal.

YOUNG HARDWAREMAN DESIRES POSITION as manager Western hardware store. Six years' experience. Good references. Box 150, Hardware and Metal.

EXPERIENCED HARDWARE AND FURNITURE man is open for engagement as Retail Manager or Travelling Salesman. Good references. Box 99, Hardware and Metal, Toronto.

DISCHARGED SOLDIER DESIRES POSITION as clerk in good hardware. Two years' experience. Western Canada preferred. Box 160, Hardware and Metal.

HARDWARE CLERK, FIFTEEN YEARS' retail experience, desires position as manager of store in Alberta or Manitoba. Best of references. Box 161, Hardware and Metal.

CAN YOU USE ME?

MY EXPERIENCE IN HIGHER ACCOUNTING, credits and general business management qualifies me for position where executive ability and wide experience are necessary. Am young, married, and prefer Montreal engagement, but this secondary. Can furnish Dun's, Bradstreet's, bank and commercial references. Would consider salaried position or partnership interest. Have been specially successful in handling large credits. Reply to Box No. 700, Hardware and Metal, Montreal.

AGENCIES WANTED

ENGLAND—A LIVE HARDWAREMAN, SIXteen years' selling experience, about to establish showrooms, is anxious to represent Canadian manufacturers of hardware and kindred trades. Arrangements to carry moderate stocks can be made. Well connected with Birmingham and London houses. Advertiser spent several years in Canada and knows the Canadian trade. Box: "English Agencys," Hardware and Metal, 88, Fleet Street, E.C. 4, London, Eng.

Agencies Wanted

CANADIAN manufacturers' agents open to take on a few good local or foreign agencies of hardware or cutlery; also any hardware specialties. Write us. Box 190, Hardware and Metal.

FOR SALE

FOR SALE—ONE OF THE LARGEST HARDware businesses in the County of Ontario. Annual turnover around $60,000. Tinshop and plumbing in connection, only one in town. All machinery and tools and store fixtures included in rent of store. Purchaser required to buy stock only. Take stock in February. Grand opportunity to get into a going concern at once. Stock at invoice prices, in first-class condition, around $18,000. Have auditor's annual financial reports for eight years, which will show large profits. Good reasons for selling. Box 180, Hardware and Metal.

FOR SALE — WELL-ASSORTED STOCK Martin-Senour paints, at a good discount. Apply to Box No. 185, Hardware and Metal.

HARDWARE BUSINESS IN GOOD DISTRICT, 75 miles from Calgary. No opposition. Clean, staple stock. Easy terms. Good reasons for selling. Apply Box 173, Hardware and Metal.

TRANSLATIONS

ENGLISH INTO FRENCH. COMMERCIAL, Financial and Technical Literature. Advertising booklets, catalogues, circulars, posters. Private correspondence. Manufacturers and Manufacturers' Agents desiring English to French translations will secure expert service at a moderate rate by addressing Leon A. Archambault, P.O. Box 135, Station B, Montreal.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WE HELP YOU GET BUSINESS

Always First

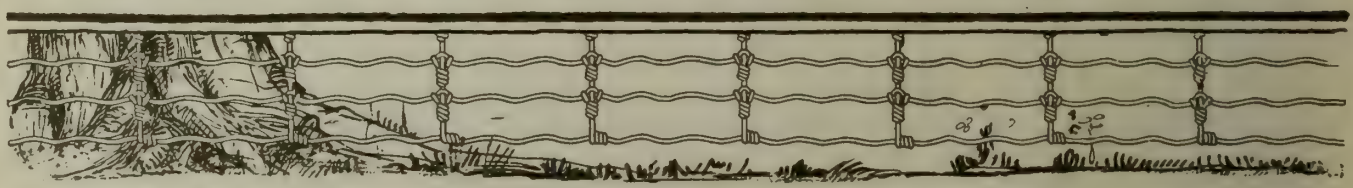
A study of fences and fence records shows that Frost Fence is justly entitled to first place among woven wire fences.

The exclusive Frost Tight Lock—look at it—is different from all others in design and is one BIG reason why Frost Fence has greater strength. The Frost Lock is the strongest part of the fence, not the weakest as in ordinary fences.

Then there are the Frost Wave Laterals with their wonderful resiliency and reserve power.

And the Frost Fence Wire, every strand of which is drawn and galvanized in our own mills.

Frost Fence has given years of service in Canada and proven its quality, serviceability and value to the complete satisfaction of the owners of millions of miles of this Canadian-made fence.



The policy and reputation of the Frost Company is well-known to the farmers of Canada who have shown their appreciation of Frost Quality, and the Frost system of selling through responsible dealers, by making Frost Fence first in sales.

While the price of Frost Fence is higher than before the war our margin of profit is narrower. It is proportionately lower than any other necessity made from steel or iron, and while such vast quantities of steel are required for rails, locomotives, cars, bridges, buildings and other re-construction work overseas there is no more likelihood of reductions in fence prices than in reductions in the prices of grain and meat which are also needed overseas.

It is good business to buy Frost Fence now.

Frost Steel and Wire Co. Limited

O-Cedar Polish Mop

YOUR O-Cedar sales can be greatly increased through **suggestion.**

A NEATLY-DRESSED window or store display is a **suggestion** to the woman who has seen the advertisement. She sees—and she buys. Teach your clerks to **suggest** additional purchases. If customers want nails, **suggest** a hammer. If they ask for paint, **suggest** brushes, O-Cedar Polish, and O-Cedar Polish Mop. There is always dusting to do; so every household can use O-Cedar Products to advantage. No matter what your customers buy, they are prospects for O-Cedar, and usually, the mere **suggestion** will result in a sale. Try the power of suggestion, and watch your sales jump.

Order from your Jobber.

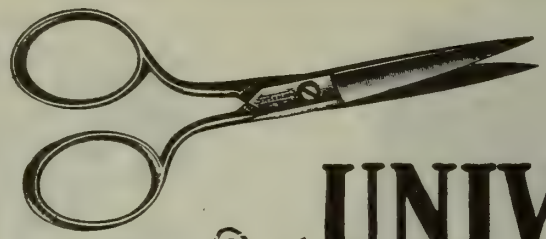
Department Picture showing stock of Poultry Netting, Etc.

RICE LEWIS & SON LIMITED TORONTO HARDWARE ESTD 1847

With spring comes the demand for poultry netting, garden and lawn tools. Order your stocks now

Everything points to greater activity than ever in home gardening, in chicken and rabbit raising. This activity means that the hardware dealer will have early calls for supplies of all kinds and should have his stocks complete.

We carry well assorted stocks of small lawn and garden tools of all kinds including the J.D. Lawn Rake (dandelion stripper), Lawn Mowers, Garden Hose and Poultry Netting (both hexagon and straight mesh). The straight mesh netting is easily handled, strong, durable, does not curl, buckle, or stretch. We carry all sizes— 2″ mesh from 12″ to 72″. 1″ mesh from 12″ to 48″.



Order from our representatives, or write direct.

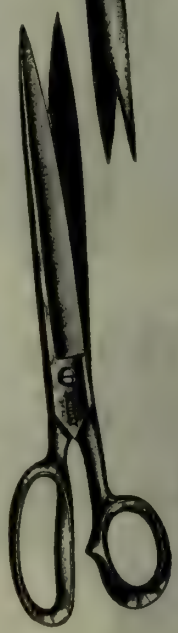
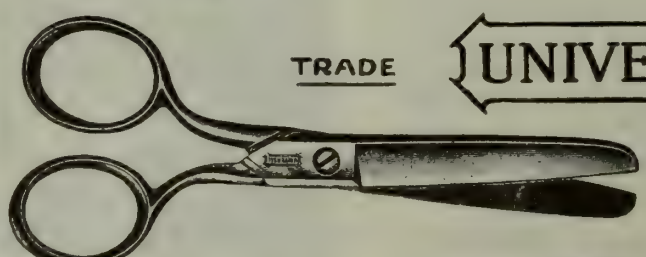
UNIVERSAL
SHEARS
LAST FOR YEARS

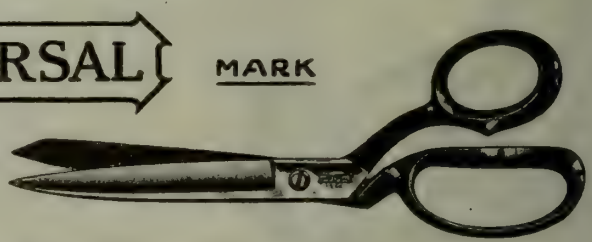


Here they are, shears of all kinds and for all purposes. Embroidery shears, pocket and barber shears, straight trimmers, bent trimmers, office or paper hanger shears.

Users of UNIVERSAL shears get the habit of recommending them to their friends because of their long and worthy service.



Have you a complete stock on hand to meet their wants?



In the manufacture of UNIVERSAL Shears and Scissors a special combination of High Carbon Crucible Steel, together with a selected Steel Forging, is used. The latter forms a frame of unusual strength, while the former is used for making the fine, sharp, cutting edge which makes UNIVERSAL Shears unusual. These two bars of steel are so perfectly welded together as to make them one piece, thus giving to the blade perfect cutting qualities, as well as absolute strength and accuracy.

Every pair of UNIVERSAL Shears and Scissors are most carefully inspected and tested as to their cutting efficiency before leaving the factory. When you sell a pair of shears bearing the UNIVERSAL trade-mark you are certain of selling the best that money can buy.

"Master Cutlers for over half a century."

Link Up Your Windows With Our Advertising

The dealer who pushes the sale of nationally advertised goods gets the reputation with his customers of being up-to-date and selling what they are looking for. Millers Falls national advertising is free to you. How much do you plan to benefit by it?

Put in windows of Millers Falls bit braces and other tools and your tool sales will show the results of our national advertising.

And don't fail to have a Millers Falls bit brace stand on your tool counter in season and out of season. This stand is furnished free with a small order of braces, and it will make you money from the first day you start it to work for you.

Be sure your tool salesmen have copies of our handbook on "How to Sell Tools." It will give them enthusiasm and selling ideas. Free on request.

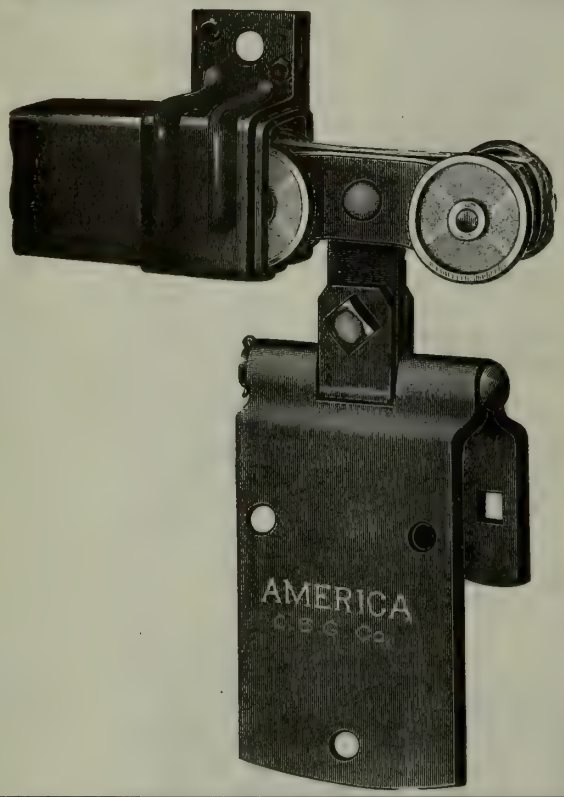
NO. 25

Swinging Door Latch

You can sell this Latch in all confidence that it will do its work well

The proper fastening device for swinging doors has been somewhat of a problem in the past with Hardware manufacturers. Our No. 25 Latch for this purpose has overcome all difficulties. Your customers will be more than pleased with its useful, durable and well-working qualities. They present two opportunities for you, the one—to win the good-will of your customer; the other—to make splendid profits on a **quality line.**



Made entirely of steel, adjustable for doors ¾ in. to 2¼ in. thick, easily installed, attractively finished, and packed in the **"Unusual National Way,"** one in a box with screws and catch to hold door open.

We would like to send you complete information on this **fast-selling Latch.** Write us for our big catalogue of **Builders' Hardware.**

NATIONAL MFG. COMPANY

STERLING, ILLINOIS

America Tandem Truck Trolley Hangers

Among users of Door Hangers and merchants who sell them the "AMERICA" is admitted to be the most efficient and practical hanger for operating barn, factory, warehouse or garage doors.

Constructed of heavy steel, fitted with hardened roller bearings and has lateral adjustment which permits increasing or decreasing space between door and building.

AMERICA Hangers run in the famous Hatch Trolley Track supported with corrugated brackets, and carry heavier doors.

Stewart Clipping Machines at the Front

The Stewart No. 1 Ball Bearing Enclosed Gear Machine.

(Copyright by the Committee on Public Information)
Clipping a French cavalry man's horse with a Stewart Machine.

Clipping of all horses used by the Allies and U.S. armies is general and a great many **Stewart No. 1 Ball-Bearing Machines** are used.

What it means to Dealers:

This lesson on the benefits of clipping hard-worked horses and the remarkable efficiency of **Stewart Machines** is being brought back to our Canadian farms and towns, with the result that more horses will be clipped this spring than ever before, and more **Stewart Machines** will be asked for and sold by dealers.

The Stewart No. 1 Ball Bearing Horse Clipping Machine

is rapidly replacing all other makes as the result of its superior qualities to clip, turn easy and stand up.

It never fails to please and is invariably asked for.
Sold through the regular trade channels only.
Horse clipping starts with the first spring weather.
Don't lose sales by experimenting with unknown and untried machines.
Sell the old reliable Stewart—reasonable in price and guaranteed to please and stay sold.

Order from your Jobber now.
Make a Window Display.
Let people know you sell Stewart Machines.

Williams" "Agrippa" Boring-Tool Holders for Multiple Bars

Raise no bar against the selection of Bars. The choice is yours.

Sleeve Bar and Holder

Plain Bar

The "twin-screw" fastening with V groove at top and bottom accommodates any size of bar within its range. No shims or bushings of any kind are required.

We furnish two types of Standard Bars, Sleeve and Plain, as illustrated—they are interchangeable in the Holder.

In the *Sleeve-Bar* the Cap admits a straight or angular Cutter: either can be quickly inserted at the business end of the Bar without removing the Cap or disturbing the setting of either the Bar or the Holder.

The *Plain-Bar* provides for the use of both styles of Cutters in the simplest manner possible.

ARMCO IRON

For Safe, Sound and Profitable Building Construction

TO tear down is the business of war; to build up is the business of peace. Razed and ravaged Europe must be restored, great and busy America must continue to grow and expand. It is absurd to think that the next decade will see otherwise than a colossal building boom in every part of the world.

With the world demanding construction of a permanent nature, metal will be used for building as never before. We expect every available pound of our product, Armco (American Ingot) Iron, to be used for such purposes as fast as we can supply it. In every phase of its manufacture, Armco Iron is subjected to scientific and never-ending care and inspection. It combines *purity, evenness, density* and other qualities that make for durability.

Building Uses for Armco Iron

In every kind of building, new or altered, residential, industrial, public, or office, Armco Iron can be most profitably employed for all exposed metal parts such as roofing, coping, pent houses, skylights, water tanks, ventilators, window frames and sashes, and for such purposes as metal lath where durability is a factor even though the metal is not directly exposed.

Every architect, builder and property owner or investor who is interested in safe, sound, and profitable building construction, should write us for information specifically applied to his building problems.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

BATEMAN TUBULAR BARROW

We are now in a position to give the trade that service which had always been our aim, but which war conditions interfered with.

The Bateman T80 shown above is our leading line, made of the best materials and finished to the Bateman standard.

Note These Features:

Tray is most popular type with 5/16" steel rod in edge which reinforces tray and ensures long life.
Has Malleable Hub Wheel, recognized the bend, will not shake loose.
Front bend in tube throws tray well over wheel.
Frame is well trussed and braced. T80 is an exceptionally well-balanced Barrow.

We solicit your Barrow business. Our prices are right.

"Wanted—A National Plan"

An article of unusual importance, by Sir George Bury, formerly vice-president of the C.P.R., appears in the February issue of MACLEAN'S. He points out that Canada must more definitely shape her destiny if that destiny is to be as glorious as all Canadians hope. It is a stirring demand for Canadians to get together in the formation of a national plan, accompanied by many practical suggestions from his experience in transcontinental railroad building. An article of national importance.

"Germany From Within To-day"

The funniest thing that he has perhaps written appears in February MACLEAN'S from the pen of Canada's great humorist, Stephen Leacock—an imaginary visit to Berlin under the Bolsheviks. He finds Von Tirpitz planning a new navy, an *inland fleet;* Frau Krupp, an apple woman; Von Bethmann-Hollweg, a cab driver; Bernstorff, a Bolshevik and president of the Scavengers Union. He finds a *Get From Under* committee planning a trade war on the world and half the population of Berlin in English clothing or Scotch kilts. He finds—

But read the article. There's a long laugh in every line. It is farce, however, built up on pretty shrewd truths.

You will find this a remarkably interesting number. The bold, fighting face of Admiral Beatty is on the cover and inside are the following big features:

The Campaign Against Britain, by Agnes C. Laut.
The Farmer in Politics, by J. K. Munro.
The Strange Adventure of the Thumb Tap Clue, by Arthur Stringer.
Old Times in Canada, by Walt Mason.
Lend Me Your Title, by Onoto Watanna.
The Three Sapphires, by W. A. Fraser.
Wild Miners I Have Met, by E. Ward Smith.
The Anglicization of Katrina, by Mary Josephine Benson.
Saturday's Child, by Mary E. Lowrey.
The Minx Goes to the Front, by C. N. and A. M. Williamson.
The Veins of the War God, by Corporal Herbert Forder.

If any advertisement interests you, tear it out now and place with letters to be answered.

In the window display above, the center panel forms an open frame behind which is a pocket for the insertion of strikingly colored illustrations depicting the various and timely uses of DAYLO. You are thus afforded a permanent display of constantly renewing interest in which the pictures can be changed at any time in thirty seconds or less.

A Permanent Display

OUR Canadian advertising aims to keep permanently before the consumer the many needs and uses of Eveready DAYLO. The window display shown above (printed in 8 colors), is one means whereby *you* can link your store with this country-wide campaign.

Without *your* efforts — without *your* co-operation — no amount of DAYLO advertising can be made fully profitable for you and for ourselves.

This display requires but little window space — 31" high x 25" wide x 18" deep. It can be placed in the center or a corner of your window among other goods on display. The center illustration can be changed from time to time and on the steps you can arrange for the display of the particular types of DAYLO needed for the use shown in the center picture.

But — to avail yourself of this co-operative opportunity you must act quickly. Only a limited number of these displays remain. Write for yours today.

The Trade Mark of the Best Known Razor in the World

With all the millions that have been bought, we consider the Gillette Safety Razor has passed through only the initial stages as far as sales are concerned.

Two objectives have been reached in our world-wide, never-ceasing campaign — we have produced the best razor the world has ever known; we have made this fact known wherever razors are used.

We consider the millions of razors bearing the mark shown above, now spread all over the world, as ground-work—just good, solid ground-work. We aim to reach that point where, when a man goes to buy a razor, it will be a foregone conclusion he will buy a Gillette.

That time is coming, and it behooves any dealer who sells razors to identify himself prominently with the Gillette Safety Razor, Made in Canada, Known the World Over.

Fighting Mail Order Competition

Other Merchants Are Learning the Lesson Hardware Men Learned Long Ago, That the Best Way to Meet the Department Stores is By Their Own Methods —Strongest Weapon is Good Advertising

"SPEND Your Dollar at Home" campaigns are unusually numerous in Western Ontario at the present time. Campaigns are in progress at Aylmer, Preston, Simcoe, Hanover, Kincardine, Goderich, Petrolea, Strathroy, and a combination campaign at St. Marys, Ont., includes the neighboring towns of Granton and Kirkton. With the exception of Preston and Goderich all of these places are under 3,500 population. The campaigns are aimed directly against the mail order houses.

The best thing in connection with these various campaigns is that the merchants have started. It will teach them something they should have known long ago, that is, that they can beat the mail order houses to a frazzle if they will only go after business in a business-like way.

Can Learn Lesson

Comparisons are not always in good taste because someone's feelings are likely to be injured, but nevertheless it is a particularly gratifying fact that Canadian hardwaremen suffer less from the mail order houses than any other classes of retailers. Why are the hardwaremen in this happy position, when so many other retailers are sending wails skywards against the "big city stores"? Simply because the hardwaremen are aggressive. They go after business and they go after it in a definite way, with definite plans and along lines of merchandising which must always produce definite results. To put it briefly the hardwaremen "keep store." To start with they get the right kind of goods, then they let the people in their district know about it by intelligently directed advertising, and they back up all this by giving service, real service, in their stores.

Are Not Afraid

Ask any hardwareman, any place in Canada, if he is afraid of the mail order houses, and with very, very few exceptions he will tell you he can beat the city stores every time. He knows what every retailer should know, that he has all the big talking points on his side. Take stoves, for instance. The hardware man can take the prospective buyer right into his stove department, show him the goods right there and then explain all the workings of the stove personally, so that there is no possibility of misunderstanding, send one of his men out and have the stove set up and in working order in the customer's home within an hour or two, and later, maybe years after, can, because he is handling a standard line of goods, supply any parts that may have to be replaced.

This is an important matter, especially when it is considered that the mail order house very often buys at the lowest price possible a line of stoves which are not only not standard, but made cheaply to sell cheaply, and that parts cannot be replaced.

Other Disadvantages

The mail order house is up against a whole lot of other disadvantages also. In the great majority of cases its sales are made by mail. It cannot possibly make that personal appeal and explain little points that the hardwareman can. It may take the mail order house a month or six weeks, perhaps longer, to get the goods to the customer. In the case of stoves it has been known, and not infrequently, that the stove has arrived in a damaged condition. This necessitated another delay of one or two weeks while letters of explanation were written and the necessary parts procured. Very often stoves have arrived in bad shape from being in wet cars, so rusty that it was impossible to ever get them to look well. The mail order house never sends any man with the stove to put it up. It does not even deliver it, except to a station, and farmers have to drive in fifteen or twenty miles, lose a day, take home a stove about which they know nothing, set it up as best they can and try to make it go. No hardwareman's expert assistant is there to put it up, see that the pipes are right and the dampers right and everything running in good shape. No chance, in many cases, of taking it back and exchanging it if a larger or smaller stove is found better suited for the requirements. In fact the whole transaction simmers down to the fact that the mail order house conducts a "sight unseen" business. The remarkable fact about it all is that people are willing to take a chance on buying goods about which they know nothing. What is more, they always have to pay cash for them. No credit or accommodation from the mail order firm.

How They Do It

How do they do it? Right here is the solution of the whole problem for the small town merchant. They let the people know that they are in business, that they have goods for sale. The big reason why the mail order firms make the progress they do is that retail merchants (hardwaremen excepted) fail to advertise as they should. Hundreds of merchants, in the small towns especially, instead of welcoming competition at once proceed to lay down their arms and send up a wail against the big city store. Just as long as they do this and take no steps to fight the mail order house, just so long will the mail order house continue to gain business in that territory. As quickly, however, as the merchants show fight, real fight, the money that has been going to the city stores commences once more to remain at home. In exactly the proportion that the small town merchants make the effort will they succeed. If they spruce up their stocks, advertise their stores and their goods, give customers real service and go after business aggressively it is only a question of time before the mail order houses are out of the running.

Unable To Compete

It has been proven time and again and

can be proven any day that with the exception of a few leaders, the mail order houses can not sell quality goods as cheaply as the home merchant can. It—is little short of amazing some of the stuff the mail order houses unload on the public as alleged bargains. No small town merchant who has a reasonably good stock and is prepared to render service to his customers need fear the big city store. He can not only meet their prices every time, but he can actually undersell them in the great majority of instances. One of the great difficulties in connection with the matter, however, is in getting the merchant to see that the advantages are all on his side. Probably ninety-five per cent. of the business of the big stores is done either through the advertisements they insert in the daily papers or through their catalogues. When it comes to advertising it has to be admitted that the mail order houses are no pikers. They spend money and more money and more money every year. Why? Because they get it back ten times over. They have built up their whole huge commercial fabrics on advertising and in a great number of cases they have built them up because the small town merchants either did not advertise at all or advertised unattractively.

Make It Attractive

No one can ever accuse the department stores of either sending out unattractive catalogues or of inserting unattractive ads. in the newspapers. They take special pains with all this advertising matter, because their catalogue or their advertisement is their salesman. The farmer or his wife, 500 miles away from the store, cannot walk in and see the goods he or she is going to get. They have the catalogue or the advertisement before them. The mail order house has to depend upon that ad. to sell its goods. Therefore, that advertisement in the paper or that section in the catalogue has to do the work that the clerk would do in the store. If it were possible for the mail order houses to have a clerk call personally on every one who buys from them, the chances are that the clerk would make the sale in far less time than it takes for the advertisement. He would do this because he would be a salesman and could mention many points about the goods that it is impossible to put in an advertisement.

Merchant Can Do This

The small town merchant in nine cases out of ten where the mail order house has invaded his field does not advertise strongly. He may use a little bit of an ad, tucked away down in some corner of the paper, without any illustrations of any kind and without any matter in it that compels sales. Here is where he can learn a whole lot from his competitor, the mail order man, and turn his own guns upon him with the effect that the mail order firm has to retreat. One thing the department stores use prolifically is cuts. The cuts they use are not mere smudges. They do not represent styles that were out of date fifteen or twenty years ago. They are clean-cut electros that stand out. They give the prospective buyer a picture of what the mail order house has to offer and invariably the price is given, not in small type, but in large, clear type. There can be no mistake made about the price. The prospective buyer knows exactly what the goods are going to cost. Nearly always there is a description of the goods. Not a word is wasted. Every word tells something about the goods that the buyer wants to know. The wording of these ads. is given the most careful study, because the ad. is to answer all the questions that the buyer would ask the clerk, if he came to the store.

Can be Improved

Compare advertising matter of this kind with many of the advertisements that appear in small town papers all over the Dominion. With the exception of hardwaremen, who always have something of interest to tell the public, many of the ads. are sales killers instead of sales producers. Many of them are mere space fillers, atrociously arranged and with no illustrations or prices, nothing to make a buyer want to buy at the store. One of the very poorest classes of advertisers of which there is any record is the small town tailor. This probably accounts for the fact that millions of dollars' worth of men's and women's clothes are sent out every year by the mail order firms. It is rather a gratifying fact from the hardwareman's standpoint that every year sees less and less hardware being handled by the big stores.

How It Works

Firms who do not advertise are worthy of little consideration, but firms who advertise without doing it properly fail to realize the far-reaching effects of their policy. To a large extent the public judges a store by its advertising. If it advertisers poorly many people believe that the service they may expect at the store is poor. There is a whole lot in impressions gained in this way, and in justice to the mail order houses it must be said that they never give people a poor impression of their goods or their stores. Very often they are inclined to overdo it the other way and claim for the goods listed in their ads. or catalogues quality that is not there.

Making Them Better

In one way it would seem that the merchants of St. Marys, Simcoe and Aylmer are making a mistake. They are running a series of small ads. every other week under the old stereotyped heading, "If you buy out of town and I buy out of town, what will become of our town?" This is followed by a more or less milk and water appeal based on sentiment, urging the patriotic duty of buying at home.

This sort of an appeal, while it may produce some small results, is not the way to meet the mail order houses. The quickest way to get people to buy at home is to deliver the goods. Let them know that you have the stock, that your store stands for service, that your prices are right and they will come to it. An

Continued on page 52

This illustration occupied the centre of a page ad. which the Marshall Ecclestone Co., Ltd., of Timmins, Ont., used in selling various lines of hardware. It served to hold attention as soon as one opened the paper, directed the readers mind involuntarily against mail order buying and the prices of the goods offered by the home firm were emphasized in the reading matter.

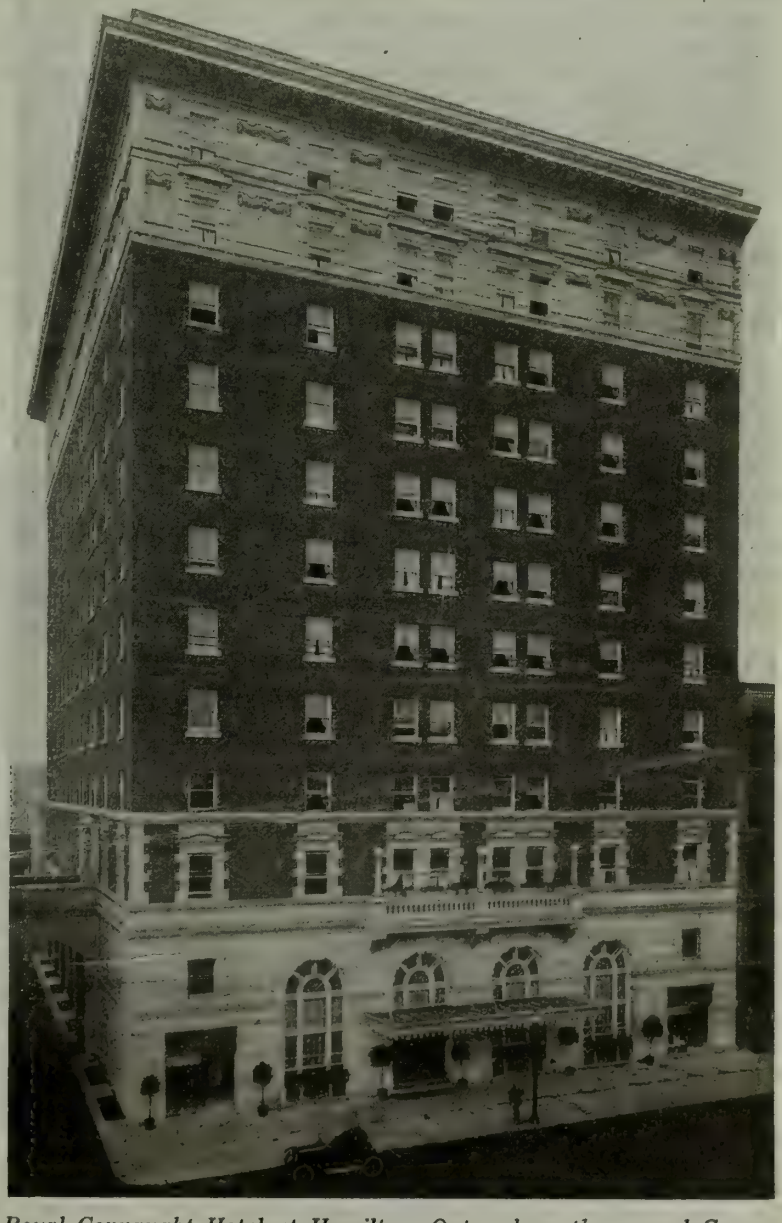
Meet Your Fellow Hardware Merchants

Dealers From All Over the Province Will Be at Hamilton Convention to Work Out Trade Problems and Make Things Better For Hardware Men—Your Co-operation Will Help the Good Work Along

THE annual convention of the Ontario Retail Hardware and Stove Dealers' Association, which will be held in Hamilton on February 18, 19 and 20, will bring together hardware men from all over the province. The advantage of men in any section of the retail trade getting together, meeting one another, and talking over matters of mutual interest, cannot be over-estimated. It engenders a spirit of co-operation throughout the whole trade of the province, which makes for better conditions and better business. The effects are not only immediate, but permanent. It is something like dropping a stone in a pond. The circle is ever widening, and in this case it is an ever-widening circle for the good of the trade. While good results immediately from gatherings such as will be held in Hamilton for three days, the benefits are spread over months or even years.

How It Works Out

For instance, a hardware man becomes acquainted with another hardware man, who lives in a town, perhaps, 400 or 500 miles away. He gets to know this man and they talk over business matters. Perhaps six months or a year after, one of the men finds out something more bearing on questions the two discussed. He at once lets his friend know, and they both profit. This is merely an instance. It is multiplied a great number of times, because of the large attendance at the convention. Besides a mutual co-operation and understanding of this kind, the hardware convention brings the retailers in the closest touch with many of the best manufacturers. The retailer meets these men, sees how and where the goods he handles are made, and gets a wider understanding of the whole situation. Things of this kind broaden him out and tend to make him a better and bigger merchant in every sense of the word. The retailer, who keeps to himself in these days of progress and competition, is playing a losing game. He is missing a whole lot that is really worth while, and he is not taking the share that he should take in furthering the interests of what is now one of the most substantial and important sections of Canada's whole commercial fabric.



A Fine Program

The officers of the Ontario Retail Hardware and Stove Dealers' Association have spared no time or trouble in arranging a program that will be of real value and full of interest to every hardware dealer who attends. Every minute of the three days which the sessions last can be turned to profit by the delegates. It should not be gathered from this that there will be no variety and that the sessions will be just one mad rush of business. The program has been splendidly varied. There will be practical demonstrations, talks by hardware dealers and manufacturers on matters of interest to the trade, visits to the big manufacturing plants, of which Hamilton has a number; general discussions on trade matters, in which all can take part; demonstrations by representatives of various firms, and many other features.

Splendid Opportunity

A gathering of this kind provides an opportunity that hardware dealers can get in no other way. No individual dealer, or group of dealers in any city, could bring together the men who will come to Hamilton. There will be big men from all parts of Canada and the United States, men who are doing things and who have much to tell the hardware dealers that is of real value to them. Besides being profitable in this way, the convention will provide the dealer, who has been tied down by business cares

Continued on page 40

The Royal Connaught Hotel at Hamilton, Ont., where the annual Convention of the Ontario Retail Hardware and Stove Dealers will be held February 18-19-20.

BIG GLASS ORDER PLACED BY FRENCH COMMISSION

DEALERS who because of the present dullness in the window glass trade, which is usual to this time of the year, and who anticipating the early arrival of European window glass, have been selling at cut prices, in some instances being below to-day's replacement factory cost, may have reason to regret their action, judging from the latest reports from Europe. There has just been placed in the United States by Captain E. Dulieux, of the French High Commission, an order for 107,000 100-foot cases of window glass, of which 80,000 boxes are single strength, 27,000 double strength. The specifications run largely to six sizes, long narrow predominating. The terms require shipment prior to March 15th, and it is a ten days' cash consideration. This is, perhaps, the choicest export order ever placed in the United States, and it has been apportioned out to leading manufacturing and distributing organizations. It is the equivalent of 214,000 50-foot boxes such as are utilized in domestic consumption. Additional orders, it is stated, are certain to follow. While this one will help the manufacturers over the dry spell they are now having, future export prospects are of a most encouraging nature.

CLOSING OF PLANTS MAY MAKE LAMP BLACK SCARCE

THE large manufacturing plants making carbon blacks in West Virginia have all practically agreed to shut down in order to stop the waste of fifteen million cubic feet of gas a day. This was the result of the efforts of the fuel administration and may have a considerable effect on conditions in the lamp black market as the West Virginia field has developed into one of the large sources of supply of this commodity. A great deal of the lamp black used in Canada comes from across the line.

LOWER STEEL PRICE MAY STIMULATE BUSINESS

AS far as the steel situation is concerned in Canada, changes have taken place during the week which indicate that buyer and seller are coming closer together rapidly and are appreciably nearer the point where business should be resumed as usual. In some cases there appears to be a big need for the acceleration of this movement, as it is evident that the holding back and waiting policy may be carried to a dangerously long extent. Steel plate is one of the greatest lines imported. Following a wild career during the war period Government action placed the figure at ten cents, and there it rested at the signing of the armistice. This week it was marked down until six cents per pound can now be stated to be the base price for plate at Canadian warehouse. The explanation is that close competition and a desire to protect customers led to the lower price. Sheets, especially the heavier gauges, invariably follow plate, and they have done so, lower prices being quoted. Canadian steel mills will be well served if, as they expect, they receive generous orders from the Government now for rails. Their equipment for the most part is intact as when engaged on war production, and is capable of a large output. Pittsburgh is looking for a decreased production at the steel mills. Even fifty per cent. operation now means more steel than the total capacity in 1906. The scrap metal market shows no change. Dealers do not want to buy, even at the present low prices, fearing a further drop.

BICYCLE DEALERS FAVOR DAYLIGHT SAVING PLAN

THE Executive Committee of the Canadian Bicycle Dealers' Association has gone on record as favoring the permanent adoption of the daylight saving plan for summer months. It takes this stand on the ground that the scheme has proven that it is undoubtedly of benefit to cyclists. The Executive decided also to urge dealers everywhere to associate themselves with good roads movements and lend every support to plans for improving the highways. The subject of early closing and regular business hours was also discussed. Ottawa bicycle dealers have decided to close on Saturday afternoons during July and August this year. The Ottawa bicycle firms close their doors regularly at 6.30 each evening. Brantford, Ont., bicycle dealers have also decided on this hour throughout the year, except on Saturdays.

REBATE ON TRACTORS IS EXTENDED INDEFINITELY

REPORTS from Ottawa indicate that the Government has decided to extend indefinitely the Order-in-Council rebating the duty on farm tractors valued at $1,400 and under. This order was passed in the interests of increased production on February 7 last, and was to have expired on Friday last. Since it was put into effect over 10,000 of the class of tractors came into the Dominion, and the amount of duty thus remitted was in the neighborhood of two million dollars. For the total fiscal year 1916-17 only about 2,000 tractors of all sorts entered the Dominion.

ELECTRICAL DEALERS MAY ADOPT OPEN PRICE PLAN

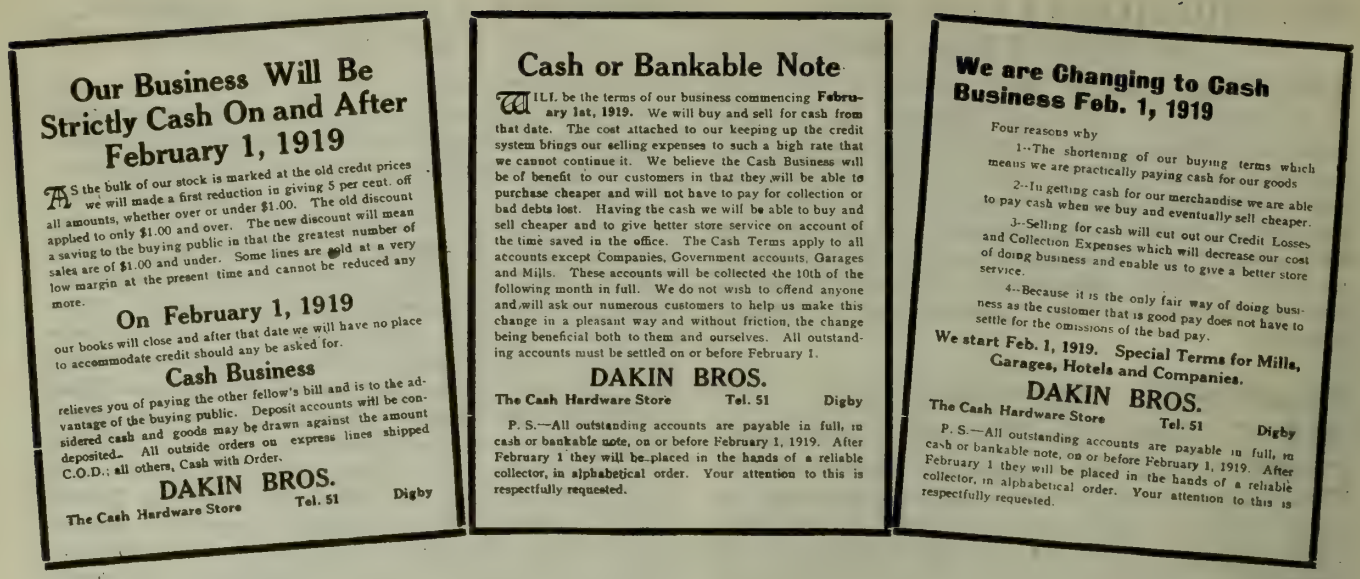
THE formation of an Open Price Association is under consideration by a number of dealers engaged in the electrical trade in Toronto. At a meeting held to discuss the project, the workings of associations of this kind in the United States were explained. The purpose of the association is largely to exchange bids on contracts, in order that extensive underbidding may be eliminated. It is stated that there is nothing in the working of the organization that will conflict with the law in regard to combinations deterrent to trade. Those who attended the meeting in Toronto favored the project.

RESTRICTIONS LIFTED ON AMMUNITION IMPORTS

THE United States War Trade Board announces the following changes in the export conservation list. Individual licenses are not required in Canada and Newfoundland for the following: Ammunition, X-2: Cartridges and shells, loaded and unloaded, X-2; shot, in bulk, X-2; coal; coke; explosives, X-2; firearms, all types, X-20a. Shipment of these commodities may be made under Special Export License RAC-63.

PROPOSED TAX WILL HIT MANY TRUCK OWNERS HARD

CLAIMING that the increased license tax to be levied by the Provincial Government on heavy commercial trucks is exorbitant, the Toronto Cartage Association has appointed a committee to take the matter up with the Minister of Highways and endeavor to obtain a readjustment. In five-ton trucks, it is claimed the increased tax will be $85, and as the proposed tax is to be based on weight of truck and carrying capacity, the total to be paid for each would be approximately $110. Many of the hardware firms have large trucks, and will be affected by the proposal. An indirect effect that may result unless the tax is lessened will be increased tariffs, which would affect many retailers.



IMPROVED SERVICE AIMED AT BY EXPRESS COMPANIES

WITH the request of the railway express companies for permission to increase their rates still under consideration by the Dominion Railway Board, comes a request from the employees of one of the companies for a board of conciliation to adjust wages. Officials of the express companies stated to HARDWARE AND METAL that they have made many increases in wages to their men in the past two years. They also point out that express tariffs have not been revised in a number of years, and that the rates that are now prevailing are the same as those in effect when wages, transportation and operating costs were much lower than now. A large amount of facts concerning the situation are being gathered by the Dominion Railway Board and a decision on the request is expected before long. In the meantime, in some of the express offices a "Better Service Campaign" has been inaugurated. Many of the losses in the past, express officials state, have been due to improper packing and inadequate addressing of parcels. An effort is being made to get business houses, especially the large shippers, to co-operate with the express companies in eliminating trouble from these sources. In the express offices a four-minute talk will be given to the employees occasionally, emphasizing the importance of "Starting Express Shipments Right."

Current Events in Photograph

For the next few months the eyes of the whole world will be centred on the doings of the five men shown in the picture. Upon them will rest the tremendous responsibilities of solving problems which will affect the course of world events for many years to come. Reading from left to right they are: Marshal Foch, Premier Clemenceau, David Lloyd George, Premier Orlando of Italy and Baron Sonnino, Italian Foreign Secretary.

Our Business Will Be Strictly Cash On and After February 1, 1919

AS the bulk of our stock is marked at the old credit prices we will made a first reduction in giving 5 per cent. off all amounts, whether over or under $1.00. The old discount applied to only $1.00 and over. The new discount will mean a saving to the buying public in that the greatest number of sales are of $1.00 and under. Some lines are sold at a very low margin at the present time and cannot be reduced any more.

On February 1, 1919

our books will close and after that date we will have no place to accommodate credit should any be asked for.

Cash Business

relieves you of paying the other fellow's bill and is to the advantage of the buying public. Deposit accounts will be considered cash and goods may be drawn against the amount deposited. All outside orders on express lines shipped C.O.D.; all others, Cash with Order.

DAKIN BROS.

The Cash Hardware Store Tel. 51 Digby

Cash or Bankable Note

WILL be the terms of our business commencing **February 1st, 1919.** We will buy and sell for cash from that date. The cost attached to our keeping up the credit system brings our selling expenses to such a high rate that we cannot continue it. We believe the Cash Business will be of benefit to our customers in that they will be able to purchase cheaper and will not have to pay for collection or bad debts lost. Having the cash we will be able to buy and sell cheaper and to give better store service on account of the time saved in the office. The Cash Terms apply to all accounts except Companies, Government accounts, Garages and Mills. These accounts will be collected the 10th of the following month in full. We do not wish to offend anyone and will ask our numerous customers to help us make this change in a pleasant way and without friction, the change being beneficial both to them and ourselves. All outstanding accounts must be settled on or before February 1.

DAKIN BROS.

The Cash Hardware Store Tel. 51 Digby

P. S.—All outstanding accounts are payable in full, in cash or bankable note, on or before February 1, 1919. After February 1 they will be placed in the hands of a reliable collector, in alphabetical order. Your attention to this is respectfully requested.

We are Changing to Cash Business Feb. 1, 1919

Four reasons why

1--The shortening of our buying terms which means we are practically paying cash for our goods

2--In getting cash for our merchandise we are able to pay cash when we buy and eventually sell cheaper.

3--Selling for cash will cut out our Credit Losses and Collection Expenses which will decrease our cost of doing business and enable us to give a better store service.

4--Because it is the only fair way of doing business as the customer that is good pay does not have to settle for the omissions of the bad pay.

We start Feb. 1, 1919. Special Terms for Mills, Garages, Hotels and Companies.

DAKIN BROS.

P. S.—All outstanding accounts are payable in full, in cash or bankable note, on or before February 1, 1919. After February 1 they will be placed in the hands of a reliable collector, in alphabetical order. Your attention to this is respectfully requested.

This is the way in which the hardware firm of Dakin Bros., Digby, Nova Scotia, announced to the people of their district that they were going to do business on a strictly cash basis. A series of ads. was run in the home paper for four weeks before the change was made. The above reproductions are about half the size of the original ads.

Took Man's Time to Watch Credits

Dakin Bros.' Hardware, Digby, Nova Scotia, Have Put Their Business on a Cash Basis —How They Advised Their Customers of the Change and Why It Was Being Made

AFTER carefully considering from every standpoint the question of putting their business on a cash basis, Dakin Bros. Hardware, Digby, Nova Scotia, adopted the plan on February 1. Their customers were notified of the firm's intentions a month before by the advertisements which appear above which were run in the local paper. In addition the firm mailed the following circular letter to its customers:

"Dear Sir or Madam:

"Just a few lines to advise you that on February 1st, 1919, we are doing away with credit business and putting our business on a strictly cash basis. This will be to the advantage of both our customers and ourselves. To our customers it means that they will be able to purchase many of our lines at a lower price than when we were using the credit plan, our 5 per cent. cash discount applying to purchases under, as well as over, $1.00. (The old credit plan carried a discount off purchases of one dollar and over only.) Of the few lines that under the old conditions carried no discount, about half will come under the discount now. Another benefit to the customer will be the fact that the 'good pay' people will not be paying for the omissions of the 'poor pay.' The benefit to ourselves will be that we will know at all times just where we are at, and that we will have more time for attention to our customers and to handle more business as the business expands. Few people realize that in a business of even small proportions as ours, it costs, besides the postage, stationery, etc., one man's salary to take care of our credit business.

Deposit Accounts

"To those not desiring to pay small amounts for goods purchased at short intervals we have arranged Deposit Accounts. This means that at the first of the month you deposit the approximate amount of your purchases during the following month or two months. This amount goes into our cash as cash and sales and the goods as taken out are entered against your deposit in a counter check of your own, the balance showing after each purchase. This is for our customers' convenience and is cash business. Our customer can tell by his or her sales slip when it is time to renew the deposit.

"All mills, Government accounts and garages will be carried on separate carbon copy sheets and are payable the 10th of the following month in full.

"We assure you of our earnest desire to serve you to the best of our ability under the new plan and solicit a continuation of your valuable patronage. We are,

"Yours faithfully
"DAKIN BROS.

MEET YOUR FELLOW HARDWARE MERCHANTS

Continued from page 37

for the past four years, an opportunity of having an ideal outing, meeting his fellow merchants, and getting a line on a thousand and one points in connection with his own business.

A Wise Selection

Hamilton is a central point, conveniently and quickly reached by all Ontario dealers. The city has an especial attraction for hardware men, because of the number of important manufacturing concerns located there. The visitors will be given an opportunity to see many of these plants, and this in itself is well worth while. As far as accommodation goes, there is nothing to be desired, and no better quarters could be obtained anywhere than those selected for the meetings. Every hardwareman should make it a point to attend this big meeting, and profit by the many features it offers, not only to each individual, but to the trade at large.

The nickel production of Canada last year, according to preliminary estimate was 44,600 tons, or approximately 90,000,000 pounds. The 1917 output was 82,338,380 pounds, or 41,887 tons.

Western Canada Can Absorb Soldiers

So Says R. W. Robinson, Winnipeg Manager, Thos. Davidson Company — No Need For Bolshevism — Committee Working to Absorb Returned Soldier in Congenial Occupation—Western Business to Be Better in 1919

"WILL the Canadian West be able to reabsorb the returned soldier?" HARDWARE AND METAL asked of R. W. Robinson, Winnipeg manager for The Thos. Davidson Manufacturing Co., Ltd., who has been on a visit to the Montreal factory.

"Yes, there will be no difficulty in this respect. It will be possible to take all that wish to come," he said.

This is an interesting view point, and as Mr. Robinson has lived in the West for the past twenty years his opinion has been based upon a grasp of conditions there which a tenderfoot could not possess in any complete degree.

"A committee of our new Board of Trade has been busy already in collecting information," said Mr. Robinson. "For instance, information has been secured from various companies and employers needing labor of various kinds and this data is so tabulated that, when a returned soldier comes back, it is possible to place him readily. This enables the former soldier to find congenial work, and he is therefore able to start in on employment with which he is familiar. Quite a good deal of this work has already been done."

Discountenances Bolshevism

Mr. Robinson replied to a question regarding the recent disaffection among the soldiers who were up in arms regarding aliens being employed there in various plants, by stating that this was the result of a wild agitation by supercharged socialistic elements, particularly from a certain section of the city of Winnipeg. Securing a considerable following, and by sowing the seeds of discontent, these people were able to raise a rumpus. "But," said Mr. Robinson, "the aliens employed are, for the most part, doing a very menial or inferior class of work,—most of them are mere truckers, and are doing a class of work that few returned men would be willing to perform."

There was not now, nor would there be any need for disturbances of this kind being continued. Work would be found, and of course as spring comes round there will be plenty of labor required, and the land awaits many strong men to till it.

One of the most serious problems is that of housing and no definite plan has yet been evolved dealing with this.

1919 To Be Record Year

"The year 1918 was a good one, from a business standpoint, but we are aiming to make 1919 better," said Mr. Robinson. "There is plenty of encouragement already in many ways and there will be need for a lot of goods of all kinds. Merchants had done well and were prosperous and there was a great deal of money in the hands of the people, generally. Farmers had secured big prices, and, although Alberta and parts of Saskatchewan had suffered from severe frosts, this had not been the drawback it would have been had the previous seasons not been prosperous. The country was pretty well fitted to stand this disappointment and loss.

Merchants Changing Methods

The manner of conducting business has changed much of late years, particularly in the matter of buying, Mr. Robinson pointed out. For instance, buying goods in carlots used to be very general. This has been superseded by a more general policy of frequently purchasing what can be readily disposed of within a given period of a month or two, or probably a little longer. The principle of stocking up in the old-fashioned way had been greatly curtailed and this has served to work several advantages. The dealer is enabled to carry a better and wider variety of goods and to spread his capital, in such a way as to give excellent service. Notwithstanding this, Mr. Robinson said that the average hardware merchant carried a good stock, and that to do business there, this was quite necessary.

Taking Cash Discounts

One of the most noticeable developments of recent months has been that of a desire upon the part of the retailer to take his cash discounts. "Several letters came to hand recently," said Mr. Robinson, "saying,—'For our purchases in 1919 draw on us 2 per cent. 30 days!'"

That this is fast-becoming a more or less general condition is reflected in the improvement of credits, Mr. Robinson pointing out that their collections during the year 1918 had been satisfactory, and that, as a matter of fact, the year's business was well cleared up before the end of December last.

The last statement is a remarkable tribute to the real conditions that must exist in the West, especially when viewed with reference to the great epidemic that prevailed in the latter part of the year.

"Very serious was the influenza epidemic," said Mr. Robinson. "So much so, that, in some districts, dealers claim that they lost as much as four and five weeks' business. This, in a large measure, was a distinct and definite loss. And it was very difficult for travellers to work their territory, for some of the small towns did not have the conveniences for dealing with the situation and merchants simply would not see the travelling men at all."

In a general way, Mr. Robinson felt that the merchant was getting cash or giving but a very limited credit, in any event.

The Future of Stoves

That there will be a good sale for stoves, and even on an increasing scale, is Mr. Robinson's opinion. The situation has been somewhat governed for a while past by the high prices prevailing. And, again, it was found that there were good and only fair seasons for selling stoves. Some years sales totalled large and perhaps the season following the movement would be less, indicating that the farmer was a better buyer in alternate seasons, or that dealers had success in stove-selling in cycles. But of the fact that there will be a big demand for stoves and ranges, Mr. Robinson was sure. The Western farmer is successful and needs a good range. That he can afford to buy it is generally agreed, and it is largely up to the hardware man to do the selling as he chooses. A regular and well-defined campaign should be a real help.

As to the class of goods wanted in Western Canada, Mr. Robinson stated that the better qualities were demanded, and that these were meeting with larger sale all the time.

VISITED ONTARIO FACTORIES.

R. A. Cowman, of the firm of Johnson, Clapham and Morris, Ltd., Manchester, England, made a tour of Western Ontario this week accompanied by R. B. Coulson of the Dominion Iron and Steel Company, Limited, Montreal. A number of factories were visited in order that Mr. Cowman, who is in Canada for the first time doing trade missionary work, may be able to see just what class of goods Canadian firms are in a position to supply to the British market. Mr. Cowman will return to England in March.

Montreal Retail Hardware Men Are Planning Closer Co-operation

AT a meeting of the hardware section of the Retail Merchants' Association of Canada, Montreal division, to select officers for the year, the following were chosen: President, E. Sauve; 1st vice-president, Arthur Leger; 2nd vice-president, H. Lambert; treasurer, H. A. Bernier, and secretary, O. Lafortune.

On accepting the presidency, and in making suitable acknowledgment of the honor, President Sauve outlined some important details that he thought should receive the attention of the hardware section of the association. That conditions in the trade could be improved he considered possible, and to this end invited the hearty co-operation of every member. Continuing, Mr. Sauve pointed out the desirability of inaugurating a series of lectures. These, he thought, should be on definite lines similar to those given in various parts of Canada last season. They could be given by merchants who had had wide experience in their chosen line.

That there should be more co-operation in the common cause of the retail hardware trade in Montreal was cited by the president elect, and he believed that there would be a greater effort made to increase membership, and he enjoined the members to attend as many of the meetings as possible. By so doing they would be able to gain help and give assistance to the general cause, and meetings will be the more interesting and profitable. "Enthusiasm is the key of success," Mr. Sauve said.

As a result of some discussion, the following resolution was proposed and unanimously adopted:

E. SAUVE
Elected president of the Hardware Section, Montreal Retail Merchants Association.

"Proposed by H. Lambert, seconded by O. Lafortune, that this section is entirely in sympathy with the early closing movement as approved by the two large meetings held on January 8 and 9, and that Mr. E. Sauve, the president, be named a delegate of this association to act for its members at the meetings of the special committee named by the civic administration to deal with this matter."

Sees No Menace to Canadian Trade in British Import Restrictions

JUST what effect the recent import restrictions put on a number of hardware lines by the British Government will have on Canadian export trade, cannot be predicted just now but Canadian firms who were seeking business in England are going ahead with their plans.

The stove manufacturers who, as stated in HARDWARE AND METAL recently, are sending A. M. Smith of the McClary Mfg. Co., London, Ont., to England, are not going to relax their efforts. Mr. Smith plans to sail on February 15.

A number of other manufacturers who planned to visit the Lyons Fair in France and at the same time size up export business prospects in England are going ahead with their original intentions.

Sees Big Business

R. A. Cowman of the firm of Johnson, Clapham and Morris, Ltd., Manchester, who is in Canada getting data for trade purposes, stated to Hardware and Metal that he does not think the restrictions will in any way interfere with Canadian trade. There are big openings in England, he says, for Canadian goods, especially enamel ware, stoves, pulp and lumber products.

"Licenses will be obtainable for the goods that are needed," he said. "The restrictions were imposed to protect British firms who had purchased stocks at high prices and also to protect the public against speculators. I am satisfied that they are only temporary.

Go After Business

"Canadian firms should go after business and go after it hard. Make every piece sent over advertise itself. Have the goods and the cases stamped 'made in Canada' in plain letters. Cases which are thrown away in Canada because of the cheapness of wood are carefully kept in England because they are costly there and are used many times. Every case stencilled 'Made in Canada' may be seen by hundreds of firms before it is discarded."

The British import restrictions which become effective March 1 include a number of hardware lines.

The following articles, will again be on the list of prohibited imports after March 1, 1919, and can then only be imported under special license:

Aluminum, manufactures of.
Aluminum powder.
Bath of metal, all kinds.
Cartridges, all kinds and parts thereof.
Cement.
Diatomite, or infusorial earth.
Electrotypes.
Fatty acids.
Fire extinguishers.
Guns, carbines, and rifles.
Lawn mowers.
Linen yarns and manufactures thereof.
Machine tools, and machinery driven by power and suitable for use in cutting, stamping, or working metal, including lathes, grinding machines, milling machines, boring and turning mills, drilling machines, power presses, planers, punching and shearing machines, shapers, forging machines, screw machines, cutting-off machines, chucking machines, gear-cutting machines, boring machines, centreing machines, slotting machines.

Machinery driven by power and suitable for use in cutting, working, or operating on wood, including sawing machines of all descriptions, general joiners, mortise, tenon, boring machines, lathes and rounding machines, box and cask making machines, and all machines accessory thereto, scraping and sandpapering machines, wheelwright machinery, firewood making and bundling machinery, wood, wool fibre, and pulp machinery, saw sharpening and setting machines, saw stretchers, and brazing apparatus.

Machines for grinding, planing, or molding irons.
Mops.
Mouth organs.
Oilcloth.
Plates and gilt wares.
Revolvers and pistols.
Sewing machines.
Slide rules for engineers and draftsmen.
Stoves and ranges.
Straw envelopes for bottles.
Soap.
Time-recording instruments of all kinds, and movements and parts thereof.
Vacuum cleaners.
Wringers and mangles.
Weighing machines, scales, and balances of all descriptions.

RULING FREES FIRM OF VICTORY BOND TAX

A concern which buys Victory Bonds with no intention of making them a permanent investment, which shortly sells them at a loss, is entitled to have such loss and other expenses deducted from the income which it received from the bonds in determining the amount on which it has to pay income tax. Such is the principle adopted by the Ontario Railway Board in a decision which relieves the Massey-Harris Company from most, if not all, of an income tax on nearly $50,000 of interest on Victory Bonds bought in 1917 and sold in 1918. What would have happened if the company had kept the bonds until 1919 is not stated; in that event the interest received during 1918 would apparently have been taxable. Toronto civic officials are not pleased with the judgment and may appeal.

Grey Colored Cards Last Longer

Do Not Get Dirty So Quickly as White Ones — A Practical Suggestion For the Card Writer—How One Store Speeded Up Number of Show Cards Being Made

By R. T. D. EDWARDS

THIS is third of a series of articles on departmental store cardwriting, which will not only aid the large store cardwriter in his work, but will be of benefit to the cardwriter who does things in a smaller way.

The store referred to in this article is one of the largest in the Dominion and has a great area of selling space. Consequently the number of show cards used, both inside the store and in the windows, is enormous. Many hundred

cards have to be made daily, both for replacing soiled cards and for new displays.

Dirty Cards Repulse Trade

To keep the cards clean is the most difficult proposition in a large store. Cards are continually getting dirty or broken and should be replaced with new ones at once. That is an important point in showcarding any store. Cards must be kept clean at all times because they are the mouthpiece of the interior of the store, just the same as the show windows are the mouthpiece outside.

To keep cards more presentable, and to avoid the greater consumption of cards, this store changed their regular store cards from white to a mist grey color.

The grey cards have proven to be a great success, because they do not show dust or finger marks as quickly as the white.

Grey cards are used for everything but "advertised" and "sale" cards. For these, white cards are used with black or red color for the printing.

All cards are of uniform size, both in the windows and on the counters—5½ x 7; 7 x 11 and 11 x 14 being the various sizes most frequently used.

A uniform style of lettering is used on these cards, which can be quickly formed and which is quite readable.

The system for operating a cardwriting office in a departmental store depends largely upon the amount and quality of cards that it has to turn out. Many offices are run in a haphazard way. That is, every writer lays out and rules his own work and sorts it when completed. This is a very expensive method. If an employee is a cardwriter, and there is enough work to keep him going, he should not be doing work which can be done by cheaper help.

Speeding Up the Work

First of all, the larger stores need one person who can do everything about the office except write cards. That is, he must be able to take care of stock, see that it is kept in good condition and see that it doesn't get low.

SUGGESTIONS FOR YOUR SHOW CARDS

In the store referred to this man lays out orders as they come in. The cards are ruled in pencil very lightly so that no erasing is needed, with correct layout-stencil, an assortment of which is always kept, and piled in a cabinet which has various sections denoting the time the order had come in.

The work is then ready for the cardwriter. After cards are written, they are sorted again by the helper back to the department card cabinet where they await being called for.

If the card is grey with black letters, white underlining is used. This can be done by the helper after some practice.

If this system is carried out, the cardwriters very seldom have to get off their chairs. This means at least two to three times as many cards can be handled as by the old method of every man for himself.

A Big Day's Work

More than sixteen hundred cards were written in a day by one man in this store on account of using this system and not having to get off the chair.

So you will find that in smaller store work, this system can be worked out to a great degree without making the work any harder. Have a helper prepare all the work for you while you do other things of greater importance.

EDITORIAL COMMENT

THERE are very few articles you have to sell which will not be better sold and oftener sold if you display them in the best possible manner.

* * *

THERE are places in most stores right now where merchants could profitably display some of the goods they are keeping hidden away out of sight.

* * *

DON'T forget the annual convention of the Ontario Retail Hardware and Stove Dealers' Association in Hamilton on February 18, 19 and 20. Come and meet your fellow hardware men and talk things over with them.

A STEADILY EXPANDING BUSINESS

CANADA is now one of the largest buyers of rubber tires that the United States has. Last year the Dominion took tires valued at $1,859,225 from American firms. Of these, no less than $1,766,518 were automobile tires. The next largest buyer was Argentine, which took auto tires valued at $1,649,840. These large sales show the increasing extent to which automobiles are being used by the farmers. In many districts in Canada now, practically every farmer has a car and many of them have trailers also, which they use to rush their produce in to the market. There has been a noticeable jump in the sales of autos in some of Canada's richest farming sections and the only thing that will prevent new records being made in auto sales this year seems to be the inability of the makers to produce the goods. Another line that promises to be a record seller from now on is tractors. The tractor business now is where the auto business was a few years ago, just getting started. Hardwaremen who have cashed in on the auto accessory business may find that by adding tractor lines, as soon as the demand is apparent in their district, they can more than double their profits and build up a steadily growing business in these lines. While the tractor is here to stay because it has demonstrated its value, the development has been too recent for the sales to be general, but it is predicted, and there seems some reason for the prediction, that the time is not far distant when every farmer will have his auto and his tractor. This and the auto business are fields well worthy of the hardware dealer's most careful consideration.

THE MAIL ORDER HOUSE A GREAT TEACHER

THE annual report of Sears, Roebuck & Company shows that the gross sales of this great mail order concern were $25,000,000 greater than in the previous year, and an increase of more than $50,000,000 from the sales of 1916. These figures give some indication of the way in which the mail order house is gaining in the favor of the public.

There is a tendency on the part of many merchants to look with fear on these advances and to feel that their days are numbered. As a matter of fact, there is little to fear. The mail order house is unquestionably taking business from some merchants, but the additional turnover is not due to this but largely to the actual cultivation of business. The mail order house is actually making customers, for themselves primarily, of course, but for the live merchant also who is wise enough to adopt progressive methods, and to take advantage of the growing demand that these large organizations are cultivating. The mail order store is the livest teacher that the retail merchant has ever had, and the merchant who heeds the teaching is prosperous. The mail order house casts no shadow on the doorstep of the wide-awake merchant. If he is losing ground it is probably the merchant himself who is to blame.

DAYLIGHT SAVING

THE Daylight Saving plan will likely be considered again this year in many parts of the Dominion. As will be noted on another page of this issue the executive committee of the Canadian Bicycle Dealers' Association has already gone on record as favoring the plan. Last year there was a wide difference of opinion over the matter. Many merchants bitterly opposed the measure. Others were just as strongly in favor. Whether the Government will take action again this year to make the Daylight Saving plan general remains to be seen. It is stated in some quarters that the Government, now that the war is over and greater production is not so urgent, may leave the question for each municipality to decide for itself. One of the chief difficulties in connection with this might be the confusion resulting in regard to train time. This, however, would be a matter for travellers to solve. In a general way it would appear that city merchants and

their employees are inclined to favor the plan, while in the country districts there is much division of opinion.

A PROTECTIVE MEASURE

THE placing of import restrictions by the British Government on a large list of articles which have hitherto been on the free list will temporarily affect some Canadian firms who have been sending goods to Britain. The reason for such action on the part of Great Britain is not hard to understand. For more than four years British firms have been subject to the shocks of strains of a war which necessitated the most stringent economic redajustment and very often the entire sacrifice of private business. With the sudden return to peace conditions and American, Canadian and other firms seeking to secure business some action was necessary to enable British firms to regain their equilibrium. A temporary restriction on imports will, it is believed, give British manufacturers an opportunity to re-establish domestic business conditions on the basis of pre-war days and tend to stabilize the entire commercial fabric. There is nothing to indicate that the restrictions are to be permanent. Almost coincident with the announcement regarding the import restrictions came word that British shipowners had made a most important cut in trans-Atlantic freight rates. In spite of her losses from the submarines Britain still controls the carrying trade of the world and now that her ships are free again, apparently she does not propose to let Americans or others take away this vast business. American shippers at once announced a reduction of 66 2/3 per cent. in tariff charges between Atlantic and Gulf ports and ports in the United Kingdom and France. It looks as if the trade war which was predicted after the war with the Hun is on in earnest.

STEPS TO SUCCESS

MANY men, especially the younger men, do not always realize the important bearing that choosing their associates, has upon their future. Mingling with men who are successful, and who are accomplishing things, is a wonderful stimulus. Association with men who are always bright and optimistic will give one an entirely different outlook on things. The reverse is also true. If men spend their time with those who are not ambitious, or lazy, or habitual failures, they generally turn out the same way. It will make all the difference in any man's career if he keeps close to those whose actions will inspire him, and avoids those whose course in life tends to discourage him. The man who remains for any length of time with comrades who are inefficient, and lack ambition, generally loses the desire to live up to the best that is in him. There is no question about the influence environment exerts.

WHAT OTHER EDITORS SAY

THERE is more need now to organize for production than there was during war time to organize for destruction, yet our leaders fall down on the job. Where are our statesmen? Are they all gone to sleep?—Cranbrook *Herald.*

* * *

WHAT a wonderful thing it is to live in Canada on the very threshold of her great progress? With her wealth of nature, "the greatest available unturned agricultural soil in the world," the Dominion is bound to become a power for good, a power that can make other nations less blessed follow her democratic, unselfish endeavors.

This period following the great war is truly that of Canada. It is up to her people to make the most of it. To do so they must have confidence in their nation. With confidence Canadians can carve a name in the arts of peace no less renowned than that the sons of this Dominion engraved on the scroll of the field of battle. —*Border Cities Star.*

"THE time to push is when the momentum from without has ceased. Now is the time for the man of the future to invest in the future. If he has any building to do, let him do it now. If he has a stock to create, let him make it now.

"Nobody is taking any chances when he gets busy meeting the future beforehand.

"This little breathing spell is a good thing to take advantage of. Now is the time to spend money and prepare for to-morrow's business, because it is going to come rolling in fast."—Henry Ford in the Dearborn *Independent.*

* * *

THE Manufacturers' Association does not now want any disturbance in the trade of the country which would be caused by a discussion on the tariff, although some time ago its then president published a manifesto in which he advocated strongly that readjustment of the tariff to a higher standard was necessary. The demands of the farmers for reduction of tariff generally, especially on British goods, for increase of reciprocity with the United States, free farm implements and so on, have made it appear that discretion would be the better part of valor, and the M. A. thinks it would be better to postpone this until other questions of reconstruction arising out of the war are settled.—Stratford *Beacon.*

* * *

THERE has been quite an agitation throughout the country for some arrangement whereby the excessively long Saturday business day can be abolished. It now seems probable that the deadlock between merchant and customer will be broken, at least in spots, within a short time. Goderich merchants have announced their intention of closing their stores on Saturday evenings at 9 o'clock, and the retailers in London are going them one better, declaring that 8 o'clock is late enough.

What can be done in one locality is not always possible in another, and there might be reasons which would render 8 o'clock closing in Ridgetown inadvisable on Saturday evening. There does not, however, seem to be any necessity for the midnight sessions now prevailing.—*The Dominion,* Ridgetown.

* * *

AT a meeting of the Ontario Motor League held in Toronto, Hon. F. G. Macdiarmid, Ontario Minister of Public Works, promised the League that 100 miles of automobile speedway would be built this year. The proposal to spend some three million dollars of the people's money in this way is the wildest scheme of public exploitation that has ever been attempted in Canada and some of them have been very bad. The United Farmers of Ontario have decided to protest against this unprecedented outrage and if they do not prevent it they might as well disband.—Forest, Ont., *Free Press.*

EVENTS IN THE TRADE

Business Changes

Napanee, Ont.—J. G. Fennell, hardware, has sold out.

Newmarket, Ont.—J. A. W. Allan & Co., hardware, have sold out.

Merrickville, Ont.—F. W. Blanchard succeeds W. Miskelly, hardware.

Kingston, Ont.—W. H. Cockburn & Co. succeed Botsford & Nicol, hardware.

Wymark, Sask.—H. C. Nickel has purchased the hardware stock of J. A. Leoppky.

Innisfree, Alberta.—Norris Bros. have purchased the hardware business of J. H. Hughes.

Obituary

John B. McMurchy, for many years general manager and superintendent of the D. F. Jones Shovel Company, died at his home in Gananoque, Ont. He was a member of the council for many years and for half a century had been actively identified with the industrial life of the town.

Stephen King, whose death occurred at Stratford, following a somewhat extended illness, was for over thirty years in the hardware and tinsmithing business at Ingersoll, Ont. Four years ago he disposed of his business to D. N. Flander, and had since resided in Stratford.

Fire Losses

Fire which may have been due to defective wiring caused a loss of $1,000 in the brass manufacturing plant of W. C. Hunt, 59 Paton Road, Toronto .

Personals

F. J. Sanders, of Kandahar, Sask., spent a few days in Winnipeg on business this week.

C. Jacobs, manager of McNaughton's Hardware at Craik, Sask., was in Winnipeg on business this week.

J. J. Cunningham, president of the Western Foundry Co., Limited, Wingham, Ont., has left for California, where he will spend the winter.

J. A. Sutton of the Aylmer Pump and Scale Company, Aylmer, Ont., has left for Montreal to take a position as secretary of the Bowser Company.

W. Dennison, of Ross & Dennison, Assiniboia, Sask., spent a few days this week in Winnipeg, looking over market conditions for the coming season.

George Campbell, manager of the Imperial Oil Company's branch at Swift Current, Sask., is holidaying at Stellarton, Nova Scotia for three weeks.

CAPT. GODFREY DARLING

Advertising manager of G. F. Stephens and Company, Limited, Winnipeg. Captain Darling was one of the first to enlist after war was declared. Joining the Fort Garry Horse as a private he worked his way up and after 18 months' work in the trenches qualified for a commission in the Imperial Army and was attached to the tank service. He returned recently and resumed his duties in Winnipeg.

S. W. Smith, Toronto manager Brandram-Henderson, Ltd., paint manufacturers, was in London, Windsor, and other Western Ontario points on business the latter part of this week.

The George Clark, of the McClary Mfg. Co., London, Ont., was elected a director of the Association of Canadian Advertisers at their annual meeting in Montreal.

Charles S. Kennedy, formerly general manager of Lowe Bros., has recently been made general manager of the Minnesota Linseed Oil Paint Co. of Minneapolis.

Lieut. W. E. Hargreaves, 1st Canadian Tank Battalion, who has been critically ill in an English hospital from pneumonia, is recovering. Prior to enlisting he was assistant factory superintendent of the G. F. Stephens Company, Limited, Winnipeg.

Mr. R. P. Boyes, formerly with the St. Marys Milling Co., St. Marys, Ont., has taken a position with Parsons' Fair and Hardware. He has returned from Meaford where he reopened the store which had been closed, the whole staff being laid up with the "flu."

Trade Notes

The Reliable Vacuum Cleaner Co., has been registered at Montreal.

H. C. Rusling has purchased the auto accessories' business of Ernest Millard.

Frank Koehler contemplates opening a hardware and saddlery store at Watrous, Saskatchewan.

The Imperial Sheet Metal Works, Sarnia, Ont., W. C. Keller, manager, will move to new quarters in the old Exchange Hotel building.

Peters Bros., hardware, Radville, Sask., have purchased another building which will be used for storage purposes.

The Elgin Motor Car Corporation of Argo, Illinois, contemplates the establishment of an assembling plant in Winnipeg.

The United Rubber Manufacturing and Reclaiming Company, Toronto, commenced operations this week. R. G. Wooten is the manager.

Silvester Bros., Stouffville, Ont., are having a cement floor put in the basement of their hardware store and are making other improvements, among them being a fire-proof room for oils.

The Walton Compapny's sash and door factory, of Belleville, Ont., has been sold to a firm of four Belleville men, Messrs. R. J. Graham, Harry Perry, Myron Ellis and Caniff Ruttan.

The Flexible Skate Company has been organized at Parry Sound, Ont., to manufacture a skate invented by J. A. Bragg. The officers of the company are: President, C. L. Falstrom; vice-president, J. A. Bragg; secretary-treasurer, E. E. Armstrong.

The firm name of Cinnamon, Allin, Limited, hardware, Lindsay, Ont., has been changed to Allins' Limited. No change is made in the management, the directors being, president, A. W. Allin; vice-president, A. M. Allin; secretary-treasurer, W. G. Prouse.

At the ninth annual convention of the agents and travellers of the Renfrew Machinery Co., Refrew, Ont., reports showed a splendid year's business. The convention lasted three days and was attended by nearly one hundred of the firm's men. Prospects for 1919 are regarded as excellent. The officers of the company are J. L. Murray, president; F. D. Vickers, general manager; Senator O'Brien and Thomas Low, ex-M.P.

Montreal News

O. N. Parent, representing Canadian Yale and Towne, Limited, was a Montreal visitor this week.

F. S. Amidon, with the Trimont Mfg. Co., of Roxbury, Mass., was in Montreal this week.

J. H. Conover, Toronto manager of the Martin-Senour Company, was at the Montreal office this week for several days.

Alfred Blackburn, of the H. & D. Folsom Arms Co., Broadway, New York, was a Montreal visitor this week.

B. A. Burke, of the Corning Glass Works, Pyrex Division, was in Montreal this week.

George Henderson, president of Brandram-Henderson, Limited, is in Halifax this week attending a meeting of the company.

A. N. Creamer, advertising manager of Brandram-Henderson, Ltd., has been indisposed for a few days.

H. M. Bolger, sales manager at Montreal for the McClary Mfg. Co., has been in Ottawa and Toronto this week.

A. C. Gibb, representing Alexander Gibb, wholesale metals, chain, etc., was in Ottawa recently.

Winnepeg News

W. L. Pattinson, another Ashdown man, has returned from service and will be taken back on the travelling staff.

R. A. Graham, sec'y-treasurer of the J. H. Ashdown Hardware Co., Winnipeg, has been in Western Canada for a fourteen days' business trip.

C. H. S. Bamford, sales manager of the J. H. Ashdown Co., Winnipeg, was back at his desk last week, after a serious illness. Mr. Bamford has been down for over a month with the flu.

W. G. Snell, who belonged to the Royal Flying Corps, has returned to his old position with the J. H. Ashdown Hardware Company, Winnipeg. He is covering a part of Manitoba and Saskatchewan.

Gordon Hawley and Alf. Crookes, who are both connected with the Ashdown plumbing department, have returned to their old positions, after being on active service. J. Seater, another member of their plumbing department, who has been overseas, is also back on the job.

Regina News

P. H. Jamieson, representing the Canadian Asbestos Co., Montreal, Quebec, was in the city this week.

Mr. Fairer, sales manager for Wood Vallance Co., Winnipeg, called on hardware merchants in the city this week.

A. D. Westman of the Chatham Malleable & Steel Mfg. Co., Chatham, Ont., called on the auto accessories trade this week.

George R. Dowswell, of Armstrong, Smyth & Dowswell, is in Winnipeg this week on a business trip.

D. Ackland & Son, Ltd. Open Accessory Dept.

D. Ackland & Son, Ltd., Winnipeg and Calgary, are branching out into the automobile accessory business. The blacksmith will undoubtedly be affected by the large number of automobiles being used in Western Canada by farmers.

This means that there will be fewer light driving horses, and that in turn

R. P. ACKLAND
Of D. Ackland & Sons, Ltd., Winnipeg, who will manage the firms news auto accessory department.

means that light shoeing will, to a great extent, fall off.

In order to supply blacksmiths who wish to cater to the automobile trade, as well as hardware dealers, D. Ackland & Son, Ltd., have put in a complete line of automobile accessories, consisting of articles such as are in demand for automobiles every day. They will handle a certain number of specialty lines, but will keep as much as possible to lines that are more staple. Besides their regular staff of travellers, this line will be handled by a separate staff of salesmen.

R. P. Ackland has been appointed manager of this department. He has been with the firm for four years, in which time he has secured a thorough knowledge of the Ackland business. Prior to coming into his father's business, he was with the Marshall-Wells Co., Ltd., wholesale hardware realers, Winnipeg.

Incorporations

Edward Thorne & Co., Limited, capital $100,000, head office, Montreal, plan to carry on the business of chemists and color grinders and deal in paints, oil and varnishes.

Robertson, Olsen, Limited, head office Ottawa, capital $100,000, plan to manufacture and deal in machinery, electrical supplies and iron and metal goods.

Montreal Supply Company, Limited, capital $50,000, head office Montreal, plan to carry on the general business of dealers in hardware, implements, toys, furniture and gramophones.

Asbestos Coverings & Lubricants, Ltd., head office Montreal, capital $100,000, plan to carry on the mining and manufacture of asbestos.

News From St. John

The Fredericton branch of the Retail Merchants' Association has elected officers as follows: President, C. H. Burtt; vice-president, W. A. Searles; second vice-president, H. E. Harrison, secretary, C. W. Hall; treasurer, W. R. Fraser.

The St. John Board of Trade has endorsed the adoption of daylight saving for 1919, but urges on the Government that it should end September 30, instead of later. The council of the board also urges the revocation of the business profits tax.

It is reported that T. McAvity & Son's plant in Rothesay avenue, which has been closed since munition making stopped, may soon re-open for the manufacture of sheet and steel platings. The company has not made any announcement yet.

Harry J. O'Neil has been appointed manager of The James Robertson Co., Ltd., St. John Branch, succeeding the late John Keefe. Mr. O'Neil has been with the company 21 years and for the last year and a half, during Mr. Keefe's illness and since his death, has been acting manager.

John Findlay, who is investigating the possibilities of Canadian trade with Siberia, at the request of Sir George E. Foster, visited St. John recently. He expressed the opinion that the three local wire nail factories and the brass and iron foundries could supply goods for which there is a keen demand in Siberia.

With the release of shipping by the Governments, trade by water carriers is getting back to a pre-war basis, with satisfactory results from the trade standpoint. The West India service now is practically complete again. The large steamers which operated between St. John and Boston soon will be released and a better service in the Bay of Fundy is promised.

LONDON HARDWAREMEN FAVOR EARLY CLOSING

At a meeting of the Retail Hardwaremen held on Thursday evening, January 30, it was unanimously decided to endorse the suggestion of the Chamber of Commerce regarding early closing on Saturday evenings. It was the opinion of the meeting that all downtown stores should be closed at six o'clock every evening during the week. Under no circumstances would they consider giving up the Wednesday afternoon closing during the summer months.

The London Retail Hardware Association will also hold a big banquet towards the end of February. Many prominent trade representatives have been invited.

ANNOUN
TO OUR

FOR some time past we have been facing a vital problem, and the coming of peace has accentuated this to such a degree that a decision could no longer be delayed. As this decision directly affects our customers, we are losing no time in acquainting them with the situation.

Briefly, it is this:

On December 31st, 1918, the Victor Saw Works, Limited, completed their sixth year in Canada of the manufacture of VICTOR Blades.

Our experience during these six years, with the depressions of 1913 and 1914, inflated manufacturing periods of 1915, 1916 and 1917, and declining prosperity to a nominal base in 1918, has forced us to arrive at a conclusion which we at first refused to acknowledge.

There is not a market in Canada for hack saw blades which warrants a plant for the manufacture of this product.

We have been a long time in coming to this conclusion—we have analysed the past—investigated the future possibilities—considered various ways of meeting the difficulty, and have regretfully decided that there is no other course for us to adopt than to discontinue the manufacture of VICTOR Blades in Canada.

Of course we realize the possibility of staying in the market by reducing our quality, but this is an alternative which we refuse to consider. The VICTOR Blade is undoubtedly the leading hack saw blade on the market today. This is a statement we very seldom make, but one which we have demonstrated to be true. We are told that our service is not approached by any hack saw firm in America, and our policies are unique. We are naturally very proud of these distinctions, and we will not sacrifice them one iota to make a success of any market.

CEMENT FRIENDS

CANADA has been good to us, and we have a strong, sentimental attachment to the business men of the Dominion that only the stern logic of facts has been able to offset. For the past six years we have been one of them, facing the same problems and contributing our mite to the common good Our intercourse in the future will naturally be limited by our decision, but we hope and believe that our relations will be none the less cordial.

For the present we shall continue to do business at the same address. When our present stock is exhausted, our Canadian interests will be taken over by the Victor Saw Works, Springfield, Mass., who have been in business for the past twelve years, and who manufacture VICTOR Blades on the same high standard of quality and are governed by the same principles and policies as we have followed in Canada. If there is one essential that we will pass on to them, it is the necessity for giving the finest kind of service, and as we have been intimately associated with them, we can speak with confidence of their determination not only to maintain, but to improve our standards.

As an earnest of this, we would point out that Mr. C. C. Jackman, who was formerly superintendent at Hamilton, is now Factory Manager at Springfield, and that Mr. E. S. Bradford and the writer occupy the same position in both Companies—Treasurer and President, respectively.

Mr. H. W. Holmes, our Manager, will continue to care for our Canadian affairs, and our sales personnel will be as heretofore.

May we take this opportunity of thanking you in all sincerity for the splendid co-operation and encouragement you have given us in the past. We have tried hard to merit it—we will continue to try just as hard, confident that we shall receive a like measure of your support.

Yours very truly,

Victor Saw Works, Limited

W. F. POLLOCK, President

Montreal Men Honored by Places on Board of Trade Council

MONTREAL business men paid a splendid tribute to two men prominent in the metal trade and to a paint manufacturer when at the annual election they returned as members of the Council of the Board of Trade, W. S. Leslie, Charles G. Drinkwater and Walter B. Ramsay.

W. S. LESLIE
President of A. C. Leslie & Co., Limited, Montreal.

So wide has the scope of the Board's operations become that a seat on its council is a distinct honor, and when an election for this office is announced, the competition, while friendly, is decidedly keen. Such it was this year and the return last week of the men mentioned bears tribute to the importance of the office, and to the personal esteem and respect in which the successful candidates are held.

W. S. Leslie

W. S. Leslie, president of A. C. Leslie & Co., Limited, wholesale metals, and nominee of the wholesale metal and hardware section of the Board of Trade, has been connected with the metal trade in Canada since 1885, and from 1889 to 1895 he represented the firm, which was originally a partnership, in Toronto. Returning to Montreal in 1895 he was admitted to the firm as an active partner.

In 1907 the company was organized as A. C. Leslie & Co., Ltd., and Mr. Leslie was then chosen as its president, a position he has continued to hold since. The firm has been in existence for over fifty years, being established in 1866 by Mr. Leslie's father, the late A. C. Leslie.

Mr. Leslie's connection with the Montreal Board of Trade covers a period of over 20 years. Its growth has been steady and very marked over recent years especially, and his election to the Council of the Board is a distinct token of respect and esteem, and as well—a tribute to his business ability.

In addition to his activities in connection with various patriotic efforts in Montreal since the outbreak of the war, Mr. Leslie has been actively identified with the Montreal Y. M. C. A., and is at present treasurer of the local Board. He is also president of Adam Hope & Co., Ltd., wholesale metals, Hamilton, Ontario.

He has also been connected with many of the charitable and benevolent works in and about Montreal.

Walter B. Ramsay

With invested capital aggregating over forty million dollars, the paint and varnish trades, as represented by the Paint, Oil and Varnish Association, through the Montreal section, felt that it should have special representation on so important an organization. In accordance with this Walter B. Ramsay, president of A. Ramsay & Sons Co., and managing-director, was selected as the Association's nominee at its recent meeting, and through the efforts of its members, was elected to the Council of the Board of Trade as announced in HARDWARE AND METAL. If ever there was a year in the history of the trade when representation was desired and important, it is in this year of reconstruction policies.

Mr. Ramsay has been connected with his firm for many years, having entered his father's employ in 1890 and serving in various departments. On the death of his father, Alexander Ramsay, in 1916 he succeeded him as president and managing-director.

In addition to his connection with the paint manufacturing business, Mr. Ramsay is a member of the Canadian Manufacturers' Association and a life governor of both the Montreal General and Western Hospitals. In a military way he is Captain of the 5th Royal Highlanders.

WALTER B. RAMSAY
President and managing director of A. Ramsay, Son & Co., Montreal.

C. Graham Drinkwater

Charles Graham Drinkwater, the vice-president, sales manager and a director of The Canadian Fairbanks-Morse Company, Ltd., was also chosen by popular election to the Board of Trade Council.

CHARLES G. DRINKWATER
Vice-president and sales manager of the Canadian Fairbanks-Morse Company, Limited.

Mr. Drinkwater is widely known in Canada and the United States and has a wide connection with the machinery business in various capacities and in many sections of the country. He was with Ingersoll, Sergeant Drill Co., Easton, Pa.; James Cooper Manufacturing Co., Montreal; Rand Drill Co., Tarrytown, N.Y.; Canada Foundry Co., Toronto, and with the Canadian Fairbanks-Morse Co. Since 1913 he has been the vice-president and sales manager and director of this company.

MONTREAL MOTOR DEALERS TO SHOW NEW MODELS DURING COMING WEEK

While there is likely to be a massing together in one place of various motors, including passenger and tractor styles, Montreal automobile dealers have not been enthusiastic in the matter of holding a big Show this year owing to the difficulty of securing suitable quarters in which to exhibit. This has prompted many of them to announce a greater interest in their individual showings and plans are now being perfected for the display of 1919 models during the week of February 10. It is proposed to have concerted action at this time when the latest models will be displayed and prices announced to those interested.

Two Calgary Firms Are Merging Interests

The hardware firms of F. J. Marshall & Co., and Bever Bros., both of Calgary, has taken place and as soon as incorporation is complete the business will be known as the Marshall Bevers Hardware Co., Ltd.

F. J. Marshall is president, T. H. Bevers, secretary; and R. F. Bevers, treasurer and manager. Previous to amalgamation, Mr. Marshall had been in business in Calgary for five years, having come from Orangeville, Ont., to settle in the West. Bevers brothers have spent seven years in business here, and were formerly in Chicago, where both gained valuable experience with well known hardware firms, both in the wholesale and retail sections.

The firm intend to keep both the stores open, as they state that business is exceptionally promising.

Calgary Firm After Chicken Fanciers Trade

Calgary is known to be a "great little city" for all kinds of fanciers, and the Ashdown Hardware Co. is quick to take advantage of the fact. Always smart and up-to-date in their window dressing, their showing during the last week in January of incubators and brooders attracted a good deal of attention. Being a line that is somewhat out of the ordinary for a hardware store, the window dresser, Mr. A. Bowen, used all that would be of interest to chicken fanciers.

With an incubator and brooder as the central objects, the balance of the window was taken up with the various articles the chicken fancier needs. Food hoppers, water troughs, identification rings, grit, poultry food and nest eggs, with the bright yellow head of a baby chick or two peeking from some obscure corner made up a display that brought up with a short stop many a passer-by.

It was the kind of window that gave people "the notion" so to speak, a window that said, "I suggest that you go in for chicken raising this summer. It is interesting, pleasant and paying." One man was heard to say: "My wife was at me all last year to start in. She had me half convinced by her arguments. This window convinces me another quarter, and if she happens to see this, the whole argument will be completed, and I have a picture of myself chasing chickens all next summer."

SUPPLIES OF PISTOLS MAY SOON BE AVAILABLE

A. Macfarlane, of A. Macfarlane and Co., Montreal, stated to HARDWARE AND METAL that improved conditions will enable the Colt Patent Firearms Co. to again make quotations on their lines to the Canadian trade. "This firm will be sending out new prices in about a week," said Mr. Macfarlane. "They are completing Government contracts and will be in a position at an early date to take care of domestic orders, from the Canadian trade and elsewhere.

"Tom" Houghton Joins Lewis Bros.' Sales Staff

"Tom" Houghton has joined the sale staff of Lewis Bros., Limited, wholesale hardware, Montreal, and will be assistant to John A. Frazer, sales manager, succeeding Mr. Nickerson.

Mr. Houghton has been connected with the trade in both retail and wholesale branches for a great many years, especially in Western Ontario.

"TOM" HOUGHTON
of Montreal who will be assistant sales manager of Lewis Bros., Limited.

Born at London, Ontario, Mr. Houghton early entered the employ of the Hobbs Hardware Company. From here he went to Cleveland, Ohio, and was connected with the wholesale hardware firm of McIntosh, Huntington Co. for some four years.

Returning to Canada he entered the retail hardware business on his own account at Forest, and was there for some years. Subsequent to this, a second engagement with the Hobbs Hardware Co. brought him into touch with Western Ontario hardware trade as sales representative for this firm. Later on he represented Lewis Bros., Limited in the Western Ontario field for two years, resigning to enter the retail hardware business at Parkhill, where he purchased the Steel hardware store. While here Mr. Houghton took a keen interest in public affairs and was an alderman for some time. He also took a real interest in athletics.

In 1915 he entered the service of the Martin-Senour Company of Montreal, representing them in Eastern Ontario for a short time, and later became advertising and sales promotion manager, with headquarters at Montreal. This position he occupied until February 1, when he again joined Lewis Bros., Ltd.

The Quebec executive, sales and the office staffs of the Martin-Senour Co provided a happy surprise for Mr. and Mrs. Houghton on Tuesday evening at the home of Manager A. T. Black. Having resigned his position with the firm as sales promotion manager, the friends of Mr. Houghton embraced the occasion to wish him well, and the arrangements made possible through the kindness of Mr. and Mrs. Black were a complete surprise to Mr. and Mrs. Houghton. Some 35 or 40 were present.

The musical part of the program was very enjoyable, and cards and dancing were features of the evening's program.

On behalf of the staffs, Manager A. T. Black, in a neat speech, made Mr. and Mrs. Houghton a presentation of a fine Jacobean library table and chair, and suitable acknowledgment of this was made by Mr. Houghton.

A vote of thanks to Mr. and Mrs. Black, as hosts, was proposed by Mr. Kendall, sales manager of the Martin-Senour Co., and this was heartily supported.

F. A. Mann Appointed Trade Sales Manager

W. S. Fallis, managing-director of the Sherwin-Williams Company of Canada, Limited, stated to HARDWARE AND METAL that he has made several important appointments, the same to become effective at once.

"F. A. Mann," said Mr. Fallis, "is appointed to the position of trade sales manager. This has been necessitated by the constantly-increasing business of the company, and the office is a newly-created one. It has been felt that a capable sales manager at the head office would be beneficial in assisting the outside salesmen, securing closer co-operation and better returns.

"Mr. Mann was with the sales department for nine years, filling various offices, and being familiar with every phase of the work. For the past four years he has been our advertising manager, and his varied experience fits him well for his new work."

W. J. Delaney, assistant advertising manager, has just been appointed to this office. In connection with the work of this department he has served under Mr. Mann for several years, and is also familiar with the details and plans of this department.

B. E. Newmark has been selected as sales promotion manager. Mr. Newmark has done duty overseas, where he was seriously wounded in his country's service. Recovering his health, he returned to Canada, and with previous experience in the sales end of the business, he comes back to a position that will be quite congenial and in which he will doubtless feel at home.

Stephens Paint News

"Stephens Paint News," published by G. F. Stephens & Co., Limited, Winnipeg, is again in circulation. It was suspended when Captain Godfrey Darling, the advertising manager of the firm, enlisted for overseas service.

THE CLERKS DEPARTMENT

FIVE DON'TS FOR CLERKS

By ONE OF THEM

SOMEONE asked me what help or advice I would give a young salesperson behind a counter for the first time. After thinking it over I decided that the best advice to give was a few "dont's" that experience had taught me. The rest is comparatively easy—and a matter of experience. I might say, however, that it would pay many experienced salespeople to observe some of these "dont's"—for they are based on what I found to be the commonest mistakes of salespeople:

First.—Don't get impatient with a customer. Even if a fussy old lady takes almost an hour to select a box of hairpins, try to keep your temper and avoid any hint of impatience in your voice. This is ofttimes hard, but it pays in the long run. I once sold a blanket to an elderly lady who took almost an hour and a half to select it. It was hard—but I tried not to look weary. Apparently she appreciated this, for she asked for my name and came back with her daughter-in-law the next day and bought $143 worth of goods.

Second.—Don't give your personal experience in favor of or against any goods—trying to urge a customer to buy. It may hurt your pride to realize this truth, but customers emphatically do not like to be reminded by a salesperson: "I've tried it and it wears wonderfully." Customers like to discover things for themselves—even at their own expense, rather than be guided by salespeople's experiences. This is invariable. Therefore, even if you feel like giving your personal experience—don't.

Third.—Don't look off in the distance, bored, or tap your foot impatiently when a customer is making up her mind about buying something. Appear interested and really help her to decide. After all, it's a law of human nature that people like to have their minds made up for them. While you can't exactly do this, you can give the good points of a particular article and perhaps help a customer decide. A doubtful customer is, as a rule, easily swayed, and by good, live salesmanship at this important time of deciding, you can do big things. You'll find that such a customer appreciates your interest and assurance.

Fourth.—Don't correct a customer's pronunciation of a style, a fabric, a book or a brand. If she asks for something by a wrongly-pronounced name, when you repeat it, if you have occasion to, don't use the right pronunciation and make it apparent that you're correcting her. If necessary, use the wrong name as she gave it. Don't make her feel cheap by saying: "Oh, you mean so-and-so"—using what you know to be the correct pronunciation. Besides being poor salesmanship, this indicates tactlessness and bad manners on your part.

Fifth.—Don't contradict a customer—even when you're positive you're right. Let her think she's right. This often necessitates politeness, patience and self-control on your part, but these are more desirable than an antagonized customer. If she is excited, angry and inconsiderate, agree with her, sympathize and let her think she's right. Then, perhaps after she is somewhat placated in an even, politely modulated voice give your side, but don't keep contradicting and irritating.

FIGHTING MAIL ORDER COMPETITION

Continued from page 36

appeal to the pocket book of Mr. Man in the Street, or Mrs. Housewife is the appeal that counts. They are going to buy where they can get the most for their money, quality always considered, whether it is at home or in a store 1,000 miles away. When they know that they can get the goods at home, at better prices than if they send away, with the privilege of changing them if they are not satisfied, and with the certainty of seeing what they are getting, they will no more buy from the department stores than from China.

Interesting Case

It is interesting to note in the case of St. Marys that the founder of one of the largest mail order houses in the world started there as a small store keeper. It is said that there was no better small store in the whole countryside than his and that he thoroughly believed in advertising. The firm at the present time is perhaps the largest user of advertising space in the Dominion. Its advertising matter is full of "pep" and its policy is aggressive. In other words, the firm is aggressive.

There is a lesson here for the merchants of St. Marys, Simcoe and Aylmer, or for any other town. No one expects them to take full pages or even half pages in their weekly papers, but they can advertise steadily, intelligently and consistently. If they do this and give real service in their stores they need not fear the mail order firms. They can take a leaf out of the book of hardware firms and put their business on the same solid foundation that the hardware trade is on.

The Right Spirit

It is interesting to note the confident spirit shown by the hardwaremen of St. Marys, Granton, Simcoe and Aylmer in the ads. which they have inserted in the "Buy At Home" page. They stand out rather strikingly from some of the "appeals" made by other firms. Here are a few:

"I can compete with anyone in general hardware. Stoves, glass, paints, and all kinds of furnace supplies. Do your trading in Granton. It will pay you. See me first and your money will stay in Granton. W. W. Baker, Granton."

"Call Up Perry Doupe at Kirkton for anything in the hardware line. He will show you from week to week why it pays to buy your goods in our own village and keep your money in circulation at home."

"Parsons Fair and Hardware. Why shop out of town when you can get anything and everything at our store and at the right price? Try us for hardware, kitchen utensils, smallwares, etc."

"Don't Send Out of Town for Hardware. Get our prices. We can compete with anyone, anywhere. A big stock of all kinds of hardware. Farm and garden tools, stoves and household goods. J. E. Austin Hardware Co., Simcoe."

"Beaver Board Keeps Out the Cold; makes cheap partitions, easy to put up. Is sold by Boyd's Hardware, Simcoe."

"It is Our Aim to Not Only get your trade in hardware, but to retain it by giving you prices that will convince you that you can do better with us than mail order houses. E. Miller, Aylmer, Ont."

"The Importance of Buying at Home and in Preston should appeal to every loyal citizen. It will make this a better town to live and do business in. As regards to prices you will find our hardware store will meet every demand in general hardware, farm and garden tools, stoves, tinware, paints, varnishes, oils, cutlery and everything that makes up a first class hardware store. See us first, it will pay you. Bernhardt Hardware."

Tells Steel Men of Trade Prospects

Colonel Carnegie, of Imperial Munitions Board, Addresses Gathering in Montreal — Canada to Have Real Opportunities—Increase in Steel Producing Capacity Bigger Than Other Countries—Domestic Trade Big Factor

AN interesting paper was read before a number of steel men assembled in Montreal by Col. David Carnegie, F.R.S., of the Imperial Munitions Board and ordnance adviser to the Board. Some sixty men were present, representative of the various steel companies and allied trades from all parts of Ontario and Quebec. The meeting convened at the Board of Trade building and was presided over by T. P. Howard, vice-president of the Canadian Manufacturers' Association.

In a general way Col. Carnegie pointed out that the world's productive capacity of steel had increased since the opening of the war from around eighty million tons to nearly one hundred million tons. Of this huge amount Canada's portion was about two and one-half million tons, not a large percentage, but her increased production had shown the largest increase as a result of speeded-up effort of any steel-producing country in the world. Her pre-war capacity was about one million tons, and of course she had, unfortunately, not increased her output of iron ore, pig iron or finished steel. These were phases of the domestic side which might well be developed, and, as a matter of fact, there was already under way a plate-rolling development that would mark a new departure for Canadian industry. Particular attention was directed to the mill now being erected for this purpose by the Dominion Iron and Steel Corporation, and which, Col. Carnegie stated, should absorb a large tonnage of steel when completed.

What Will the World Use?

Since all countries engaged in steel production have speeded up their various plants under great pressure, it is now the problem of these countries to ascertain the ability of the world to absorb the output on the basis of the greatly-increased production. Therefore it was necessary to decide the following points: (1) The size of standing armies and navies (if any); (2) The amount of destruction caused by the war to be replaced by each Government; (3) the national works, industries or otherwise, to be undertaken by the Government concerned.

In this latter connection the speaker pointed out that some had argued, among leaders conversant on this matter, that France would be quite equal to taking care of her own domestic production of steel and that she would very quickly become a competitor with other nations, notably with Great Britain. Her effort would be to quickly regain and even create a big export trade.

Belgium May be Buyer

Of the countries devastated by the war, Belgium was hardest hit and least able to resume her own manufacturing problems. She would require assistance, and, owing to the complete destruction there in so many ways, she will perhaps be a buyer for two or three years at least, of large quantities of steel. She was, therefore, one of the most probable fields of exploitation for orders for steel and iron products. But it was just as probable that, when she had recovered sufficiently, Belgium would be her own supplier, and as well become a heavy exporter. Having attained unto increasing importance in this respect prior to the war, and having need for great expansion, she is likely to be a factor in the future. Among her important exports would be those of rolled steel and cast steel products.

What of Great Britain?

It has been argued by some, Colonel Carnegie pointed out, that Great Britain would be a big factor from a national standpoint, that she would, as a Government, develop a big business in the manufacture and export of steel and steel products. He was opposed to the acceptance of this suggestion, for, as was pointed out, nationalization of industry in this way would make the Government a competitor with her own industrial concerns—an improbable thing. He thought that the amount of work which probably would be secured through Governmental channels for public works, would doubtless exceed the pre-war requirements owing to many or most Government war contracts having expired or otherwise terminated of necessity.

Colonel Carnegie went into the matter of Great Britain's capacity to produce iron ore and from it pig iron, not for domestic sale and use only, but as well for export. The war had enabled her to greatly increase her steel capacity through the establishing of many new furnaces. She would want to maintain these, and in order to do this would be anxious to greatly develop export. In doing it she was faced with some knotty problems, for her huge obligations, brought on by the war's mighty costs made her face the cold necessity, he figured out, of providing a tax against her industries to repay these debts of 22½ per cent. Closer figuring along these lines made the relative handicaps of the United Kingdom 10, against Canada 6, and the United States 1. His remark was: "These figures indicate struggle, but struggle has made the United Kingdom, struggle has made Canada, and I believe that any country that has passed through such a crisis as the United Kingdom and Canada have passed, need have no fear of the handicaps which these plain facts reveal. There is no room for discouragement and pessimism, for the close study of the industrial situation reveals for Canada a bright outlook."

Canada's Chance a Domestic One

One of the unique points made by Colonel Carnegie was that of the greater development of trade within Canada by her own basic industrial concerns. He was of the opinion that, if Canadian manufacturers would take a page from Canada's book and follow more closely the example of Britain by deciding to supply a greater proportion of her own domestic requirements than she has been wont to do in the past, normal conditions of trade and prosperity would the quicker return. He said: "I believe Canada should have at least one structural mill for rolling heavy structures. I hope the time is not far distant when she will produce her own requirements in this respect and be able to stimulate an export trade. The large plate mill now being installed at the Dominion Iron and Steel Works should absorb a large tonnage of steel."

A Forward Look

Colonel Carnegie referred to the wealth of mine and mineral which Canada had within her own borders. Magnesite and nickel supplies were big items that went far to offset other handicaps, and with an abundance of electric power that ought to be cheap, these combinations would go far toward development in a big way.

In conclusion, the speaker pointed out the ideal that might be kept in mind and worked toward, that of toiling toward the day when manufacturers in a given industry would consider the big advantage of joining with one another and especially with others engaged in like manufacture in other countries with a view to international agreement and distribution of products. He expressed the hope that such a step might emanate from manufacturers within the British Empire.

SAYS CANADA WILL EXPAND CHEMICAL INDUSTRY

That Canada will have a greater appreciation of the importance of the chemical industry as a result of the war and that her chemists will have solved the technical difficulties in a manner to promise a real future in the matter of making the most of this country's requirements is the view of A. W. Poole, of McArthur-Irwin, Limited, Montreal. Particularly in the matter of acetic acid, of which more and more will be required as the manufacturing of various commodities increases, he believes there will be an increased output. Mr. Poole thinks that Canadian makers will be able to handle the manufacture of this commodity, as well as of other lines, very efficiently. There should be, he says, a steady and satisfactory increase in the annual demand and with it the required increase of output.

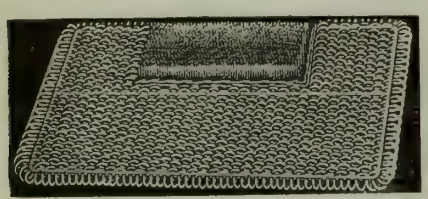
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

TANDEM WIRE STRETCHER

A new wire stretcher known as "Tandem" is being placed on the Canadian market by J. N. Warminton, Montreal, acting for the manufacturer in England, Alfred Bullows & Sons, Ltd., Walsall, Staffordshire, England.

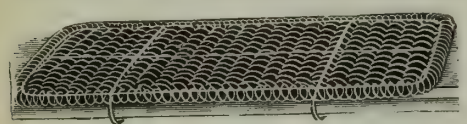
The Tandem strainer is claimed to be



Wire Stretcher

particularly suited to erecting and repairing fences, telegraph lines, guard wire for tram lines, etc. It is of light weight, and in addition to the foregoing advantages it is claimed for this device that it will exert a straining force of 600 lbs. without difficulty, through the leverage feature.

The "grips" are made of steel, it is stated, and these are hinged to a lever. When worn they may be removed and reversed, the jaws thus being fresh and good as new, it is claimed.

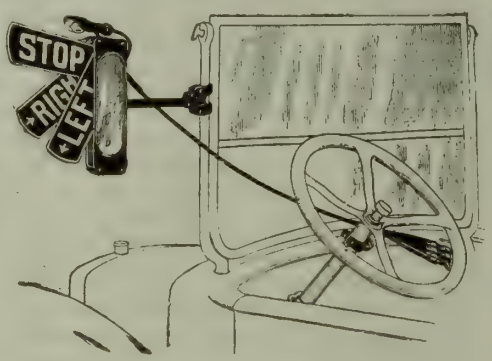


COMBINATION MAT

A combination mat is being manufactured by the Sanitary Door Mat Company, of 413 South Lincoln St., Chicago.

Combination Mat

Into the regular steel mat the firm sets a cocoa fibre mat at one side, making, it is claimed, two mats in one. It is stated that the steel section scrapes the dirt and mud from the soles of the shoes, while the cocoa fibre section dries and



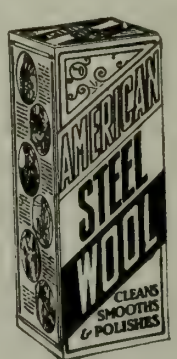
Auto Mat

cleans them. The whole mat, it is stated, makes a very attractive appearance.

The same company makes an automobile running board mat, which, it is claimed, clamps on the running board of any car without use of screws or bolts. All mats, it is stated, are one inch high, and this, it is claimed, is a great advantage.

TRAFFIC SIGNAL

A traffic signal, which, it is stated, is very simple and inexpensive, is being put on the market by the Police Auto Traffic Signal Company, of 26 Houston St., New York. The signal, it is claimed, gives unmistakable notice as to whether the motorist desires to stop or go to the right or left. The device, it is stated, is easily attached, and at night lights

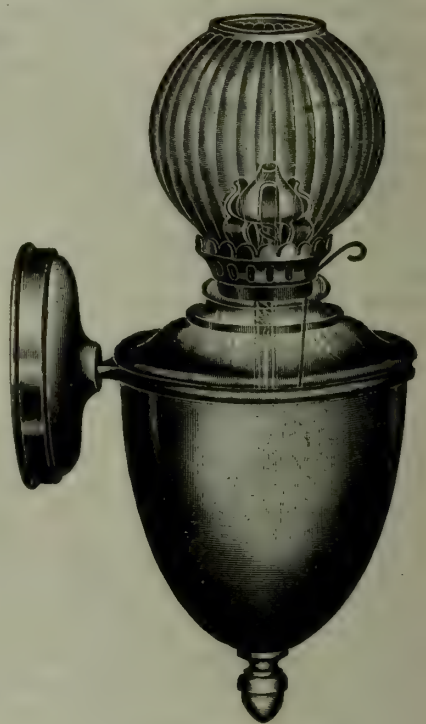


Traffic Signal

up automatically when it is operated. In city streets, it is stated, the signal has the additional advantage of making the work of the traffic officer perfect, and of automatically guiding pedestrians at crossings.

STEEL WOOL

American Steel Wool is being marketed in Canada by W. J. Chambers & Co., Scott St., Toronto. It is manufactured by the American Steel Wool Manufacturing Company, Inc., New York City.



Steel Wool

Steel wool is a fine wool made of steel, and is used for cleaning and polishing household utensils, particularly aluminum, as well as for glass, tile, enamel, garden implements, factory machinery, the garage, etc.; also for removing paint, enamel or varnish from a wooden surface. The manufacturers claim for it several more important uses. It is put up in two sizes, one to retail at 15 cents, and the other at 35c a package. The package is in three colors: red, white and blue.

COMBINATION LAMP

A combination wall lamp manufactured by H. G. McFadden & Co., 38 Warner St., New York, is made, it is stated, in three styles, with crystal, opal

Combination Lamp

or ruby globes. All the metal parts, it is claimed, are of brass with satin finish. A removable glass fount, it is claimed, shows contents, and is easy to fill. It is stated the lamp is especially valuable for lighting hallways, stairs and corners, where ordinary lights are not always suitable. The lamp, it is stated, has an outside wick adjustment.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PRICES on plate have undergone a further revision downward in some quarters this week, and the heavy gauges of black sheets have also narrowed towards the lowest basis. Supplies are now very good in these lines, and the same is true of galvanized sheets, on which business is being keenly developed. Tin plate has declined $5 per box, and terne plate is $3 per box lower. Ample supplies are available, but trading as yet is rather limited.

Many miscellaneous lines in which the retailer is interested have been revised this week, declines being frequent. Barn door hangers and track, steel thumb latches and copper rivets and burrs are among the lines to decline. Sleigh bells are down about 10 per cent., and easier prices on cow ties seem a prospect.

Declines have beeen recorded in barbed wire, plain twist wire, and galvanized wire this week in some markets, and a lower scale of prices is provided for in brass spring wire in new discounts issued to the trade this week.

Chalk lines, masons' lines and pump oilers are higher in prices, the latter being up about 20 per cent. Revised quotations issued on fishing tackle show advances ranging from 5 to 25 per cent., according to class of goods affected. Tennis balls are also higher, new prices ranging about 33 1/3 per cent. above quotations ruling last season. Buck saws, lunch kits, pine tar and spring balances are other lines to register advances this week.

Cotton waste has undergone a revision to lower levels, prices being down from 1c to 2c per pound, according to grade. Game traps have come in for some further revision this week, and prices listed last week have in some instances been advanced slightly; this is just a readjustment.

Linseed oil has advanced 3c per gallon this week in some quarters, narrowing the range towards the higher figure. Crushers and jobbers report a better movement of oil to the retail trade, and a steadily improved demand is now expected.

Turpentine has sagged 2c to 5c per gallon in the various markets, and some movement is now in progress. Southern markets developed weakness late last week and early this, but the tone has strengthened again and advances from low point reached have been made.

Business as a whole shows a much better feeling. Some sources supplying the building trade report sales for January this year well above same month of last year, and all seem to be quite satisfied that the outlook is decidedly encouraging.

MONTREAL MARKETS

MONTREAL, Feb. 6.—Declines have been made effective for barbed wire and for coil spring, smooth galvanized, and plain twist wire also. A slight revision has also been made in one quarter for cap and set screws. The ingot market is very unsettled, and lower prices have again been quoted for lead, tin, antimony and spelter, while all lines are weak and quiet. Old materials are weak and may go still lower. Steel sheets are marking time, and prices are decidedly on a nominal basis, with further revision downward probable. Wax is down. Various lines of copper wire and spring brass wire are lower in price also. No advances are reported for the week.

Trade is improved somewhat, and quite a number of orders are being received.

Spool Wire Declines; Copper Rivets, Too

Montreal.

WIRE, RIVETS.—A lower price basis is quoted for various wire on spools and in rolls. Brass spring wire No. 12 is now selling at 50c per pound in 10-lb. rings, and soft copper wire of 17 and 18 gauge at 55c per pound. Copper rivets and burrs are down through a change of discount. This is reduced from 30 per cent. to 25 per cent. advance on the list, while burrs only are unchanged at 50 per cent. advance on the list.

Barb, Twist, Smooth Wire Down; Nails Held

Montreal.

NAILS AND WIRE.—A decline of 40c per 100 pounds has been made effective for barbed wire. This is now selling at $5.60 per 100 pounds. Plain twist is down, too, the price being $6.10. Plain galvanized wire No. 9 is quoted at $5.30; No. 12 at $5.55, and No. 13 at $5.65, while galvanized coil spring wire is quoted at $5.45, and No. 12 at $5.60. Smooth steel wire is still quoted at $6.25 per 100 pounds. Nails are unchanged with wire selling at $5.50 base per 100 pounds, and cut at $5.35.

Stoves to Hold; Standardising Wares

Montreal.

STOVES AND WARES.—There is not a great deal of selling of stoves and ranges, and prices, say the makers, are likely to rule steady for some time. For some months makers of enamelware have been reducing patterns and this is still going on. Various lines are affected, as already outlined in HARDWARE AND METAL, and the hardware man will gradually have a better range, without the seeming necessity of carrying stock that has moved but slowly. The markets are steady and quite firm.

Rope Market Steady; Fair Business

Montreal.

ROPE AND CORDAGE.—No new features present themselves and the amount of business coming to hand is just fair, and what might be looked for at this season of the year. Pure manila is quoted at 28½c; British manila at 24c, and sisal at 25½c per pound base.

Wax Down Half Cent; Gasoline, Oil Held

Montreal.

OILS, WAX, GASOLINE.—The price of coal oil is steady and held still at 19c for Royalite and at 22c per gallon for Palacine and Electroline. Motor gasoline is also the same and steady at 34c per gallon. Wax, in its various forms, is reduced ½c per pound.

Sales Iron, Steel Reported Light

Montreal.

IRON AND STEEL.—The basis is steady and unchanged, and the demand for bars, both steel and iron, is limited. Small lots are going out all the while and the jobbers' stocks are in fairly good shape to meet requirements.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Lower Prices Likely For Steel Sheets

Montreal.

SHEETS.—There is more or less of a demoralized market, prices being decidedly nominal and the selling quite limited. Readjustments are under contemplation and lower prices may probably be in effect in the immediate future.

BLACK SHEETS—		Per 100 lbs.	
10 gauge	7 25	$7 35	$8 50
12 gauge	7 35	7 40	8 50
14 gauge	7 10	7 35	8 20
16 gauge	7 20	7 55	8 25
18-20 gauge	7 50	8 15	8 30
22-24 gauge	7 60	8 20	8 35
26 gauge	7 65	8 30	8 40
28 gauge	7 75	8 50	8 50
GALVANIZED SHEETS—			
10¾ oz.		$ 9 50	$10 75
28 gauge		10 90	10 25
26 gauge			10 00
22 and 24 gauge			9 85
20 gauge			9 65
18 gauge			9 65
16 gauge			9 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

On Last Declines Lead Lines Hold

Montreal.

LEAD PRODUCTS.—While there have been no changes in solder, lead pipe, sheet lead, etc., the recent lowering of price for ingot lead may make for a change to lower levels within a short time. There is little new to report and trading is limited to immediate needs.

Lead pipe, lb.	$0 13
Lead pipe (cut lengths)	0 14
Lead waste pipe, lb.	0 14
Lead traps and bends	Net list.
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12¾
Lead sheets, 1 to 8 lbs., s. ft.	0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.	
Solder, guaranteed, lb.	0 42
Solder, strictly, lb.	0 38½
Solder, commercial, lb.	0 35
Solder, wiping, lb.	0 36¾
Solder wire (8 gauge)—	
40-60	0 45½
45-55	0 49¼
50-50	0 53
Zinc sheets, casks	
Do., broken lots	

Weakness is Feature in Old Materials

Montreal.

OLD MATERIAL.—While the market is weak and very uninteresting, there are no changes of price. These are likely to come, however, and a lowering of quotations will not be unlikely in the near future. The amount of trading being effected is very limited.

Dealers' Buying Prices:		
Pipe scrap	15 00	16 00
Stove plate, per ton	17 00	18 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 07	0 07½
Overshoes, lumbermen's rubber boots		0 05½
Bicycle tires		0 04
Automobile tires	0 04	0 04½
Yellow brass	0 10	0 11
Red brass	0 14	0 15
Light brass		0 08
Scrap zinc		0 05¾
Heavy copper	0 18	0 19
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast		30 00
Heavy melting steel		15 00

Tin Quoted 65c; Spelter, Lead Down

Montreal.

INGOT METALS.—The market has developed a greater weakness and the outlook is very unsettled. Tin and spelter, lead and antimony are all lower in price.

COPPER.—Markets are decidedly quiet and the basis is without change at 24c per pound.

TIN.—Competitive selling has been responsible for a decline of this to 65c per pound. There is no trading excepting in small lots.

SPELTER.—This is very weak and the price has been further reduced, the quotation being around 9c per pound.

LEAD.—Further reduction of the Trust price in the United States is reflected here, the quotation being based at 8c per pound.

ANTIMONY.—In common with other ingots, the undertone is weak and selling limited. The price is 9c to 9½c per pound according to quantity.

ALUMINUM. — At the unchanged price of 40c per pound there is little trading.

BRIEFS FROM THE WEEK'S MARKETS

Fishing tackle prices show advances of from 5 to 25 per cent. in new figures just issued.

* * * *

Tennis balls show a sharp jump in new prices this week, the advance amounting to 33 1-3 per cent. over 1918 figures.

* * * *

Copper rivets and rivets with burrs have declined. Burrs alone remain unchanged.

* * * *

Sleigh bells have registered a decline of 10 per cent., and this is basis, it is understood, at which bookings for next fall are being solicited.

* * * *

Some lines of barn door hangers and track have reached lower levels this week.

* * * *

Bucksaws have gone to higher levels—one reason the small boy will advance as to why he should be freed from the nightmare of the woodpile.

* * * *

Galvanized wire, plain twist wire and barb wire are all lower. The decline amounts to about 40c per 100 pounds.

* * * *

Tin plate declined $5.00 per box this week. Terne plate is $3.00 lower.

* * * *

Prices on steel plate and heavier gauges of black sheets have undergone further revision downward in some quarters.

* * * *

Cow ties reveal an easier tendency this week but whether this will be reflected in any marked decline is still somewhat uncertain.

* * * *

Potts' irons have undergone a slight revision downward. Thumb latches are lower, too.

* * * *

Pump oilers advanced about 20 per cent. this week at Winnipeg.

* * * *

New prices have been issued this week on Stevens' rifles. Booking orders are being solicited for fall.

TORONTO MARKETS

TORONTO, Feb. 6—Lower prices have been named this week on copper rivets and burrs, tinned-roofing caps, barn door hangers and track, steel thumb latches and brass spring wire. Some revision of prices on plate and heavy black sheets is also reported. Sleigh bells show a decline of about 10 per cent. and cow ties are rather weak, though prices unchanged as yet. New prices are out on at least one line of rifles and booking orders are being solicited for fall. Tin plate has dropped $5.00 per box. Little change has been recorded in ingot metals this week.

Business, though not heavy, is considered very good. Some factors serving the building trade report increased volume for January of this year as against the same month 1918. Better inquiry is noted and the feeling is much improved during the past few days.

Copper Rivets Undergo Revision

Toronto.

COPPER RIVETS—New prices have been established on copper rivets and rivets with burrs which provide for declines from previous levels. Copper burrs are held at unchanged levels. The trade discounts on copper rivets and burrs, effective now, are:

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding 1-3 of combined weight of copper rivets and copper burrs, list plus 25%.

Copper rivets with copper burrs where the burrs are more than 1-3 of the combined weight of the copper rivets and copper burrs: Copper rivets, list plus 25%; copper burrs up to 1-3 of combined weight of copper rivets and copper burrs, list plus 25%; copper burrs in excess of 1-3 of combined weight of copper rivets and copper burrs. list plus 50%.

Copper burrs only, list plus 50%.

Rifles Being Booked For Fall

Toronto.

RIFLES—Orders are being solicited for fall delivery on some lines of rifles. The basis of quotations prevailing on the Stevens line now being booked is given as follows: No. 14½, Little Scout, $5,25 each; No. 26, Crack Shot, $6.25; No. 12, Marksman, 22 cal., $7.75; No. 12, Marksman, 25 cal., $7.75; No. 17, Favorite, 22 cal., $9.25; No. 17, Favorite, 32 cal., $10.00; repeating, No. 70, LR, 22 cal., $15.75.

Barn Door Hangers, Track Easier

Toronto.

BARN DOOR HANGERS, TRACK—Quotations on barn door hangers and track have been revised in some instances to slightly lower levels. The New Milo barn door hanger is now being quoted at $10.65 per dozen and barn door track, ¼-inch at $8.50 per 100 feet.

Wrenches Revised; Chains Holding

Toronto.

WRENCHES, CHAINS—New prices have been issued this week on Carll wrenches and quotations being made to the trade are at the following levels: No. 60 x 6-inch, $13.00 per dozen; No. 100 x 10-inch, $19.50.

Booking business is being taken on various lines of chains, prices remaining at unchanged figures as shown by these discounts: Halter chains, 12½ per cent.; dog chains, 12½ per cent.; tie out chains, 37½ per cent.; cow ties, 10 per cent. The market on cow ties seems somewhat unsettled just at the moment and some revisions may be undertaken. Other lines of chains are steady. Stall fixtures, No. 1 heavy, are quoted at $2.00 per dozen and the light or Dominion fixtures at $1.40 per dozen.

Thumb Latches, Potts' Irons Down

Toronto.

THUMB LATCHES, SAD IRONS—Prices on japanned steel thumb latches have undergone a slight revision downward this week, quotations named to the trade being for the No. 2, $2.00 per dozen and No. 3, $2.70.

Mrs. Potts' irons, nickel plated, are easier, now being quoted at $2.10 per set.

Sleigh Bells Register Decline

Toronto.

SLEIGH BELLS—New prices have been issued on sleigh bells, including back bells, body bells, team bells and kindred lines which provide for a decline all around of about 10 per cent. It is understood orders are now being booked for fall delivery at this basis. The mild winter and absence of snow have curtailed sales to a large extent so whether bookings will be as large as usual is a question just at present.

Wire hat and coat hooks have advanced in price, the 3-inch coppered being quoted at $1.15 gross, and 3-inch brass plated at $1.50.

Roofing Caps Down; Spring Wire Too

Toronto.

ROOFING CAPS, SPRING WIRE—Declines are shown this week in tin roofing caps. The new price in bags being $9.00 per 100 pounds.

A similar step has been taken in brass spring wire, quotations being made on a list, plus 25 per cent. basis with the usual extras for spring.

Cotton Waste Registers Decline

Toronto.

COTTON WASTE—In line with information given out in HARDWARE AND METAL last week, prices on cotton waste have been revised downward in some quarters, the declines ranging from 1c to 2c according to grade and type. On the new basis of quoting these figures rule on white waste: XXX Extra, 19½c per pound; XX (replacing X Grand), 18¼c; XLCR, 17c; X Empire, 15½c; X Press, 14c. Colored Waste: Fancy, 15½c per pound; Lion, 14c; Standard, 12½c; Popular, 11c; Keen, 9½c; Cream polishing, 21½c per pound.

Cement Steady; Plaster of Paris Too

Toronto.

CEMENT, PLASTER OF PARIS.—No material change has been recorded in the situation on cement. Reports from dealers report a larger movement in January of this year than that recorded in the same period of 1918, and the inquiries coming to hand would indicate a fair business is in prospect. Prices have held at unchanged levels.

Plaster of Paris is in much the same position as cement. Business is small but even so, January figures are ahead of January, 1918, and the outlook is considered very satisfactory. Quotations hold without change.

Game Traps Revised Again

Toronto.

GAME TRAPS.—New prices issued last week on steel game traps have come in for further revision, the basis on which figures were arrived at being, it is indicated, the wrong one. This has resulted in a slight increase in the price of some sizes. Correct quotations are given as follows:—

Game Traps—Victor, with chain—No. 0, $1.90 per dozen; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.65; No. 3, $6.50; No. 4, $7.80.

Jump, with chain.—No. 1, $2.95 per dozen; No. 1½, $4.40; No. 2, $6.45; No. 3, $8.55.

Hawley & Norton, with chain.—No. 0, $2.95 per dozen; No. 1, $3.45; No. 1½, $5.20; No. 2, $7.25; No. 3, $9.65; No. 4, $11.35.

Newhouse, with chain.—No. 0, $4.30 per dozen; No. 1, $5; No. 1½, $7.55; No. 2, $11.10; No. 3, $14.80; No. 4, $17.50; No. 81, $5.80; No. 91, $6.35.

Bear—No. 5, $10.85 each; No. 50, $7.85 each.

Tin Plates Reach Lower Levels

Toronto.

TIN PLATES.—Further declines have been recorded in tin plates this week and new prices which are being quoted to the trade are as follows: I.C., 20 x 28, $20.00 per box; IX, 20 x 28, $23.00; IXX, 20 x 28, $27.00; IXXX, 20 x 28, $31.00. The decline amounts to $5.00 per box.

Supplies are considered ample and demand only fair at the moment. Terne plates are also somewhat easier, I.C., 20 x 28, 112 sheets, being quoted at $22.00 per box, a decline of $3.00.

Nails Unchanged; Wire Inactive

Toronto.

NAILS, WIRE.—New developments are lacking this week in respect to nails. Price of cut nails holds at decline recorded last week, the base now being $5.35 per 100 pounds. Wire nails remain unchanged, too, the base of $5.50 per 100 pounds being the one generally prevailing.

Inactivity marks the position of wire with prices holding at unchanged levels. Smooth steel wire base is held at $6.25 per 100 pounds.

Wares Holding Stoves Steady

Toronto.

STOVES, WARE.—Wares remain in an unchanged position with a fair amount of business coming to hand and prices holding without any quotable change. Stove pipes and elbows are being booked for September delivery, prices being quoted at following figures: Pipe, 6-inch, $22.28 per 100 lengths; 7-inch, $23.87; elbows, 6-inch, $2.74 per dozen, 7-inch, $3.06.

Cordage Holds at Unchanged Levels

Toronto.

CORDAGE.—There have been no new developments in the market on cordage and prices rule at unchanged levels. The position of hemp is one of strength but whether this will influence prices to higher levels is still a question. Quotations named to the trade are at the following figures: Pure manila, 28½c per pound base; British manila 24c; New Zealand hemp, 24c; sisal, 25½c.

No new features have developed in respect to binder twine and prices hold at unchanged figures as shown in current market quotations.

Steady Tone to Oils, Gasoline

Toronto.

OILS, GASOLINE.—Prices on coal oil have undergone no change this week, quotations to the trade ranging from 18½c to 21½c per gallon according to grade. Lubricating oils are steady at unchanged figures.

Gasoline shows no difference either, 33c per gallon being price, which is steadily held.

Little New to Report in Bars

Toronto.

IRON AND STEEL.—There is little new or of particular interest to the trade this week as applied to bars. Business is within rather narrow channels and prices unchanged.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	6 25
Refined iron	5 15	5 40
Angle base	5 25	6 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Remain Steady

Toronto.

CORRUGATED SHEETS.—Steadiness marks the position of corrugated sheets and manufacturers report a fair inquiry and appear satisfied with business coming to hand. The mild weather has resulted in quite a repair business being conducted and eavetrough and conductor pipe have been somewhat more active than usual on this account. There has been no revision of prices.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$9 00	$7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Some Revisions in Plates; Fair Orders

Toronto.

SHEETS, PLATES.—There have been some slight revisions in the prices of plate to lower levels. Other lines of sheets remain unchanged at figures given below and jobbers report a fair amount of business coming to hand and quite an inquiry which is expected to develop into orders in due course. Stocks are very good and outlook considered satisfactory.

BLACK SHEETS -	Per 100 lbs.	
10 gauge	6 50	$6 90
12 gauge	$6 05-6 60	7 00
14 gauge	6 10	6 65
16 gauge	6 20	6 75
18-20 gauge	6 80	7 30
22-24 gauge	6 85	7 35
26 gauge	6 90	7 40
28 gauge	7 00	7 50
3-16 inch plate	6 25	6 75
¼-inch boiler plate	6 00	6 50

Prices shown are for full cases. An evtra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 50	$9 00
U.S. 28	8 20	8 75
U.S. 26	7 90	8 45
22 and 24	7 75	8 30
18 and 20	7 60	8 30
16	7 45	8 00
12 and 14	7 35	7 90

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Holds; Tubes Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—There has been no change recorded in wrought pipe this week, prices to the trade being at figures shown in current market quotations. There is some business passing and outlook is improving for stock.

Boiler tubes are steady at quotations appearing herewith. Orders are coming along in fair volume and outlook healthy.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$32 00	$.....
1¼ inch	36 00	.....
1½ inch	39 00	32 00
1¾ inch	39 00	32 00
2 inch	45 00	32 00
2¼ inch	48 00	34 00
2½ inch	50 00	40 50
3 inch	58 00	45 00
3¼ inch	.....	52 00
3½ inch	70 00	54 00
4 inch	80 00	67 00

Lead Products, Solder Unchanged

Toronto.

LEAD AND ZINC PRODUCTS.—An unchanged list is shown in lead products this week and solder is holding at figures named last week. Manufacturers report a surprising amount of business going through and are well satisfied with the outlook. The range of prices follows:

Lead pipe, lb.	....	$0 13
Lead waste pipe, lb.	....	0 14
Lead traps and bends	....	Net list
Lead wool, lb.	..	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb.	$0 38	$0 40
Solder, strictly, lb.	0 34	0 37½
Solder, commercial, lb.	0 31	0 33¾
Solder, wiping, lb.	0 30	0 31
Solder, wire, lb.	....	0 45½
Zinc sheets, per lb	0 16	0 20

Scrap Metals Dull; Rubber May Advance

Toronto.

OLD MATERIALS.—The scrap metal market remains dull. In fact, "stagnant" is a better word. There are no deals put through, and the chances are that the claims made by the dealers that they are losing money on present operations are quite correct. Dealers are not anxious to buy even at the present battered down list. They fear further drops in prices, and do not care to get caught in a declining market, especially when there is no urgency in the situation to force them to buy.

A number of dealers in the country that have scrap rubber have inquired for a quotation. The same question is also of interest to garage men, where old tires very often accumulate. The present price for this material is 8¾ cents per pound. This is low, and the chances are that it will reach a higher level before so very long. In fact it would not cause any surprise to see this going to 8c. It would be much better for a person to hold this material for a while, as some of the mills are known to be short of raw stock, and the move toward a better price may be made almost any time now.

Toronto.

Dealers' Buying Prices	
Tea lead, lb.	0 08½
Heavy lead pipe	0 05

Country mixed scrap	.....	10 50

Tin is Active; Prices Holding

Toronto.

INGOT METALS.—Somewhat more activity is noticeable in tin and stocks are considered light. Stocks of spelter are small, too, while lead is in plentiful supply. There seems to be a better feeling in the trade as a whole, though trading is still restricted.

COPPER.—The ample supplies of scrap available are retarding the sales of metal to a great extent with the result there is little moving in regular way. Prices range around 25c to 28c per pound.

TIN.—There is a very lively demand reported in tin with stocks considered pretty light. There has been little tin arriving, and hence no accumulation of supplies around. Prices range from 65c to 70c per pound.

SPELTER.—Stocks are considered light, but the trading is by no means heavy. Price held at unchanged figure of 9c per pound.

LEAD.—There is lots of lead, but not lots of business in the metal, although manufacturers using lead are reporting active operation of their plants. The price rules around 6¾c to 7c per pound.

ALUMINUM.—Activity is not yet reported in this metal, and quotations nominally range around 50c per pound.

ANTIMONY.—Unchanged is the sign hanging up on this metal this week. Price is 8½c per pound, with only limited trading in progress.

LONDON MARKETS

LONDON, Ont., Feb. 6.—Several important price changes have been noted this week, and many of these provide for advances over previous figures. Among the lines which have been revised to higher levels are buck saws, lunch kits, pine tar, and spring balances. New prices are now available on game traps and lamp burners, the decline in each of which was mentioned in last week's issue. Lower prices have been named on copper rivets, and the price of cross-cut saws has been advanced.

Business here is considered very good, although merchants generally are buying only for their immediate requirements. Delivery of spring goods is being made, such lines as paints, screen wire cloth, poultry netting, lawn mowers, oil stoves, harvest tools, screen doors and windows, which take forward dating, now being accepted. The outlook is considered very good.

New Prices on Lamp Burners; Lower

London, Ont.

LAMP BURNERS—Mention was made last week of the decline in the price of lamp burners, but at that time the new quotations were not available. These have now been issued to the trade, and the prices which are now being quoted are as follows: Banner No. 0, $1.40 per dozen; No. A, $1.40; No. B, $1.75; No. D, $3.45; Ontario No. A, 85c per dozen; No. B, $1.10; Lantern burners No. 2, $1.90 per dozen.

Lunch Kits Up; Spring Balances Too

London, Ont.

LUNCH KITS, SPRING BALANCE.—New prices issued this week on the Universal Lunch Kits provide for a higher basis of quoting than those formerly in effect. Figures which have been established are for the No. 310, Black Enamel, $3.75 each; No. 410 Gray Enamel, $4.00 each.

Sportsman spring balances have also been revised to higher levels and are now selling at the new price for the No. 002 of $6.40 per dozen.

Buck Saws Move Upward

London, Ont.

BUCK SAWS—A revised price has been issued this week on at least one line of buck saws and buck saw blades which show that these have reached higher levels. On the new basis the Prince Rupert buck saw is quoted at $15.30 per dozen, and the Prince Rupert buck saw blades at $9.35 per dozen.

Game Trap Prices Announced; Lower

London, Ont.

GAME TRAPS—Prices have been announced on game traps and these show a decline of about 15 per cent. as noted in last week's issue. The new scale of quotations which has been arranged is given as follows: Victor, with chains, No. 0, $1.90 per dozen; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.65; No. 3, $6.50; No. 4, $7.80; Jump, with chain, No. 0, $2.50 per dozen; No. 1, $2.95; No. 1½, $4.40; No. 2, $6.45; No. 3, $8.55; Hawley and Norton, with chain, No. 0, $2.95 per dozen; No. 1, $3.45; No. 1½, $5.20; No. 2, $7.25; No. 3, $9.65; No. 4, $11.35; Newhouse, with chain, No. 0, $4.30 per dozen; No. 1, $5.00; No. 1½, $7.55; No. 2, $11.10; No. 3, $14.80; No. 4, $17.50.

Lower Levels on Copper Rivets

London, Ont.

COPPER RIVETS—Lower prices have been named on copper rivets during the week. The basis now established on the copper rivets being to add 25 per cent. to the list and assorted with the usual proportion of copper burrs, add 25 per cent. to list. Copper burrs are unchanged, the price being arrived at by adding 50 per cent. to list.

Saw Sets Move Upward; Nails Hold

London, Ont.

SAW SETS, NAILS—An advance has been made in the Lincoln Cross Cut Saw Sets, and the quotations which are now being named to the trade are at $10.00 per dozen.

There has been no new developments in regard to nails. Cut nails are selling at the new basis established last week of $5.35 per 100 pounds, and wire nails are unchanged at the basis of $5.50 per 100 pounds.

Coaster Wagons Moving Well

London, Ont.

WAGONS—There is still a remarkable sale for Coaster Wagons, and this has continued practically all winter due to the absence of any material quantity of snow. There has been no change in the prices which are named to the trade. The following figures are the ones still in effect on the Auto Wheel Coaster, No. 00, $22.80 per dozen; No. 01, $45.04; No. 1, $54.34; No. 2, $60.06; No. 3, $66.50; No. 4, $75.79.

Pine Tar Moves Higher; Coal Tar

London, Ont.

PINE TAR, COAL TAR—Higher prices have been named on pine tar this week in the small tins. The new quotations on half pint size are $1.20 per dozen and on the one pint size $1.75 per dozen.

Coal Tar in one quart cans is quoted at $1.80 per dozen.

White Lead in Oil, Putty, Glass Hold

London, Ont.

WHITE LEAD IN OIL, PUTTY, GLASS.—There have been no new developments recorded in regard to White Lead in Oil, the decline which took place a couple of weeks ago carrying the trade through the present week with quotations on the pure at $16.30 per 100 pounds in ton lots and $16.65 in less than ton lots.

Putty rules without material change. Business is dull and prices holding at

following prices: Standard, 100 lb. drum, $6.75 per 100 lbs.; 25 lb., $7.00; Pure, 100 lbs., $8.75; 25 lbs., $9.00.

The discount on window glass shows no revision, double and single diamond in full boxes being quoted at 25 per cent. from list and cut lights 10 per cent.

Linseed Oil Holds; Turpentine Down

London, Ont.

LINSEED OIL, TURPENTINE—The grain market seems to have steadied down to some extent, at least it does not seem to want to get below figures which ranged a week ago. In the interval there have been substantial advances and also declines. It is still a little uncertain to gauge just which way the market will finally turn, but in the meantime the price of linseed oil holds at figures established last week. Quotations on linseed oil appear below.

The price of turpentine has been revised. The present basis provides for a decline of 2c per gallon. The market in the South seems to have eased away slightly owing to the lack of buying on export account, but in the last day or two has shown a firmer trend. Quotations on turpentine locally appear below.

	Raw	Boiled
	Per gallon	
1 to 2 barrels	$1 52	$1 55
3 to 5 barrels	1 51	1 54
6 to 9 barrels	1 49	1 52

Less barrels add 10 cents gal.

—TURPENTINE

	Gallon
1 barrel lots	$1 10
2 to 4 barrels	1 09
5 gal. lots	1 20

WINNIPEG MARKETS

WINNIPEG, Feb. 6.—Price changes during the past week again record both advances and declines in the various lines. The following articles have been affected: chalk lines, masons' lines, pump oilers, fishing tackle and tennis balls, all showing advances, while gasoline faucets, packing tire tape, white lead in oil, and steel hoops register declines. Few lines of heavy goods show any fluctuations, markets in general holding quite steady.

Business is reported as very brisk, spring cars are beginning to move, and the usual spring rush is anticipated.

Chalk, Masons' Lines Go Higher

Winnipeg.

CHALK, MASONS' LINES.—Chalk and masons' lines undergo a further revision during the week, advancing from 5 to 7½ per cent., based on latest manufacturers' prices. To-day's selling prices are as follows: Chalk lines: No. 18, $4.30; No. 21, $4.80; No. 24, $5.40; No. 30, $6 per gross; masons' lines: 100 ft. white, $2; yellow, $2.25 per dozen.

Lock Faucets Down; Asbestos Packing Too

Winnipeg.

LOCK FAUCETS, ASBESTOS PACKING.—Gasoline lock faucets No. 1094 x ¾ inch, show a slight reduction in price, and are now selling at $15 per dozen. New prices have just been announced on asbestos wick packing and wire inserted packing, both lines showing a drop of 5c per pound, making to-day's resale $1.05 per pound.

Pump Oilers Up 15 to 20 Per Cent.

Winnipeg.

PUMP OILERS.—Prices on Howland oilers, which have remained firm for the past year, show a heavy advance on new stocks just purchased, advancing from 15 to 20 per cent. To-day's markets are given herewith: Howland oilers: No. 320, $8.10; No. 321, $9.75; No. 323, $12.80; No. 325, $14.60 per dozen.

Steel Hoops Show Decline

Winnipeg.

STEEL HOOPS.—New prices have been issued during the week covering steel hoops. These show a slight decline. Prices now in effect are given as follows: ½ inch, $8.35; ⅝ inch, $8; ¾ inch, $7.40; ⅞ inch, $7.10; 1 inch, $7; 1¼ inch, $6.90; 1½ inch, $6.80; 1¾ inch, $6.80; 2 inch, $6.60; 2½ inch, $6.60; 3 inch, $6.60 per 100 pounds.

Trolling Baits, Lines Up 5 to 25%

Winnipeg.

TROLLING BAITS, LINES.—New prices for this season have just been issued on fishing tackle. Prices in general move to higher levels varying from 5 to 25 per cent. according to items affected. Prices on a few of the items are given herewith:

Baits—Trolling, No. 110—1 to 4½, $1.50; 5 to 6, $2; 7 to 8, $2.50 dozen.

Black Bass—No. 116, 3, $2.50; 4, $2.50; 5, $3.20 dozen.

Hammered Oval, No. 228—2, $2; 3 to 4, $2.50; 5 to 6, $3; 7, $4.25 dozen.

Kidney, No. 619—1 to 4, $1.50; 5 to 6, $2 dozen.

Montreal, No. 636—2, $2; 3 to 4, $2.40; 5 to 6, $3; 7 to 8, $4.25 dozen.

Cobourg, No. 1376—2, $2; 3 to 4, $2.40; 5 to 6, $3; 7 to 8, $4.25 dozen.

Phantom Minnows—No. 1005, all sizes, $6 dozen.

Devon Minnows, No. 1581—0 to 1, $6.80; 2, $7.45; 3, $8; 4, $8.65; 5, $9.10 dozen.

Baits, Trolling on Cards—No. H, $1.30 card.

Lines, S.I.C., 84 ft.—4, $1.80; 3, $2.40; 2, $3; 1, $3.75; 1/0, $4.25; 2/0, $6 dozen.

Decline of 2c in Tire Tape

Winnipeg.

TIRE TAPE.—Prices on tire tape show a reduction during the week amounting to approximately 2c per pound below former quotations. To-day's resale prices are as follows: 1 oz. rolls, 70c per pound; 2 oz. rolls, 66c per pound; 8 oz. rolls, 61c per pound.

Tennis Balls in Sharp Advance

Winnipeg.

TENNIS BALLS.—New price for the coming season has also been issued on tennis balls and shows a heavy advance over last year's price. The figure last year was $5.40, while to-day's price is $7.20 per dozen on both Slazengers' and Ayres' balls.

White Lead in Oil Registers Decline

London, Ont.

WHITE LEAD IN OIL.—White lead in oil prices show a sharp decline during the week, after holding firm for the past six months. New prices are $1.50 per 100 pounds below former market prices. To-day's ruling quotations are given herewith: Decorators' pure, 5-ton lots, $16.40 per 100 pounds; 1-ton lots, $16.90; less, $17.25. Decorators' Special, 5-ton lots, $15.40; 1-ton lots, $15.90; less, $16.25.

Linseed Oil Holds; Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices show no change during the week holding firm at $1.80 for raw and $1.83 per gallon for boiled, in single barrel lots, with only a limited demand reported. The demand for turpentine is also reported to be light, while stocks are ample to meet all demands. Prices now ruling are as follows: Barrels, $1.30 gallon; ½ barrels, $1.33; 5-gal. lots, $1.35 gal.; 1 gal. lots, $1.35 gal., plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., Feb. 6.—Only a slight improvement in current bookings is reported by the steel mills, and no substantial change in the rate of buying is now expected before early spring. Last December there were some predictions that conditions in the iron and steel industry would become more active after the turn of the year, but these predictions did not carry much weight with those who study the precedents in the industry, for it is noteworthy that when business in iron and steel improves it is almost invariably in the spring, not at the turn of the year. Accordingly not much disappointment

was caused by business failing to improve materially after what was called "the holiday dullness." That dullness usually occurs in an active market but if it is to be followed immediately by activity it must have been preceded by activity.

The rate of buying in finished steel products represents probably less than one-third the productive capacity. As the mills are actually operating at 60 to 70 per cent. of capacity, on an average, it is evident that the major portion of the shipments being made is against old orders. As a rule these old orders will not last much longer, and a decreasing rate of production during February, if not through March also, is expected even though buying from week to week may increase somewhat. It is more likely than not that steel production will drop below 50 per cent. of capacity. However, it must be remembered that even a 50 per cent. operation represents a very heavy tonnage as compared with outputs in the past, since capacity has increased by 40 per cent. during the war alone. A 50 per cent. operation would mean more tonnage produced than in 1906, when the industry was extremely active and the existing capacity was strained to the utmost to take care of demand, which was heavy from all quarters.

Prices Firm

Prices are firmly maintained for pig iron, unfinished steel and the regular finished steel products. This price maintenance is regarded as perfectly natural in the circumstances, and not as remarkable in any sense. There is no incentive to producers to cut prices as there is no business in sight that could be booked at a cut price and could not be booked at current quotations. Those who do buy are buying only to supply known requirements that cannot profitably be postponed, and price is hardly an object at all. The buyers pass the material along very promptly, either as jobbers to retail buyers or as manufacturers to distributors of their various wares. Purchases are only for very early delivery, generally in from two to four weeks.

Producers know quite well that when prices are so high any cutting would likely precipitate a decline, probably a very extensive one, and the game would not be worth the powder. There are certain commodities which normally fluctuate more than do the regular finished steel products, and their behaviour at this time furnishes a good illustration of the principle that when prices once start declining they go quite a distance. Iron bars are an excellent illustration. Under Government control they were set at 3.50c. Chicago and Pittsburgh adopted this price as f.o.b. their respective mills, while eastern Pennsylvania mills held that this meant 3.50c f.o.b. Pittsburgh, and added freight to destination, which made 3.745c, delivered Philadelphia.

When in December the steel mills made certain precise reductions in steel products, the iron mills did not reduce. Then the Chicago mills made a reduction in the curious form of taking 2.90c Pittsburgh, as their new quotation, which meant 3.17c delivered, Chicago. It would have been easy to adhere to this price if the Chicago mills had confined their sales to nearby territory, but when they sold towards the east they were shipping "against their freight," and thus received less f.o.b. mill than if they shipped locally or westward.

Some mills actually sold in Boston at 2.90c, Pittsburgh, making the delivered price 3.20c, but this was equal to only 2.66c mill, whereas at 2.90c Pittsburgh delivery to Chicago would be 3.17c, with just a little freight deducted to get the f.o.b. mill price. The next step was naturally to sell at 2.66c or thereabouts for local delivery, which resulted in 2.70c, delivered Chicago, being done, or far below the original cut price adopted, 3.17c. The Pittsburgh and eastern Pennsylvania mills refuse to cut prices and therefore are quoting, nominally, prices that are roughly $15 to $20 a ton above the Chicago mills. Should they undertake to meet the Chicago mill quotations there would be more widespread competition.

Scrap is another illustration. Heavy melting steel scrap was so scarce, that mills paid the full Government limit of $29, delivered, and in the case of Pittsbough mills paid also the 3½ per cent. commission allowed, making the cost about $30. Now scrap is going begging at $17, delivered Pittsburgh, having slumped and slumped, and still there is no demand.

Decline in Coke

Connellsville coke is the latest illustration. It was $6.00 for furnace, under Government control, but as soon as it was announced, about January 17, that Government control would cease at the end of the month, it began to decline. Some leading operators endeavored to hold the price at $5.50, but the decline hardly halted an instant at that figure, and there have been many offerings in the past few days of good grades of furnace coke at $5.00. A similar effort was made to hold foundry coke at $6.5[illegible], the Government limit having been $7.00, but there is foundry coke of at least fair grade available at $6.00.

These things are well understood, and the steel producers want it that when circumstances require a decline there will be a definite and precise one to some new level to which they can adhere. There is an idea quite prevalent that about April 1 some reductions along this line will occur, probably with the United States Steel Corporation taking the initiative.

Wages

The iron and steel industry has no intention of making any move whatever towards reducing its wage rates, at least for some time to come, say not before the middle of the year. The producers believe that wages in general should come down, but they feel that the cost of living should come down first. Moreover, they are not more concerned, if as much, in their own wage rates as in rates paid outside the industry. They would like to see their customers who fabricate or consume steel, not so much burdened with high wage rates, as that interferes with the consumption of iron and steel. Then, too, the industry buys materials which are high priced on account of high wage rates, and it pays much higher freight rates than formerly, the freight advances having been caused chiefly by advancing wages on the railroads. Thus while the cost of producing finished steel is high by reason of high wages it is not simply because the steel producers themselves are paying high wages.

Veneer Chair Seats

D. K. Clarke, 228 Ottawa St., Hamilton.—Where can we procure veneer chair seats?

Chair seats are made by the Canadian Veneering Co., Inc., Acton Vale, Que. This line being distributed by Richardson & Bureau, 55 St. Francois Xavier St., Montreal. J. E. Beauchamp & Co., Montreal, also deal in veneer chair seats.—Editor.

Motor Boat Engines

Barton & Fisher, Port Arthur, Ont.—We have an inquiry for an engine for a motor boat, Smillie engine preferred. Please give names of firms and any other information.

The list herewith of marine engine manufacturers includes the principal manufacturers and distributors throughout Canada and the United States. As far as we can learn, the Smillie engine is not being made at the present time: Canadian Fairbanks-Morse Co., Ltd., Toronto; Adams Engine Co., Penetanguisheine, Ont.; A. R. Williams Machinery Co., Toronto; Canadian Sirocco Co., Windsor, Ont.; Midland Engine Works Co., Midland, Ont.; Gilson Mfg. Co., Ltd., Guelph, Ont.; Hamilton Motor Works, Hamilton, Can.; St. Lawrence Engine Co., Brockville, Ont.; The Smart-Turner Machine Co., Ltd., Hamilton, Can.; Buffalo Gasoline Motor Co., Buffalo, N.Y.; Sterling Engine Co., Buffalo, N.Y.; Ferro Machinery & Foundry Co., Cleveland, Ohio; Gray Motor Co., Detroit, Mich.; Evinrude Motor Co., Milwaukee, Wis.; Loew-Victor Engine Co., Chicago, Ill.; Kermath Manufacturing Co., Detroit, Mich; Northwestern Motor Co., Eau Claire, Wisconsin; S. M. Jones Co., Toledo, Ohio; Palmer Bros., Coscold, Conn.; Winton Engine Works, Cleveland, Ohio; The Frisbie Motor Co., Middletown, Conn.; Peerless Marine Motor Co., Buffalo, N.Y.; The Standard Co., Torrington, Conn.; The Automatic Machine Co., Bridgeport, Conn.; S-R Manufacturing Co., Schnectady, N.Y.; Universal

Prepare Samples for Spring Business

Dealer Tells How He Discovered One of the Best Paint-Selling Stunts He Ever Used —Shiny Samples Do Not Always Carry Strongest Appeal to the Country Trade

IT was a farmer who put me on to one of the best paint selling stunts I have ever used.

I was out in the back of the store one day, trying out some barn paint when one of our farm customers strolled up. He watched me for a few minutes, and naturally directed a few questions and observations my way about paint.

He wandered off, but presently returned with a rough piece of hemlock.

"Let's handle that brush a minute or two," he requested. I handed over the brush, and he applied some of the paint on his board; he held it up for inspection critically.

"Now that's the kind of sample that gets me interested," he remarked. "It makes me see exactly how it's going to look on the boards my barn is made of. Besides," he added, "I've had a chance to get a feel of the stuff, and it don't look to me as though it would take an awful sight of work to do my barn."

Made a Good Sale

A few more questions about covering capacity and prices resulted in a good-sized sale of barn paint. The farmer, I know, had no intention of buying paint when he wandered up to where I was working. He had come to town to buy wire fencing and the family's weekly grocery supply.

The transaction set up a line of thought I couldn't get away from.

Had I been left to deal with him over the counter in the usual fashion, I was certain I never could have sold that paint with the shiny samples provided by the manufacturer. They would not appeal to him. When he saw the paint on a surface he knew, and which was exactly like the surface of his barn, it aroused an interest that any amount of fancy finished samples could not do.

Over Their Heads

It struck me that perhaps the highly finished samples of the manufacturer were shooting away over the heads of the common run of folks. Why not make up our own samples on plain every-day surfaces that would hit our trade around the breast pocket or in whatever pocket they carried their cash. I soon found that it was simplicity and not complexity that brought paint sales. Just as the kind of cooking that mother makes whets a keener appetite so I figured that the simple samples that we plain chaps in the store could make might arouse greater interest in paints.

The spring painting season was coming on, and I thought it was worth trying out.

My first idea was to arrange a window display of our paints on exactly the same kinds of surfaces that our trade had about them, and in which they would be more interested than the smooth specially prepared samples of the manufacturer.

I went to the local lumber yard, and obtained a number of different kinds of lumber and siding, such as were most commonly used in our locality.

At the back of the window we built up a small section of clapboard siding which was painted carefully with our best selling color in our first grade house paint. On this was hung a small white card, which read as follows: **"This is the way your home will look with our ——— brand of paint. We supplied it ourselves out of our regular stock."**

Showed Barn Paint

Taking a tip from our farmer friend, I placed a section of four rough hemlock boards, five feet high at one side of the window. This was painted with red barn paint. A card similar to that placed over the clapboard section was hung on this section, drawing attention to our barn paint.

At the other side of the window, a section of wall board, made to represent the wall of a room and decorated with flat wall paint, was erected. A similar card was hung on this section also.

On the floor of the window, we placed two sections of flooring, one of tongue and grooved pine, the other of hardwood. The first was finished with our floor paint, the other with our favorite floor varnish. On these also we placed cards, drawing attention to our own work with our own stock in trade.

Between the two sections of flooring was placed a larger display card, reading as follows:—

"THESE SAMPLES ALL FINISHED FROM OUR REGULAR STOCK BY OURSELVES

What we can do, you can do, with our Paints and Varnishes. Come in, and let us tell you how
We did it,
and
How you can do it too."

Continued on page 64.

When Asked for a Wall Finish—

are you sure that the one you sell will do credit to your store?

There should be no element of doubt in your mind if you have a reliable **Paint Agency** with a line of first-class Paints to back you up.

Moore's Muresco Wall Finish

is an ideal wall decorative medium. It's easy to apply—will retain its new appearance for an unusual length of time, and is absolutely sanitary. Your customers will be pleased with the soft, velvety tones so easily to be had with Muresco.

A wall finish that gives wonderful results both to the customer and to the dealer seeking additional profits. All that and more you will find in **Muresco.**

Write us to-day for particulars regarding our agency proposition. It's a good one, and well worthy a place upon your programme of future planning for the coming year.

BENJAMIN MOORE & CO., LIMITED

WEST TORONTO :-: ONTARIO

The results were, to say the least, more surprising than I had anticipated, and revealed valuable lessons in the way of interesting human nature with paint displays. In fact, I was led to look upon ways and means of selling paint from several new angles.

Appeals to Farmers

We kept our manufacturers' display cards and samples for use in selling over the counter in the usual way, but here was where the farmers' viewpoint and the point that appealed to them revealed itself as a common trait in every class of those who became interested in the display.

In the majority of cases we found our customers would wander away from the manufacturers' samples to the home-made samples in the window. They wanted to get their fingers in those samples, and their eyes close up to them. These held an interest that came closer home to the paint buyer because he could see more readily what our paint and varnish would look like on his own property. We found also that the samples brought out a greater volume of enquiries about paint. "Exactly how did you do it?" and other similar questions came to the surface, where the manufacturers' samples usually develop an attitude of "Yes, they look very nice, but, of course, it won't look like that when I put it on."

It was found that our own samples developed ten questions and enquiries to one that the stereotyped display rack of colors brought forward.

Extra Effort Paid

I soon found that our extra effort more than paid for itself in the paint sales. I also realized that I had found a solution to the getting at the human interest side of engaging attention in our paints and varnishes. By adopting a simple homely method which anyone could comprehend and visualizing as clearly as possible his own property surface I was able to get the attention and interest not only of the man who had thoughts of painting or the man whose property needed paint, but also of him whose attention had not been turned in that direction

The fact that we ourselves, men whom our customers actually knew in the flesh, had done the work, made a strong appeal to many. Our window cards, stating that "What we can do, you can do" had a human appeal that we had scarcely realized the value of when we arranged it.

The fact that we as individuals, on practically the same plane of life as our customers, could obtain such results put up no serious barriers in the mind of the prospective buyer about accomplishing the same for himself. The highly finished manufacturers' samples, consciously or unconsciously, raise in the mind of the paint buyer visions of highly trained experts who make such work a specialty. They lack the common everyday appeal for service to the average wielder of the brush.

Other Opportunities

This personal effort also raised us to the position of near experts in what the plain man wanted. Because it was our own work, it opened up opportunities for us to advise our customers how to use paints and varnishes, and to caution them on what not to do.

I never realized before how much power rests in the hands of the retailer in directing sales of paints and varnishes so that they could become of greater service to the purchaser. In fact, he has a distinct advantage, in his personal contact, over the manufacturer, with all his elaborate organizations for marketing his product.

Our home-made samples had opened up avenues of personal contact with our trade, which we actually realized on, in increased paint and varnish business.

It was such a good idea that I felt that it should be extended.

Clinches the Sale

Did you ever watch a dry goods clerk selling cloth to the women? The moment he gets a line on what is wanted he throws several bolts down on the counter and commences to unfold them. Immediately the customer's hand shoots out, takes hold of it, rubs it, smells it, stretches it out, and otherwise makes herself familiar with the goods. The clerk has begun to silently clinch his sale in this way. Mighty little selling would be done if he left those bolts on the shelves and attempted to close his sales with little two-by-four samples.

I found this same trait exhibited on our own samples. People seemed never satisfied until they got their hands on them, felt the surface, rubbed it up and down, and otherwise made themselves familiar with it. Somehow or other manufacturers' samples do not invite this familiarity, though I have often felt that if we could open up our cans of paint and let them stick a finger in it, they would be more pleased and satisfied with their purchase.

But it appeared we were playing as close as we could to this human trait and I sat down to figure out how we could make it a permanent feature in the paint department.

Were Kept Handy

The window samples were not thrown into the limbo of other displays. We made room for them in the department, and added to their number as rapidly as time would permit. Nor were they fastened against the wall. We kept them handy, so that we could trot them out on to the counter.

We found that in this way the customer was better able to get intimate with his intended purchase. The more intimacy we could promote not only led to quicker and easier sales, but to sales of larger volume as well. The intending purchaser was led to a greater interest in proper methods of use and application. The man or woman who held no previous thoughts of painting was more easily drawn to a sense of necessity of paint, and the home-made samples set his thoughts on the run to buying desire.

The manufacturers' samples were kept for display purposes, but they rapidly took second place as a selling help in our department.

"The Lord helps those who help themselves" was exemplified in this effort on our own behalf. The paint dealer who is genuinely interested in advancing his sales holds a majority of the trump cards over the manufacturer in his first-hand contact with the local trade.

Homely Touch Counts

It is not my intention to belittle the selling helps furnished by paint makers. Heaven knows they have attempted enough devices to assist the dealer, but the one thing they lack is the personal homely touch which only the individual dealer can put into his own store.

This suggestion will, perhaps, have no appeal or significance to the man who has no time to help himself.

But the man who wants to climb out of the rut, and give himself a boost will undoubtedly find in this suggestion a means of breaking into new selling channels.

As for myself, the idea paid and paid handsomely and I am going to develop it until I hit upon a better one; but the absolute simplicity of this method will be hard to replace, and I believe that simplicity has been the key-note of its success.

CONCRETE OIL TANKS

Storing oil in concrete tanks is a new departure in England, says the New York "Evening Post." A tank with a capacity of about ten gallons was recently made with a chemically treated concrete aggregate, and after being allowed to "weather" for seven days after moulding was filled with paraffin oil. Thus filled it was placed in a shed, where it remained for fifteen weeks; at the end of this period it was carefully examined. With the exception of evaporation, no loss had taken place; there was no sign of leakage, and the outside walls of the tank were free from the smell of its contents. Upon removal from the spot on which it had been standing no trace of paraffin could be detected, nor had the under side of the tank acquired any smell. This is probably the most severe test that could be applied to any container.

AMERICAN IRON AND STEEL INSTITUTE

Directors of the American Iron and Steel Institute have decided to hold the regular meeting of the Institute in New York City in May. Arrangements for the meeting will be in charge of a committee including James A. Farrell, Jas. A. Burden, E. A. S. Clarke, Charles M. Schwab and John A Topping.

SALES!

Have You Planned for Increased Sales

IN YOUR

Paint and Varnish Department?

Should your plans not be complete it will pay you well to investigate "The Elastica Line." This line comprises a paint or varnish product for every conceivable purpose, each one made up to the high standard of quality that has always been maintained on goods bearing the famous trade name

TRADE ELASTICA MARK.

Besides the assurance of superior quality maintained in all our "Elastica Products," our plans are most complete for a publicity campaign that will be far-reaching—one that will make Sales and increase the business of any merchant who stocks "Elastica Products." Let us talk the matter over with you. Our proposition is interesting.

The time to investigate is NOW.

Write us at once.

How to Check Up Net Earnings of Your Paint Department

DO you know the net earnings of your paint department? It is a simple matter to know where you stand and it is most important to promptly check anything that is eating holes in profits. It is handy to know also for your business returns in figuring out income tax and so on.

The very first thing to do is to subtract total expenses and cost of goods sold from total sales. The result will be the net profits from sales. You must add to this miscellaneous revenues and discounts realized. The result from this is the net earnings of your business.

Now the above is a very simple affair and can be concluded quickly and accurately *providing* proper records have been kept throughout the year. There are certain rules which must be followed, for instance, you must know exactly the cost of your goods every year, a careful inventory must be taken and an accurate record of all your purchases of every description must be maintained. To this add the cost price of your paint and varnish stock after inventory, we will say January 1, 1918, the purchase price of goods bought during the twelve months which followed and deduct the cost price of stock as you have it inventoried January 1, 1919. The result of this must be the cost of goods sold during that year.

Now, in order to reach a figure representing total sales for 1918, all you have to do is to consult the daily result of cash and charge slips. Next you want to find out your total expenses, and here are important items to include, wages, salaries —and do not forget to include in this the sum drawn by the proprietor or owner of the business. Include also rent, heat and light, supplies, delivery and express expenses, cost of your advertising, insurance, taxes, fixtures and equipment, interest paid, bad accounts actually charged off, depreciation on stock and general expenses.

Do not overlook this item of depreciation, for it represents a very vital part of your expenses. There is many a paint and varnish retailer who fools himself into the idea that his business is paying a much higher rate of profit than it actually does. Stock and fixtures and general equipment will depreciate, and it is very legitimate expense, quite as much so as salaries paid to your help. Do not forget to include this when you are figuring up your cost of doing business.

Bad accounts are another item which must be charged off on the books as soon as you have given up all reasonable hope of collection. List these bad accounts as items of expense.

You will see by the above that the problem of figuring the net earnings of your business is primarily a matter of keeping very simple records. You cannot steer safely without a rudder, and you cannot reach the harbor of sure profits unless your business is guided by accredited merchandising methods.

The practice of all of the above is distinctly to your advantage. There are many paint and varnish retailers who have kept good records recently because it was necessary to make out a tax statement, and they have been surprised at the leaks from their old systems which have been shown up by the installing of the new. Of course these records which have been kept during the last year were perhaps prompted by a duty to the Government, but, after all, you should have a selfish reason, we might say, because increased profits will result from managing your business on facts and not guesswork, and this is one thing which war tax legislation has done for many a business man. It has forced or inspired him to sound accounting principles, and he has reaped a great reward therefrom.

Says Demand For Glass Will Improve Every Day During 1919

Export Business, Added to the Home Needs, Will Take Whole Production, in Opinion of Pittsburgh Firm

Conditions in the window glass trade point to a big demand this year according to the following letter issued to the trade by the Johnston Brokerage Co. of Pittsburgh. The letter says:

To the Trade:—

After almost sixty days of negotiations the wage scale regulating pay of skilled workmen was concluded. Sensible working periods were adopted and the conservative production arranged last fall with the War Industries Board was allowed to remain in force.

Affairs relating to window glass have worked out admirably. This includes time of resumption, quantity to be produced and operating periods. To begin with, it is estimated the production of all plants, hand and machine, will be from 6,000,000 to 6,500,000 50-feet boxes. During the blast of 1917-1918 the season's total output was about 6,300,000 50-feet boxes while manufacturers' sales were about 700,000 boxes in excess of the production. Certainly a very strong and healthy condition.

Delayed 60 Days

This year the fixed and natural time for starting up was December 8th, 1918, but for good reasons the general start applying to hand plants and to many machine factories was delayed 60 days, or until February 8th, 1919. This idleness during a dull period was fortunate and helpful. It gave every interest time to analyze the situation and recover from the shock and surprise of the sudden termination of the war. Upon considering the problems of readjustment and reconstruction, glass was purchased in limited quantities. In many cases the suppression of buying was unnatural, but the placing of needed orders was held up waiting for something to happen. December was one of the most inactive months ever known in window glass circles, but since the new year there has been a marked improvement. There is scarcely a jobbing house or sash firm that is not buying one or more cars and they want the glass quickly.

Expect Improvement

In our opinion the demand will improve every day during 1919. There never was a chance of lower prices for the current year, for the reason that factories had completed their purchases of materials on the old basis and in two-thirds of the plants these materials were stored ready for use. Fuel is higher, transportation unchanged and as yet no relief in the way of increased labor or reduced wages. The skilled workers secured an increase of ten per cent., largely for the reason that they will be given only a half season's employment and will have to resort to changed methods which are inconvenient and expensive.

We consider the present market absolutely safe and believe at the end of the manufacturing year stocks will be lower than at present, which is a record. Therefore we will all be prepared to take whatever action is necessary at the proper time without fear of depreciation on large stocks.

Export Business

Remember also that the export business will be large and will greatly influence our home market. Under present plans about half the hand plants will operate from February 8th until May 24th and will then close for the year, when the remaining hand plants will make their quota beginning August 15th and ending December 8th. The machine production will also be distributed over the entire year, so there will be no danger of an accumulation of glass that could be considered a menace.

Under these plans manufacturers and dealers can conduct their business very much as usual.

GIVEN THREE MONTHS

Cecil Beam, a Woodstock youth, who was convicted of stealing a quantity of goods from Ingram & Davey's hardware store, where he was employed, in St. Thomas, was sentenced to three months and not more than two years in the Ontario Reformatory.

Theo. A. Anderson, hardware, Norquay, Sask., contemplates erecting a new brick store in the spring.

Varnish Selling

It is comparatively easy to make the first sale of any varnish, but there is only one real foundation for a permanent and growing demand—and that is quality. Even small and occasional buyers have learned by experience, when buying varnishes and their allied products, that it pays to discriminate.

A simple but effective selling argument for the varnish salesman is Berry Brothers' label, because of its wide recognition as a guarantee of the utmost in varnish value.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 6.—Linseed oil has been steadier this week and has indicated a firmness in one quarter. It is not improbable that the bottom has been reached and that there may be a slight reaction to higher levels. Turpentine is in larger and freer supply and the price has weakened in one quarter 5c per gallon. There may be a further decline. Paint orders have been coming along very well and the volume of business is looked upon as quite satisfactory. A big season is looked for with sorting orders predominating. Rosins have declined, and the average change is about 50c per 280-lb. barrel.

Linseed Oil Tends To Steadiness

Montreal.

LINSEED OIL.—The market is without a great deal of change, and it is freely stated that the present basis is a decidedly low one, costs considered. There is more oil about than the present limited demand can readily absorb, and this is partly responsible for the present basis. There is a slight increase in one quarter but the range is within the scope of last week.

LINSEED OIL

Raw, Imp. Gallon—			
1 to 4 bbls	$1.38	$1.40	$1.45
5 to 9 bbls.	1.37	1.39	1.45
10 to 25 bbls.	1.36	1.38	1.45
Boiled, Imp. Gallon—			
1 to 4 bbls.	1.40½	1.42½	1.48
5 to 9 bbls.	1.39½	1.41½	1.48
10 to 25 bbls.	1.38½	1.40½	1.48

Turpentine $1.05; Rosins Decline 50c

Montreal.

TURPENTINE.—Some are selling this week at $1.05 per gallon, a decline of 5c. There is a freer delivery of turpentine and stocks are much improved. Indeed, there would seem to be no real shortage at this time and some large importers are willing to make a concession on round lots. It is not improbable that even a little lower basis will be reached ere long. Rosins, too, are somewhat freer, and the price basis down about 50c per 280-lb. cask.

Turpentine—		Imp. gal.
1 to 4 barrels	$1 05	$1 10
Small lots	1 12	1 20

(Packages extra).

No Big Selling; Putty is Held

Montreal.

PUTTY.—There is no great demand for putty this week, and the seasonable sale of this line is of a reduced nature. Prices are maintained on a fairly steady basis and no decline is looked for, while many materials hold at present levels.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Some Bookings For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—While there is naturally little present movement of white lead in oil the bookings have come along fairly well in the usual lots that dealers require for early selling. The market is unchanged with 5-ton lots selling at $15.50 per 100 pounds; ton lots at $16, and less at $16.35.

TORONTO

TORONTO, Feb. 6.—A narrowing of the range of linseed oil prices to higher levels is reported this week. Turpentine has declined 2c per gallon, and all sources are on the same basis now. Mixed paint holds unchanged and no further revision in white lead in oil is reported. Putty is quiet and the outlook for big business in window glass is encouraging. There seems to be an improvement in the movement of various paint products and the trade seems to be getting its feet and going out after business with very satisfactory results.

Linseed Oil Range Narrows; Higher

Toronto.

LINSEED OIL.—The range of prices has narrowed and an advance of 3c per gallon is shown from low level reached last week. The flax seed market seems to have steadied somewhat. There are wide fluctuations, but $3 seed seems to be about at low as it can get at the present time, and it may mean that the bottom has been reached for some time. The demand is better and some interests report a very good movement now in progress to the trade. The range of prices prevailing to-day follows:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1 44
3 to 5 barrels, gal.	1 43
10 bbls. and over	1 41

	Boiled Imp. gal.
1 to 2 barrels, gal.	$1 46½
3 to 5 barrels, gal.	1 45½
10 barrels and over	1 43½

	Imp. gal.
1 to 2 barrels, gal.	$1 52
3 to 5 barrels, gal.	1 51
10 bbls. and over	1 49

	Boiled Imp. gal.
1 to 2 barrels, gal.	$1 55
3 to 5 barrels, gal.	1 54
10 barrels and over	1 52

Turpentine Down 2c Per Gallon

Toronto.

TURPENTINE.—Some sources report a decline of 2c per gallon in turpentine this week, and this brings prices in all quarters on the same basis. The market in the South shows a little recession from last week's figures but has strengthened the last day or two and seems on the way up again. There is some selling being done for export but little shipment yet in progress, and consequently activity is not very general. Locally there is some business passing and outlook is considered very satisfactory

Turpentine—	Per Imp. Gal.
1 barrel (barrel included)	$1 10
2 to 4 barrels (barrels included)	1 09
5 gallon lots	1 20

More Activity in Mixed Paints

Toronto.

MIXED PAINTS.—There is a little more activity in mixed paints. Retailers are buying carefully but taking delivery of a fair amount of goods. The manufacturers look for a big sorting business this year and are making preparations to take care of same. Prices are held without change.

No Change in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—There has been no change in the situation as it affects white lead in oil. A little more activity is noted and a fair amount of sorting business and booking business for a little later shipment is being handled. There have been no further revisions in quotations, the prices ruling to the trade on pure white lead in oil being $16 30 per 100 pounds in ton lots, and $16.65 per 100 pounds in less than ton lots. The various brands are shown in current market quotations.

Brushes Selling Freely; Firm

Toronto.

BRUSHES.—Manufacturers report a distinct improvement in point of sales

Saved

500 Pounds White Lead

JUST one trial convinced the Niagara, St. Catharines, Toronto Navigation Company that Brandram's Genuine B.B. White Lead rightly deserves the title "Best for over two hundred years."

Usually they bought one ton of ordinary White Lead for covering their boat "Dalhousie City." Last year they were persuaded to try Brandram's. They bought one ton and when the job was finished *had* 500 *pounds* left, while the job was pronounced better than former years.

This is one instance in hundreds that we could tell you about. Painters all over Canada who have used Brandram's Genuine B.B. will never "go back" to any other.

Our dealers are enthusiastic in their praise of Brandram's Genuine B.B. White Lead as a builder of business. They never have any complaints.

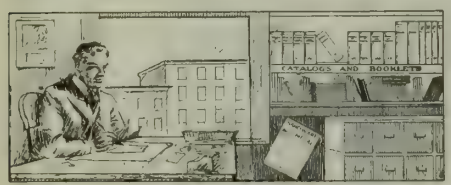
There is a sales proposition waiting for you—write for it. Better still, send in a trial order.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

If any advertisement interests you, tear it out now and place with letters to be answered.

of brushes, and retailers seem to be placing quite well for requirements of next few months. In regard to fibre used in household brushes, quotations received from Old Country interests show figures there much higher than present values in Canada, and active buying of supplies by British interests may result in higher fibre, which would be reflected in prices to the trade here on the various lines of household brushes into which it enters. There seems no immediate prospect of any recession in prices.



Glass Outlook Good; Putty Unchanged

Toronto.

GLASS, PUTTY.—The outlook for window glass is considered very good, Jobbers report a very fair inquiry and that these will develop into orders in many cases seems certain. It does not seem that smaller business can be expected than has affected the building trades the last two or three years, and in swinging the other way it is a case of getting behind and seeing how big each one can make the total. The prospects are considered very satisfactory. Discounts are held without change. Putty is unchanged this week; little activity is manifest and prices have held steadily at following figures:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

BOOKS, CATALOGUES AND CALENDARS

The Carborundum Company of Niagara Falls has issued an attractive calendar in which is featured a panoramic view of Queenston Heights, the lower Niagara River and Lewiston Heights. The view is in the natural colors and is splendidly done.

F. E. Myers & Bro., Ashland, Ohio, in their 1919 calendar show a large number of the pumps and hay unloading tools manufactured by the firm.

TALLMAN STOCK LIST

Tallman Brass & Metal, Limited, Hamilton, Ont., have issued a stock list of brass, copper rod, tobin bronze and phosphor bronze rod, brass and copper sheet and tubing, cast phosphor bronze, cored and solid bars. Copies will be sent to readers of HARDWARE AND METAL upon request.

Bicycle Week Will Be Observed May 3 to 10

At a conference of the Canadian Bicycle Dealers' Association, held in Toronto, it was decided to observe the eight days of May 3 to 10 as the Fourth Annual Bicycle Week in Canada. This selection will probably coincide with the date to be chosen by the United Cycle Trade Directorate for the U.S.A. Announcement was made that the Canadian industry had advised the association that considerably more attention, time and money would be devoted to Bicycle Week details than in any previous year.

The C. B. D. A. executive decided to give a dinner to the affiliated trade association of any city in Canada which makes the best showing during Bicycle Week with advertising, publicity, parades, window displays, races, stunts and other features. The competition will be restricted to members of the association.

The executive decided to have a standard form of lease agreement for bicycle time sales.

Committee chairmen were selected as follows: Grievance, N. S. Ferries, Hamilton; Racing, J. L. Isaac of Brantford (Western Ontario); Herb. Howe, Ottawa, (Eastern Ontario); Entertainment, J. R. Dixon, Hamilton; Legal, Percy A. McBride, Toronto; Membership, George A. Wenige, London; Publicity and Advertising, W. M. Gladish.

Trade Inquiries

65. **Small tools.**—A firm in Cardiff desires to purchase small tools suitable for engineers and carpenters, etc.

66. **Binder twine.**—A Bristol firm calling on farmers in this district wants to import binder twine from Canada.

67. **Hack-saw blades.**—Canadian manufacturers having hack-saw blades for export are asked to communicate with a Bristol concern.

68. **Spruce deals.**—A concern in Cardiff desires to get into communication with New Brunswick exporters of spruce deals.

69. **Pit props.**—A Midland importer of pit props and pitwood wants to get into touch with Canadian exporters of same.

119. **Shuttles and bobbins.**—Canadian manufacturers of shuttles and bobbins as used in cotton spinning are requested to communicate with a Bristol cotton works. Samples can be inspected on application to the Department of Trade and Commerce, Ottawa.

Electric Coffee Grinders

Fred C. Bishop, Norwich, Ont.—Where can I procure electric copper grinders?

Another firm manufacturing electric coffee grinders not mentioned in previous list is Landers, Frary & Clark, New Britain, Conn., A. Macfarlane & Co., Montreal, being Canadian representatives.—Editor.

Predicts Big Expansion in the Automobile and Tractor Business

WITH an easier situation in the steel market, the Dominion Forge and Stamping Company of Ford City and Walkerville anticipates a wide trade expansion, and are making preparations for increased capacity in their three plants.

Discussing the industrial outlook with HARDWARE AND METAL, Pearson Wells, secretary-treasurer of the firm, said:

"While prices may not be so good as we have enjoyed for the past three years, I think the coming three years will see a tremendous expansion of the automobile and tractor business. I also think we will still be able to compete very favorably with American manufacturers and I look for an extension of our business in the United States as well as in Canada.

"There is bound to be a little period of business depression after such a period of prosperity as all North America has enjoyed during the past two years but I think it will be gradual and will not be badly felt because the cost of living will decrease along with other things, and although the wage rate is bound to lower, still, there will be no severe hardships facing the people as a whole.

"Through all the periods of prosperity and depression and prosperity, the natural trend of business has been slanting upward, and we are attaining the highest business plane the world has ever known."

.. NEW HARDWARE GOODS

West-Woods, Ltd., Winnipeg, are now introducing on the market their Westwo peevie and canthook handles. The big claim made by the manufacturers is that these are made in a factory where efficiency counts, which is reflected in the goods. They are made, it is stated, of hickory in all sizes.

RAMSAY'S

Tremendous Lesson in Paint

The German fleet was really unseaworthy because of the lack of Paint.

Is this not a lesson that every paint dealer can convey to his customers—what a valuable asset RAMSAY'S PAINT is?

Tell your customers that RAMSAY'S PAINTS and VARNISHES answer this lesson — they have the PROTECTIVE PROPERTIES for the HOME, BARN and OUTBUILDINGS wherever used.

What Varnish Do You Sell?

There is just as big a difference in varnishes as in paints. Cheap varnishes will not stand the test and cause dissatisfaction and disappointment to the user.

Dougall Varnish

is the line of entire satisfaction. Every user is a pleased customer. There is a Dougall Varnish for every purpose and our reputation and guarantee stand behind every gallon sold.

Our Proposition to the dealer is a good one. Write for it.

The Dougall Varnish Co., Ltd., Montreal

The Value of the Business Press to Business Men

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

WOODSTOCK ONTARIO

CANADA PAINT

A good window-display of Sun Varnish Stain will bring you a lot of new customers, who will become well-satisfied ones, after they see what excellent work they can do with this fine CP product.

CP Sun Varnish Stains

Make Your Women-Customers Happy

It is a wise plan to stock up well with Canada Paint Sun Varnish Stains.

They are just what your women-customers want in housecleaning time, for doing over the floors, woodwork, and renewing the furniture.

They combine a permanent Stain with a durable varnish---the materials are of the very highest quality---and the result is most successful. They give a splendid finish to all sorts of woodwork, and have exceptionally long wearing qualities. The used hardwood effects are perfectly simulated.

We have a number of well-tried selling-helps for you. Ask about them. Our advertising is behind every can of Sun Varnish Stain that you stock.

Send your order in at once and insure early delivery.

Ask us about our Agency Proposition.

Westwo

It Pays The Dealer To Buy Wagon Sets In Crates

The price per set is very slightly more than where shipped loose — while the crated sets reach the customer in as good shape as when they leave the factory.

No Bruised Woods
No Marred Finish

Westwo products are made from the best selected hickory and oak. Irons used are the best manufactured in Canada. Painted and striped — they look better and last longer.

All Sets Guaranteed
Defective Parts Replaced

Goods Represent The Highest Quality

Westwo goods represent the highest quality. Every piece backed by the manufacturer's guarantee. You will have requests for these goods. Write your dealer to-day for illustrated folder and catalogue. If he does not handle, write us direct.

West-Woods Limited

Winnipeg

London Bar Iron

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.

Compares in quality with the best imported brands, but is considerably lower in price.

Copy of tests made by Strength of Materials Laboratory (University of Toronto) March 27th, 1918, prove our claims as to quality.

	9-16 Sq.	⅞ Rd.	1 Sq.	1½x⅜

THE **Wolseley** Sheep Shearing Machine Co., Ltd. Birmingham

"Delta" Files

—we'll help you sell them

TRADE MARK

DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

A Paint that Satisfies!

When you hand a can of paint over your counter, what are you selling your customer?

Is it just paint—a fluid which colors a surface? If that is all you can honestly give him for his money, it's high time you were linking up with a *Stephens' Agency.*

Every *Stephens' Agency* sells with every *Stephens' can of Paint or Varnish* a product that he is proud to recommend to his customer.

He knows — that the Stephens' organization is back of every sale. An organization that has a reputation for good paint.

He knows — that the high standard set for Stephens' Paints and Varnishes is there in every can.

He knows—that his customer will be thoroughly satisfied.

STOP THAT

GUESSWORK

There is only one way whereby you can be sure —take a Stephens' Agency.

Write to-day for our proposition

Every Hardware Dealer Should Use This Display

The illustration below shows the new self-selling counter display for Marble's Waterproof Matchboxes. Each case holds one dozen matchboxes, individually packed in a neat two-color carton. The lid of the case is attractively printed in colors, and is cleverly arranged to tilt up the box at back for better display of goods.

Marble's Waterproof Matchbox is famous the world over—used by soldiers, hunters and campers in every country and is a staple, year 'round seller. Made of seamless brass and heavily nickeled. List price, each 55c.

Trade supplied by jobbers. Any Canadian jobber will fill your order promptly. Liberal discounts to dealers. Write for complete catalog of Marble's Sixty Specialties.

Marble Arms & Mfg. Co., 5350 Delta Ave. Gladstone Michigan

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

Kwiklites MEHASCO

ANOTHER MEHASCO MESSAGE 25

Here is another well-advertised line, Metal Kwiklites. They are the latest and highest type of Flashlights, and made from the very best of materials. The cases are strong, drawn from solid sheet brass. They are non-short-circuiting; the battery will not run down by being left on metal objects. The Reflectors are scientifically designed and show up well on the darkest night, or in fog or smoke. They are also beautiful in appearance, and are of standard sizes, and their batteries are interchangeable with all other well-known makes. We feature strongly the Miners' regular two-cell and the three-cell, as well as the vest pocket. We also carry a stock of batteries and bulbs. If interested we will be pleased to hear from you.

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

Flags :: :: Flags :: :: Flags

There is brisk demand for all kinds of flags, and well-assorted stocks in sizes ranging from 3 ft. by 1½ up to 12 ft. in Jacks and Canadian Ensigns are being carried by many hardware men throughout Canada.

More local trade is done by having goods on hand for delivery when required—for the **Public Schools, City Hall,** various **Churches** for draping inside, over **Pulpit** or **Honor Rolls, Lodges** and other places. Our Flag Catalogue is now ready for distribution and will be mailed for the asking.

GOVERNMENT CONTRACTORS **J. J. TURNER & SONS, LIMITED** PETERBOROUGH ONTARIO

The Red Star is crated to take up very little space in your store room.

The Dolly on the Red Star by which the clothes are agitated.

The Red Star Washer.

Beatty Bros., Limited

Dept. P362

Fergus, Ont., London, Ont., Winnipeg, Man., Montreal, Que., Edmonton, Alta., St. John, N.B.

The Red Star

There is no heavy work with the Red Star. The lightest push will start it.

The lid is easy to lift because the Dolly can be lifted first to free it from the clothes.

A Better Washer

This is the machine your customers have been waiting for. It works easily; runs noiselessly; washes thoroughly; lasts well.

Put one on your floor, and let your customers try it for themselves. It won't stay on the floor long! The first person who tries it will soon find that it is, indeed, "A Better Washer."

The Red Star runs easily because the mechanism runs on **two sets** of ball bearings; because all gears have spiral machine cut teeth and fit to a hair's breadth; because the fly wheel is extra large.

There is no racket when the Red Star is running. The ball bearings and carefully cut gears cut out friction, and besides doing away with the noise make the washer easy to operate.

Week in and week out the Red Star can be used, and still it will run as easily as a new machine and be as serviceable as when it left your store. There is a solid, one-piece bed plate bolted to the tub serving as a foundation for all mechanical parts—and it keeps them running in harmony always. The mechanism is very compact and simple, with no complicated parts to get out of order.

Another point your customers will appreciate—**The Dolly can be raised before the lid is lifted.** This frees the dolly of clothes and makes the lid easy to lift. The dolly can be dropped after the lid is down so that the clothes are not scooped over to one side of the tub.

Try one of these washers. It will make lots of friends for your store and for itself. They are selling like wild fire from Coast to Coast. If our salesman has not called on you about the Red Star, he soon will. In the meantime, write us for circular in color illustrating and describing "The Better Washer."

Champion
Priming Plug
Price $1.50

Putting the Spark in a Cold Motor

Making a motor hum with the first turn-over is important to all motorists from now till next April. Getting a quick answer from the crank or the starter eliminates most of the hardships of cold-weather motoring.

Champion Priming Plugs

Will not only help your customers to run their cars in comfort all winter, but they save gasoline and starter batteries.

They take the worry and work out of driving a car, and it means more sales and profits to you. Show your customers how "a Prime Saves Time."

Champion Priming Plugs place the gasoline right into the heart of the motor, at the sparking point, where it catches the first spark. This is the plug that every man who drives his own car—whether passenger car or truck—needs right now.

A stock of Champion Priming Plugs will help you to give a service that your customers will appreciate, and increase sales in an otherwise dull accessory season.

Every Champion is guaranteed to give "complete satisfaction to the user or free repair or replacement will be made."

Any jobber in motor equipment can supply you.

"——and They Came Back for More"

How One Hardware Dealer Satisfied His Customers

Throwing out the unbranded, unknown and unreliable lines has enabled one hardware dealer to make every customer come back for "more." How often hardware dealers are induced to stock up on lines that can be bought cheap, but send the customer off to some other dealer for his next supply. "Good Trade Follows Good Goods."

MALTESE CROSS Accessories

MALTESE CROSS ACCESSORIES are known all over Canada. They have the **quality** and they are exactly adapted for the purpose intended. No mistakes or misfits in Maltese Cross Accessories.

Order a Sample Line Direct from Head Office, or from our salesman when he calls.

1,000,000 Motorists Use It 4,000,000 More Need It

The limited supply and high cost of inner tubes makes it necessary for motorists to repair punctures, cuts, tears and cracks—to keep their tubes in good repair.

The present conditions make it imperative for motorists to stop the easy-going, wasteful habit of carrying $5 to $15 worth of spare tubes—that deteriorate quickly—and scrapping perfectly good inner tubes that merely have a puncture, cut or tear—which can be repaired *permanently* with a Shaler 5-Minute Vulcanizer, quicker than a new tube can be inserted.

Saves Tubes—Saves Repair Bills

Easy to Use

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically*—and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on patch"—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. Carry it in your tool box for emergency use. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

Easy to Sell

A five-minute demonstration sells the Shaler Vulcanizer easily. Every sale gives you a good profit. The large resale of Patch and Heat Units is profitable and brings new customers into your store, who will also buy other accessories.

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc.; 4,000,000 more need it. Every motorist is a prospect for this handy tube vulcanizer—it should be in every car owner's tool box, for emergency use on the road or repairing tubes at home.

Complete Outfit Only $2.00

The outfit includes, the Vulcanizer—12 Patch & Heat Units (6 round for punctures, and 6 oblong for cuts)—complete $2.00. Extra Patch and Heat Units $1.00 per dozen.

Sold By All Accessory Dealers and Jobbers

TO DEALERS—To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists, Repair Shops and Garages mailed on request.

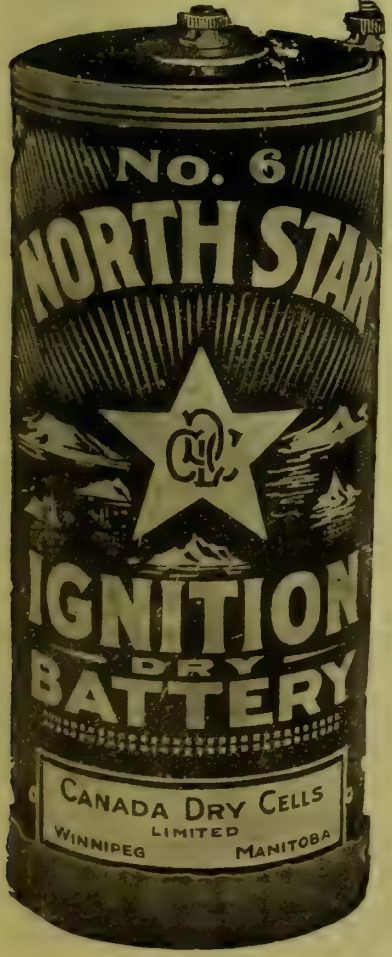
It is Cheaper to Prevent Trouble than to Cure it

The BOYCE MOTOMETER installed on a car insures safety in operation. No driver, not even an expert, can absolutely guess at motor temperatures. And a Boyce Motometer installed on a car absolutely demonstrates this fact the first day it is installed.

It immediately detects motor troubles, such as overheated engines, lack of oil, radiator leaks, any defects in the circulating systems, improper carburetor adjustment, and like troubles, and gives warning in ample time to avoid serious injury, with its consequent expensive repairs.



WHEN THERE IS TROUBLE THE MOTOMETER SAYS—STOP!

Send for descriptive booklet, "What Every Car Owner Should Know," and complete information.

GREAT WEST ELECTRIC CO., LIMITED

WINNIPEG

Distributors of Laco Tungsten and Nitro Lamps

In North Star Dry Cells Your Customer Gets What He Pays For: ---Service!

The element required in an ignition battery is length of life—service—it must do the work required or it must be cast aside to be replaced by a satisfactory — an **efficient** battery.

In North Star Dry Cells your customer gets a thoroughly efficient battery in every sense of the word.

He will always come back to you, because in selling North Stars, your customer always gets what he pays for—**service.**

The Western Battery for Western Need.

Ever-Tyte PISTON RINGS

B79

READ THIS GUARANTEE:—

We guarantee *EVER-TYTE* Piston Rings to produce higher compression, develop more power, and use less fuel and lubricating oil than any other piston ring; and we will return the full purchase price to any purchaser upon the return of rings, if they fail to meet the conditions of this guarantee after six months actual service—provided the cylinders are not scored, nor badly warped and the motor is fully equipped with *EVER-TYTE Piston Rings.*

The Real Ankle Support That Makes Others Look Like Imitations

Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

Why Not Use Facts? They are Excellent When of the Right Sort.

Then why not have your store equipped with the best and latest time and labor-saving devices? Our cash carrier service will afford one of them. The merchant without it is losing more dollars in one year than are required to defray its cost. Your money, by it, would be sent to the office, where it properly belongs.

Our circular—full of information—will tell you more about it, and a post card costs but two cents to enable you to get it.

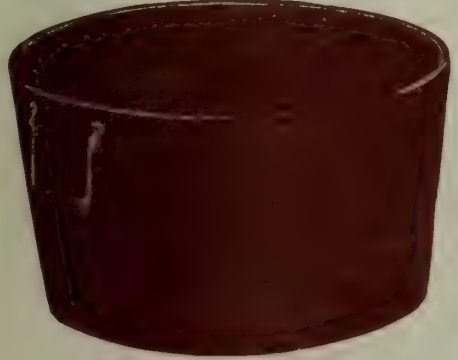
STAR PAIL

TWIN BEAVER
WASHBOARD

LIGHT AND DURABLE

Eddy's Indurated Fibreware

In the home and on the farm, Eddy's Indurated Ware is becoming more popular every day. It is much lighter than metal, and wears far longer.



Being moulded in one piece, Eddy's pails, butter tubs, etc., are sanitary and practically unbreakable—will not absorb odors and cannot split, warp, rust, or come apart.

Eddy's Twin Beaver Washboard is an especially popular line. It has a double rubbing surface of indurated fibreware which, beside being unbreakable, will outwear either metal or wood.

You can do a bigger and more profitable business by recommending these goods to your customers with the assurance of giving entire satisfaction with every sale.

ORDER NOW FOR SPRING

UNIVERSAL

GREETINGS

To the hardware men in attendance at the Convention in Hamilton we wish to extend our heartiest good wishes. From what we know of the trade generally in years spent "on the road" we feel sure that the gathering will be productive of pleasure and profit to every dealer who is fortunate enough to be present.

For us it means a welcome opportunity of meeting old friends again, and of making new ones. Our exhibit, as usual, will be quite convenient to the meeting room. We cordially invite every hardwareman to drop in and make himself at home, when it will be our pleasure to do what we can to make his stay agreeable.

If any advertisement interests you, tear it out now and place with letters to be answered.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

St. John, Quebec, Montreal, Ottawa, Toronto, Hamilton, Windsor, Winnipeg, Saskatoon, Calgary, Vancouver, Victoria.

Stirs Up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers' and grocers—weighing produce before marketing, weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A Government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

Sterling Spark Plugs

More About Why I Sell Sterling Spark Plugs

Last month I talked about Sterling electrodes in backing up my claims for Sterling Spark Plugs.

Now I am going to talk about leak-proof adjustment.

That is another reason why I sell Sterling Plugs.

To be readily cleanable, a spark plug must admit of repeated separation and re-assembly.

Naturally, then, to get absolutely leak-proof re-assembly, every part of the plug—shell, bushing, core and the copper-asbestos gaskets—must go back into perfect adjustment.

Sterling Spark Plugs are especially designed to fit together so accurately that, no matter how many times the parts may be separated, adjustment will be as truly leak-proof as when the plug left the factory.

No mechanic is necessary to re-assemble the plug; two wrenches are the only tools required.

Sterling Spark Plugs are sold by progressive garages and supply dealers everywhere.

Canadian Products

IN THE SPOTLIGHT

Our advertising campaign, outlined on the opposite page, is sure to develop a big market for Reliable Flashlights and Reliable Dry Batteries.

Thousands of Canadians already know Reliable products, favourably. There is a big demand for them already. One reason—our attractive coloured enamelled Flashlights; another—the high quality of every article we offer for sale.

Reliable products provide a greater margin of profit for dealers than any other similar line. Reliable products are made by Canadian workmen in a Canadian factory, financed by Canadian money.

Reliable Dry Cells and Ignition Batteries are offered to the Trade, fresh, and brimful of life and energy. Dealers who are now handling them know that they have earned the right to the name RELIABLE and our slogan "Lively and Lasting."

Reliable products are offered for sale by the following jobbers:

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Meet Us In Hamilton

---and see the complete 1900 line

When you come to the Convention, be sure to look up our Exhibit. We will have a representative in constant attendance, and will show our complete line.

We are very anxious to meet all of our present dealers, and any other hardwaremen that are interested in the latest and best in washing machines. Just so you won't forget, jot down the word "1900" in your notebook.

Nineteen Hundred Washer Co.

357 Yonge Street TORONTO

A New Firm Selling Automotive Supplies

WE are entering the jobbing field with assurance that the past experience of the members of this firm, both in the wholesale and retail business, will materially aid in our service to the trade.

Our new catalogue, listing many new and exclusive lines, as well as those of accepted reputation as standard, is now ready. It will be mailed to all sending their names and addresses.

"Twenty-four Hour Service Worth While" will be our slogan, which we will back in a manner that will be most pleasing and acceptable to the trade.

This twenty-four hour service idea will result in reducing the slow-moving stock problem for many dealers and makes the entry into the automotive parts business easy for such dealers as are in a position to add this line.

Write for our proposition

WALKER-VALLANCE LIMITED

HAMILTON, ONT. - - Phone L.D. Regent 3564, Hamilton

P.S.—Convention members attending the meeting in Hamilton on the 18th, 19th and 20th are invited to inspect our premises, and make use of our facilities as headquarters while in Hamilton.

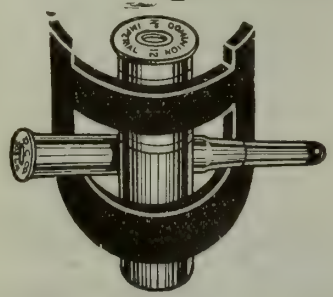
Build Your Sales OF AMMUNITION

DOMINION .22's



Over 6,000 Canadian boys — members of Dominion Marksmen's Club will shoot millions of rounds of Dominion .22's in their competitions this year.

Thousands of Canadians have taken up target shooting since the beginning of the war and many more are adopting this interesting sport.

Make this the basis of bigger and more profitable ammunition sales. Encourage the boys. Every target shooter sooner or later becomes an ardent sportsman. They will be the purchasers of Dominion Metallics and shot shells later.

Push your sales of .22's to-day and your ammunition business of to-morrow is assured.

Dominion .22's mean a small investment, a quick turnover and good profits. Order from your jobber to-day the little cartridges backed by the big "D" guarantee of dependability.

German Exports to Canada in 1914

Lines That Figured in the Building Up of a Trade That Was Increasing Every Year—List Shows the Number of Firms in This Country Now Engaged in Making These Lines

(By T. M. Fraser, Ottawa Representative MacLean Papers)

THE last year for which we have trade statistics involving Germany is the year 1913; but in the case of Canada, as our fiscal year ends in March, we have Canadian importations from Germany for the trade year 1914.

The total exports of Germany in 1913 were nearly two billions and a half. In the year ending March 31st, 1914, Canada imported from Germany more than she did from France; in fact, Germany ranked third on our trading list, though the balance was much in her favor, as we imported $14,686,069, and exported $4,433,736. From Austria-Hungary we imported $1,787,473, and exported to her $378,824. Our total import trade with both countries was between sixteen and seventeen million dollars. This was cut off at a stroke when the war began, and we either had to produce the goods ourselves, or import from some friendly country. The bulk of this business went to the United States; but in the case of a considerable amount of it, the supply was produced in Canada.

As a matter of fact, when the war came, Germany was making rapid strides in the Canadian market. The history of our trade with her in recent years is interesting, because it involves a typical attempt on her part to bully Canada into compliance with her wishes—an attempt which was a pronounced failure.

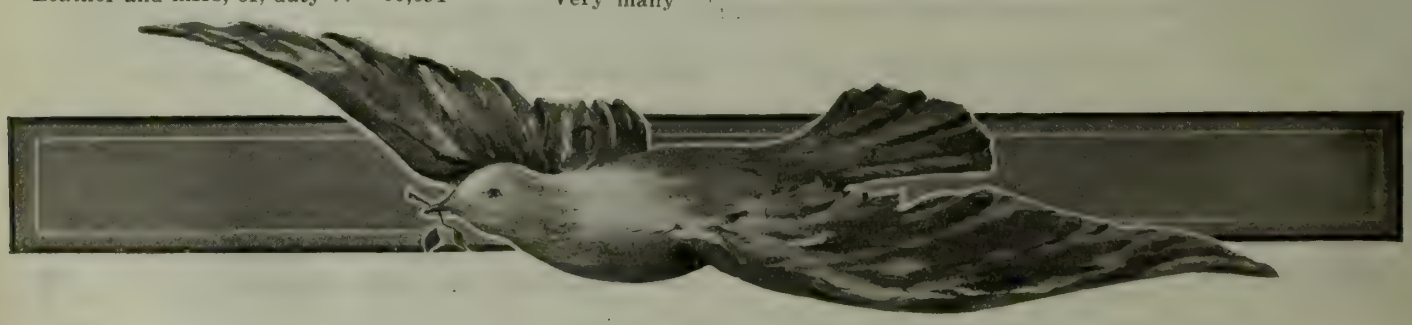
In 1903, Germany denied the right of Canada to give a trade preference to the Mother Country, and attempted to penalize us by imposing maximum duties. Mr. Fielding clapped on the surtax, and cut German trade with Canada in two. In 1910, Germany cried "Kamerad," after a seven years' fight, in which the loss was practically all on her side, as we were importing manufactured goods from her, and selling wheat mainly in return, which was good in any market.

As a perusal of the list given below will show, practically all our imports from Germany were manufactured goods.

There are comparatively few articles on the list which we could not make in Canada. What we can do is shown in the matter of toys and dolls. Before the war almost all this came from Germany. There are now thirty-five concerns engaged in the business in Canada, and their product last year was estimated at 800,000 dollars. More than one-third of our toys and dolls are now home-made, the chief competitors being the United States and Japan.

In the Metal Markets

Importations of iron and steel goods from Germany amounted to nearly three million dollars. This is all now either being purchased at home, or coming from the United States or Great Britain. There are certain lines of small hardware in the making of which Germany excels; and German cutlery had begun to get a big hold in Canada, importations for that country being second to those from Great Britain and ahead of those from the United States.



We imported over two and a quarter million dollars' worth of woollens and other textiles, including over half a million dollars' worth of hosiery. In cottons, the importations were small—we are "some" cotton manufacturers ourselves. We imported nearly a million dollars' worth of drugs, dyes, and paints. Some of this stuff—particularly in dyes and drugs—we had to go without, or accept substitutes which, if not yet "just as good," are fast becoming so. Some of the substitutes came from the United States, and some we produced ourselves. It would seem like carrying coals to Newcastle to import furs to Canada, but it is a fact that the year 1914 saw well on to seven hundred thousands dollars' worth come here from Germany. This was a needless trade, and is probably gone for ever.

In 1914, our total importations of sugar and molasses amounted to over sixteen million dollars, including over one million dollars' worth of beet sugar from Germany. We got along without it, even if we did have to ration ourselves. Germany's loss will likely be the gain of the West Indies, or we shall get it from France if we must have beet sugar.

The following list covers the principal items imported from Germany and Austria in 1913-14, only those of which the gross importation exceeded ten thousand dollars being given. The number of firms engaged in the various lines is given in the belief that it is approximately correct, according to the best information we could secure:—

ARTICLE	Amt. imported in 1914		No. of firms mfg. in Canada now

High Prices for Formaldehyde

Western Canada Hardware Men Highly Indignant Over Situation — Drug Used For Farming Purposes May be Brought in From States — Statement to "Hardware and Metal" by President of Largest Canadian Firm Producing It

WESTERN Canada wholesalers, through whom the supplies of formaldehyde that are used extensively by farmers are distributed, are expressing indignation at the enormous increase in price this season. So wrought up are they over the situation that many firms are not placing their usual orders and it is stated that efforts are being made to secure supplies in the States. Approximately 800,000 pounds of formaldehyde is used in Canada each season, and unless it is in the hands of the farmers by the middle of March or April 1 at the outside it is of little use. Prices have advanced more than fifty per cent. it is stated and the Western wholesalers regard this big increase as unjustifiable.

What They Claim

The Western jobbers claim that the Standard Chemical, Iron and Lumber Co. of Toronto, are the only manufacturers of formaldehyde in Canada and that therefore the firm controls the price. It is stated that a big mail order house is planning a coup by endeavoring to secure a quantity of formaldehyde in the United States and bring it to Winnipeg and offer it at a price much lower than that which the Canadian firms are asking. Just what this means to the hardware dealers is obvious. There is a duty of 25 per cent. on formaldehyde coming into Canada. The price in the States at present is about 32 cents as compared with over fifty cents now being asked in Winnipeg.

Company's Statement

L. M. Woods of Toronto, president of the Standard Chemical Iron and Lumber Company stated to HARDWARE AND METAL that there is at the present time in both Canada and the United States a great shortage of formaldehyde. The company's output this year he states cannot even under the most favorable circumstances exceed 600,000 pounds in time for the use of the farmers.

"In the wood distillation process in which we are engaged," he said, "there are three products produced simultaneously. charcoal, acetate of lime and wood alcohol. The extraordinary mild weather prevailing in Eastern Canada has demoralized the charcoal business, with the result that all our warehouses and factories are choked up with stocks.

For War Purposes

"Acetate of lime has been used almost entirely in the past four years in the manufacture of acetone for use in explosives for war purposes. Last year we converted almost all our production of acetate of lime into acetone for the British Government. At the end of December all our acetone contracts were cancelled and we were left without any market temporarily for our acetate of lime production.

"Wood alcohol, the third product, is the basis of formaldehyde, and for wood alcohol there is a very active demand at the present time.

Complicated Situation

"The position in which we found ourselves at the end of 1918 demanded the shutting down of our factories until we could dispose of our charcoal and acetate of lime. On the other hand we have a very important business in England and France in wood alcohol, and an equally important business in Canada in the sale of wood alcohol and formaldehyde. As we are the largest producers of wood alcohol and formaldehyde in Canada, it might be a serious thing if we were to close down our factories without giving ample warning to our numerous customers, and therefore we have been forced to keep our factories running to the extent of supplying to the extent of our ability the Canadian demand for wood alcohol and formaldehyde. It is quite obvious that under these very peculiar circumstances we could not sell these products on a normal basis, and if we are relieved of any of the business by the importation of goods from the United States or elsewhere it simply would make our position that much easier.

"We have hitherto always based our prices for formaldehyde on the prevailing market price of wood alcohol and we should have followed that policy this year if it had not been for the combination of circumstances that I have endeavored to describe."

Belgian Gun Makers Recently Released Seeking to Recover Trade

AT the outbreak of the war, many Belgian manufacturers were captured and interned by the Germans who overran that country. Among the firms suffering severely was that of Neumann Freres of Liege, manufacturers of shot guns, whose goods were widely sold in this country.

A. Macfarlane, of A. Macfarlane and Co., Montreal, stated to HARDWARE AND METAL that Mr. Neumann had been released, and that both he and his family are safe.

Mr. Macfarlane stated that a dispatch just received says the company's factory is being restored, and that development of the industry will be undertaken at an early date, dependent upon the various conditions peculiar to restoration there.

The Fabrique Nationale D'Armes de Guerre, also of Liege, makers of Browning Automatic Pistols, Mr. Macfarlane pointed out, would immediately undertake the restoration of their plant. In a letter received from the company a few days ago, reference was made to the fact that Mr. Andri, director of the company, had been liberated from the German prison in which he had been incarcerated since the beginning of the war, August 4, 1914, when the Germans entered Liege. Mr. Andri was offered exemption if he would operate his plant to the advantage of the advancing hosts, and to their request he gave a flat refusal. The assessed penalty for this refusal was the removal to Germany of the machinery and plant of the company, as well as his own arrest and imprisonment.

Mr. Macfarlane stated that the plant would be restored as quickly as possible with a view to looking after export trade.

MARKET FOR INGOT TIN

There are many factors which contribute to making a very interesting and unsettled market in tin. The contract placed for 10,000 tons of English tin was made at a high figure. At the time, it was figured the war would continue for some time. The arrangement entered into by the War Trade Board of the United States whereby the supplies came through a specified channel, has served to prevent a lowering of prices, at least to the extent that would have been possible had supplies been bought as required and this stock not bargained for.

It was pointed out to HARDWARE AND METAL that the Bolivian tin being brought into the United States is a factor in competition with the regular recognized grades selling so prominently heretofore. This tin is being smelted in the States at the rate of about 1,500 tons per month or 18,000 tons annually, and the sale is maintained on a reasonably steady basis, so that the distribution of the tin brought forward from Great Britain is naturally finding outlet slowly. With prices ruling much above the normal values of pre-war days, users are not buying in other than hand-to-mouth fashion. It means that there are many small operators coming out with little lots all the while and as a consequence the market is decidedly nominal. One informant claimed that it might be nearly six months before there would be a clean-up of supplies now held in this country, —Canada and the United States included.

Looking down James street from the mountain at Hamilton, Ontario.

All Aboard for the Big Convention

Sessions Which Will Open at Hamilton on Tuesday Morning Important to Hardware Dealer—Program of Exceptional Interest Has Been Arranged —Record Attendance is Expected

EVERYTHING is in readiness for the opening in Hamilton on Tuesday morning at 10.30 of the fourteenth annual convention of the Ontario Retail Hardware and Stove Dealers' Association. The sessions will last all day Tuesday, Wednesday and Thursday, and the officers of the organization have arranged a program that is of exceptional interest to hardware men. There will be something doing every minute, including a number of special features that have never appeared on any of the former programs. These are aimed to be of direct and immediate help to hardware dealers right in their own stores. The program has been splendidly varied, so that while there is a great deal of business to be dealt with, it will be interspersed by demonstrations of hardware goods, visits to Hamilton manufacturing plants, practical discussions on matters of interest to the trade, a banquet and entertainment, a moving picture show entitled "The Troubles of a Merchant, and How to Stop Them," and other features.

Don't Miss a Meeting

The officers of the association have done their part. They have spared no effort to provide the best program in the history of the association. It is now up to the hardware dealers of Ontario. The more support they give the association the stronger it will become. Every hardware dealer in the province should attend every meeting. He should do this not only as a part of his duty in supporting the association, but for his own interests. In no other way and at no other time can he meet so many of his fellow hardware merchants, so many of the manufacturers of the lines he is selling every day, or hear discussed by men in the very closest touch with the situation, conditions which are going to affect the hardware business in the coming months.

The Way to Win

The way to win is to pull together. It is to a merchant's advantage in a dozen different ways to meet the other men who are in the same business as himself, and discuss with them their mutual trade problems. It has been demonstrated time after time that co-operation of this kind is the quickest, safest and surest way of solving all difficulties. Every merchant has his problems. That is part of the game. Merchants who get together, though, are generally very much surprised to find that the very thing that has been bothering them has puzzled some other chap. By getting together and talking the thing over they can generally get around the trouble, and it very often has happened at conventions like that which is being held in Hamilton, that when a merchant states his problem, several other hardware men will get up and tell him how they solved it. Just in things like this the value of getting together and talking things over is obvious.

Is Worth While

It is well worth while, though, in itself for any merchant to get out of the business rut and meet merchants from all over the province. He will get a broader outlook on business and on everything else. The hardware business is one of the soundest and most prosperous of any of the branches of commercial activity in Canada. Merchants, especially those who have been tied closely to business, do not always re-

Programme

Fourteenth Annual Convention Ontario Retail Hardware and Stove Dealers' Association, Tuesday, Wednesday, Thursday, February 18, 19, 20, Banquet Hall, Royal Connaught Hotel, Hamilton, Ont.

TUESDAY, FEBRUARY 18

10.30 A.M.

MORNING SESSION

Executive Meeting
Appointment of Committees
Reception of Members

2 P.M.

AFTERNOON SESSION

Open Session
Reception by Mayor and Trade Representatives.
Greetings by Mr. Adam Taylor of Guelph; Mr. H. P. Hubbard of Hamilton, for Manufacturers, and Mr. James Hardy of Toronto and others.
Address by Col. J. B. Maclean, Publisher Hardware and Metal, Toronto.

3 P.M.

MEMBERS' SESSION

Distribution of Officers' Reports and reference to proper Committees.
Consideration of Notice of Motion from 1918 Convention, as follows:
1st. "That the Membership fee in the Association be $5.00, for Associate Members $1.00, and for Clerks $1.00."
2nd. "That the name of the Association be shortened to The Retail Hardware Association of Ontario."
3rd. "That the office of Second Vice-President be obolished, and that the Executive Committee shall consist of three members in place of six."

3.45 P.M.

Ten-minute talks by Exhibitors
"Windsor Solvent Stains." Mr. A. L. Mason of Standard Paint and Varnish Co., Windsor.
"Door Hangers and Track." Mr. R. K. Falkiner of Allith Manufacturing Co., Hamilton.
"Kasement Screen Doors." Mr. W. H. Cunningham of Kasement Skrene Dore Co., Toronto.
"Building Materials that are Easily Handled." Mr. Cale of The Alabastine Co., Paris, Ltd., Paris, Ont.
"Manufacture and Sale of Roofing." Mr. F. T. Bush of Bird & Sons, Hamilton.
Visit Exhibits

6.30 P.M.

TUESDAY EVENING

Banquet and Entertainment tendered by Wood, Alexander and James, Hamilton.
Visit Exhibits

WEDNESDAY, FEBRUARY 19

9.30 A.M.

MORNING SESSION

Series of ten-minute addresses on prospects for 1919 by Manufacturers and Wholesalers.
"Wire and Wire Fencing." Mr. H. L. Frost, President Frost Steel & Wire Co., Hamilton, Can.
"Ready Mixed Paints." Mr. W. S. Fallis, Managing Director The Sherwin Williams Company of Canada, Limited.
"The Glass Situation." Mr. J. E. Harrison, Canadian Manager, Pilkington Bros., Ltd., Thorold, Ont.
"Wire Nails and Kindred Products." Mr. F. H. Whitten, General Manager Steel Company of Canada.
"Stoves for 1919." Mr. F. M. Tobin, Secretary Stove Founders Association.
"Electrical Supplies for the Retail Trade." Mr. A. S. Edgar of Canadian General Electric Co.
"The Wholesalers' Viewpoint." Mr. C. A. Witwam of Hobbs Hardware Co., London, Vice-President Canadian Wholesale Hardware Association.
Mr. S. H. Alexander of Wood, Alexander & James, Hamilton, Can.
"The Manufacture and Use of Insecticides in Canada." Mr. Shirley P. Newton, Chief Chemist of Canada Paint Co., Montreal.

11.30 A.M.

Nomination of Officers
Nomination papers will be issued in advance to all members of the Association.
Visit Exhibits

1.30 P.M.

WEDNESDAY AFTERNOON SESSION

"The Gasoline Situation." Is a fixed retail price in this commodity in the best interests of the retail trade? Mr. F. J. Wolfe, District Manager Imperial Oil Limited, Toronto.

2 P.M.

"The Income Tax." Who is eligible and how to prepare financial statement. By Official of the Income Tax Department of Finance, Ottawa.

2.30 P.M.

"How to get the most out of your territory." Address by Mr. John C. Kirkwood, Business Counsel, Toronto.

3.30 P.M.

"Talk on how to advise customers to finish floors, both as to Wax and Varnish finish." Mr. William Home, Toronto, of Berry Bros., Inc., Walkerville, Ont.
Visit to Exhibits

7.30 P.M.

WEDNESDAY EVENING SESSION

Cash vs. Credit
"How I placed my business on a Cash Basis," showing method of introduction and results. W. F. McPherson, Prescott.

8.00 P.M.

"The use of illustrations and prices in advertisements," an illustrated talk, Mr. Geo. D. Davis, Manager Hardware and Metal, Toronto.

8.20 P.M.

"The use of price tickets and show cards in windows, and results obtained," Mr. Nelson Mills, Hamilton, Vice-President, Mills Hardware Co.

8.40 P. M.

"How I made use of the Association Sales Bureau," Mr. J. E. Archer of Moore Hardware Co., St. Catharines.

9.00 P.M.

Motion Picture Show
"The troubles of a Merchant and how to stop them." Mr. T. C. Warren, of Lecture Bureau National Cash Register Co., Dayton, Ohio.

THURSDAY, FEBRUARY 20

9.30 A.M.

MORNING SESSION

Election of Officers

9.45 A.M.

Address
Mr. Geo. A. Simpson, Hamilton, Sales Manager, Steel Co. of Canada.

10.30 A.M.

Ten-Minute Talks by Exhibitors.

12

Luncheon and Entertainment tendered by Hamilton Hardware Manufacturers.

2 P.M.

AFTERNOON SESSION

Round Table Talk on problems affecting the Retail Trade.
Question Box—An all-round discussion in which every member should take part.
Drop your question in the box and win the experience of your fellow hardware men.

3.30 P.M.

Demonstrations at Exhibits.
Every Member is urged to be present at the opening session Tuesday, and stay to the finish.

PAINT MANUFACTURERS SEEK EXPORT BUSINESS

A COMMITTEE of paint men left Montreal and other points for Ottawa on Wednesday night. This was composed of George Henderson, president of the Canadian Paint, Oil and Varnish Association; Walter B. Ramsay, vice-president; Walter Jamieson, of R. C. Jamieson & Co.; John Irwin, president of McArthur, Irwin, Ltd.; A. T. Black, manager, Martin-Senour Co.; Thos Monypenny, of Imperial Varnish and Color Co., Toronto, and F. J. Penberthy, of Lowe Bros., Toronto.

The delegation interviewed the Trade Commissioners on Thursday, going thoroughly into matters regarding export business, shipping facilities and reconstruction orders. It is expected that good business will result. Deliveries will probably begin almost immediately, as the British import restrictions do not in any way bear heavily on paint importations. It is likely that the paint manufacturers will send a representative to England to consult with the Canadian Trade Commission with a view to securing additional business.

MAKING GLASS BY HAND WAS RESUMED THIS WEEK

THE manufacture of window glass by the hand method was resumed this week in thirty-four American plants with a total capacity of 1,157 pots. These factories will, in accordance with their wage agreement, be required to make their quota and close down not later than May 24. From that time for a period of nearly three months no hand glass will be made. Second period factories, with a total of 924 pots, resume on August 15, and continue in blast until December 8, the end of the wage scale year. This arrangement is going to distribute output over a period of approximately six months in such manner as to prevent glutting the market and take care of an expansion in business which is confidently expected during the summer and fall months. To this end the National Window Glass Workers contributed substantially, even to the extent of refusing to go to work a few weeks ago when some manufacturers were disposed to resume and pay a wage increase of 35 per cent. Factories listed for operation during the first and second periods include every hand plant in the States excepting one at Stockton, Cal. In a letter sent out to the trade the Johnston Brokerage Co., of Pittsburgh, states that it reaffirms the discounts given in the schedule of August 15, and that all sizes and qualities of glass, including heavy specialties, can be furnished promptly.

INABILITY TO DELIVER KEEPS PLATE PRICES UP

STEEL plate has not moved yet below the six-cent price in Canadian warehouses. Dealers claim that they are not yet able to secure deliveries which will enable them to pass on the reduced price at once to users. As a matter of fact, about one cent a pound is being paid by way of premium for quick delivery. Canadian warehouses for the most part are pretty well cleared out of war price plate and should be able to quote prices based on the lower United States base price as soon as they can secure satisfactory deliveries.

Although reports have it that the mills of the United States Steel Corporation are still operating at 85 or 90 per cent. of their war-time capacity, it is not to be taken that they are selling at that rate. As a matter of fact, sales have dropped materially, and the Corporation, which has an extensive system of storage, is making use of this section of its equipment. How long they can or will pursue this policy is problematical. It is interesting to note that the buyers seem willing to absorb high costs for automobiles, but when it comes to putting money into steel for industrial purposes they regard it as a very different matter, and fight shy of actual purchases.

HEAVY SELLING OF TURPENTINE TO EUROPE

AN immediate effect of the reduction in freight rates from American ports to Britain has been the stimulation of turpentine shipments. The latest reports from the South state that: "Several thousand barrels of turpentine are understood to have been placed this week for London and Liverpool shipments. One thousand to two thousand casks of spirits will go to London in the fore part of February from Savannah. Out of Brunswick this week 1,000 casks were to be cleared for Liverpool. Other inquiries have come in from the U.K. that show a willingness to take on spirits now that the expected drop in freight rates has been fixed and there is an assurance of some stability as to that for a time.

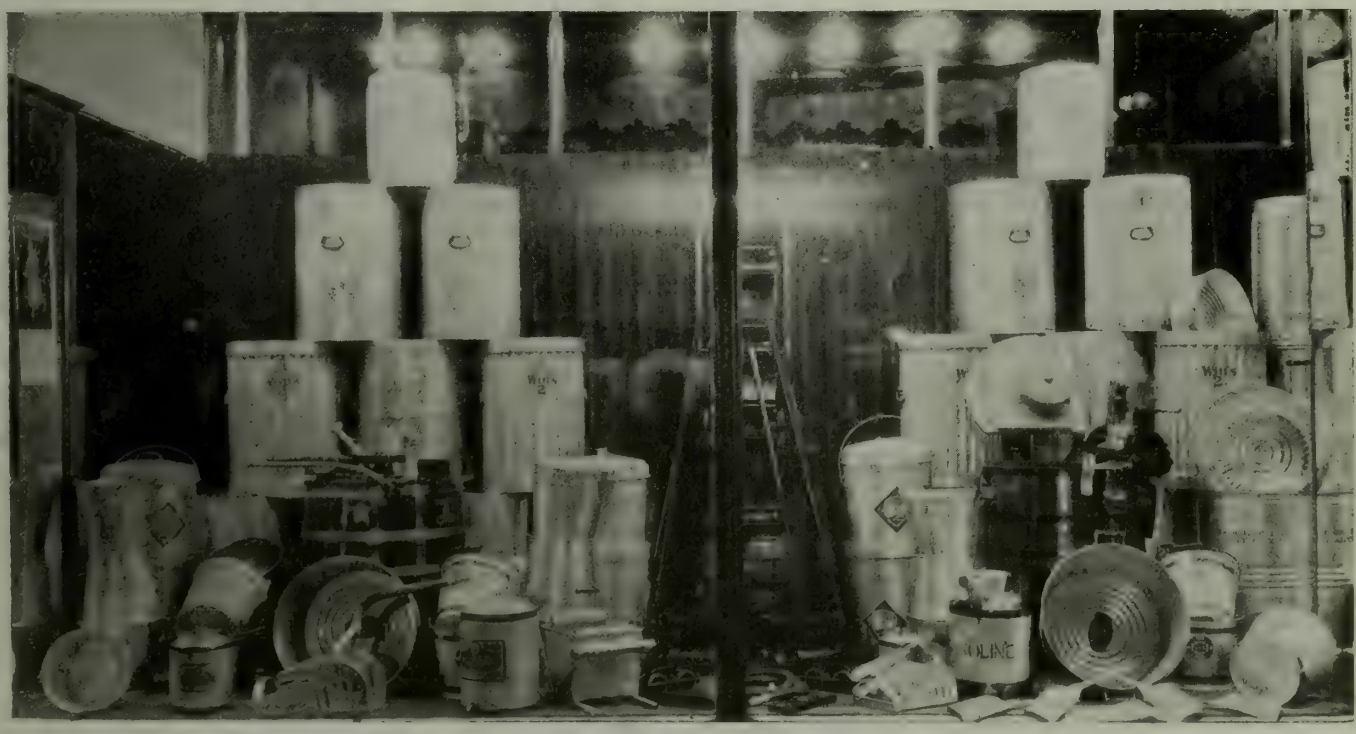
"These new rates represent a tremendous drop that has been needed to stimulate business, it would seem, as the tendency is everywhere to curtail and remove the Government restrictions as to naval stores. On British ships out of New York 30 per cent. of the space is now available for miscellaneous cargoes, and a further increase in the proportion of space not reserved by the Government is looked for.

PROPOSED TAXATION MAY HIT CANADIAN BRANCHES

BORDER cities industries, a large proportion of which are financed by American capital, are vitally concerned in the revenue bill now before the United States Congress, which proposes the taxation of American capital invested in Canadian enterprises. Should the bill be approved, practically every automobile concern in Ford and Walkerville would be affected, as would many factories turning out a variety of manufactured products.

The Border Chamber of Commerce is cooperating with other industrial organizations throughout Western Ontario in forwarding a protest to Washington.

FIREARMS AFFECTED BY BY WAR BOARD RULING



THE United States War Trade Board announce in a new ruling (W. T. B. R. 575) that the latest export conservation list is as follows:—

Ammunition, X-2':—Cartridges and shells', loaded and unloaded, X-2. Shot, in bulk, X-2'. Explosives, X-2'. Firearms, all types, X-2'.

Seasonable Window Suggestions

The window displays shown above offer suggestions that any hardware dealer may adopt with profit. Either section will make a splendid display. A window of electric lamps, toasters, electric irons, shades, casseroles, thermos bottles, trays and similar lines lends itself to a showy, attractive and sales-producing combination. Note the background that was used. A good window of tools will always increase sales in this line, especially during the coming building season.

Note how the large cans have been used to make a background for the washing machines in the window display here shown. The galvanized ware, washers, carpet sweepers, wringers, etc., carry a strong appeal to home-makers, especially to women. Note the contrast of this window with that shown above. The arrangement in the lower window is such that the whole display seems to stand out sharply.

May Boycott Co-operative Association

Retail Merchants Are Preparing For Straight Fight Over Principle Involved in Co-operative Activities of Ottawa Civil Service Association

AT the annual meeting of the Ottawa branch of the Retail Merchants' Association of Canada, the following officers were elected: President, E. R. Fisher; first vice-president, R. Clarke Cummings; second vice-president, B. G. Crabtree; treasurer, A. G. Johnston; secretary, A. E. Kelly. The Ottawa branch was presented with its charter.

A number of important resolutions were passed. It was decided to have a bonded collector for the Ottawa branch of the Retail Merchants' Association, and it is expected that the idea will be extended all over the district, as many collectors as are required being appointed. They will work on commission, and their work will begin after the regular collecting methods of the association have failed to produce results.

Considered Unfair

Another resolution had to do with the fact that goods bought on foreign markets are valued for duty, not at the price paid but at the price prevailing when they arrive at the port of entry. This was considered unfair, and the Dominion Board of the association was asked to take action.

A matter of pressing interest to the association, and in which the Dominion body is interesting itself keenly because of the general principle involved, is that of the co-operative activities of the Civil Service Association. This comprises a large number of members, and is a sort of trade union formed among the civil service employees of the Government, of whom there are several thousand. For several years this association has been endeavoring to formulate a scheme of this kind. About five years ago they started a co-operative store here, but it was a failure. They are now trying to buy in quantities and have the goods shipped to a central point for distribution. The chairman of the co-operative committee, Frank James, of the Post Office Department, has recently issued a circular calling on all members interested in co-operative buying to communicate with him, when they will receive valuable information and assistance.

An Official Protest

The Retail Merchants' Association passed a resolution that it was unfair to the merchants of the city, who pay taxes and carry stocks for the convenience of the public, that wholesalers and manufacturers should supply such organizations, and also expect that the retailers should patronize them.

The Retail Manufacturers' Association all over the Dominion is going to come out for a straight fight on this issue. The ground the association takes is that retail merchandising is either the correct way of distributing goods to the consumer, or it is not. If right, they must be maintained, and conditions must be made so as to uphold and preserve the system.

Threaten Boycott

E. M. Trowern, Dominion Secretary of the association, says frankly that the matter can and will be settled by boycott, if no more agreeable way presents itself. "It is not a nice word," said he in a conversation with HARDWARE AND METAL, "but it is the right one. If I, as a consumer, am not treated right by the retailer from whom I buy, I institute a practical boycott against him by telling my friends my experience.

"Much of the trouble is caused by a lack of concerted action on the part of the wholesalers. And in this connection let us say that the time has long been ripe for a general "Wholesalers Association." The wholesale trade is divided up into small organizations, and they have accomplished little or nothing. This is a time of reconstruction, and it would be a good time for the wholesalers to do some reconstruction work among themselves and form an association.

Need Not be Afraid

"Some people seem to fear trade associations, but I never could see any reason for this so long as your actions are fair and above board. It is the same feeling which has so long distinguished the Canadian Manufacturers' Association, with the result that they have, by their mysteriousness, created an impression that 'they love darkness rather than light because their deeds are evil.' If they came out in the open and took the public into their confidence a little more this would not be so."

There will be a convention of the Dominion Board of the Retail Merchants' Association in Ottawa on March 17, when this and many other questions of vital importance to the trade will be discussed, and some interesting action will be instituted.

Early Closing

A good deal of discussion of the early closing movement took place at the meeting on Monday. It was resolved that the Provincial statute be amended by substituting six o'clock for seven as the legal hour. A petition has been signed by about three-fourths of the stores in Ottawa to close at seven every night, including Saturday. The hour would have been six, but for the Provincial statute. Many are now closing at 6 and 6.30, and will probably continue to do so. The butchers are following suit. Nearly one hundred per cent. of them have signed a petition to this effect. At a meeting of the boot and shoe trade here this week it was unanimously resolved that a petition should be prepared to close during July and August on Saturday afternoons.

Take Exception

Many dealers are familiar with the circulars sent through the mails by organizations, chiefly domiciled in the United States, but having many imitators here, pushing "sales systems." Particular exception was taken to a circular letter recently circulated by the T. E. Kelly Sales System of Minneapolis, and a resolution was passed that such letters were not in the interests of Canada; that people residing in the United States and having no capital invested in Canada, but who are here to promote business and make statements contrary to facts, should come under the False Advertising Act. The association placed itself on record as being opposed to this system of doing business and asked the Dominion Board to take action.

The Letter

The letter referred to was as follows:

THOMAS E. KELLY

The T. E. Kelly Sales System,
Minneapolis, Minn.

President of
26th Street State Bank
Fidelity State Bank
Liberty State Bank

Gentlemen:

The writer is president of three banks, and is given a six-figure rating, first grade, by the three prominent mercantile agencies.

I mention these things because I have an important business proposal to place before you, and I don't want you to dismiss my offer in any doubt of my sincerity and good faith.

I think you will realize that no business man of my position is going to waste his time and yours making you idle offers which he does not mean or is not able to fulfill.

Now, what I want to say to you is this

The profitable period of the winter season is practically gone. Mild weather, sickness, and the expectation of a drop in prices have interfered with trade to such an extent that most merchants have practically all of their winter stock still on hand.

Such a situation under normal merchandising conditions would be serious. In the present situation it is **dangerous.**

Starting the first of the year, and continuing to next fall, prices will drop from thirty to forty per cent. This statement is made in accordance with the predictions of leading bankers, financiers, mercantile authorities and economists.

You must this season unload at present prices every dollar's worth of seasonable merchandise in your stock.

On every dollar's worth that you carry over, you'll lose 30 per cent. deflation of value, besides the customary overhead of interest and depreciation in styles, etc., which always cost from fifteen to twenty per cent. Moreover, next year's merchandise,

besides being at least thirty per cent. cheaper, will be of higher quality, and therefore in greater demand.

All of the really great stores in the country are now unloading or have unloaded in the past thirty days. The leading retailers believe the price decline will start with the January clearance period, and will progress as the unloading season advances.

(He then gives details of sales conducted in various parts of Canada).

The January clearance period is going to start with a rush and develop into a cut-throat scramble to unload. Only those who lead the rush and who have a distinct advantage over competition will be successful in moving their merchandise and in getting a profit.

You have about six weeks left in which to unload at present prices. In that time you must sell every dollar's worth of winter merchandise you have in stock.

If you wish to go out of business I will guarantee to close out your entire stock completely and sell every last article in it at a price which you mark on the goods and back of my guarantee, remember, is a responsibility of a quarter of a million dollars.

Or, if you wish merely to unload your surplus of seasonable goods there is no reason why we cannot do it for you just as successfully and profitably as we did for the merchants mentioned above.

Don't delay in filling out and mailing the enclosed card. Time is short and every day counts.

Sincerely yours,
T. E. KELLY,
President.

Leaves For England To Seek Orders For Stoves

At the recent meeting in Montreal of the Canadian Stove and Enamelled Ware manufacturers, it was decided to send a representative overseas to investigate the possibility of developing export business with some of the European countries. In accordance with this policy, A. M. Smith, of the McClary Mfg. Co, London, Ont., left on Wednesday. His instructions are to work through the Canadian Trade Commission at London, and while in Europe Mr. Smith will endeavor to secure real orders. These are to be distributed among the various manufacturers.

As an interesting side of this matter, it transpires that England was supplied with fully 90 per cent. of her enamelled ware from German and Austrian factories prior to the war. It will be one of the objects of Mr. Smith to secure a fair share of the business which went to these countries a few years ago.

COLLECTED ACCOUNT THAT HAD BEEN OWING 11 YEARS

According to a statement recently filed with the Border Cities Retail Merchants' Association by T. C. Ray, secretary-treasurer, the organization, after one year's operations has assets of $717.98 with no liabilities. This report was unexpected by the general membership, who anticipated a slight deficit.

Mr. Ray also announced that collections in the credit department for January aggregated $521, comprising many accounts of long standing. One in particular had been practically abandoned by the merchant years ago, as it consisted of $20 owing on a note given eleven years ago when he was located in Northern Ontario.

New York Co-operative Stores Close Their Doors

A Chain of Stores Operated by the New York Railway Company With a View of Assisting Their Employees Has Failed, Owing to the Lack of Enthusiasm on the Part of Those They Were Intended to Benefit

THE chain of co-operative stores established by the Interborough and New York Railways to lower the cost of living for their employees, has locked its doors never to open again.

Despite a promising start, the experiment of the company ended in failure. Employees were cold to bargain rates and shopped elsewhere. Company officials, while willing to face a reasonable deficit in maintaining the stores, decided they were losing more money than justifiable. And so the stores were shut, and December 30 and 31 the huge stock of groceries, canned goods, jellies, jams and baking powders, valued at $150,000, was auctioned off to the highest bidder.

When on March 12, 1916, the first shop was opened at Forty-ninth street and Eighth avenue, workers thronged the sidewalks waiting to get in. Sales for the first day were estimated at $1,500, and soon after two more stores were established. Each carried the highest grade merchandise, the stores were spotlessly clean, and up-to-date in every respect. Salaries of grocery clerks and butchers and the upkeep of stores were paid by the company, which claimed in this way to be able to reduce the cost of foodstuffs to employees not less than 30 per cent.

Yet the stores failed.

Rigid investigation of the mystery seems to indicate that failure was due to several things—but the reasons are largely conjectural. Many of the employees are single men. At first they possibly bought at the lower prices for friends. But later it became monotonous and they quit. A majority of the married men didn't care to take time to do their family shopping, so as a last resort, free transportation was furnished to the wives. But a careful check-up indicated that while most of the office people bought through the co-operative stores, toward the end only about 5 per cent. of the workers on the street lines, elevated and subway purchased through the company—and these were the people officials were most anxious to benefit.

The stores sold the highest grade foodstuffs, and in order to stimulate purchasing, even went so far as to demonstrate. An incident is related of a comparison between contents of a can of tomatoes sold at the company's store and one purchased on the open market at the same price. The brand sold by the co-operative stores contained three whole tomatoes, while the brand bought at a local grocery shop contained less than one whole tomato, the remainder of the contents being mostly water. Yet employees traded elsewhere!

One official of the company attributes the demise of the stores to the fact that they were not able to make free deliveries and give credit—while the local stores sent their wagon cheerfully with the goods and waited until Saturday night for payment. Another explanation is given in the possible impression that the company was profiteering at the expense of employees, although price comparisons would prove the absurdity of such opinion.

And so the establishments and their fixtures were recently sold, and when December 31 ushered in the departure of 1918, the mountain of foodstuff stocks, together with twenty tons of paper, bags and twine, was knocked down to the most enterprising cash customer, as the auctioneer called, "Going, going, gone!"

—From "Printer's Ink."

Says Holding Off Orders May Cause Congestion

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., of Montreal, stated to HARDWARE AND METAL that there was danger of a considerable congestion in the spring if dealers deferred placing orders unduly. This, some have done, thinking that prices would decline materially. The manufacturer, he says, can only base his manufacturing upon the probable demand through the retailer. If the buying be deferred until the goods are asked for by the consumer, then the manufacturer is deluged with orders at the last minute that can only be filled as received, and in the order of things someone has to suffer.

"Wages have not only been holding, but in some instances they have increased," said Mr. Goodwill. "While it is true that a slight reduction of price has been made in some of the raw materials, this is fully offset by the high payrolls that we have. In some cases the wage increase has more than offset the other reductions. And I do not expect that labor costs will decline materially."

ROBERT N. HORNIDGE JOINS LEWIS BROS., LTD.

Robert N. Hornidge has joined the staff of Lewis Bros., Ltd., Montreal. Mr. Hornidge has, until recently, been connected with the Keys Supply Co., of Ottawa, and comes to Montreal to assume charge as buyer of the New Auto Equipment Department of Lewis Bros. Mr. Render, who has been inside for the most part, will now devote his time more largely to sales promotion work with the travelling salesmen.

EDITORIAL COMMENT

BOOST THE CONVENTION

NO pains have been spared by the officers of the Ontario Retail Hardware and Stove Dealers' Association to make the fourteenth annual convention which will be held at Hamilton on Tuesday, Wednesday and Thursday of real interest and practical value to hardware dealers. Getting together the best men from all over Canada and the United States who have a real message to hardwaremen involves no small amount of labor. It is an undertaking that could only be accomplished by the united efforts of the officers and of the association. Because the work is one which is in the best interests of every hardware dealer in the province, it deserves the strongest support of every merchant. It is your convention, Mr. Dealer. If you attend the sessions and give the association your support you will have a strong organization that will show results. If you do not support your trade organization and leave the load for some other fellows to carry you are not dealing fairly either with them or yourself. This is not the spirit that has carried the hardware trade to the very front of Canadian commercial life and placed it on perhaps the soundest basis of any branch of business in the Dominion. Hearty co-operation by every dealer will work wonders in solving trade problems and in getting results that will benefit every individual. Last year's meeting was a record-breaker. This year's meeting gives every promise of being even better.

WHAT OF CO-OPERATION?

THE growing feeling among certain people or organizations that all the evils of the high cost of living are to be met by the formation of co-operative buying concerns, is a question worthy of some thought. There can be no reasonable argument against anyone obtaining the necessities of life on the cheapest market, that is able to adequately meet their needs. The idea of co-operative buying is, however, more glittering on its face than in actual operation. It is a movement that certainly should not be undertaken without a serious appreciation of conditions, and also of the history of such enterprises, for that history has not always been cheerful reading for those most closely interested in the matter. On another page of this issue appears the story of a large chain of co-operative stores, financed and managed by a great company for the benefit of their employees, that failed rather dismally, because the employees showed a strange proclivity to deal elsewhere, despite the inducements offered.

In our own country similar results have frequently followed. A large co-operative undertaking in Northern Ontario had a similarly sorrowful ending. Experience has so often proved that price is not the only consideration in sales, that it need not be proved anew. And low price is the only argument used by the co-operative stores.

As we have said before, there is no use in trying to bolster a trade by words. If the wholesaler or the retailer is a non-essential element, then the stress of business will eliminate him. These agencies survive because they do actually deliver a marketable commodity for which they charge a price, and that commodity is service, and for that service the public is willing to pay.

IN THIRD PLACE NOW

THE shipbuilding that has been carried on in Canada for many months has placed the Dominion in third place now as far as the amount of tonnage in merchant ships actually under construction is concerned. The United States at present holds first place, but plans which British shipowners have under way will, it is expected, be much larger than even the big American programme at present. Canadian shipbuilding activity will, it is reported, be increased by the removal to the Pacific Coast of the huge plant of the Messrs. Yarrow from England, because of labor troubles. The latest figures show that Canada has under construction just now 195 merchant ships with a tonnage of 278,711. Japan is crowding Canada hard for third place, that country's tonnage being 278,140 for 116 ships. The Japanese are practically centering their efforts on large steel steamers, while Canadian builders are busy turning out both steel and wooden ships. The stimulus that the war has given to shipbuilding in this country has been turned to good advantage by many hardware dealers who have sold large quantities of various supplies to the firms.

PAINT INSPECTION

IN Illinois, a paint law is to be vigorously enforced in future, according to the Bureau of Foods and Drugs of the State Department of Agriculture. It is said that the attention of the authorities has been

called to the laxity with which certain provisions have been administered owing to a failure on the part of the legislature to provide a fund for the proper inspection and chemical analysis.

No inspectors or chemists could be appointed without a proper appropriation, but now this difficulty has been overcome. Several prominent men in the trade have been interviewed, and it is understood that violations of the law against adulteration of paints, varnishes, colors, linseed oil, turpentine and other materials shall be severely punished.

MAY ACT AS BOOMERANG

ONE of the first constructive, after-the-war developments across the line, was the organization of the Copper Export Association, operating under the Webb Act. One of the first acts was announcement of a 23-cent export price. It is safe to assume that not a single pound of copper has been sold at that price, which was promulgated in all probability more for its effect on the domestic situation than with any idea of inducing foreign buying. As the result of the publicity given to this level in connection with the Copper Export Association, there has been created, however, an entirely erroneous impression regarding its character. With a price of 15 per cent. higher than the domestic market, advent of the Export Association created the belief that it was formed in the hope of being able to maintain an abnormally high level in export trade, no matter what the domestic situation might be.

The probabilities are, however, that, far from being able to reap extraordinarily large profits on their foreign business, members in the Copper Export Association will at first be called upon to bear sacrifices, as far more copper is being produced now than is needed for home consumption.

A WAITING GAME

CANADA is supposed to be engaged in a process of reconstruction, involving the change from war-time conditions to such peace-time conditions as will permit of activity and prosperity. There are indications, however, that many people are engaged in a waiting game, each waiting for others to make the move. There seems little disposition on the part of anyone to take the lead. Many business men are realizing that activity will not come until a very considerable readjustment in costs has been made. A new scale of values must be created, of commodities of all sorts and of labor. It is not certain that this will occur eventually, but it seems very probable. Many believe that lasting prosperity cannot come except through such wholesale readjustment. If by any chance, or accident, activity is resumed without the proper scaling down of costs, or in other words, without considerable restoration in the purchasing power of the dollar, the activity, they say, will be mere activity and not prosperity.

WHAT OTHER EDITORS SAY

THAT business man is fortunate who, in planning his selling campaign, can completely detach his mind from the selling side, and see his proposition as the careful buyer should or will see it. If that happy faculty were more generally prevalent in sales departments and trade councils, salesmen often would have easier sailing, or selling.

"Would I accept this proposition if I were a prospective buyer?" is the fair test to be frankly faced.—*American Paint Journal.*

* * *

IT is quite true, as is commonly said, that labor costs should be reduced, because they are too high, but too many men are hiding behind labor and blinking the fact that they too have a duty in readjustment. They should consent to very considerable reductions in their profits. The explanation probably is that the individual has hopes that he may escape observation in this readjustment, that he may be able to slip through with his old time profits while others are readjusting. Something of that sort might occur with a small minority, but everybody cannot expect to be the exception. The thing to do is for everyone to accept his fair share of the general responsibilty. —*The American Metal Market.*

* * *

IF the steel manufacturers would inspire consumers with the necessary confidence that will make for a speedy resumption of buying, they must first show that they themselves are possessed of the staunch faith in the future which they would impart to others. This they can only achieve by actual demonstration through paying for scrap prices commensurate with those they believe to be justified for their finished material.—*The Waste Trade Journal.*

* * *

AN interesting point has been unearthed through the disclosure by an important exporting house with offices in this city of correspondence from its agent in Switzerland. The text of the message was that the United States could not at present compete with the prices for steel and iron quoted by Germany and Sweden and the cable came in answer to a list of prices quoted by the exporting house for comparison abroad. It was also stated in the cable that tin plate was in great demand in Switzerland because of the need for its manufacture into tin cans.—New York *Journal of Commerce.*

* * *

RETAIL merchants are as much entitled to co-operate and organize for mutual benefit as any other branch of society or business. Free interchange of ideas and candid discussion of retail problems have done much to ward off misunderstandings that would otherwise have persisted.

Being a vital part of any community their interests must be protected just as trade unionists seek to safeguard theirs. Divided and unorganized they are just as much at the mercy of greedy and profiteering corporations as the customers to whom they sell their wares. Oftentimes the retail merchant is blamed for high prices, but his critic falls far short in his accusation. In the majority of cases the domestic buyer will patronize the cheapest and best market. It stands to reason, therefore, that with the present keen competition no retail merchant could afford to inflate the prices of his goods. Many and various reasons have placed the high cost of living at a record altitude, but to lump them altogether and point to the retail merchant is not only an indication of child-like innocence of world-wide affairs, but positively wrong. —Border Cities Star.

WHATEVER the future immigration policy of this country may be for many months to come, immigration should be rigidly restricted—until all our demobilized soldiers have found employment.—Hamilton *Herald.*

EVENTS IN THE TRADE

Business Changes

Dresden, Ont.—Gordon Wall, of the Dresden Hardware Company has disposed of his interests in the firm to Russell Wells.

Elmira, Ont.—Walter and Oscar Klinck have purchased the hardware business of John Klinck.

Fire Losses

Fire which started in the roof of the National Abrasive Company's new factory at Niagara Falls, Ont., burned the roof off causing a loss of $5,000.

Fire, which started in the varnishing plant of the Beaver Co., Ltd., Ottawa, Ont., manufacturers of beaver board, caused a loss of $10,000. During the fire, Oscar Bergeron, an employee, was badly hurt by being struck by a portion of a vat which blew up.

Obituary

The death occurred at West Chester, Pa., on January 31, of E. L. Ewing, secretary and acting treasurer of the Sharples Separator Company.

The death occurred at Pittsburgh, following a breakdown he sustained last fall, of Wallace H. Rowe, president of the Pittsburgh Steel Company. He was 58 years old.

Besides the Pittsburgh Steel Company he was president of the Monessen Coal and Coke Company and the Pittsburgh Steel Ore Company, vice-president of the Pittsburgh Ice Company and a director of the Duquesne National Bank, Pittsburgh Steel Products Company and the Home Life Insurance Company of New York.

Thomas I. Thomson, aged 64, sheriff of the County of Grey, died at his home in Owen Sound, Ont., on Sunday, following a long illness. He was 64 years old and went to Owen Sound thirty-one-years ago and founded the firm of T. I. Thomson & Co., Limited, hardware. He represented North Grey in the House of Commons and took an active interest in business and politics. He was president of the Farrar Transportation Co. of Toronto, president of the T. I. Thomson Co., Ltd., Owen Sound, and a former director of the Imperial Cement Company of Owen Sound. He was mayor of the town for two years and four years ago was appointed sheriff. Mr. Thomson was a native of Napanee, Ont.

The death occurred at Sheffield, Eng., of John Rodgers, aged 62, chairman and managing director of Joseph Rodgers & Sons, Ltd., cutlery and plate manufacturers. His eldest son lost his life during the war. Besides having charge of the firm of Joseph Rodgers & Sons, Limited, Mr. Rodgers was a member of the Cutlers' Company and a director of Cocker Brothers, Limited, wire and spring manufacturers, Sheffield. The firm of which Mr. Rodgers was head is one of the oldest, if not actually the oldest, in the trade, but there are no records indicating the year in which it was established. The earliest record of the business extant is 1724, but as the company's trade-mark—the familiar device of a star and a Maltese cross—was registered in 1682, it must have been founded a long time before that year. Probably no trade-mark has proved so tempting to competitors, and the legal profession has reaped a golden harvest from the numerous actions by Rodgers & Sons in the Courts to protect it from misappropriation.

Personals

W. McMillan has joined the sales staff of Smellie Bros., hardware, at Shoal Lake, Manitoba.

F. R. Murray, president of F. R. Murray Co., Ltd., Vancouver, recently returned from a trip to Chicago, and called at important prairie points on his way home.

M. Soren of Soren Bros., Toronto, who was recently operated on for appendicitis, is making good progress toward recovery.

Alex. McLean, of Mackenzie, Milne & Co., Limited, Sarnia, Ont., attended the meeting held in Stratford on Tuesday to discuss the Provincial highways plans.

H. Ready, of Mackenzie, Milne & Co., Limited, Sarnia, who has been confined to the house through a severe attack of rheumatism, will not be able to resume his duties for several weeks.

H. P. Livingstone, manager of the Dominion Linseed Oil Company, Toronto, has returned after spending several weeks in Winnipeg getting the company's new Western plant in operation.

Trade Notes

The Ideal Glove and Mitt Works, Ernest Brosseau, has been registered at Montreal.

Dust-O-Dust Mfg. Co., makers of sweeping powders, H. N. Archambault and J. H. R. Messier, has been registered at Montreal.

The Globe Engineering Co., Ltd., Hamilton, Ont., has purchased the business of the Hamilton Stamping, Plating and Mfg. Co.

R. B. Smith has purchased the hardware business of J. A. W. Allan & Co., at Newmarket, Ont.

Howe and Henderson, tinsmiths and plumbers, Ingersoll, Ont., have been succeeded by D. Howe.

The Lougheed Sheet Metal Works, Lougheed, Alberta, is reported to be discontinuing business.

The directors of the Sterns Tire and Tube Company, Toronto, are holding their annual meeting this week.

W. W. McCubbin, hardware, Oak Lake, Manitoba, is building an addition to his store and will use it as a furniture show room.

A. W. Jenkins, until recently a member of the Royal Air Force, has taken a position as salesman with the Banwell Hoxie Company of Hamilton, Ont., and will cover territory east of Toronto.

W. M. Morrison, hardware, Shedden, Ont., has disposed of the plumbing and furniture departments to Lloyd Atkinson. Mr. Morrison retains the hardware and wall paper business.

At a meeting of the Executive Committee of the National Paint, Oil and Varnish Association, held in New York, George V. Horgan was appointed secretary to succeed Henry A. Sawyer.

The B. Greening Wire Co., of Hamilton, Ont., has secured the patents and manufacturing rights for Canada for what was formerly known as the United States Poultry Netting.

The C. C. Craig Co., manufacturers' agents, Winnipeg, have been appointed representatives in Canada for Irwin Leather Goods Co., 530 West Monroe St., Chicago. This firm recently purchased the estate of the R. W. Sunasack Co., manufacturers of razor strops.

D. B. Wilson, who has purchased the hardware business of John G. Fennell, at Napanee, Ont., is a former resident of that town, but for the past twelve years has been in the West. He was a former member of the firm of Madole and Wilson.

F. J. Gernandt, of Chicago, succeeds H. H. Biggert, who for the past ten years has been general manager of the International Harvester Company's plant at Hamilton, Ont. Mr. Gernandt was formerly assistant to Mr. Biggert. Mr. Biggert goes to Bridgeport, Conn., where he will be general manager of a large manufacturing plant.

Montreal News

H. H. Dalton, representing A. M. Bell & Co., of Halifax, was in Montreal during the week.

Alfred Blais, hardware merchant, of Thetford Mines, was in Montreal during the week on business.

W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada, Ltd., and R. C. Misson, Montreal manager, were in Halifax this week.

F. B. Leslie, of A. C. Leslie & Co., Ltd., wholesale metals, is this week in the United States, calling at New York, Pittsburgh, Cincinnati, and other steel centres.

H. R. Joyce, representing the Champion Ignition (A.C.) Spark Plug Co., was in Montreal this week. Mr. Joyce has, until recently, been attached to Uncle Sam's naval forces.

Winnipeg News

Geo. A. Chalk, of Allan, Sask., spent the first part of the week in Winnipeg, on business.

John Biffar of the Folsom Arms Co. is calling on the jobbers here during the week.

Victor Van der Linde of The Van der Linde Rubber Co., Toronto, is in the city on business.

Douglas Moulden of W. F. Moulden & Sons, left on Wednesday for an extended trip to factories in the east.

F. S. Millard of Abbey, Sask., spent a few days in the city on business this week

H. F. Moulden has just returned from his spring trip through the three Western provinces.

Mr. Coltart of the Roland Hardware Co., Roland, Man., was a visitor in the city during the week.

It is reported that Tom Mair of Minnedosa, Man., has sold out his business and is moving to Central Butte, Sask.

A. L. Fitzgerald, sales manager for Merrick Anderson Co., has just returned from a trip over part of the western territory.

The Ford Motor Co. is holding a convention here this week at which all representatives as well as Ford dealers from coast to coast are participating.

Prescott W. Robinson, of Montreal, representing Three in One Oil Co., Miller Bros. Superior Door Catch Co., etc., is calling on the trade this week.

Incorporations

The Gerrard Company, Limited, head office, Hamilton, Ont., capital $400,000, plan to manufacture and deal in hardware and iron and steel products.

Marine Products, Limited, capital $500,000, head office, Toronto, Ont., plans to deal in oils, fertilizers and stock feeds.

The Sarnia Paper Box Company, Limited, head office, Sarnia, Ont., capital $50,000, plans to manufacture and deal in cartons, boxes and bags.

Ingersoll File Company, Limited, capital $500,000, head office, Ingersoll, Ont., plans to manufacture iron, steel, manganese, copper and other metals.

Thrift Broom Company, Limited, head office, Toronto, capital $40,000, plans to manufacture and deal in brooms, whisks, brushes.

St. Thomas Metal Signs, Limited, capital $20,000, head office, St. Thomas, Ont., plans to take over and carry on the business of A. J. Stough.

Perfection Flax Pulling Machines, Limited, capital $500,000, head office, Toronto, Ont., plans to deal in flax harvesting machinery, motors and engines.

Frank Barton, Limited, head office, Toronto, capital $40,000, plans to manufacture and deal in automobiles, cycles, motors, engines and all accessories.

Shinn Manufacturing Company, Limited, capital $50,000, head office, Guelph, Ont., plans to manufacture and deal in all kinds of metals, wire, wire nails, wire cables and lightning rods.

F. A. MANN

Who as stated in a previous issue of HARDWARE AND METAL *has been appointed trade sales manager of the Sherwin-Williams Company of Canada, Limited.*

Riker Laboratories, Inc., of New York, has been granted a charter to manufacture and deal in paints, oils, dye stuffs, glassware, photographic and optical goods.

The Frontenac Graphite Mining Company, Limited, head office, Toronto, capital $40,000, has been granted a charter to develop properties held and to deal in minerals and metal products.

Bastian Brothers, Limited, capital $50,000, head office Toronto, Ont., plan to manufacture and deal in metal, cloth and celluloid badges and novelties, also hardware and hardware specialties.

The Mitchell Vacuum Cleaner Company, Limited, capital $50,000, head office Montreal, plans to manufacture and deal in vacuum cleaners, washing machines, floor scrubbers and sewing machines.

Thomas Pink Company, Limited, capital $200,000, head office, Pembroke, Ont., has been granted a provincial charter and plans to carry on the business as founders, blacksmiths, machinists, lumbering and driving tools, gas engines, automobiles and all their parts.

War Tax Stamp Duty

Do we need to put stamps on stock food and panacea? Revenue officer here wants us to put on stamps and we do not think we should.

Re stamps on stock food and panacea. It is necessary to affix a war tax stamp to these, and has been since the Special War Revenue Act, 1915, was passed. The particular part of the act covering this reads as follows:

Stamp Duties on Articles in Bottles and Packages

14. (iv). "Proprietary or patent medicine" includes powders, tonics, ointments, etc., and all other medicinal preparations or compositions bottled or packed ready for sale in respect of which the person making or preparing the same has or claims to have any formula or secret or occult art for the making or preparing thereof, or has, or claims to have any exclusive right or title to such making or preparing, or which are prepared or made under any letters patent or which are designated by a trademark, or which, if prepared in accordance with any formula published or unpublished, are recommended to the public by the makers, vendors or proprietors thereof **as remedies or specifics for any diseases or affection whatever affecting the human or animal body."**

These lines are specifically mentioned as follows:—

"Condition powders, veterinary liniments, medicated stock foods are subject to the war tax.

"Animal foods, unless medicated and advertised as such, are not subject to the war tax."

We think the lines you mention are medicated.

A stamp to the value of one cent is to be affixed to each package, the retail value of which is 25c or less; when the retail value is more than 25c, an additional one cent stamp is necessary for each 25c and in addition for any fractional part of 25c.

To illustrate, goods selling at 26c to 50c require two cents in stamps; from 51c to 75c, three cents in stamps; from 76c to $1.00, four cents in stamps and so on.

Retailers are required by the Act to affix stamps themselves. They may or may not add the amount of the stamp to the price of their goods, as this becomes a business proposition as between themselves and their customers.—Ed.

Transformer Sheets Are Badly Needed in Italy

Writing from Milan under date of January 7, W. M. Clarke, Canadian Trade Commissioner says:—

"This office is informed that there is a great scarcity of transformer sheets on the Italian market, and an opportunity exists for introducing a Canadian product. The United States and Great Britain have been the suppliers, but stocks are now low, while at the same time a regular trade could be established as the orders for transformer sheets must be continually refilled. The following sizes are principally those in demand, and the details herewith given also show the maximum loss in watts per kilogramme:—

(1) Transformer sheets 765 by 380 by 0.3 mm. Maximum loss in watts, 1.5 per kilogramme.

(2) Transformer sheets 2,000 by 1,000 by 0.4 mm. Maximum loss, 2.8 watts per kilogramme.

(3) Transformer sheets 2,000 by 1,000 by 0.5 mm. Maximum loss, 3.6 watts per kilogramme.

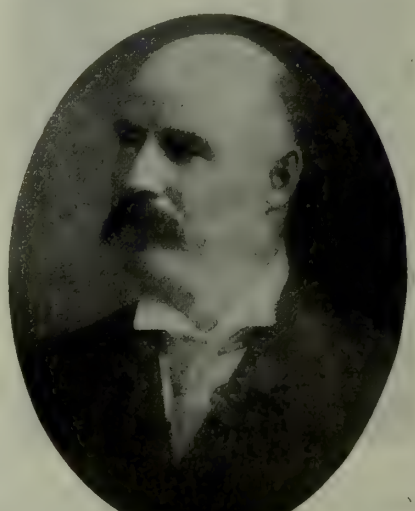
(4) Transformer sheets 2,000 by 1,000 by 0.5 mm. Maximum loss, 3.2 watts per kilogramme (periods 50, B. 10,000).

An important British firm of import and export merchants at Milan has at present a definite inquiry for 50 tons monthly of the transformer sheets described as No. 4, and states that once business connection are made it would be prepared to take from 300 to 400 tons monthly of the various kinds specified. Quotations (preferably by cable) are asked for c.i.f. Genoa, together with a statement of time of delivery. (See Trade Inquiry No. 250, this issue.)

Sees Little Gain From Bounty On Iron Ores

General Manager W. E. Perley of the Canadian Steel Corporation at Ojibway, Ont., does not believe the request emanating from the Port Arthur Board of Trade for a Dominion Government bounty on iron ore converted into iron and steel in Canada would, even if granted, prove a stimulant to iron mining or the industry generally.

Discussing the issue with HARDWARE AND METAL he said:



"Ontario iron ore does not equal that imported into this country in quality as it generally has too high a percentage of sulphur or lacks a sufficient proportion of iron, and hence requires a complicated and expensive treatment before it can be marketed.

"Even when the old smelting plant at Port Arthur was in operation, the quality of its finished product was none too good," he continued, "and as the imported raw material is much better than the Ontario product, it is doubtful if the Port Arthur plant, even with the bounty asked, of fifty cents per ton, could find a large enough market to make the proposition pay. The capacity of the plant is 500 tons a day, and providing the company had a market for that much ore, the annual cost to the country would approximate $75,000 annually."

Incomplete Description Is Unfair to Customers

In many lines, "seconds" are sometimes sold without mentioning their quality in advertisements, and to meet this, Los Angeles, through the instrumentality of the truth-in-advertising department of the advertising club of that city, has passed an ordinance providing a heavy penalty for failure to describe such goods fully in an advertisement. An incomplete description in such a case, the Los Angeles advertising club believes, is unfair, both to the customer and to competitors, and is therefore detrimental to the best interests of business.

While an advertisement of "seconds" so written as not to divulge the fact the goods are "seconds" may sometimes bring a better crowd to a sales because of the seemingly low prices quoted, such sales, in the long run, destroy confidence in advertising and do not pay, says a bulletin just issued by the Associated Advertising Clubs of the World.

THOMAS I. THOMSON

Sheriff of Grey County, who died at Owen Sound. He was President of the hardware firm at T. I. Thomson, Limited.

An example mentioned by the Associated bulletin is that of a Michigan electrical goods dealer who advertised nitrogen lamps.

They were burnt out lamps which had been remade. They were plainly described as remade lamps on the label they bore, yet a customer of the store complained to the vigilance committee of the local advertising club that he had been defrauded. He thought they were new lamps, because there was nothing in the advertisement to the contrary.

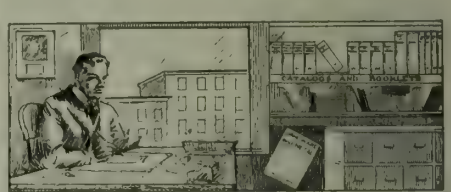
The vigilance committee took the case up with the dealer and explained the necessity for describing such merchandise for just what it was. The management gladly refunded the purchase price to the displeased customer, agreeing, at the same time to describe goods more fully in the future.

Hardwareman Hurt In Gasoline Explosion

Solomon Krawitz, proprietor of the Farmers' Hardware Store at Luseland, Saskatchewan, narrowly escaped serious injury in an explosion which set fire to the building and blew him out of the rear door. He was soldering an empty gasoline drum when the gas confined in the drum caused it to burst.

The rear door of the building was blown off, also the rear window with the frame, and the glass front on the left side of the store was shattered. The drum was completely wrecked, the welded seams being torn apart like paper.

Mr. Krawitz was found lying outside in the snow in a dazed condition by neighbours, but soon recovered, and except for a badly bruised leg sustained no hurt. The fire which started was soon put out and the damage from this source was small.



HITS COPPER PRODUCTION

Every copper mine of any producing capacity at Butte, Montana, was compelled to close down Saturday through inability of men who wished to work to reach property. Several hundred strikers took possession of roads and refused to allow miners to pass.

Representatives of mining companies waited upon merchants of Butte and asked that they lower the costs of food and clothing. Refusal will mean either that the mines of Butte will close indefinitely or that companies will establish stores of their own at which commodities will be sold to employees at cost.

GEORGE STANLEY INJURED

George Stanley, of the Geo. A. Stanley Hardware Company, Lucan, Ont., will be laid up for some time as a result of injuries he sustained when his arm caught in the machinery of his coal elevator. The flesh was very badly torn and while the injury is not serious it is painful.

ERIE IRON WORKS

Catalogue No. 6, just issued by the Erie Iron Works Manufacturing Co., Limited, St. Thomas, Ont., lists a number of hardware specialties as well as the lines of shovels, garden trowels, spades, garden forks, and wheel barrows made by the firm. It contains thirty-two pages and is attractively illustrated. Copies of the catalogue may be obtained by readers of HARDWARE AND METAL upon request.

Predicts Big Future For the Solid Tire Industry

The Rubber Association of America, in a report on the past year in the rubber industry, calls attention to the phenomenal growth in the manufacture of solid tires:

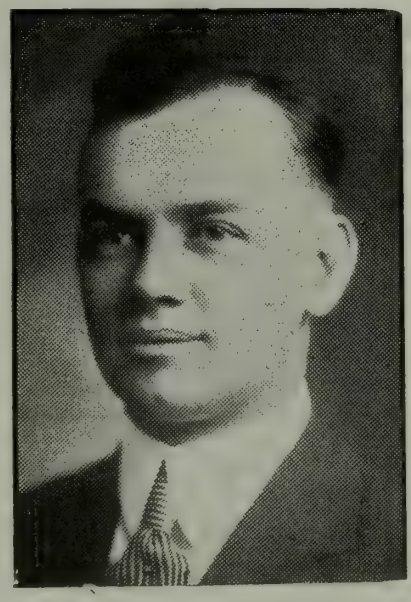
"The past year has witnessed numerous economic changes brought about by the war, which affect the rubber industry greatly. Higher transportation costs have increased the use of the bicycle, with a consequent greater demand for tires. But of far more importance is the enormous development of motor trucks for army use, delivery purposes, short-haul and even long-distance overland freight in which a few rubber companies were among the pioneers. More than half a million motor trucks are now in use in the United States, and it is confidently predicted that in five years there will be four millions. A phenomenal growth of the solid-tire industry has resulted. Meanwhile, too, cord construction has removed the previous limits of pneumatic tire sizes, and 12-inch cord tires are now being successfully used on the heaviest trucks, prolonging their life and increasing their speed. Nothing can stop this great economic movement except the failure to build hard-surfaced roads of adequate strength to carry the greater tonnage at the higher speed required, and with Government officials everywhere awake to the need, an adequate construction program seems assured.

"New industries have been created and further incentive given to the old by the abnormal conditions affecting raw materials. The prevailing spirit of economy, the necessity to conserve rubber, the high cost and shortage of tires, and the importance of obtaining maximum service from them have all been factors in the new industry of retreading or rebuilding tires, which has assumed considerable importance in America during the last twelvemonth. Henceforth thousands of automobile tires, such as were formerly discarded prematurely, will be rehabilitated for further service at a lower cost per mile than that of new tires."

Merchants Behind Move To Round Up Delinquents

With three of their members in the Windsor city council for 1919 and representation on the governing bodies of the various other Borders Cities of Ford, Walkerville, Sandwich and Ojibway, the Border Cities Retail Merchants' Association are planning a vigorous campaign to secure legislation to help business.

Ald. Samuel Keyser, Fred L. Howell and Andrew Laing of the Windsor council have already been approached and promised their co-operation in putting through a by-law that will force registration of all persons who move into or leave the city, thus insuring a complete record of all residents. The measure is advocated primarily as a means of assisting the credit department in locating delinquents.



It is hoped to secure similar legislation in the other communities along the south side of the Detroit River.

W. E. VALLANCE

Secretary-treasurer of Walker Vallance Ltd., Hamilton, Ontario.

W. E. Vallance and Fred J. Walker, have gone into the automotive parts business in Hamilton, Ont., under the firm name of Walker Vallance, Limited. Mr. Vallance is a son of the late William Vallance of Wood, Vallance & Co. He has been connected with the wholesale hardware business for some time. Mr. Walker has been in the retail accessory and tire business.

FRED J. WALKER

President and general manager of Walker Vallance Ltd.

HARDWARE MEN HOLD DANCE

A successful dance was held in the Metropolitan Assembly Hall, Toronto, on Wednesday evening, February 12, under the auspices of a section of the Retail Hardware Merchants of Toronto.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

208. **Carpet broom handles.**—A London firm desires quotations from Canadian manufacturers who can make regular shipments of carpet broom handles 1-inch by 42-inch, slightly tapered and shaped on top, to South Africa; maple preferred. Prices f.o.b. Canadian ports from which South African steamers sail.

209. **Glace kid, box calf and willow calf.**—A company of tanners and leather factors in the east of England, whose travelers cover the whole of the country, are desirous of securing the agency of a Canadian manufacturer of glace kid, box calf and willow calf.

210. **Birch.**—A Manchester firm is open to purchase large quantities of birch suitable for manufacture of spools.

211. **Staves.**—A Manchester firm wishes to purchase dressed staves for cooperage trade, also cut oak heads. Would be prepared to represent a manufacturer.

212. **Oak sleepers.**—A commission house in London, England, has received an inquiry from the Italian Government for 3,000,000 railway oak sleepers and would like to receive offers from Canadians. Sample sleepers of Douglas fir might be submitted as possible substitutes for oak sleepers. Full information regarding prices on board ship should be given.

214. **Baling wire.**—A Glasgow firm would like to receive offers of annealed baling wire in bundles of about 50 pounds, 14 B.G. (and other suitable gauges), 10-ton lots, with a view to business as soon as conditions permit. Also five tons new or defective wire suitable for bundling purposes, 4, 6 and 6 B.G.

216. **Fencing wire.**—A Glasgow firm makes inquiry for 10 tons of Nos. 6, 7 and 8 galvanized fencing wire, and No. 4.3-inch and 4.6-inch galvanized barbed wire. Further specifications may be obtained from the Department of Trade and Commerce, Commercial Intelligence Branch, Ottawa.

219. **Bentwood chairs.**—A Glasgow firm would like to receive offers of above, which they stocked in large quantities before the war.

220. **Wire rods.**—A Coatbridge firm would like to receive offers of 500 tons of wire rods, 5 and 6 gauge, in coils of about 150 pounds, with a view to business as soon as conditions permit.

221. **Bolts and nuts.**—A Glasgow firm wishes to communicate with manufacturers of the above, with a view to business as soon as conditions permit.

225. **Wire nails, brads, staples and dowels.**—A Glasgow firm will be in the market for 25 tons made up of various quantities of the above, as soon as conditions permit shipments. Specifications may be obtained from the Department of Trade and Commerce, Commercial Intelligence Branch, Ottawa.

226. **Blue annealed or black polish painted iron or steel hoops.**—A Glasgow firm makes inquiry for about 30 tons of the above as soon as conditions permit shipment. Specifications may be obtained from the Department of Trade and Commerce, Commercial Intelligence Branch, Ottawa.

227. Builders' hardware.—A commission firm in Barbados would like to be appointed agent for a firm in Canada manufacturing builders' hardware and agricultural implements.

250. **Transformer sheets.**—An important British firm of import and export merchants at Milan inquires for transformer sheets.

THE CLERKS DEPARTMENT

Can You Size Up People Quickly and Accurately?

In the Final Analysis, Picking Men For a Jury is the Same as Picking Men For Business—Read This Story—You May Get a Tip That Will Help You With Your Work

JOHN B. STANCHFIELD is one of the greatest trial lawyers in America. His success he attributes largely to being able to pick men. If you are a good picker he says you win. In the "American Magazine," he tells how he sizes people up as follows:

Human nature is always interesting; but to me personally it has been the most interesting in two very different places—the baseball field and the court room. I know them both very intimately, for before I was a lawyer I had been a baseball player at college.

My father was a country doctor at Elmira, New York, where I was born. As with most country doctors, his practice was not rich in financial rewards, and when I went to Amherst I helped to put myself through that college by playing baseball during vacations. I was a pitcher and we used to do our spring practising in the bowling alley of the gymnasium.

By accident I discovered that I could pitch a ball which would curve out over the adjoining alley, a feat which attracted so much attention that it came to the ears of the professor of mathematics. He declared that it was impossible, violating the law both of God and of man. He could not be convinced to the contrary until I proved it to him by pitching a ball and curving it around the corner of a building.

With these curves at my command I naturally had a secure place on the college nine; and as I also rowed with the crew I spent more time on athletics than on books. But I think that, because of this very thing, I learned to study human nature, and the training I got in this way was worth more to me later than mere book knowledge could have been.

To know what the other fellow is thinking, to be constantly on the alert, to watch all the different players on a ball field, is not so very different from a lawyer's work in a court-room. In both places it is a battle of wits as well as of technical skill. In a trial one must watch the opposing lawyers, the plaintiff, the defendant, the judge, the witnesses, and the jurymen.

The battle, as a rule, is not over points of law. Instead, it's based on the knowledge of human nature possessed by all parties concerned. In fact, human nature plays so important a part in a court-room that most cases are won through shrewd observation of how the human being thinks and acts.

In selecting a jury, for example, the law plays practically no part. It is understanding of human beings that counts.

For this reason I study your face, your tone of voice, the answers you make and, especially, whether or not you look me in the eye when speaking. I make it a point to find out whether you are well-to-do, or perhaps a clerk in a store In addition, I always want to know the occupation of a prospective juror's children as well as the occupation of the juror himself. I ask your age, religion, and many other things, because they all aid me, as the prosecutor or the lawyer for the defense, to make up my mind whether or not I want you for the jury. And if I don't want you, I try to get rid of you, as I shall explain later on.

If your answers are hesitant, both the prosecution and the defense are against you. And the reason is, of course, that we both fear you will be too easily swept with the crowd; that you will bring in whatever verdict the majority decides upon. We doubt your ability to think for yourself.

There is, however, another side to this point. If, instead of being a weakling, you have a hard, determined jaw, and show by your answers that you are stubborn and defiant, we may also hesitate to take you. If we get twelve stubborn men on a jury, the end of the world might arrive before they would come to an agreement! The ideal jury is one composed of four strong men, and eight intelligent and resolute ones. We want a few men of great decision so that they will bring a verdict for one side or for the other.

Your position in life is always considered, of course. If I were defending an employee I should hesitate about having many employers on the jury. They may try to be neutral and fair; but if there's any "leaning" at all, it will be toward the prosecution instead of the defense. The same thing would apply if a rich man were being tried. Then, I should try to get a jury of men of property, and of the same standing as the defendant. For a jury of poor men is not inclined to be merciful toward a wealthy defendant, even though he may really be innocent. The poor love to "swat" the rich whenever it is possible. We always try to get men of one class to try men of the same class in order to insure fairness and justice.

Another point that must be watched is that of religion. A fanatic of one faith may take an instant dislike to a defendant of another faith, and so make his decision on the ground of religion, instead of on the evidence. On the other hand, however, the prosecuting attorney knows that it is dangerous to his case to allow many men of the same faith as the defendant to sit in the jury box. For they may allow that common interest to sway them in rendering their verdict.

Membership in a society, or a fraternal lodge, is to be taken into account, for the same reason. If a juror belongs to the same society as the defendant, he will usually be challenged by the prosecution on the ground that he could not give a fair verdict. Of all problems, however, that of an Orangeman and an Irishman is the most difficult. You can well imagine what would happen if one were set to decide the case of the other.

There is a vast variety of things which can influence human beings in rendering judgments on others. Just take, as an example, the incident which taught me always to ask, "What are your children's occupations?" Apparently, the occupation of a man's son could not affect the verdict he would render. But I found that it sometimes does.

I was defending a man accused of some crime against a department store, and I was very much surprised when a verdict of guilty was brought in against my client. I was so surprised, in fact, that I spoke to some members of the jury after they had been dismissed. And this is what one man told me:

"The fellow that swung the verdict," he said, "has a son working in the department store. He seemed to think it was up to him to help convict your man just because his son works in that store."

You, as the reader, may probably say that you wouldn't have let such a fact influence you. Nevertheless, if one of your children or a near relative had a

good job with some corporation, and you were a juror in a case brought by that corporation, I'll wager that your sympathies would not be with the defendant. In cases for the Government, especially, lawyers for the defense have to be careful to find out if any of the prospective jurors have children in the Civil service. If they have, we don't care to take a chance; for, though the man may not blindly disregard justice, his sympathies will all be the other way. It might be possible, of course, that he and his children might dislike the Civil Service, and so be for the defense. But we are not likely to find this out.

It is impossible to know what relationship may exist between the defendant and some member of the jury. We have sometimes discovered, long after a trial, that the defendant had wronged some member of the jury years before, and that the juryman voted against him "to get even."

If a man is lying, however, you can always catch him by asking him to repeat. And the test isn't, "Does he tell a different story?" It is, "Does he tell exactly the same story, word for word?" If he does, you can bank on it that he has prepared his story beforehand, memorized it, and can tell it the same way a hundred times if you ask him.

The honest man never tells the same story twice in the same way. He always leaves out something or adds something. No man can tell the same story exactly the same unless he has prepared and memorized it.

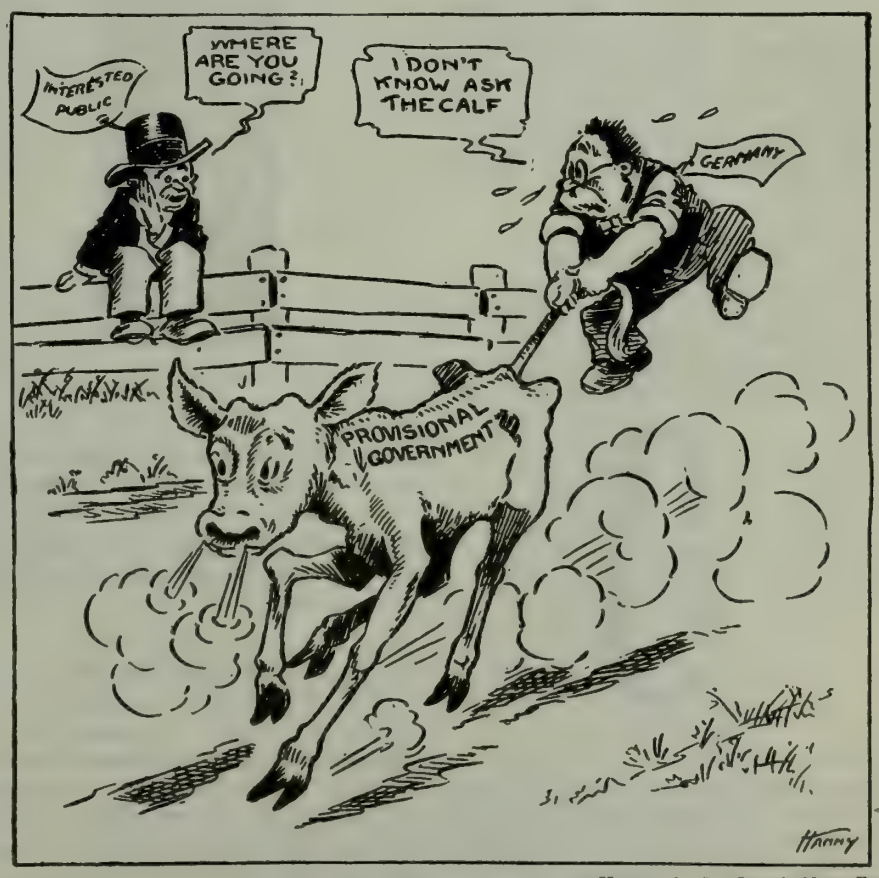
If you want to detect a liar, watch his face. Liars always shift their eyes. They cannot help it, especially in a court-room, where everyone is watching. They also hesitate for a fraction of a second. The simplest way that lawyers can catch them is to ask if they have talked the case over with the opposing lawyer. If they say "No," you've got them, because no lawyer would dare to put a witness on the stand without first talking to him. Many witnesses do not know this, however, and so they fear an admission would be harmful. Accordingly, they lie. And if you can make the jury realize this, their testimony isn't worth two cents.

Recently—and it just shows that you never stop learning—I've discovered another thing: When a man wants to make a special point he will emphasize that point, though unconscious that he is doing so. He will say emphatically, "I know that he was in the drug store at ten o'clock." If you catch him up quickly and say: "Why did you want to emphasize that point? Why did you need to bring that out so emphatically? Come on, now! Answer me! Answer me!" you'll get him confused and uncertain. In most cases you will discover that he emphasized the point and raised his voice because he knew he was lying! He raises his voice to still the thought in his mind that he wasn't telling the truth. That's just plain, simple, human nature, but I learned it only after years of experience and practice.

Women are always harder to trap in a lie than men, they remain cool and smiling, whereas men get nervous and confused. I think the reason is that men realize the seriousness of a court-room, whereas women don't. Women do not pay attention on the stand, they talk when they are spectators, and they generally pay little respect to the laws of the court.

As an actual witness, a woman differs from a man. She is so much more observant than a man that she will remember many details which a man will forget. Women are at their best, however, when they are testifying in behalf of someone they love. Then they are cool, collected, and on the alert for anything which may harm the defendant. Perhaps the best witness New York ever saw was Evelyn Nesbit Thaw when she testified in behalf of her husband twelve years ago.

When children are telling the truth, they, also, make good witnesses. You can't make them change their stories. They keep saying "No, no," or "Of course, of course," and their words carry the conviction of truth. When they have been coached, however, it is very simple to pull their stories to pieces.



Women and children also come under the category of "what influences human beings." When I got Harry Thaw out of the insane asylum at Matteawan, my greatest card was his white-haired mother, who sat in court comforting and encouraging Harry. Mrs. Thaw is quite a wonderful woman, and I could see the jury melting as they watched her, day after day, fussing around her son. I kept reminding them of her; asking them how they could keep a boy from the mother who had fought ten long years for his freedom, from the mother who had suffered as she had suffered. And, as the world knows, Harry Thaw was declared sane and given his freedom.

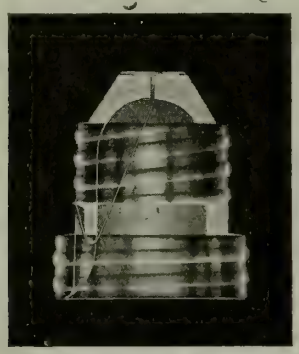
However, though human beings are mostly soft-hearted and inclined to be lenient, they hate to feel they are being fooled, that their heartstrings are being wrung in an attempt to wipe away evidence. That is why anything of this sort has to be well managed to carry any conviction with it. When there is no good reason for the presence of a mother or children in court, their introduction is likely to turn the jury against one's client, especially if the jury is composed of hardheaded business men.

The old-fashioned oratory of the past is another thing for which people no longer seem to care. At least, they don't like it in New York City. What New Yorkers want is the facts, and the sooner you give them the better. This is not true, however, in the South, the West, and in rural districts. In these places, people still love to hear long, rolling, eloquent oratory. If you start this in New York, however, the jury begins to say:

"Good Lord! Here is this fellow keeping us away from our homes and business with his infernal speech-making."

All of which merely goes to prove that human nature is human nature—especially in a court-room!

--Hanny, in St. Joseph News-Press.



The Old Joke Modernized

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

REFILLABLE FUSE PLUG

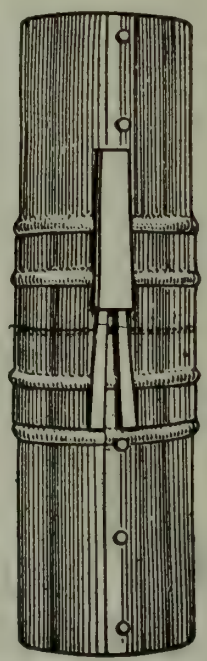
The J. C. Refillable fuse plug, which is manufactured by the Clemens Electrical Corporation, Limited, Hamilton, Ont., can it is claimed be changed from six to thirty amperes according to requirements. The plugs it is stated refill at a cost of only one cent each and can it is claimed be refilled twenty or thirty

Fuse Plug

times. It is stated that they are especially useful to large users of plugs, industrial plants, railways, hotels, etc., because the J. C. Refillable plugs enable them to reduce their capital tied up in carrying a large and varied stock of fuses. The plugs it is stated are approved by the Hydro-Electric Power Commission.

CROWE FAN BELT

The Crowe fan belt manufactured by the Canada Sales Co., 183 Church St., Toronto, Ont., consists it is stated of a steel chain into which blocks of oak tanned sole leather are firmly imbedded.



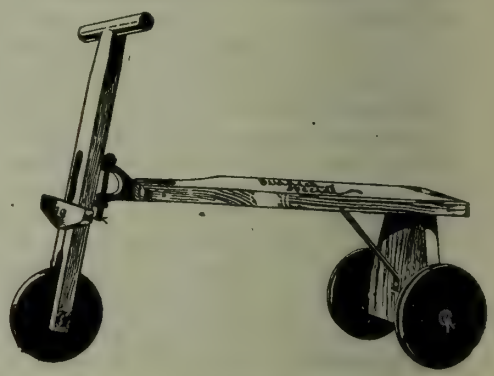
Fan Belt

The steel chain is constructed it is stated so that while flexible and resilient it will not stretch or break. The combination of steel and leather makes the belt impervious to oil, heat, dirt or water, it is claimed.

WELL CASING

"Ideal" Galvanized well casing manufactured by the Ideal Well Casing Co., Ltd., of Calgary, is made it is stated of 20 gauge galvanized iron or heavier, according to service. A new idea which it is claimed is an especially important feature is the patent lock joint. With ends butting it is claimed that good heavy driving may be accomplished. The casing it is stated has smooth interior bore, is made in sizes from four to twelve inches in diameter and may be used for

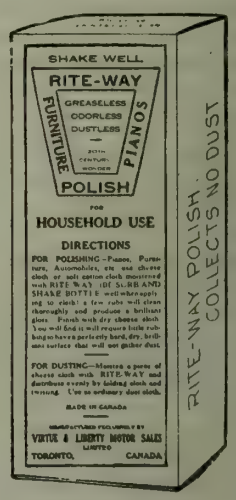
Well Casing



wells 500 feet deep, for grain spouting, irrigation flumes, culverts, mine ventilation and other purposes. When used for mine ventillation it is claimed the casing will not shake down while blasting is going on.

RITE-WAY POLISH

"Rite-Way" polish, manufactured by Virtue & Liberty, 531 Yonge St., Toronto, can be used, it is stated, for automobiles, leather goods, glass, furniture, pianos, floors, or white enamel. It is claimed by the makers that it is odorless, greaseless and dustless and takes very little rubbing.



BUDDIES CAR

Buddies Special Car, manufactured by the Chown Manufacturing Company, of Hamilton, Ontario, is made, it is stated, of hardwood and steel throughout. It is finished in natural and red, and has a wheel base of twenty-one inches. It is stated that it has solid one-piece steel

Buddies Car

axles front and rear, steel bearings in the wheels, and that bolts, nuts and washers are used instead of nails in putting it together.

Rite-Way Polish

William B. Powell, formerly assistant advertising manager of the Sherwin-Williams Company, Cleveland, and for the past two years publicity director for the Y. M. C. A., with headquarters at London, England, has joined the staff of Fuller & Smith, Cleveland.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

AN advancing market which has been in evidence on hemp for some time past has finally reached such proportions that prices on rope have undergone a sharp advance during the week. Last Saturday an advance of 5c per pound was made in manila grade of rope, and this has been followed on Wednesday of this week by a further general advance on all grades except tarred hemp goods of 2c per pound. Although higher prices have been talked of for some time on rope, the amount of the advance came as rather a surprise to the trade as a whole.

New list prices have been named on metal shingles, sidings, ceilings and corrugated sheets this week which provide for a substantial decline from the figures previously prevailing. A new feature adopted by the manufacturers is the fact that present prices are worked out on a delivered basis for most points in Ontario, and equalized for delivery to far Eastern or Western towns.

Copper rivets are down a further 10 per cent. this week, and a 10 per cent. decline in copper burrs has also been made. Coppered split rivets are much higher, according to advices from some markets this week.

Auger bits have moved to higher levels this week, along with car bits, machine bits and expansive bits. Wood faucets, splint clothes baskets, post-hole diggers, post-hole augers and chain blocks are other lines which are under revision upward this week.

Linseed oil has moved up and down, and the basis of quoting is about the same in most markets. Flaxseed shows an advance for the week and now seems on a fairly stable basis, though whether this will hold or not is a question. The price of oil cake is somewhat easier, and with a possibility of some export developing, a steadier tone to the linseed oil market may be expected to manifest itself.

Turpentine has declined 5c per gallon this week. Conditions at primary points show practically no change, and this move on the part of the dealers is evidently the expression of a desire to get down to rock bottom in line with producing points and so encourage business. Greater activity is noted, and considerable inquiry is reported which may reasonably be expected to develop into orders.

Wash boards are higher this week, and express wagons, whip lashes, resin and coal tar are other lines to advance. Cow chains have declined, along with wheelbarrows, copper wire, brass butts and friction tape. Business generally seems to be opening up fairly well, and dealers are satisfied with the prospects.

MONTREAL MARKETS

MONTREAL, Feb. 13.—The biggest change of the week in point of surprise and importance is that of a stiff advance for rope. There were two advances, one on the 8th instant and the other on the 12th, and the higher prices are caused by a steady advance of the price for hemp. This condition was definitely forecast in recent reports appearing in HARDWARE AND METAL, although the makers did not expect such stiff advances for hemp as have been transpiring from week to week.

Declines have been noted this week, lower prices being named on sad irons, galvanized and black sheets, old materials, lead sheets, solder, fuel oil, cattle chains and game traps, and ingot metals.

There is a very fair amount of business, represented in small orders rather than large. The outlook is, if anything, more promising.

Cattle Chains, Sad Irons; Traps Down

Montreal.

TRAPS, SAD IRONS, CATTLE CHAINS.—Declines are made in the basis of cattle chains. The discount on these is 20 per cent.

Mrs. Potts' sad irons also are reduced, the quotation for No. 50 being $2.10 per set, and that for No. 55, $1.95.

Various game traps are revised, and as there are several changes from the recent list the new revised price basis is given as follows:

Game Traps—Victor, with chain—No. 0, $1.90 per dozen: No. 1, $2.20; No. 1½, $3.30; No. 2, $4.60; No. 3, $6.50; No. 4, $7.80. Jump, with chain—No. 1, $2.95 per dozen; No. 1½, $4.40; No. 2, $6.45; No. 3, $8.55. Hawley & Norton, with chain—No. 0, $2.95 per dozen; No. 1, $3.45; No. 1½, $5.15; No. 2, $7.25; No. 3, $9.65; No. 4, $11.35. Newhouse, with chain—No. 0, $4.25 per dozen; No. 1, $5; No. 1½, $7.50; No. 2, $11.10; No. 3, $14 80; No. 4, $17.50; No. 81, $5.80; No. 91, $3.65. Bear—No. 5, $10.85 each; No. 50, $7.85 each.

Stoves Are Steady; Wares the Same

Montreal.

STOVES AND WARES.—The market is quiet as far as stoves are concerned, and the same may be said to be true of enameled wares and stamped ware. There is a steady and even a firm basis, for even though the cost of some ma-

terials has declined, the labor situation is offsetting this entirely, increases having been made to some classes of labor.

Rope Changes Twice; Pure Manila 35½c

Montreal.

ROPE, CORDAGE. — Two changes have been made in the rope basis within a few days, both being advances and totalling an increase of seven cents per pound for manila grades, and two cents for sisal. As was pointed out two weeks ago in HARDWARE AND METAL, "While there has been a steadily advancing hemp market, prices scoring an increase of around 4c in a short while, there is no advance yet in the price of rope; this may come." This has been the reason for the advances made—that is, steadily advancing costs for hemp. The manufacturers have had to buy on the raising basis the raw material needed, and have accordingly had to advance the manufactured costs.

The new prices are: Pure manila, 35½c; British manila and New Zealand hemp, 31c; sisal, 27½c; lath yarn, 27½c per pound base.

Fuel Oil Down; Gasoline; Oil Held

Montreal.

GASOLINE AND OILS.—The feature of the week is that of a decline for fuel oil. This is selling at $8.80, and the reduction is therefore 70c from the previous quotation in this market of $9.50.

Coal oil is steady at 19c per gallon for Royalite and 22c for Palacine and Electroline, while motor gasoline is unchanged at 34c per gallon.

Bars Holding; Sales Just Fair

Montreal.

STEEL AND IRON.—There is a certain movement of bars, both of iron and steel, but little change in the market is made, the basis being fully maintained at the recent declines. The outlook bids fair as regards improvement of demand, but this may not come for a few weeks in a large way.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

10-Gauge Sheets, $10; Galvanized Down

Montreal.

SHEETS.—A price of $10 per 100 pounds is quoted in one quarter on black sheets, 10-gauge. This is in definite accord with the tendencies that have been outlined in recent market reports in HARDWARE AND METAL, last week's report stating that, "readjustments are under contemplation and lower prices may probably be in effect in the immediate future." There is not a great movement, but sales are made regularly in a limited way.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 00	$7 10
12 gauge	7 10	7 15
14 gauge	6 85	7 00
16 gauge	6 95	7 05
18-20 gauge	7 10	7 25
22-24 gauge	7 15	7 35
26 gauge	7 20	7 40
28 gauge	7 35	7 50
GALVANIZED SHEETS—		
10¾ oz.		$9 75
28 gauge		9 25
26 gauge		9 00
22 and 24 gauge		8 85
20 gauge		8 65
18 gauge		8 65
16 gauge		8 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Sheets 11c; Solder, Zinc Less

Montreal.

LEAD AND ZINC PRODUCTS.—There is weakness in the market as far as sheet lead and solder are concerned. Sheet lead is down to 11c per pound for heavy and 12c for the lighter weights. Guaranteed solder is selling at 38c and commercial at 33¼c per pound, while wire solder is quoted down 1½c per pound all around. Business is reported better. There is much scope for a bigger movement and this is looked for within a few weeks. Zinc has dropped 2c per pound and is quoted at 17c to 18c according to quantity.

Lead pipe, lb.		$0 13
Lead pipe (cut lengths)		0 14
Lead waste pipe, lb.	0 14	
Lead traps and bends	**Net list.**	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.		0 12
Lead sheets, 4 to 8 lbs., s. ft.		0 11
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.		0 38
Solder, strictly, lb.		0 35½
Solder, commercial, lb.		0 33¼
Solder, wiping, lb.	0 31	0 33
Solder wire (8 gauge)—		
40-60		0 44
45-55		0 47¾
50-50		0 51½
Zinc sheets, casks		0 17
Do., broken lots		0 18

General Decline in Old Materials

Montreal.

OLD MATERIALS.—A decline all around is made for old material. This bears out the definite forecast made in HARDWARE AND METAL of last week. There are very considerable reductions for tea lead and lead pipe, while brass and copper and various old iron lines are much lower. There is no improvement in selling, and even small holders are not offering a great deal, preferring, apparently, to hold on to what they have. There are no indications of improvement and values may fall considerably yet.

Dealers' Buying Prices—		
Tea lead		0 03½
Heavy lead pipe	0 04	0 04½
Pipe scrap	14 00	15 00
Stove plate, per ton	14 00	15 00
No. 2 busheling	8 00	9 00
Old rubbers, boots and shoes	0 07½	0 07¾
Overshoes, lumbermen's rubber boots		0 05½
Bicycle tires	0 02½	0 03½
Automobile tires	0 03½	0 04
Yellow brass	0 08	0 08½
Red brass	0 14	0 15
Light brass		0 06
Scrap zinc	0 05	0 05¼
Heavy copper	0 16½	0 17½
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast	24 00	26 00
Heavy melting steel		18 00

BRIEFS GLEANED FROM THE WEEK'S MARKETS

Barb wire, plain twist wire, plain galvanized wire and coil spring wire have declined at Toronto this week.

* * * *

Splint clothes baskets have been revised upward this week.

* * * *

Irwin auger bits have advanced about 5 to 7½ per cent.

* * * *

Metal siding, ceiling, and shingles all show a substantial decline this week. New prices issued are on a delivered basis for shipments of 300 pounds and over to most Ontario points, and freight is equalized on other shipments.

* * * *

Post hole diggers and post hole augers have followed the upward trend this week.

Turpentine declined 5c per gallon and seems right in line with producing points now.

* * * *

Copper rivets came down another 10 per cent. this week. Copper burrs followed suit this time.

* * * *

Manila rope advanced 7c and sisal rope 2c per pound this week. Firmer hemp markets are considered the main contributing factor.

* * * *

Dart unions have been revised downward according to new discounts just issued, the ¼ to 2-inch now being quoted at 20 per cent., and 2½-inch and larger, 12 per cent.

* * * *

Weston chain blocks just received in Winnipeg from England show a higher cost, and selling prices have advanced to cover same.

Tin, Lead, Copper Less; Spelter Up

Montreal.

INGOT METALS.—A continued weakness prevails in the ingot markets, and tin, lead, copper, and antimony are all lower. The desire to sell on the part of various operators assures the buyer of a fair price basis, providing his needs are large, but as a rule specifications are for small quantities.

COPPER.—This is on a declining basis and the end is not yet, apparently. Some orders are received and the basis this week is lower at 23c per pound.

TIN.—London cables are much lower this week, a drop of £20 being made within a week. Some licenses are also being granted now, although nothing has come through yet. The price here is 63 cents per pound.

SPELTER.—Contrary to the tendency of last week a slight reaction has been made and the basis this week is up ¼c to 9¼c per pound.

LEAD.—The undertone is still a softening one and prices are lower than last week, 7½ to 8 cents per pound being quoted here.

ANTIMONY.—Some expect that the present basis will rule more or less steadily now that it is quoted at 8½ cents per pound, which is ½c to 1c under last week's price.

ALUMINUM.—The price on this holds and there is little business. For ordinary small lots 40 cents per pound is quoted.

TORONTO MARKETS

TORONTO, Feb. 13—A 5-cent advance in manila rope effective last Saturday, followed by a further jump of 2c in all lines Wednesday of this week, was the outstanding feature of the market. Copper rivets have declined still further and burrs are lower also. Auger bits, car bits and machine bits have moved to higher levels and expansive bits are also advanced. One line of union is lower along with brass butts, cow chains, and sad irons. A revision in galvanized wire, barb wire, plain twist wire and coil spring wire to lower levels is now effective. Wash boards have undergone a change to higher levels. Business is considered very fair.

Unions Reach Lower Figure

Toronto.

UNIONS.—New discounts have been issued on Dart unions, and the present prices are lower than those formerly in effect. On sizes ¼ to 2 inch the discount is now 20 per cent., replacing the previous discount of 15 per cent., and 2½ inch and larger are now 12 per cent.; the former discount was 6½ per cent.

Auger Bits, Expansive Go Up

Toronto.

AUGER BITS, EXPANSIVE BITS.—Higher prices have been named on auger bits. The discount quoted on the Irwin auger bits is now 10 per cent.; Irwin car bits at 20 per cent., and machine bits at 20 per cent. are also slightly higher. Expansive bits have also reached higher levels, the small now being quoted at $16.25 and the large $23.50 per dozen.

Wheelbarrows Come in For Revision

Toronto.

WHEELBARROWS.—Revised prices have been named on several lines of steel and steel tray wheelbarrows. New quotations now being named to the trade are K and J. Pan-American, $9.50 each; Contractor No. 2B, $10.25; Concrete K. and J., $12; Tubular No. 4, $11; No. 5, $13; No. 10, $16.25. Garden barrows have also been revised, the large being quoted at $68.40 per dozen and the boys', $55.80.

Wash Boards Move Higher

Toronto.

WASH BOARDS.—New prices have been issued on wash boards this week which show an advance. On the new basis the quotations to the trade will now range as follows: Pony, $2.60 per dozen; Improved Globe, $5.40; Neptune, $5.40; Standard Globe, $5.40; Original Globe, $5.90; Jubilee, $6.05; Newmarket King, $6.05; Western King (enamel), $8.25; Beaver (brass) $7.60; Diamond King (glass), $6.55.

Friction Tape Down; Post Hole Augers

Toronto.

FRICTION TAPE.—POST HOLE AUGERS.—Friction tape has eased away slightly, the new quotations named to the trade this week being for the No. 8, 58c per pound, and No. 2, 62c. Vaughan post hole augers are also changed, the 8-inch now being quoted at $17, and 10-inch at $20 per dozen.

Butts Easier; Weather Strip

Toronto.

BUTTS, WEATHER STRIP.—Lower prices are provided for in new discounts issued on brass butts. The new selling basis on the narrow, middle or broad brass butt is now 20 per cent. advance on list.

New prices are out on the weather strip, the Bosley line now being quoted as follows: No. 60, $2.04 per 100 feet; No. 61, $2.04; No. 62, $3.25; No. 64, $4.05. Booking orders are subject to a further discount of 5 per cent.

Cow Chains Show Decline; Rivets Down

Toronto.

COW CHAINS, RIVETS. — Lower prices have been determined upon for cow chains, the discount of 10 per cent. formerly ruling giving way to the present discount of 20 per cent.

Copper rivets have undergone a further revision downward this week, new price being 15 per cent. advance on list. Copper burrs are also lower, being now quoted at 40 per cent. advance on list.

Iron rivets, ½ inch diameter and larger, are quoted at following base prices: Round head, $8.10 per 100 pounds; cone head, $8.25; countersunk head, $8.75.

Copper wire is quoted at 10 per cent. discount from new list, a decline.

Wire Prices Sag; Nails Unchanged

Toronto.

NAILS, WIRE.—Lower prices have been named on barb wire, plain twist wire, coil spring wire and galvanized wire. The figures just issued rule at following levels: Barb wire, $6.00 per 100 pounds; plain twist, $6.50; coil spring No. 9, $5.85; No. 12, $6.90; No. 13, $6.10; plain galvanized Nos. 3 to 8, $6.60; No. 9, $5.75; No. 10, $6 65; No. 11, $7.00; No. 12, $5.95; No. 13, $6.05; No. 14, $7.05; No. 15, $7.60; No. 16, $7.70. All these prices f.o.b. Montreal.

Nails hold at unchanged levels this week, the wire being quoted at a base of $5.50 per 100 pounds and the cut at $5.35.

Sharp Advance in Rope; 7c Higher

Toronto.

CORDAGE.—The firmer tendencies developing in regard to the hemp market have been outlined in these columns during the past two or three weeks and these have finally resulted in an advance on Manila rope of 7c per pound. On the new basis quotations which are now being named to the trade are: Pure Manilla, 35½c per pound: base; British Manila, 31c per pound base; New Zealand hemp being 31c pound base; sisal rope, 27½c per pound base; sisal lath yarn, 27½c per pound base.

This came in the form of an advance of 5c per pound February 8, and following on Wednesday of this week came a general move upward in all lines except tarred hemp of an additional 2c per pound.

Activity Marks Oils, Gasoline

Toronto.

OILS, GASOLINE.—Activity is noted in oils and gasoline—to a remarkable degree it is stated. There has been no change in coal oil prices, 18½c to 21½c per gallon being the figures according to grade. Gasoline is also ruling at the unchanged figure of 33c per gallon.

Wares Steady; Stoves Unchanged

Toronto.

STOVES, WARES.—A steady tone is noted in all lines of wares and whereas United States markets seem to be fluctuating quite a good deal, the basis there was said to be much higher than in Canada and no immediate prospect of any change is mooted. Business coming to hand and in prospect is considered good.

There have been no new developments in regard to stoves. The market is steadily maintained and whereas business is quiet just now this is a result of unseasonable weather combined with a usual lull experienced at this time.

Iron and Steel Bars Unchanged

Toronto.

IRON AND STEEL.—Bars remain in about the same position as that prevailing the past couple of weeks. There is little moving and prices are unchanged.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	6 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Lower Prices on Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — Lower prices have been named on metal shingles, siding, and corrugated sheets. The new scale of quotations on the corrugated sheets with delivery points is shown below. The question of delivery is a new one with the manufacturers and should work out to the advantage of the retailer in figuring costs. New list prices on the galvanized range from 75c on the 28-gauge to $3 on the 18-gauge below former figures. Business is still quiet but a marked improvement in the inquiry is noted and lower prices will no doubt be a factor to stimulate sales.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Sheets Show No Further Change

Toronto.

SHEETS, PLATES.—The markets rule without change this week and whereas more business could be handled than is now coming to hand, jobbers are very well satisfied with the outlook. They report a greater feeling of confidence in the trade and when things open out in another six weeks or two months, look for big business. Range of quotations follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	6 50	$6 90
12 gauge	$6 05-6 60	7 00
14 gauge	6 10	6 65
16 gauge	6 20	6 75
18-20 gauge	6 80	7 30
22-24 gauge	6 85	7 35
26 gauge	6 90	7 40
28 gauge	7 00	7 50
3-16 inch plate	6 25	6 75
¼-inch boiler plate	6 00	6 50

Prices shown are for full cases. An evtra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	8 50	$9 00
U.S. 28	8 20	8 75
U.S. 26	7 90	8 45
22 and 24	7 75	8 30
18 and 20	7 60	8 30
16	7 45	8 00

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Steady; Tubes Quite Active

Toronto.

WROUGHT PIPE, BOILER TUBES. —Wrought pipe is ruling at steady figures and some business is being done. Prices appear in current market quotations.

A fair amount of business is being done in boiler tubes and stocks are at a comparatively low ebb. The tube situation just now is one that comes under the two-price heading. This is not true in all cases, but in several it is. The warehouses have stocks in some cases that were taken in at war prices when help was scarce and costs very high. They have not enough of this to make them stampede the market and they are able to get new stock at the lower prices but it takes time. Buyers of tubes, if they watch their needs ahead, can save a little money here. If they can so arrange matters that they can wait for a couple of weeks for delivery, they can buy tubes at ten per cent. below the price if they want them taken out of the stock that warehouses have on hand. There seems to be a tendency on the part of the Canadian trade in nearly every case to give the buyer the advantage as soon as it is possible to do so.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$32 00	$.....
1¼ inch	36 00	.....
1½ inch	39 00	32 00
1¾ inch	39 00	32 00
2 inch	45 00	32 00
2¼ inch	48 00	34 00
2½ inch	50 00	40 50
3 inch	58 00	45 00
3¼ inch	.....	52 00
3½ inch	70 00	54 00
4 inch	80 00	67 00

Some Slight Change in Solder

Toronto.

LEAD AND ZINC PRODUCTS.—Some slight changes are reported in prices on guaranteed and strictly solder, quotations being down about 1c per pound. Wire solder is quoted up to 50c in some quarters. No change has been made in manufactured lead products, pipe and traps and bends holding at figures below:

Lead pipe, lb.	....	$0 13
Lead waste pipe, lb.	....	0 14
Lead traps and bends	....	Net list
Lead wool, lb.	..	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb.	$0 37	$0 39
Solder, strictly, lb.	0 33	0 36
Solder, commercial, lb.	0 31	0 33
Solder, wiping, lb.	0 30	0 31
Solder, wire, lb.	0 45½	0 50
Zinc sheets, per lb.	....	0 20

Declines Noted in Metal Siding, Shingles, Corrugated Sheets; Now a Delivered Basis

A NEW basis of quoting is revealed in figures issued this week on metal shingles, siding and corrugated sheets. Besides providing for a substantial decline from figures which have prevailed for some months, the prices named have been revised to include delivery charges or equalization charges on far-Eastern or Western points.

The fact that dealers can now arrive at an accurate laid-down cost without difficulty should assist them materially in submitting figures to their customers.

List prices now being quoted to the trade subject to usual 7½ per cent. discount are:

Standard Shingle, galvanized, per sqr.	$10 00
Do., Do., painted, per sqr.	8 00
Standard Siding, galvanized, per sqr.	8 50
Do., Do., painted, per sqr.	6 50

Corrugated Sheet—	Per 100 sq. ft. Galv'd	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

On shipments of 300 pounds and over the freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay the freight is equalized on North Bay. For Quebec and Maritime Provinces freight is equalized on Montreal.

It is indicated that in addition to above price changes there has been a reduction of 50c per square on some lines of metal ceilings.

Old Materials May Go Lower

Toronto.

OLD MATERIALS.—That even lower prices may be reached on the entire list seems quite probable. Dullness is the condition of the market, there being no selling and no buying—stagnant is the word to describe the present situation. Quotations herewith are really only nominal.

Dealers' Buying Prices:		
Pipe scrap	15 00	16 00
Stove plate, per ton	17 00	18 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 07	0 07½
Overshoes, lumbermen's rubber boots	....	0 05½
Bicycle tires	....	0 04
Automobile tires	0 04	0 04½
Yellow brass	0 10	0 11
Red brass	0 14	0 15
Light brass	....	0 08
Scrap zinc	....	0 05¾
Heavy copper	0 18	0 19
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast	....	30 00
Heavy melting steel	....	15 00
Auto tires	0 04	....
Bicycle tires	0 02½	....

	Per gross ton.
No. 1 railroad wrought	$15 00
No. 2 railroad wrought	8 00
Pipes and flues	8 00
No. 1 busheling	11 00
No. 2 busheling	7 50
Country mixed scrap	10 50

Copper Lower; Tin, Spelter Too

Toronto.

INGOT METALS.—Lower prices on copper and spelter have been recorded this week. There is a fair amount of activity noted in tin and stocks, though not heavy, are ample to meet the demand.

COPPER.—The substantial declines recorded in the United States market on copper have been reflected here and quotations to-day range around 21c to 22c per pound. There is only a fair amount of business being done in the metal here, the heavy stock of scrap being a factor to retard the sale of the metal.

TIN.—A somewhat lower basis has been determined upon in tin, quotations ranging from 60c to 65c per pound. There is a fair amount of activity and stock is considered ample to take care of the immediate demand.

SPELTER.—It is indicated that there is very little spelter on stock. However, there is not a great deal of interest being shown in this metal and prices have dragged half a cent a pound to 8½c.

LEAD.—Dullness marks the position of the metal this week. There are only small lots moving and stocks are quite ample to meet even very much heavier demands. Quotations are unchanged for the week at around 6¾ to 7c per pound.

ALUMINUM.—There is nothing new to report in this metal, commercial interests still very largely keeping out of the market. Nominally quotations range around 50c per pound.

ANTIMONY.—There have been no particularly interesting features develop in regard to this metal this week. Sales are light and stocks are comparatively heavy. The price holds at 8½c per pound.

LONDON MARKETS

LONDON, Ont., Feb. 13—A sharp advance in the price of rope amounting to 7c per pound on manila and 2c on sisal has been reported. Higher prices are also being quoted on wood faucets, splint clothes baskets, rosin, post hole diggers, post hole augers and garden tools. Further declines are shown in the price of copper rivets and burrs and lower prices have been named also on cattle chains. Coppered split rivets and auger bits are other lines that follow the upward trend this week.

Business here continues very good and wholesalers now are shipping out spring goods such as poultry netting, screen wire cloth, Garden tools, lawn mowers, screen doors and windows and spring hinges. The outlook is considered very satisfactory.

Rope Makes Substantial Gains

London, Ont.

ROPE.—The firm tendency which has been reported in the price of manila hemp is mainly responsible for the sharp advance of 7c per pound which has been made this week in the price of manila rope. An advance came through on Saturday last applying only to pure and British manila and New Zealand hemp, this increase being 5c per pound and the price of sisal underwent no change whatever. On Wednesday of this week, however, a general advance of 2c per pound became effective on all grades except tarred hemp, and in the case of the manila lines made the total advances for the week 7c. The range of quotations now prevailing is as follows: Pure manila, 35½c per pound base; British manila, 31c; New Zealand hemp, 31c, and sisal, 27½c; sisal lath yarn, 27½c per pound base.

Post Hole Diggers, Augers Go Higher

London, Ont.

POST HOLE DIGGERS, AUGERS.—Higher prices have been named this week on both post hole diggers and post hole augers. The new price on the Universal post hole digger which is being quoted to the trade is for the No. 1 by 5 ft. handle, $30, and No. 2 by 6 ft. handle, $32.50 per dozen. The Rogers post hole auger is also higher, the new price on the 8-inch being $28 per dozen; 9-inch, $29, and 10-inch, $32.

Copper Rivets and Burrs Decline

London, Ont.

RIVETS, BURRS.—A further lowering of the price on copper rivets and burrs has occurred this week. The new basis of arriving at prices is for the copper rivets to advance 15 per cent. on the list. Copper burrs which held unchanged when the last revision on rivets was made have declined and are now quoted at 40 per cent. advance on list. Coppered split rivets, however, show a sharp advance, the No. 9 being quoted at $1.30 per dozen packages.

Cow Chains Down; Stretchers Moving

London, Ont.

COW CHAINS, WIRE STRETCHERS.—The discount on cow chains has been revised this week to lower levels. The present discount is 20 per cent. off list, which supersedes a former discount of 10 per cent. Wire stretchers are now selling and there is no change in price recorded, the Detroit line selling at $1.55 per pair. McCloskey grips are also moving forward fairly well and are quoted at 75c each, an unchanged figure.

Wood Faucets Up; Garden Trowels, Too

London, Ont.

FAUCETS, TROWELS. — Revised prices have been issued on wood faucets. The new scale of quotations adopted provides for a higher list of figures than those previously in effect. The new prices on the Redlich No. 2 are $1.45 per dozen; No. 4, $2 and No. 6, $2.60. The reliable No. 4, faucet is quoted at $1.35 per dozen; the No. 6 at $1.60, and the No. 8 at $1.90. Higher prices have also been named on garden trowels, the Erie No. 1 now being quoted at $1.30 per dozen: the No. 2 at $1.85, and the No. 4 at $2.50 per dozen.

Auger Bits, Clothes Baskets Move Up

London, Ont.

AUGER BITS, CLOTHES BASKETS.—Irwin auger bits have come in for revision this week and are now quoted at a discount of 12½ per cent. This provides for an advance in the net prices over the figures formerly in effect. Splint clothes baskets have also reached higher levels, the Peerless 26-inch now being quoted at $15 per dozen; the 29-inch at $15.75, and the 32-inch at $17.

Nails Unchanged; Staples Moving

London, Ont.

NAILS, STAPLES.—There has been no change in the price of nails this week, the wire selling at $5.50 per 100 pounds base, and the cut at $5.35. Fence staples are a little bit more active and the price on these has been maintained, the bright, in kegs, selling at $5.75 per 100 pounds,

and the galvanized at $6.50; in 25 and 50 pound boxes an extra 50c per 100 pounds is charged.

Rosin Up; Coal Tar Also Higher

London, Ont.

ROSIN, COAL TAR.—New prices have been issued this week on rosin, which are higher to-day than those formerly in effect. The price to-day in casks is 8c per pound, and in smaller quantities 10c per pound. Coal tar in barrels has also been revised upwards and is now quoted at a price of $5 per barrel. Blue vitriol, or blue-stone as it is often called, is being quoted in casks at 15c per pound, and in smaller quantities at 16c per pound.

Putty, Glass, White Lead in Oil Unchanged

London, Ont.

PUTTY, GLASS, WHITE LEAD IN OIL.—There have been no new developments in regard to putty during the week, the sale being within rather narrow limits and prices holding at unchanged levels. The price of the standard putty in 100-pound drums is $6.75 per 100 pounds, and in 25-pound drums $7. Pure putty takes an extra of $2 per 100 pounds over these prices. Window glass is holding its own, and whereas there is little activity at the present time this is a seasonable condition. The discount is unchanged, both single and double diamond in full boxes selling at 25 per cent discount from list. White lead in oil is also without change this week, and a little more buying interest is being shown in this line. The pure white lead in oil in tons is quoted at $16.30 per 100 pounds, and in smaller quantities $16.65.

Linseed Oil Down; Turpentine Too

London, Ont.

LINSEED OIL, TURPENTINE.—The trade seems to be waiting for the grain market to get settled down to a point where the market can really be determined and from which linseed oil values may reach their proper status. There has been a drop recorded in linseed oil this week, the prices shown below being two cents below those ruling for the past couple of weeks. Turpentine is in an easier condition also with only a fair amount of activity noticeable and prices showing a 5c decline. To-day's quotations appear below:

	Raw gal.	Boiled gal.
Linseed Oil—		
1 to 2 barrels	$1 50	$1 53
3 to 5 barrels	1 49	1 52
6 to 9 barrels	1 47	1 50
Less barrel lots add 10 cents gal.		
Turpentine	Per gal.	
1 barrel lots	$1 05	
2 to 4 barrels	1 04	

WINNIPEG MARKETS

WINNIPEG, Feb. 13.—Price changes during the week again are a reflection of the unsettled state of the markets. Both advances and declines are numerous in many of the staple lines. Among those advancing are mentioned express wagons, Weston chain blocks, and whip lashes. Dart unions, game traps, turpentine, carpet and vacuum sweepers, sand paper and emery cloth register declines.

Business is reported very brisk with spring shipments now moving freely and prospects point to a good volume of business. Winnipeg jobbers are looking forward to meeting many of their customers who will be attending the big bonspiel which opens here on Tuesday.

Game Traps Revised Downward

Winnipeg.

GAME TRAPS.—Prices issued recently on game traps show a revision downward to levels, which were in force prior to January 1. To-day's ruling prices are as follows:

Game Traps—Victor—No. 0, $1.95; No. 1, $2.30; No. 1½, $3.45; No. 2, $4.80; No. 3, $6.75; No. 4, $8.10; No. 91, $3.20; No. 91½, $4.55 per dozen.

Hawley & Norton—No. 0, $3.05; No. 1, $3.60; No. 1½, $5.40; No. 2, $7.50; No. 3, $10.00; No. 4, $11.80 per dozen.

Newhouse—No. 1, $5.20; No. 1½, $7.80; No. 2, $11.55; No. 2½, $18.15; No. 3, $15.40; No. 4, $18.15; No. 4½, $45.65; No. 50, $97.95; No. 5, $135.35 per dozen.

Oneida Jump—No. 0, $2.60; No. 1, $3.10; No. 1½, $4.55; No. 2, $6.70; No. 3, $8.90; No. 4, $10.45 per dozen.

Lower Prices Named on Unions

Winnipeg.

UNIONS.—Prices on Dart unions register a decline during the week of approximately 10 per cent. based on new prices received from the manufacturers. To-day's selling prices are as follows: ¼ inch, 27c; ⅜ inch, 36c; ½ inch, 45c; ¾ inch, 54c; 1 inch, 72c; 1¼ inch, $1.08; 1½ inch, $1.44; 2 inch, $1.80 each.

Sand Paper, Emery Cloth Move Down

Winnipeg.

SANDPAPER, EMERY CLOTH.—Based on new lists and discounts just received from manufacturers, new prices are now ruling on sand paper and emery cloth, which show a downward trend of from 5 to 10 per cent. below previous prices. To-day's selling prices are as follows:

Sand Paper	Star Quires	Star Reams	B & A Quires	B & A Reams
No. 00..	33	605	37	675
No. 0..	33	605	37	675
No. ½..	36	650	40	715
No. 1....	40	730	45	810
No. 1½..	45	825	52	945
No. 2..	52	930	60	1090
No. 2½..	58	1050	70	1250
No. 3..	66	1190	80	1430

Emery Cloth—No. 00, $2.00; No. 0, $2.00; No. ½, $2.10; No. 1, $2.20; No. 1½, $2.30; No. 2, $2.15; No. 2½, $2.65; No. 3, $2.85 per quire.

Whip Lashes Revised Upward

Winnipeg.

WHIP LASHES.—Prices on whip lashes show a revision during the week moving up from 72c to 80c per foot on Nos. 499, 503½ and 505, making the resale price on the above lines as follows: 3½ ft., $2.80; 4 ft., $3.20; 4½ ft., $3.60; 5 ft., $4.00; 5½ ft., $4.40; 6 ft., $4.80 dozen.

Lower Prices on Carpet Sweepers

Winnipeg.

CARPET SWEEPERS.—New prices just announced show a decline of approximately 5 per cent. in carpet sweepers and vacuum sweepers. The following are the new resale prices established by the manufacturers:

Carpet Sweepers—American Queen, $51.00 doz.; Champion, nick., $43.00; Champion, Jap., $37.00; Grand Rapids, nick., $48.00; Grand Rapids, Jap., $42.00; Grand, nick., $64.00; Grand, Jap., $58.00; Parlour Queen, $54.00; Princess, $49.00; Standard, nick., $45.00; Standard, Jap., $39.00; Universal, nick., $46.00; Universal, Jap., $40.00.

Vacuum Sweepers—Superba, $117.00 doz.; Grand Rapids, $101.00; Household, $91.00.

Chain Blocks Up 10 to 15%

Winnipeg.

CHAIN BLOCKS.—Based on new costs of shipments of Weston chain blocks just received from England further advances have been found imperative ranging from 10 to 15 per cent. over old figures. To-day's selling prices are as given below. Weston differential blocks with 40 ft .of chains: ½ ton, $24.00; 1 ton, $30.00; 1½ ton, $40.00; 2 tons, $48.00 each.

Velocipedes, Express Wagons Are Higher

Winnipeg.

VELOCIPEDES, EXPRESS WAGONS—New prices have just been issued on velocipedes and express wagons for the coming season and show an approximate advance of 5 per cent. over last year's prices. To-day's ruling markets as given on a few of the more familiar lines as follows:

Velocipedes No. 10, $3.50; No. 11, $3.85; No. 12, $4.40, No. 13, $5.20 each.

Velocipedes, Rubber Tired—No. 10R, $5.50; No. 11R, $6.00; No. 12R, $6.50; No. 13R, $7.15 each.

Express Wagons—No. 8, $18.25; No. 10, $22.50; No. 11, $27.75; No. 12, $33.00; No. 13, $36.40; No. 14, $40.00; No. 112, $37.20; No. 114, $43.80; No. 112R, $55.20; No. 114R, $75.00 per doz.

Linseed Oil Holds; Turpentine Down 5c

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices show no change over previous quotations which were $1.80 gallon on raw and $1.83 gallon on boiled. The demand is reported limited and stocks sufficient to meet demands.

Turpentine prices show a decline of 5c per gallon during the week, making to-day's quotations as follows: Barrels, $1.25 gal.; ½ barrels, $1.28 gal.; 5 gallon lots, $1.30 gal.; 1 gallon lots, $1.30 gal.; plus the usual extras for containers. The demand for turpentine is reported light.

Rope Goes to Higher Levels

Winnipeg.

ROPE.—An advance of 5c in manila rope has been recorded this week and a further general advance on all grades is slated to come, amounting to 2c per pound. The change in price made in pure manila, British manila, and African hemp this week reveals a base price on the various grades of 35c per pound; 33¼c per pound, and 33¼c per pound respectively. Sisal is still quoted at 26¼c base per pound. Indications are that a further advance of 2c per pound on all grades will become effective next week.

PITTSBURG MARKETS

PITTSBURGH, Pa., Feb. 13.—Buying of steel products has failed to maintain the pace of slight increases set in January, but has rather shown a disposition to taper off in the past week or ten days. The sum total of buying is, as a matter of fact, extremely small, representing possibly only one-fourth of the productive capacity. Production, of course, is much heavier than that in the aggregate, partly because all mills have a considerable volume of old orders to work on, and partly because in addition the United States Steel Corporation subsidiaries are making considerable material for stock.

Operating Rates

Independent steel mills are operating at various rates, generally between 40 and 60 per cent. capacity. The eastern mills seem to be operating, generally speaking, at lower rates than the Pittsburgh district and more westerly mills, the average of all the independents being about 50 per cent. The Steel Corporation subsidiaries as a whole are understood to be operating at an average of between 85 and 90 per cent. of capacity. Possibly their shipments on orders are somewhat heavier than are those of the independents, but the chief cause of the divergence is that the Steel Corporation subsidiaries are putting material into stock, while the independents do not appear to be doing this, at least to any extent.

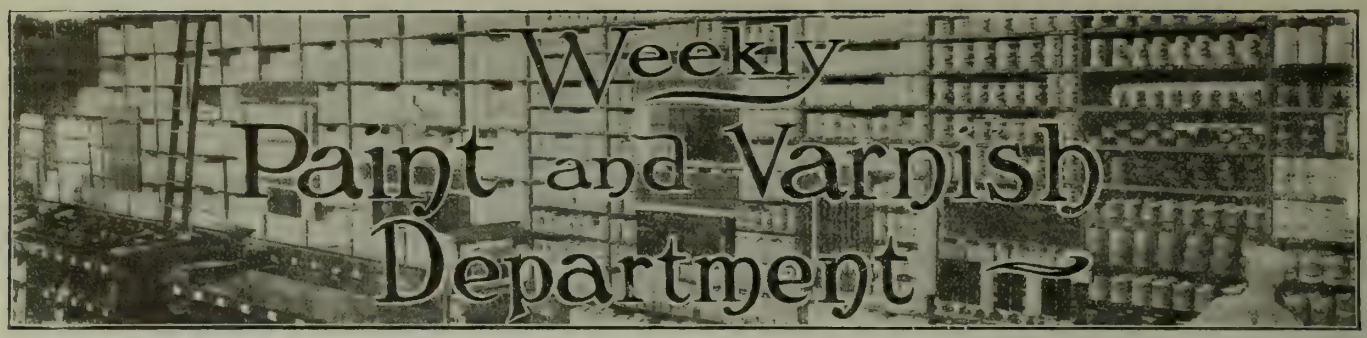
The Steel Corporation is stocking material for the purpose of keeping its working forces employed. There may be some loss in doing this, as costs of production may be lower when the stocked material is eventually shipped, and there is also the expense of extra handling, but one offset to this is that costs of production per ton is less when a mill runs full, or nearly full, than when it runs at 50 or 60 per cent. With its string of large and efficient warehouses established during the past few years, from Boston and New York through Pittsburgh to Chicago and New Orleans the Steel Corporation has good storage facilities. It is only in the case of wire products, tubular goods, sheets and tin plates that mills are customarily built with storage facilities of their own, and thus in the case of bars, shapes and plates the Steel Corporation can store to much better advantage than can the independents, though of course there is an expense attached.

Prospective Operations

As old orders are running out and new buying is not increasing, the mills face continually decreasing operating rates until a change for the better comes. Some improvement, of course, is to be expected by spring. Mills are looking to the farmers rather than to the building trades for an early increase in buying, farmers being normally large consumers of wire products and of sheets. There is a fair demand for steel from the agricultural implement makers, indicating that the implement interests expect good buying of their wares.

Building Activity

The first activity in new construction will doubtless be in the building trades, in erecting dwelling houses, which are ore or less scarce throughout the country. This may easily start much sooner than new construction along the line of large office buildings, hotels, bridges, factories, power stations, etc., and in that direction there is no sign whatever of any activity to come in the near future.



Everything is held back by high costs and by the indisposition of costs to come down at such a rate as would promise fair conditions in the near future. The situation is really an acute one. In the past few days representatives of sellers of building materials of various descriptions from all over the country have been in conference in Pittsburgh, their chief proposition being to consider whether it would be advisable to start, with funds contributed by all interested, a national campaign to encourage building, particularly of dwelling houses. This seemed to be a good idea, but the first thing that confronted the proposition was that men in the building trades in the Pittsburgh district, carpenters, bricklayers, plasterers, etc., have already formulated plans for demanding a 10 per cent. wage increase when the present agreement expires May 31. Most of them already are getting $8 a day or thereabouts. It was concluded that to start a publicity campaign for building at this time would simply encourage further increases in the cost of building, when it is unattractively high already, and there is now an effort on foot to secure the good offices of the Chamber of Commerce or some such authoritative representation, to take the matter up with the men and point out to them that the only way to make work is to reduce the cost so as to encourage those who have money to spend it.

Export Business

The United States Shipping Board has now reduced ocean freights to a parity with the reduced British rates, thus removing the great handicap under which steel makers of the United States had labored, when American rates were tens of dollars a ton above rates from British ports. Whether this equalization will result in much export business being booked by American mills ought to be developed within a couple of weeks. While the British mills had the start of the American mills, that is a small matter if the export trade is really to amount to anything, for the American industry is three times the size of the British and if there were enough export demand to make it an item for the American mills it would not set them back a great deal for the British mills first to fill up to a comfortable extent.

There is practically no demand for steel on the part of France, except that the American Sheet & Tin Plate Company has just booked an order from the French Government for about 25,000 tons of electrical sheets. While this is not a large order in point of tonnage it is a large quantity for the particular commodity involved, and the order means that the American Sheet & Tin Plate Company will be very busy in the departments involved to complete shipment in the time specified, 60 days. Demand for electrical sheets on the part of makers of electric machinery in the United States has been very slack the past two or three weeks, while just after the armistice was signed there was a very considerable demand. There has been very good buying of electrical sheets by makers of electrical equipment for automobiles, other lines being quiet. As electrical machinery is required when new projects are being undertaken, involving new construction of various classes, the outlook is not favorable. It is in new construction that the chief demand for steel normally comes.

Thus a scrutiny of the demand for steel products, in detail, indicates that the people have plenty of money to buy steel for ordinary everyday consumption and for luxuries, if automobiles are to be considered luxuries, but are unwilling to spend any money in investments. They regard costs as too high, and capital will lie idle or draw bond interest rates until the outlook changes. Meanwhile there can be no heavy demand for steel, commensurate with existing productive capacity. It cannot be said that high prices for steel products stand in the way. Steel prices will come down when steel producers see that it is worth while to reduce them. At present they get along better by maintaining them.

Paint Big Factor in Reconstruction

Every Community in Canada Has a Lot of Delayed Painting to Do, and This Year Offers Aggressive Dealers One of the Greatest Chances They Have Ever Had

JUST what day and date the word "reconstruction" came into being in the English language, I do not know.

"Every dog has its day." "Reconstruction" is having its day, and will have it for some time. As a word, it has been working overtime ever since men's attention has been turned to what would happen after the war.

Because it conveys the idea of a big and necessary movement that must surely follow the biggest mix-up in affairs the world has ever seen, does not necessarily mean that paint dealers will have no part in it.

Everyone can play a part in it if they will.

There will be reconstruction along big lines, and reconstruction along smaller lines wherever men have permitted war conditions to be an excuse for neglect in the up-keep of their property.

Shells and shrapnel have not disturbed the peace of your community. But because they were being shot off in Europe, property owners have made it an excuse to put off painting.

Has Left its Mark

The ravages of war have not alone scarred Europe. Practically every paint dealer knows that war has left its mark on Canadian property as well. Homes that were formerly well kept up and painted ever so often have become shabby through lack of paint. Protection and preservation have been neglected through the false notion that paint was not necessary. Scarcely a community but shows a more or less down at the heel condition. All because there was a war on!

True—lack of painters had contributed to this condition.

But it cannot go on very much longer. There will be an inevitable call for reconstruction methods to overcome what this neglect has brought about in your community.

Reconstruction will take place right at your very doors. Paint and varnish dealers can take a mighty big part in it this spring. What "preparedness" are you making to help the movement along in your locality?

Let us look over the situation.

A Great Opportunity

A lot of queer ideas of economy have been floating around in regard to paint at the expense of common sense. Four years of this sort of hoodwinking have unmistakably left their mark on the appearance of your streets and property. It is not necessary to take a megaphone to tell you about it, or a telescope to show it up. You face it every time you walk up the street. Likewise you face an opportunity for greater paint sales this spring.

I know this condition exists generally. You know better than I to what extent it exists in your locality. You know it cannot go on for ever. Some day a "buck-up" movement is going to start to improve this condition. If it is eventual, why not start it now with a good vigorous paint, advertising campaign? Draw your paint manufacturer into it with the co-operation he always stands ready to place at your disposal.

Now we quite expect that some one in the audience will rise to a point of order and plead:—"The people won't pay the present prices." Let us guillotine that bugaboo without ceremony before it hatches up any more trouble.

Dealers Surprised

The demand for paint last spring, in spite of high prices, was a surprise to paint manufacturers and retailers alike. With the help provided by returned soldiers, and those cast out of munition employment, it is confidently expected that this spring will see a bigger demand than ever. There will be more labor for its application.

Compare paint prices and their rise with the same movement in other lines. Paint has little more than doubled in price during the war. Lumber has more than doubled in price. It is expected that with present scarcity of labor, high wages, and the European demand for reconstruction, lumber will go still higher. In a comparative sense, paint is relatively lower than lumber, considered in connection with pre-war conditions. There is little or no excuse for paint neglect; rather there is a greater cause for painting and paint selling.

Of course, if a paint dealer is himself scared stark stiff over prices, it does not take very long for him to infect his trade in the same manner. It doesn't require a second look for trade to spot a long face and a pessimistic mind. Such an attitude has no place in reconstruction.

Aggressiveness Needed

Reconstruction needs men that whistle and put their shoulders to the wheel. It wants men that will go over the top with business aggressiveness. Hiding in a funk hole of pessimism will never reconstruct. Filling these holes up and forgetting them is the idea and the job.

The buying attitude of many paint dealers during the late fall and winter has shown little action towards preparedness for this reconstruction movement. Holding off for lower prices is good business sense if prices were likely to fall. As has been pointed out in this page before, there is little likelihood of any price alterations before next summer, and what next summer will bring about finds no present grounds for very sound prophecy.

Moore's
Paints
READY
MIXED
Moore's Paints represent true value in house colors.
It's a paint that works easily, spreads far, covers well and is lasting. It is an excellent wood preservative which leaves an excellent surface for repainting.
Altogether Moore's is a good satisfactory paint to use and just as satisfactory for the hardwareman to handle.
The profits are liberal and the satisfied customers mean a big turnover — an ideal combination.
It will pay you to get the agency for Moore's Paints.
WRITE TO-DAY
BENJAMIN MOORE & CO., Ltd.
WEST TORONTO -- ONTARIO

Present values look good to most paint manufacturers, and they are about as sensitive to price fluctuations as anyone interested in the trade.

Sufficient preparedness, with ample stocks, is then a feature of reconstruction that it will be well to turn over in your mind a time or two.

Want Better Homes

The insistent demand of wage earners for better housing facilities is another factor that should keep the paint dealers' ear close to the ground. In what form this demand will be met is hard to tell. One thing sure, it will mean more building and more paint used.

The man who has fought, the man who has been attracted to your town through munition work, and the man who is going to be busy making the things that the world's reconstruction needs, will need a roof over his head and his family; because there exists a temporary depression in certain industrial centres only means that matters are adjusting themselves to the reconstruction period. Supplying paint to those who become absorbed in this activity will become your part in reconstruction.

With the demand of European countries upon our agriculture resources to replace their depleted food stocks, it is not altogether unlikely that our farmers will be amongst our busiest reconstructors. They will have more help, more produce, if growing conditions are favorable; and more money.

Will Need Paint

Those among you who are dependent upon the farm trade probably know more about this feature than we do. You know how a farmer likes to clean his place up financially, pile up a roll in the bank, then retire and let his son or sons run the farm, and when he retires he is no piker in putting up a comfortable retiring place in town which will need paint.

And when Johnny on the farm gets things in his own hands, he is quite likely to set about ripping a few leantos down and putting up something that meets a more modern idea than the old man had.

Watch Johnny; he got a clean farm, a little money to start on and a good chance of a whole lot more coming in. A regular little old reconstructor. He'll need paint in his operations.

Now, these fellows on the farm are wide awake for ideas and progressiveness. and herein perhaps will rest a solution to the ancient notion of neglecting barns and stock buildings with paint.

Farmers Big Buyers

There are upwards of 711,000 farms in Canada, with approximately 689,000 that have never felt the stroke of a paint brush on the barns. Some chance for paint selling when you look at it bye and large. Let us suppose that these would take, on the average, 10 gallons of paint. In the aggregate it would amount to very nearly all the paint and varnish manufactured in or imported into Canada in any one year in normal times.

There would scarcely be a more important contribution to the cause of reconstruction than having all Canadian barns painted. It would conserve lumber; it would preserve the barns for greater use; it would add to the appearance and value of the farms.

And paint dealers could be a help in this effort by pushing the sale of barn paint. You have had to fight indifference, and oftentimes obstinacy in the older generation with regard to barn paint. Your hope rests with the younger generation coming in, and who are developing greater enterprise and aggressiveness in farm methods and upkeep.

Dealers Can Help

The country is now facing the problem of placing the returned soldier and the former munition worker back into normal production. The paint dealer can contribute his share in this direction by encouraging the use of more paint. Many of these men have formerly been painters. Called by duty to shoulder a rifle, or attracted by munition wages, they have depleted the ranks of the painting trade to a remarkable degree. There has been a very great dearth of painters all over the continent. The encouragement of more painting will provide work for these men, and bring them back to their former trade. And this is no small item in the work of reconstruction.

Weighing up both the financial and real obstacles to proclaiming the use of more paint against the many advantages that would result, the latter more than kicks the beam towards advancing the interests of reconstruction.

The war is over; the days of recruiting and drafting are over; but the day of the slacker is not. Reconstruction will need an army of earnest, progressive business men; like the armies in the field it will be filled with volunteers, keen in their duty to their trade and their nation in its reconstruction efforts. And there will be slackers who, because the Government, the gods or the fates have not softsoaped the skidways for them, will remain out. There will be a place in this army for the paint manufacturer and the paint retailer.

How about joining up, Brother Paint Man?

The Brush Department

Keep Your Brush Stock in Good Order and Let People See the Goods

Montreal Firm Turns Its Stock Five Times and Finds That Business is Steadily Increasing—Constant Displaying of Goods Has Helped Sales

THE Bernier Hardware Company, of St. Lawrence Boulevard, Montreal, has developed a nice business in brushes. This has been a gradual, but steady growth and as there is always a real chance to interest someone in the purchase of a brush, the plan of displaying them is followed constantly.

Use is frequently made of the small display windows located just beneath the main window. These are right back of the sidewalk. By keeping the glass clean and using electric lights here, special attention is drawn to the displays. As a general thing, the floor of the window is covered with enamels or paints of one or several varieties. These are conveniently arranged and made attractive. The bottom of the window is kept clean and fresh paper or other suitable covering material is constantly made use of.

Turns Stock Five Times

"We turn our brush stock about five times," said Mr. Bernier to HARDWARE AND METAL. "We have not used unusual methods, but aim to keep the brushes always before the buyer and in this way a nice business has been developed."

In order that depreciation of the brush stock may be kept down and reduced to the minimum, as many brushes as possible are kept in the original boxes. The cover is lifted off and turned under the box and then the drawers in which these are kept are tightly closed. This keeps dust out and the brushes are not exposed to light, which will fade the bristle or otherwise impair its appearance.

"We use tarred paper in the drawers," Mr. Bernier said. "This is effective in keeping the moths out in the warmer seasons, and has been very satisfactory."

Conservation of stock in the best possible manner and display, are two important elements that go hand in hand and cannot be dispensed with if maximum sales are to result.

Ready Sellers

BOECKH TRADE MARK EST'D 1856 TORONTO

You don't need to use salesmanship to sell your customers

BOECKH'S

Steel Grip - Rubber Set

BRUSHES

In the great majority of cases they will specify Boeckh's, and unless you can supply their demands the sale is lost.

Do your part. Display Boeckh's Brushes prominently in your store. Their known quality and our national advertising will do the rest.

The great point to remember with Boeckh's Brushes is — the bristles "can't come out."

Results to you—satisfied customers and bigger brush sales.

The Boeckh Company, Limited

Toronto, Ontario

Boiling Water Won't Hurt

UNIVERNISH

Varnish a table top with UNIVERNISH and then pour boiling water on it—it will remain uninjured. Pour ammonia on it—it will have no ill effect. Pour water on it and leave it over night—there will be no mark.

It's equally good for any purpose whether it be pianos or floors. It is put up in all sized cans from quarter pint up. Let us send you a counter display case of twelve quarter pints to retail at 25c each. It will sell quickly—give satisfaction and enable you to judge the possibilities of this line.

The Simple Matter of Arrangement May Make or Kill Sales

One Manufacturer Found That He Was Losing Sales Because Dealers Were Not Arranging Paint Cans Carefully—Fronts of Cans Were Hidden When Put on Shelves

DID it ever occur to you that you can co-operate with the paint manufacturer whose lines you handle and increase business for yourself and him by a careful arrangement of cans on your shelves? One manufacturer who took the trouble to investigate found that he was losing a lot of business and a lot of the results he should have obtained from the thousands of dollars he was spending in advertising because a great number of the dealers paid little or no attention to the manner in which the cans were placed on the shelves.

This manufacturer's products featured the name of the paint on one side of the can only. Here it was very prominently displayed and in all his advertising matter this was the side that was shown in the illustrations. A host of good points about —— paints were made in the advertisement and all who read it were likely to be convinced that ——'s were good paints.

Could not Find Them

An investigation of the paint department in many stores showed that thousands of the cans of paint were just piled up any way. The point that struck the manufacturer was that people coming into the store would see the cans of paint but that there was absolutely nothing to identify them with the advertising he was doing. People who had made a mental picture of the design contained in the illustration they saw in the ad. would never recognize in the goods on the shelves —— paints. The trouble was that about seventy-five per cent. of the cans had the backs turned to the public. In this case the back of the can was filled with other matter than the design that was featured on the front proclaiming to the public at large that the can contained —— paints. The manufacturer tried to get the paint dealers to so arrange the cans on their shelves that the brand name would be prominent. It proved rather a hard job. In a great many cases the paints were piled up by boys or clerks who took no particular interest in seeing that the brand name was placed so as to show.

Will Change The Label

So seriously was the manufacturer impressed with the business he believed he was losing in this way that he has worked out a label that will show the brand name no matter in what position the can is placed on the shelf.

"I want the people to see facing them on the shelves the same name they see on our advertising matter," he says. "They will be able to tell at a glance that the paint they are looking at is —— 's no matter in what position the can has been placed on the shelf. In the old labels our brand name was so placed that unless the front was placed so as to be directly facing you, you could not tell —— paints from other similar cans. We figured it out that our goods just had three chances to one of impressing their identity on prospective buyers. If the dealers would have gone to the trouble to see that all the labels were faced so that they could be read it would have been all right, but they did not do this and I am certain we lost a lot of sales and a lot of the results of our advertising."

A Valuable Point

There is a valuable point involved in this manufacturer's plan, not only for the paint dealer but for other manufacturers. It all comes back to the idea that if you let people know that you have the goods they will buy. If they read about —— paints and then when they go to the store see a lot of cans bearing no brand name and not looking a bit like the picture they have formed in their mind after reading the advertising matter about —— paints, a whole lot of them are going to forget to ask for the line of paints they had in mind.

American Dealers Go Back to the Old Plan

At a conference of American linseed crushers held at Chicago and attended by representatives of the leaders in this industry, it was decided to withdraw the new terms on linseed oil in carlots and substitute instead terms of 1 per cent. discount 10 days or net 30 days trade acceptance, which are practically the old terms.

On October 1, 1918, the linseed crushers advised their customers that effective November 1 the terms on linseed would be, sight draft attached for carloads, less than carlots 3 cents per gallon higher, less 1 cent per gallon if paid within 10 days, 30 days net trade acceptance.

These terms did not meet with the approval of the consumers and a meeting was held in New York which was attended by some thirty of the leading Eastern linseed users and the following resolutions of protest were adopted:

Whereas, The crushers of linseed oil have arbitrarily changed their terms without due consideration being given to the interests of their best customers, be it resolved that it is the sense of this meeting that a protest be entered against these new terms for the following reasons:

1. That it is absolutely impossible for consumers to take care of sight drafts against B/L without restricting credit in our industries.

2. As all successful merchandising is based on credit it is absolutely unjust to place a buyer on a cash basis.

3. That the terms published under date of October 15, 1918, shall not be adopted, and that the old terms of 30 days net or 1 per cent. cash 10 days shall remain in force.

Several of the Paint clubs also adopted similar resolutions which were concurred in by the National Convention in Boston in December.

It is understood that since the adoption of the new terms that very little car load business has been transacted and this feature may have had to do with the crushers' latest decision.

Mild Winter Boosts Paint Sales at Calgary

Calgary hardware firms report that paints have been selling well for interior work. While the unusually mild weather is partly responsible for this the hardware men say there is no doubt that many people are in the advance guard in getting their spring cleaning work well ahead.

"It is noticeable also," said a hardware man, "that we are selling more brushes, brooms, dust mops, kalsomine, and such like articles than we generally do at this season of the year."

In general Calgary firms report that business is good but the outlook for sales of builders' tools and hardware this season is a question to which some of the hardware men are giving much thought. It appears there is little demand at present for any quantity, and under present conditions, with the unsettled state of the labor market, and the fact that no one has any real information as to what program of work the Dominion and Provincial Governments are intending to carry out, the hardware men are buying carefully. They admit the situation depends to a certain extent on the crops, but a good deal also depends on the Government program.

CLEVELAND TRACTOR COMPANY TO LOCATE AT WINDSOR

Operations of the Cleveland Tractor Company's Canadian branch, which is to be located in Windsor, will be commenced immediately, according to Col. E. S. Wigle, one of the incorporators. A site has been secured on which a $200,000 plant is to be located.

Farm implements and accessories will also be made. Those incorporated under a charter recently issued are Col. E. S. Wigle, W. G. Bell, O. Stead, James Vincent O'Neil and W. S. Doty.

Too Late for Classification

HARDWARE SALESMAN—SIX YEARS' EXperience, open for position March 1st. Box 206, Hardware and Metal.

Varnish Buying

Even the occasional user has learned that quality and adaptability must be carefully considered when buying varnish, since it is an easy matter to ruin the appearance of a fine interior by using poor or inappropriate finishing materials.

When the dealer is consulted on such matters he can do his customers no better service than by suggesting or endorsing Berry Brothers' varnishes and paint specialties. They have a record of sixty-one years for complete efficiency for all finishing purposes.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, February 13.—Linseed oil is up in price 3c per gallon. This is the immediate result of a firmer flax seed market and the basis may continue somewhat steady although the outlook is harder to define than ever, few wishing to make even a guess. Turpentine has declined 5c a gallon, the tendencies, pointed out in HARDWARE AND METAL last week, having materialized. There has been freer delivery of this and stocks are in much better shape. Putty and white lead are steady, and sales, while not large, have been made more freely during the last few days. Larger selling will, it is felt, develop in the near future.

Three-Cent Advance In Linseed Oil

Montreal.

LINSEED OIL.—The firming of flax seed markets has been responsible this week for an advance in oil prices of 3c per gallon and the tendencies seem to be towards slightly higher figures. The price of seed advanced 8c, and while the usual difference in oil price based on this would be 4c, 3c has taken care of the increase. There is an improvement in business but this is not marked as yet.

LINSEED OIL

Raw, Imp. Gallon—			
1 to 4 bbls.	$1.41	$1.43	$1.48
5 to 9 bbls.	1.40	1.42	1.48
10 to 25 bbls.	1.39	1.41	1.48
Boiled, Imp. Gallon—			
1 to 4 bbls.	1.43½	1.44½	1.50½
5 to 9 bbls.	1.42½	1.43½	1.50½
10 to 25 bbls.	1.41½	1.42½	1.50½

Dollar Turpentine Means Drop of 5c

Montreal.

TURPENTINE.—As was pointed out in last week's issue of HARDWARE AND METAL, the market was afforded freer supplies with the probability of lower prices coming. This condition has materialized and $1 per gallon is now quoted in some quarters with the usual differential for five-gallon lots. The demand is seasonably satisfactory.

Turpentine—		Imp. gal.
1 to 4 barrels	$1 00	$1 05
Small lots	1 07	1 20

(Packages extra).

Better Putty Sale On Steady Basis

Montreal.

PUTTY.—There has been no change of price for putty but the movement is improved over that of last week. The basis is steady, for although linseed oil is down in price the cost of other materials has been holding firm.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Movement Steady White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The market is steady on this commodity and there is little new to report. Sorting business is the order of the day, but spring shipments ought soon to be moving. The basis for 5-ton lots per 100 pounds is $15.50; 1-ton lots $16, and smaller lots $16.35.

Mixed Paint Sales Rather Light

Montreal.

MIXED PAINT.—There is still a fairly quiet market condition, but some small orders drift in. General shipment of spring orders will soon begin. There is a steady and unchanged basis all around.

TORONTO

TORONTO, Feb. 13.—Higher and lower prices have been named on linseed oil this week and the basis for quoting is now about the same in all quarters. Turpentine has declined 5c per gallon and dealers report a much improved demand. A fair amount of business on mixed paints is coming to hand, and whereas the volume is not heavy the situation is considered satisfactory. Putty and glass are quiet but steady.

Linseed Oil Moves Up and Down

Toronto.

LINSEED OIL.—Prices are due for an advance in some quarters and they have actually declined in others, the basis expected to rule and that ruling being on a par. The seed market shows an advance for the week, the last couple of days remaining almost stationary. What the future holds is a little hard to say. There has been a slight easing away in oil cake and this may mean a steadier basis on oil. There is some inquiry for export on the oil cake, and if this develops into actual business the position of oil will be improved. Quotations to-day, though made as low as $1.44 per gallon for raw, were expected to change Friday, and the new basis is that appearing below. Some factors are lower than last week.

Linseed Oil—	Raw	Imp. gal.
1 to 2 barrels, gal.	....	$1 50
3 to 5 barrels, gal.	....	1 49
10 bbls. and over	....	1 47
	Boiled	Imp. gal.
1 to 2 barrels, gal.	$1 52½	$1 53
3 to 5 barrels, gal.	1 51½	1 52
10 barrels and over	1 49½	1 50

Turpentine Declines; Activity Noted

Toronto.

TURPENTINE.—Lower prices are again in evidence this week, declines ranging from 2c to 5c per gallon. The market in the South is holding without change and seems to have settled into a steady channel. The decline locally is really an effort to get down to rock bottom in line with prices at producing centres and encourage buying. Some factors report a distinct improvement in the amount of turpentine actually moving, while inquiries for prices are coming along much more plentifully. That these may develop into orders seems quite likely. Range of prices this week are:

Turpentine—	Per	Imp. Gal.
1 barrel (barrel included)	$1 05	$1 08
2 to 4 barrels (barrels included)	1 04	1 07
5 gallon lots	1 15	1 18

Mixed Paints Moving Out

Toronto.

MIXED PAINTS.—Orders are coming to hand quite plentifully, though not in large volume, and the manufacturers are now getting spring shipments away to their customers. The outlook is considered good, but a hand-to-mouth buying policy is the attitude the retailers are taking in placing for supplies. This will probably mean more orders and more handling, but everyone seems satisfied that final results as regards volume will be excellent.

White Lead in Oil Remains the Same

Toronto.

WHITE LEAD IN OIL.—There have been no new developments this week of a particularly interesting nature. There is better inquiry and a little better feel-

THE POWERFUL MAGNET

That Draws good trade to the B.H. store

Two elements have contributed to the phenomenal growth of B-H Paint sales.

1. **Widespread sincere advertising.**
2. **A product of Sterling Quality.**

Either of these elements is of great value in moving stock from your shelves, but the close combination of the two forces gives you a real asset in building your business.

B-H Paint

because of its exceptional high quality, makes satisfied customers—and they are the greatest force a business man can have.

Our advertising and sales plans for 1919 have been completed. They are greater than ever before. We are giving our agents more sales helps and closer co-operation to make this the biggest year in our history.

Let us tell you of these plans. Write us.

ing, and that a fair amount of activity may be looked for soon is considered probable. Quotations are ruling at unchanged levels, the prices to the trade on pure white lead in oil being $16.30 per 100 pounds in ton lots, and $16.65 per 100 pounds in less than ton lots. The various brands are shown in current market quotations.

Putty Steady; Glass Unchanged

Toronto.

PUTTY, GLASS.—Putty remains at unchanged figures this week, and whereas some business is being done this is limited to small lots. Prices ruling today are shown below. Window glass shows no new features, orders coming in slowly—a seasonable condition—and prices showing no change from figures and discounts appearing in current market quotations.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

ALL ABOARD FOR THE BIG CONVENTION

Continued from page 38

member or realize this. A meeting such as that to be held in Hamilton will impress upon a dealer as nothing else can the importance of the business in which he is engaged. It will bring him into touch with the manufacturers, and when he hears men who have all the latest first hand information discussing the conditions, market and otherwise, that are likely to prevail for some months ahead, he realizes the value of the convention.

An Important Centre

Many of Canada's most important industries, especially those in which hardware men are interested, are located in Hamilton. For this reason, and also because it is a central point easily reached from any part of Ontario, it was chosen as the convention centre. Another factor that was also given consideration was the splendid accommodation available. Hamilton includes among its many other large factories, wire fence makers agricultural implement works, washing machine and clothes wringer manufacturers, wire goods makers, hardware manufacturers, firms making silver plated ware, blast furnace and steel manufacturers, plow works, and other plants containing much of direct interest to hardware men. Visits will be made to many of these plants and the visitors will see the various processes of manufacture.

Hospitable Hosts

Those who attended the convention last year know how cordially they were received in Hamilton and the measure of hospitality that was extended. This year the Hamilton hardware men and manufacturers have promised the same generous treatment. They say they are only too glad to welcome the hardware dealers of Ontario and have them meet there. Besides the Hamilton manufacturers there will be in attendance representatives from many of the largest firms of Canada and the United States. The convention presents an opportunity for meeting these men and learning from them information that hardware men can get in no other way. The information they will give will be of the greatest value, not only from an instructive standpoint, but from a financial viewpoint as well. For instance, the discussion of market conditions and what is likely to happen in any branch of the trade in the coming months, what conditions are likely to obtain regarding prices, shipments, etc., is obviously of real and immediate value to any hardware dealer in shaping his business policy. Such information is important at any time, but in a period like the present, when business is facing a period such as it has never had to face before, it is particularly important.

Excellent Arrangements

Excellent arrangements have been made for the convention and with a full attendance of hardware men from all over the province, the gathering of 1919 will be the greatest in the history of the association.

OIL TRADE WITH CHINA IS GROWING RAPIDLY

Within two decades China has developed a trade in vegetable oils that now nets 30,000,000 taels (about $300,000) a year. The United States takes 75 per cent. of China's total annual export of wood oil, amounting to 30,000 tons. Following are its uses in China:

As a paint oil for outside purposes, the cruder oil, applied to native boats, paints, varnishes and preserves in one operation; with certain Chinese mineral substances added, it is a waterproofing varnish for silks, etc.; as an adulterant in lacquer varnish; as an illuminant; mixed with lime and bamboo shavings, for calking native boats, Chinese ink made from the soot of wood oil, a dressing for leather and a varnish for furniture.

In America it is chiefly used for the manufacture of varnish, since it possesses the advantage of drying quickly and of making high-class varnish with cheap gums.

HOW CUSTOMERS ARE LOST

There was a noise on the front verandah, the door opened, a parcel dropped on the floor, the door slammed again and the boy was off to the wagon, but not before the lady of the house got to the door and reminded the boy that there was a side entrance to the house where groceries should be delivered, and that she did not want her clean front porch messed up with his dirty boots, but the only answer she got was an impudent grin.

Immediately this indignant customer called up the store to complain. The phone was answered by the head clerk, who explained that the boss was out, but he would tell him of the occurrence and see that it did not happen again.

But it did happen again, the very next day. This time she did not call up the store, but the next day another delivery boy from another store brought the groceries, but he went to the back door as he was instructed to do by the proprietor of the store.

You may think this customer was a little hasty, and perhaps a little fussy, but this is an important matter with busy housekeepers, and they judge the store by its service, and the delivering of the goods is just as important as the buying and selling.

Look into your delivery system. Does your driver go to the back door? Is he courteous with customers?

And your clerks who would some day be merchants, do you pay strict attention to complaints of customers, and try to remedy the faults or do you just forget about them, as was most likely done in this case and a customer lost?

Remember advertising, prompt and careful deliveries will not get you far if you don't back it up, and this much abused word "service" doesn't mean anything in your store.

TRADE INQUIRIES

228. **Aluminum ware.**—A commission firm in Barbados would like to represent a Canadian firm manufacturing aluminum and enamelled ware.

231. An engineering agent with English training and long experience in South Africa is prepared to take up Canadian agencies in machinery or specialties.

232. **Iron and steel.**—A South African agent with good South African experience is prepared to take up the representation of Canadian firms in iron and steel and their manufactures.

234. **Specialty agencies.**—An old-established agency firm calling on the jewelry trade is prepared to take up any special line which can be sold to jewelers. Full particulars, such as catalogues, price lists, and when possible, samples, are requested with first correspondence.

235. **Mining supplies.**—A Johannesburg firm making a specialty of supply to the mines, is prepared to take up the representation of any supply except machinery. Carbide, chemicals, shovels, hammers, pickaxes, belting and such lines are of special interest.

236. **Household supplies.**—A Johannesburg firm, specializing in household supplies, ask for catalogues, price lists, and other details from Canadian manufacturers of pianos, organs, tables, chairs, furniture, packed k.d.s., enamelware, sewing machines, castors, lock and other lines.

237. **Lawn mowers.**—A Johannesburg firm ask for catalogues and price list of Canadian-made lawn mowers.

238. **Agencies.**—A South African commission agent, well established with branch offices in several centres of South Africa, is prepared to take up Canadian agencies in special lines, such as tools, all kinds, ploughs, hardware, all kinds, tables, chairs, furniture, k.d.s., and paint and varnish.

239. **Catalogues and price lists.**—A firm of wholesale jobbers ask for Canadian catalogues and prices lists on all lines suitable for the general wholesale dealer.

A Continuous Drive

A steady, irresistible drive has carried the Martin-Senour Company into the very forefront in the Canadian Paint and Varnish field.

This drive has established the thousands of Martin-Senour Dealer-Agents in a position where they are enabled to procure and control the larger share of the paint and varnish trade of their districts.

The successful methods pursued in this drive will be continued by even more aggressive means.

"Quality the best" has always been the Martin-Senour Watchword.

Every product carrying our label absolutely guaranteed to best serve the purpose for which it is made.

Advertising and sales help the strongest we can plan and carry into effect.

The whole-hearted effort of an experienced personnel in Administrative, Manufacturing, and Sales Departments, devoting their entire energies to serving well our customers.

A combination of Quality and Service which establishes beyond all doubt that MARTIN-SENOUR Paints and Varnishes are the easiest and most profitable to sell.

Let us present for your consideration our exclusive Agency Plan.

A Postal request does not obligate you to buy. It merely indicates your willingness to be shown.

RAMSAY'S

Tremendous Lesson in Paint

The German fleet was really unseaworthy because of the lack of Paint.

Is this not a lesson that every paint dealer can convey to his customers—what a valuable asset RAMSAY'S PAINT is?

Tell your customers that RAMSAY'S PAINTS and VARNISHES answer this lesson — they have the PROTECTIVE PROPERTIES for the HOME, BARN and OUTBUILDINGS wherever used.

A Few of Our Big Sellers

Next Spring will be a paint Spring.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

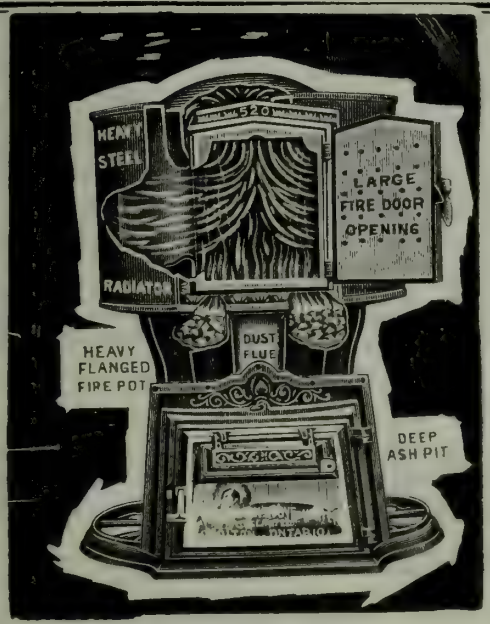
Lowe Brothers Paints

Are You Willing to Place Your Reputation Behind the Paint You Sell?

Your reputation is your greatest asset. It is the foundation of your business—the guarantee of its present and future prosperity. Why take chances with it by handling a line of paints you cannot sincerely recommend?



Line up behind the best paint. It will pay you. It will help the sale of the other goods you carry. It will mean for you new customers—repeat orders—good will.

People want quality and the worth of the money they spend—and they are going to the store that will give it to them.

Write us for information. Ask about the great advertising campaign we are organizing among your customers for the sale of paint this spring.

LOWE BROTHERS, LIMITED, TORONTO

DAYTON BOSTON NEW YORK CHICAGO KANSAS CITY MINNEAPOLIS ATLANTA

New Idea Warm Air Furnace

MORE HEATING SURFACE on every NEW IDEA FURNACE than any other furnace. Ash pit large and roomy, less chance of ashes banking up and burning out grates.

FIRE POT one piece, with deep flanges adding one-third more heating surface. Very heavy. Guaranteed for FIVE YEARS.

RADIATOR large, giving more surface than found in other furnaces.

NEW IDEA DUPLEX GRATES (Patented) take care of any size clinker from either Hard or Soft Coal. They operate so easy a child can operate them. They work so well that there are never any ashes worth sifting, saving the dirtiest work necessary in attending old-style furnaces.

New Idea Furnace made in seven sizes. And every one Guaranteed.

Get the NEW IDEA FURNACE AGENCY for 1919 and see your furnace business grow. They sell themselves and others. Write now for Agency.

Smooth as Silk

Hard as Stone

Silkstone Flat Wall Colors

This is a seasonable time of the year for pushing sales on interior paints.

Silkstone Flat Wall Colours are meeting with an ever-increasing demand on account of the immediate and universal satisfaction they give. The colours present a soft, pleasing finish, can be washed with soap and water, a distinct advantage over Kalsomine. You can make many additional sales by recommending *Silkstone*. It's superior and more sanitary then wall paper. A guarantee of satisfaction with every can.

Stephens' Special Wall Size

Here is the sizing to sell when the best of results are desired, stops suction with one coat, can be used under any material and on all kinds of plaster walls, patent wall boards, etc. The most economical and satisfying sizing to use as a priming coat for *Silkstone Flat Wall Colours*. A profitable line for every dealer.

The service we render and the quality of our products are big aids to the development of the hardware dealer selling Stephens' Paints.

Write for our agency proposition.

It is Cheaper to Prevent Trouble than to Cure it

The BOYCE MOTOMETER installed on a car insures safety in operation. No driver, not even an expert, can absolutely guess at motor temperatures. And a Boyce Motometer installed on a car absolutely demonstrates this fact the first day it is installed.

It immediately detects motor troubles, such as overheated engines, lack of oil, radiator leaks, any defects in the circulating systems, improper carburetor adjustment, and like troubles, and gives warning in ample time to avoid serious injury, with its consequent expensive repairs.

WHEN THERE IS TROUBLE THE MOTOMETER SAYS—STOP!

Send for descriptive booklet, "What Every Car Owner Should Know," and complete information.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

It's Music to their Ears!

THE "Song of the Sale" bursts forth early and often from the P&L dealer's cash register, because his store is identified with that 24 carat, quick-sale line — "61" Floor Varnish in Colors!

It's music to the ears of the dealer because it means a quick turnover! It's music to the ears of the customer because he knows he is getting one hundred cents worth of durable, satisfaction-giving varnish for every dollar he invests.

"61" in Colors is the same reliable "61" Floor Varnish that has made good with P&L dealers and consumers for 30 years. It is backed up with a nation-wide advertising campaign to increase its already far-reaching popularity.

Let this advertising boost your store and link it up with that 70-year-old P&L reputation for quality varnishes. Write today for full particulars of Introductory Assortment.

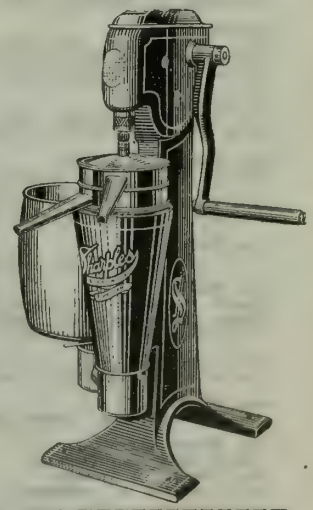
Around and Around and Around!



No human hand can keep up a fixed normal speed.

If every owner of a fixed feed separator—especially those who think they are skimming clean—could see a chart of the great variation in speed during one week's separation, they would be amazed. The chart would show that practically all the time the separator was being turned below speed and wasting butterfat. Actual tests prove that 95% of all separators are turned below speed most of the time, and all separators are turned below speed some of the time. No matter how careful you are, it is humanly impossible to turn at a fixed speed, day in and day out. Speedometers, bells and other contraptions only show how wasteful fixed feed separators are.

SHARPLES SUCTION-FEED CREAM SEPARATOR

SKIMS CLEAN AT ANY SPEED.

Every progressive dealer will be interested in the above reproduction of a Sharples advertisement to dairymen and farmers. It points the way to greater sales; it proves the weakness of the fixed feed separator; it shows why the thrifty farmer is eager to know about the Sharples. Take advantage of it thru a Sharples Dealer Contract. There's a big idea behind a Sharples contract. Find out about it. Write nearest office.

THE SHARPLES SEPARATOR CO., Toronto, Ont. Regina, Sask.

Sharples Milker—the ONLY milker with a squeeze.

THE HOT-FLO ELECTRICAL FAUCET

Now Ready For You

Instantly heats water electrically. Turn of the faucet controls both water and electric current.

This will be welcome news for the many users and dealers who have been trying to secure this remarkable device during the past year.

The war caused unexpected difficulties in quantity production, but they have been overcome and the result is a faucet, in unlimited numbers, that has a greater capacity and is more durable than the original model.

The New Hot-Flo Sells for $12

Send check for one and try it yourself. It will please you as it does every one who has seen it.

Before

After

"BEFORE"—To the stove dealer, this reproduction illustrates a familiar sight—the old stove that you allowed your customer a few dollars for in the deal for a new one.

Now, the question arises in your mind, "Shall I dump it in the junk heap, or put it in shape to sell again at an attractive profit?"

You have the extra fittings to put the inside in good order, and we have the equipment and expert workmen to put all nickel trimmings in the same condition as when new, and at a small cost.

What are the net results?

1. You are in a position to allow your new stove customer more money for his old stove—he is thoroughly satisfied.

2. When you and us convert this old stove into practically a new one, as shown above as "AFTER," you will have a "most as good as new" stove to sell to a customer at a medium price—he will be absolutely satisfied.

3. Now you have made two sales instead of one—have two satisfied customers instead of one—have made two profits instead of one, and you are satisfied.

4. Now, remove all the nickeled trimmings from the old stoves you have on hand, wrap in old newspapers and pack securely in a box and send them along to us—we will make them look like new at a trifling cost, and we will be satisfied.

5. Up to now everybody is satisfied, and you can feel that you have conserved instead of wasted.

We have been rendering this service for years and have scores of satisfied customers.
We have recently doubled our capacity and can give you quick delivery.
On receipt of your shipment of fittings we will quote prices for your approval.

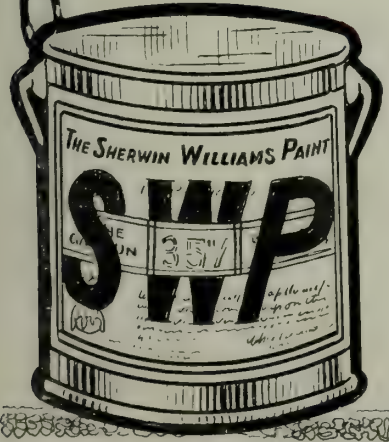
Don't Let The Mail-Order Houses Win Out

You are right on the ground—with direct, personal, conversational privileges. Also, your customers are your friends and your neighbours.

If the Mail Order Houses take your business from you—or any part of it—who's to blame?

If you have the goods—in good range—and display them properly—and treat your customers right—they will never go to Mail Order Houses, or to any other stores.

Sit right down, now—and have a good look at the situation.



Have you the goods? In Paints and Varnishes—do you keep a full line of

Sherwin-Williams Products

—an ample line of S-W Paints, Varnishes, Stains, Flat-Tone, Insecticides, etc. If you do, you get the benefit of the people's preference, and the benefit of our nation-wide advertising.

Stock up well and display the goods properly. It is easily done.

Make out an order to-day---and don't let the Mail-Order House get ahead of you.

A Right Quality Product for Every Purpose

Do You Believe In Signs?

If Not There Is One That Will Convert You

Is a Sign of Quality; A Mark of Merit; A Symbol of Satisfaction

It is the sign of modern methods, improved machinery, progressive ideas, 57 years of experience and growth and the desire to make brushes better than they have ever been made before.

It is the sign of a wonderful factory, with more than 125,000 square feet of floor space, lighted with over 21,000 lights of glass, thirty separate departments, free shower baths for the workers, safety first conditions and hundreds of employees.

It is a sign found on brushes that look better, feel better, wear better, sell better and are better than any other brushes made.

It is a sign that was "born and brought up in Canada."

It is the sign used on a brush that you can boil, bake, stew, soak in paint remover, drown in hot glue, scald in boiling tar or freeze in ice and that is absolutely guaranteed forever to hold the bristles securely in the ferrule.

It is the sign used to designate

"BETTER BRUSHES"

DOMINION
Rubber System
Belting Service is Dominion Wide

No matter what your business or where it is located, there is within telephone distance of your plant, a branch of the Dominion Rubber System and a belting expert.

These technical experts are not merely salesmen, *they know belting* and its requirements thoroughly and their services are at your command, without charge, whether you are a customer or not.

Put your problems up to the Dominion Rubber System experts—*place your belting equipment in their care—they will shoulder the responsibility* for giving efficient service in all your belting, no matter what it is used for.

They are able to "speed up" your production—reduce your manufacturing or belting costs or eliminate unnecessary delays and "shut-downs."

The Dominion Rubber System is not only the largest but the oldest organization of its kind in Canada and has specialized in belting for more than fifty years—its entire facilities and Dominion Wide Service are at your command.

If you are in trouble or in doubt about a belt, 'phone, wire or write our nearest branch and *let us prove that our Belting Service means more than just selling belts.*

If any advertisement interests you, tear it out now and place with letters to be answered.

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

Canada's National Hardware Weekly

will appear on

March 22

The advertisements in HARDWARE AND METAL'S Annual Spring Number are salesmen who are right on the job when Canadian hardware merchants are placing the biggest orders of the year.

Hardware buyers in Canada hang up their copy of HARDWARE AND METAL'S Spring Number, close beside their desk. A cord is inserted in the upper left-hand corner for this purpose.

Impress buyers with the importance of your firm and the quality of your goods! Make the impression strong and lasting by using big space in the biggest and best annual issue of any Canadian trade paper.

There is scarcely a hardware store of importance in any part of Canada where you will not find HARDWARE AND METAL.

Do Your Bit!

BUY W-S S WAR-SAVINGS STAMPS

DO not think patriotic work is a thing of the past. The great need to-day is to repatriate the returned soldier, and to promote Prosperity so as to solve the problem of the War Burden.

The Dominion of Canada requires your help.

You can be a vital factor in the Government's plan to sell War-Savings Stamps by getting your customers to buy Thrift Stamps.

If they buy the Thrift Stamps from you, they will soon be War-Savers, helping themselves and the country in the great work of Reconstruction.

Put up your Thrift signs, get your stock of stamps, and push the sale among your customers.

Every Bank and Money-Order Post Office carries Thrift Stamps.

SELL THRIFT STAMPS

PEDLAR'S PERFECT METAL CEILINGS AND WALLS

Renovation Days Are Here!

The advent of spring brings up the question of renovation. Everywhere people's thoughts begin to dwell on improvements.

As a wide-awake merchant, keen upon taking advantages of seasonable opportunities you can readily see the advantage that you derive from suggesting Pedlar's Metal Ceilings and Walls for **the home, the store, the church, the lodgeroom, school, public hall,** etc.

Many hardware men profit by suggesting metal for interiors of all kinds of buildings which they hear are to be renovated. There's a hint here for you. And with the unrivalled Pedlar range of choice patterns you can land a big share of the business.

The
Financial Post
THIS WEEK

ON "OTTAWA'S DUTY TO BUSINESS"

"Let us emphasize the situation. Industry and business are in a good, sound position so far as the present is concerned. It is the future which causes apprehension. We believe that labor and price problems can be solved if other factors for uncertainty are removed and public opinion remains reasonably rational. But capital looks to the Government for some reasonable assurance of fair treatment and until that assurance is given there will be a tendency to mark time. While capital marks time there will not be any industrial progress or general development, because any such expansion requires money. The investor cannot expect to devote his funds to any enterprise which does not give reasonable guarantee as to security and a fair income."

ON THE TARIFF PROBLEMS

"We cannot but conclude that the farmers' great grievance is not the tariff but the combination of financiers and manufacturers; all through the speeches and all through the conversations, that thought continually cropped out. They frankly admitted that a tariff was necessary as a means of raising revenue, and that it might be necessary for the upbuilding of industries based upon Canada's natural resources, but if the tariff was to be used to enable a few groups of manufacturers to extort high prices, then they were prepared to smash the whole tariff.

"This antagonism is not confined to the farmers alone; it is the opinion of the country generally. And the public are not holding the Government blameless. Cabinet Ministers have winked at or frankly supported these supposedly powerful combinations."

Besides the important articles from which the above quotations are made, THE POST this week deals with the following amongst

Becoming a Bigger Man

WHAT is the difference between some men you know and others known to you? Why are some men earning $3,000 a year and some $30,000? You can't put it down to heredity or better early opportunities, or even better education. What, then, is the explanation of the stagnation of some men and the elevation and progress of others?

We are reminded of a story. A railroad man, born in Canada, was revisiting his home town on the St. Lawrence River. He wandered up to a group of old-timers who sat in the sun basking in blissful idleness. "Charlie," said one of the old men, "they tell me you are getting $20,000 a year," "Something like that," said Charlie. "Well, all I've got to say, Charlie, is that you're not worth it."

A salary of $20,000 a year to these do-nothing men was incredible. Not one of the group had ever made as much as $2,000 a year, and each man in the company felt that he was a mighty good man.

Charlie had left the old home town when he was a lad. He had got into the mill of bigger things. He developed to be a good man, a better man, the best man for certain work. His specialized education, joined to his own energy and labor sent him up, up, up. To put it in another way: Charlie had always more to sell, and the world wanted his merchandise—brain, skill and ability. Having more to sell all the time, he got more pay all the time.

Charlie could have stayed in the old home town; could have stagnated like others; could have been content with common wages. In short, Charlie could have stayed with the common crowd at the foot of the ladder. But Charlie improved himself and pushed himself, and this type of man the Goddess of Fortune likes to take by the hand and lead onward and upward. Almost any man can climb higher if he really wants to try. None but himself will hold him back. As a matter of fact, the world applauds and helps those who try to climb the ladder that reaches towards the stars.

The bank manager in an obscure branch in a village can get out of that bank surely and swiftly, if he makes it clear to his superiors that he is ready for larger service and a larger sphere. The humble retailer can burst the walls of his small store, just as Timothy Eaton did, if he gets the right idea and follows it. It is not a matter of brain or education so much as of purpose joined to energy and labor. The salesman or manager or bookkeeper or secretary can lift himself to a higher plane of service and rewards if he prepares himself diligently for larger work and pay. The small manufacturer, the company director, the broker—all can become enlarged in the nature of their enterprise and in the amount of their income—by resolutely setting themselves about the task of growing to be bigger-minded men.

Specialized information is the great idea. This is what the world pays handsomely for. And to acquire specialized information is really a simple matter, calling for the purposeful and faithful use of time. This chiefly.

One does not have to stop his ordinary work, or go to a university, or to any school. One can acquire the specialized information in the margin of time which is his own—in the after-hours of business. Which means: If a man will read the right kind of books or publications, and make himself a serious student at home, in his hours—the evening hours or the early morning hours—he can climb to heights of position and pay that will dazzle the inert comrades of his youth or day's work.

IF business—BUSINESS—is your chosen field of work, we counsel you to read each week THE FINANCIAL POST. It will stimulate you mentally. It will challenge you to further studious effort. It will give you glimpses into the world of endeavor occupied by the captains of industry and finance. With the guidance of the POST, and with its wealth of specialized information, you, a purposeful man, aiming to go higher in life and pay, will find yourself becoming enlarged in knowledge and ambition, and will be acquiring the bases and facts of knowledge which become the rungs of the ladder you climb by.

It is the first step which costs. But this cost is trivial—a single dollar. We offer you the POST for four months for a dollar. Surely it is worth a dollar to discover how right we are in our argument. If you have the will to go higher in position and pay, sign the coupon below.

THE MACLEAN PUBLISHING COMPANY, LIMITED,
.—143-153 University Avenue, Toronto.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

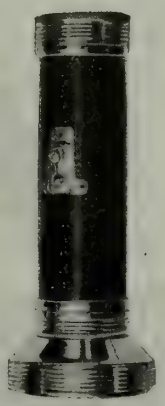
TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.



In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

Kwiklites

MEHASCO

ANOTHER MEHASCO MESSAGE 25

Here is another well-advertised line, Metal Kwiklites. They are the latest and highest type of Flashlights, and made from the very best of materials. The cases are strong, drawn from solid sheet brass. They are non-short-circuiting; the battery will not run down by being left on metal objects. The Reflectors are scientifically designed and show up well on the darkest night, or in fog or smoke. They are also beautiful in appearance, and are of standard sizes, and their batteries are interchangeable with all other well-known makes. We feature strongly the Miners' regular two-cell and the three-cell, as well as the vest pocket. We also carry a stock of battries and bulbs. If interested we will be pleased to hear from you.

The One Best Seller

Anyone can see at a glance that the curved lance is a big feature. With it you get the nozzle under the leaves without wrenching your back all day. That point alone sells the

O-K-Spra

Its obvious advantages save you a lot of selling talk.

The efficiency non-clog nozzle has a thimble shape strainer that keeps going longer than that of any other sprayer—another big selling point.

These features make the O.K.-Spra doubly useful for all kinds of spraying.

Won't it pay you to lay in a good stock of O.K.-Spras — the easy sellers. Write us for information.

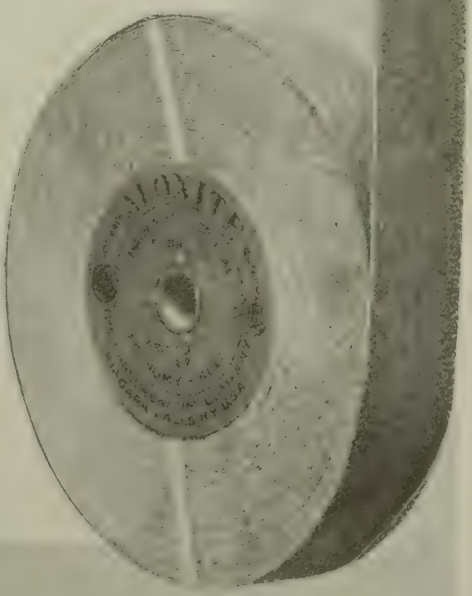
Aloxite Cloth in Economy Rolls Will Help You to Develop More Business

THE men who use Aloxite Cloth in the garages, general machine and repair shops and in the factories need tools, Carborundum sharpening stones, wheels and supplies.

When you introduce Aloxite Cloth in Economy Rolls you will have made friends. You will have opened the way for more business.



Aloxite Cloth in Economy Rolls

Saves time—saves cloth. The user just snips off a piece in the desired length and width. He doesn't waste time and spoil good cloth tearing a strip from a sheet.

Aloxite Cloth does the work of the old-time emery cloth. It cuts cleaner and faster—gives a finish in less time. It is flexible and is uniformly coated with accurately graded Aloxite grains. And there are a hundred and one uses for it.

Study these talking points—they will help you make sales

Aloxite Cloth in economy rolls is just one of the many Carborundum products that keep the cash registers busy.

The Carborundum Company
Niagara Falls, N. Y.

180 pages, bound in red Atholeather cover with gold title. Good paper. Size 1½ in. x 7 in.

Just Show Him This Book

When You Show Him Starrett Tools

A BOOK of exceptional value to the practical machinist. Sequel to the well-known "Starrett Book For Machinists' Apprentices" now in its 4th edition. It contains technical data, tables relating to machine speeds, power transmission, drilling, turning and milling, materials, etc.

Edited by men prominent in the machinery field—men who know exactly what the practical machinist needs.

Sell your customers this book—retail price 50 cents. It will help sell them more of the high-quality Starrett Tools. If you haven't stocked, write us immediately, Department MA.

HAMILTON

It Pays to Display O-Cedar

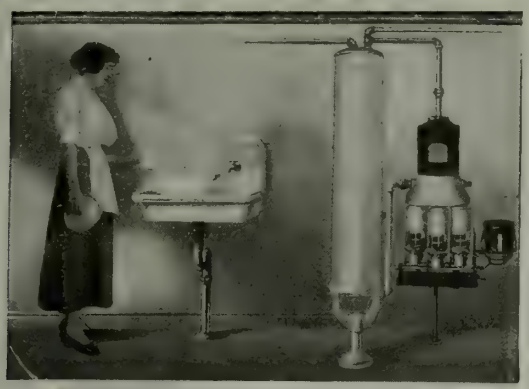
This O-Cedar Display Stand will help you to give O-Cedar its merited prominence on your counter. Free with an order for $27 (net) worth of O-Cedar Products.

This attractive sign for window or counter comes to you complete with cord and lamp, ready to be attached to any electric light socket. Free with an order for $40 worth of O-Cedar Products.

THE other day, a merchant told us he would like to display O-Cedar Products, but he had not room enough. After talking the matter over, however, he came to the conclusion that he couldn't afford *not* to show O-Cedar in one of the most conspicuous parts of his store.

He had forgotten to take into consideration the fact that O-Cedar Products are among his most quickly-moving specialties. Some of the lines he had been featuring most prominently would only sell to an ordinary family about once every ten years. O-Cedar Polish, on the other hand, from six to twelve times a year for the ordinary household.

When you consider the good percentage of profit that you make on each sale of O-Cedar, and multiply that by the number of sales per year to each customer, can you think of any article which better deserves the most expensive display space in your store than O-Cedar Polish, and O-Cedar Polish Mop.



If you, too, have overlooked O-Cedar Products in the arrangement of your store and window display, consider the claims of O-Cedar from the standpoint of possible profits, and you will be sure to look up the conspicuous part for showing this money-making line.

Before this day's work is over, will you instruct your clerks to give O-Cedar "preferred position" in your store.

Order from your jobber.

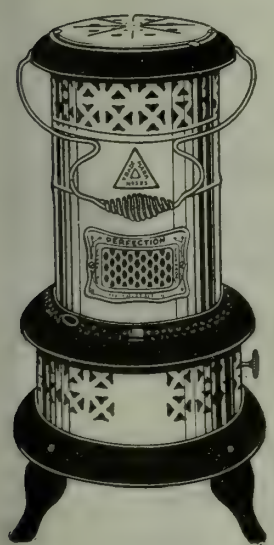
THE NEW PERFECTION KEROSENE WATER HEATER is solving the hot water problem for many a rural home.

The "New Perfection" Cook Stoves and Heaters

ALL YEAR 'ROUND SELLERS IN RURAL CANADA — STOCK THEM THIS SPRING

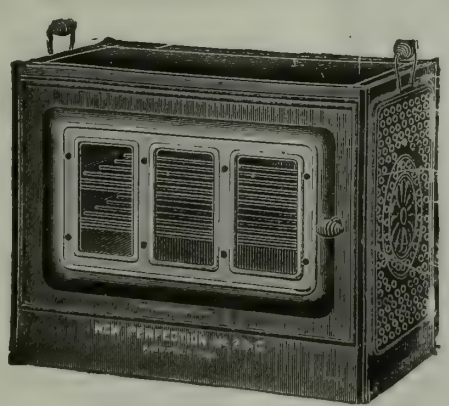
NO. 61. NEW PERFECTION STOVE. It has the regular New Perfection burner. Oil reservoir surrounds the burner. Glass indicator to see oil level.

PERFECTION ONE AND TWO-BURNER OVEN. Made with glass swing door, and blue enamel door frame.



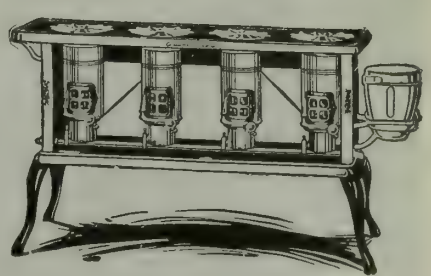
With the housecleaning season in sight the demand should start for this line of stoves and heaters in rural and suburban districts.

The New Perfection stoves and heaters are rapidly becoming all-year-round sellers. There's no reason why they should not be used in the rural home the same as gas is used in the cities—every day of the year.



Order your spring and summer stock the next time the "Rice Lewis" representative calls, or write to us direct.

Rice Lewis & Son, Limited



VICTORIA ST., TORONTO

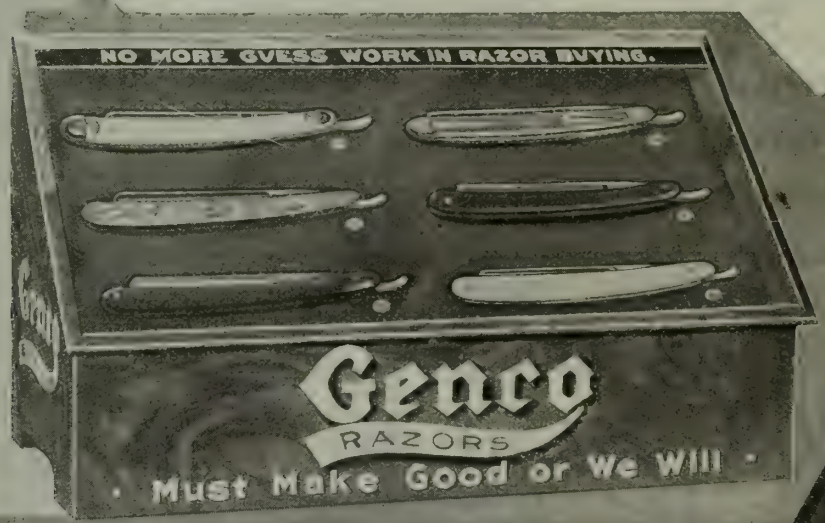
Genco RAZORS

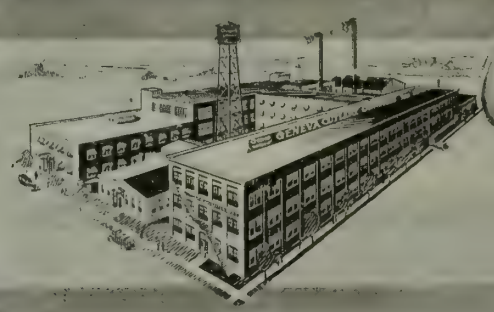
A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.



All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which includes one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

Kasement Screen Doors

Appeal to the Householders BECAUSE

—There is practically no fitting. Holes are bored ready for hinges (right or left). Hours of time (money) saved every spring and fall.

—They are light, neat looking, easy to keep clean, revarnish or paint.

—They allow the maximum ventilation.

—They positively WILL NOT SAG.

And Appeal to the Dealers BECAUSE

—There is only one pattern to stock.

—3 sizes fit all openings (in some localities 2 sizes are sufficient).

—Doors are well crated, and the complete hardware sets in separate cartons are all ready to hand out.

—A GOOD PROFIT CAN BE MADE.

Sold from Coast to Coast.

WHOLESALE HARDWARE

TORONTO

If any advertisement interests you, tear it out now and place with letters to be answered.

Before

After

"BEFORE"—To the stove dealer, this reproduction illustrates a familiar sight—the old stove that you allowed your customer a few dollars for in the deal for a new one.

Now, the question arises in your mind, "Shall I dump it in the junk heap, or put it in shape to sell again at an attractive profit?"

You have the extra fittings to put the inside in good order, and we have the equipment and expert workmen to put all nickel trimmings in the same condition as when new, and at a small cost.

What are the net results?

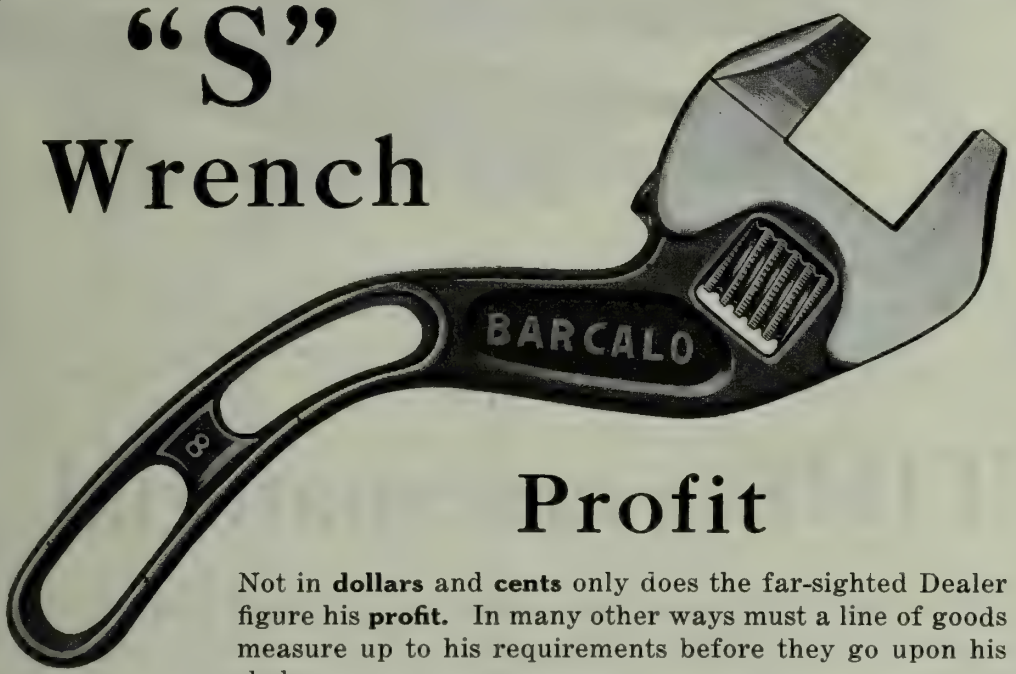
1. **You are in a position to allow your new stove customer more money for his old stove—he is thoroughly satisfied.**

2. **When you and we convert this old stove into practically a new one, as shown above as "AFTER," you will have a "most as good as new" stove to sell to a customer at a medium price—he will be absolutely satisfied.**

3. **Now you have made two sales instead of one—have two satisfied customers instead of one—have made two profits instead of one, and you are satisfied.**

4. **Now, remove all the nickeled trimmings from the old stoves you have on hand, wrap in old newspapers and pack securely in a box and send them along to us—we will make them look like new at a trifling cost, and we will be satisfied.**

5. **Up to now everybody is satisfied, and you can feel that you have conserved instead of wasted.**



We have been rendering this service for years and have scores of satisfied customers.
We have recently doubled our capacity and can give you quick delivery.
On receipt of your shipment of fittings we will quote prices for your approval.

GUELPH, CANADA

BARCALO

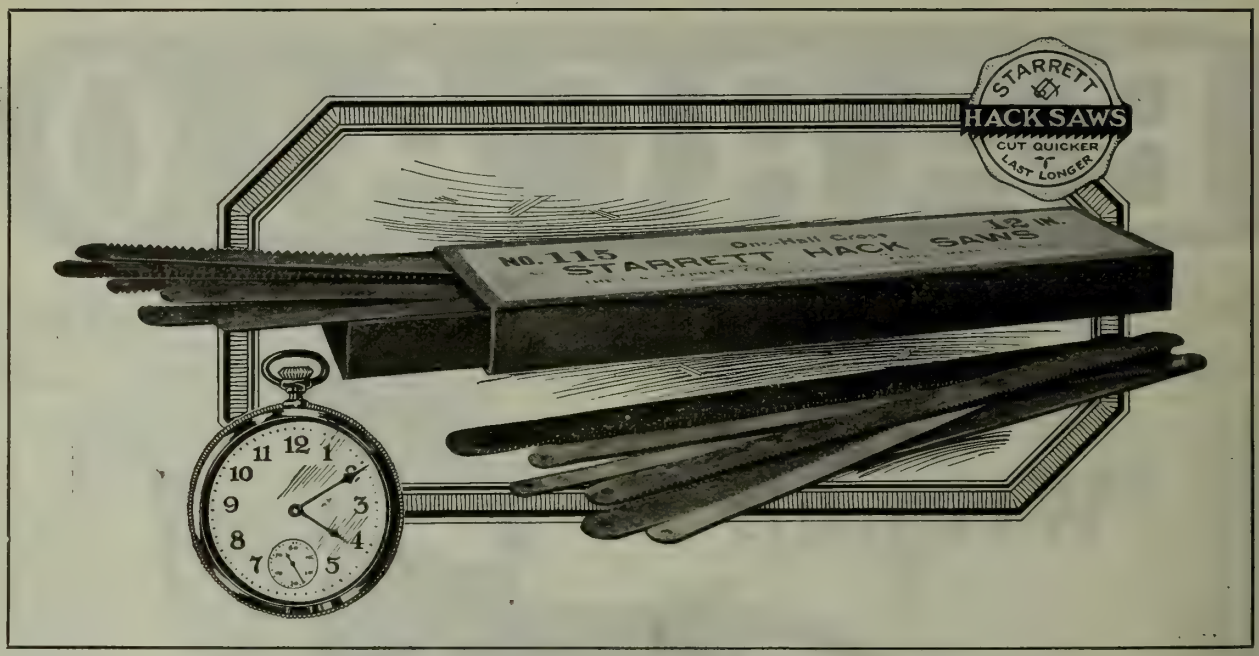
"S" Wrench

Profit

Not in **dollars** and **cents** only does the far-sighted Dealer figure his **profit.** In many other ways must a line of goods measure up to his requirements before they go upon his shelves.

The **Barcalo "S" Wrench**, taken from every angle, is the most profitable wrench any **hardware dealer can handle.** It proves its worth where others fail. Its extraordinary strength, its ability to perform tasks, impossible to other wrenches, its lasting qualities and its simple construction makes it an easy wrench for you to sell and an ideal one for the mechanic, machinist and garageman to use.

Our guarantee—of replacing without question, free of charge, any unsatisfactory wrench is proof of the confidence we place in the Barcalo "S" Wrench and your assurance of satisfied customers.



Made in 6, 8, 10, 12 and 14 in. sizes.
May we explain the splendid profits to be made selling this line?

WILT
HIGH SPEED AND CARBON TWIST DRILLS

For Ventilators

TONCAN METAL

Resists Corrosion

Foul air, gases and fumes of a corrosive nature are constantly passing through the interior of ventilators, while the exterior is exposed to the weather and the usual exterior corrosive conditions.

The experience of hundreds of users has shown that the use of Toncan Metal in ventilators is the best possible way to guard against expensive renewals.

For Eaves Trough, Balconies, Flashing, Ridges, Ventilators, Roofing, Siding and all exterior sheet metal work, Toncan Metal offers unsurpassed resistance to corrosion. Recommend it—specify it -- *Use* it.

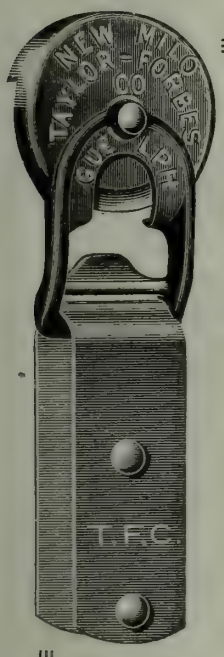
PEERLESS STEAM COOKER



The marvelous possibilities of this wonderful steam cooker go far in making it an easy utensil for the Dealer to sell. Think of being able to cook a whole meal on one burner at one time. What a variety of selling arguments involved in that.

Money, Time and Labor are saved—disagreeable odors are done away with—the housewife's sweet temper is retained and more properly cooked food is the result.

The Peerless Steam Cooker is strong and substantially made. In the High Quality Class. More than pays back its initial cost in fuel saved.
We believe you are interested in making greater profits this year. The **Peerless Steam Cooker** is your opportunity. We have an agency proposition that will prove mighty interesting to you. Write us to-day.

ONWARD MANUFACTURING CO., KITCHENER, ONT.

The "NEW MILO" Door Hanger

FOR GARAGES, BARNS, Etc.

An easy working dependable Door Hanger that gives a maximum of service with a minimum of cost. Simple in construction—easy to install, made to stand the roughest usage.

Thirty years' experience in the manufacture of hardware lines is back of this Hanger. Bears the usual "T. F. C." mark, the visible guarantee to your customers of its dependability.

An exceedingly profitable line for the dealer to handle. Figure up the number of garages, barns, stables, etc., in your district that are sadly in need of proper door hangers.

Show your customers the "New Milo," it's not hard to sell and the splendid profits are worth while.

Order through a jobber or write us direct.

CANADA FOUNDRIES & FORGINGS LIMITED

THE DIFFERENCE IN PRICE BETWEEN

A CURSE AND A-SONG

IS SOMETIMES ONLY A DIME—10c.

Mr. Dealer sold Smith
a cast iron wrench.
IT BROKE
Smith cursed the Dealer.

Mr. Dealer sold Brown
a stamped metal wrench.
IT BENT
Brown cursed the wrench.

Mr. Dealer sold Jones
a Forged Steel Wrench.
IT WRENCHED
Jones sang at his work.

When a consumer buys a wrench he has only one object in view :

TO WRENCH A NUT

Then why for the sake of a few cents is he sold a tool that will either break or bend when he asked for a tool that will **wrench ?**

Every kind of a nut in the world has been wrenched by an Endurance wrench.

If they were thoroughly investigated they would soon become the only wrenches sold.

Always displayed by the Better Stores.

MEMO
February 22nd

for your Babbitt Metal file

QUALITY

—is the all important factor in alloys as in anything you buy or sell. That's why you should sell these high quality Babbitt Metals: "Nickel Genuine," "Trojan" and "Frost King" Quality of raw materials and extreme care in the mixing have always been considered of paramount importance in the manufacture of Hoyt Metals. It is a point of pride that Hoyt Babbitts have in all cases stood up handsomely under all tests to which they have been subjected.

You will readily understand the importance of passing on to your customers metals which are so perfectly made and so uniformly effective under all conditions.

May we send you our price list? Write for it to-day.

When A Wide-Awake DEALER Connects With the KRIBS Line of Washing Machines.

There's no risk in the experiment. Scores of hardware dealers have responded to our invitation and are proving for themselves that **KRIBS** machines make pleased customers. Almost every home in your district is a good prospect for a **BETTER** washer. That's right where we come in.

No more shrunken or warped tubs. No complicated mechanical devices. Simplicity, thoroughness of construction, efficiency, and the resulting SATISFACTION, make KRIBS washing machines always welcome. The enthusiastic customer becomes a booster and an advertiser for you.

Attend to this important matter TO-DAY. Nearly every jobber carries the KRIBS line, but if your wholesaler is not supplied, write us direct for catalogue and prices. HAND-POWER, WATER-MOTOR, GASOLINE-MOTOR AND ELECTRIC.

There's a model for each home, from the most modest cottage to the elaborate mansion, but SATISFACTION in every machine.

WM. A. KRIBS, Hespeler, Ont.

Canada's High Grade Steel Wheelbarrow

BATEMAN TUBULAR BARROW

We are now in a position to give the trade that service which had always been our aim, but which war conditions interfered with.

The Bateman T80 shown above is our leading line, made of the best materials and finished to the Bateman standard.

Note These Features:

Tray is most popular type with 5/16" steel rod in edge which reinforces tray and ensures long life.
Has Malleable Hub Wheel, recognized the best, will not shake loose.
Front bend in tube throws tray well over wheel.
Frame is well trussed and braced. T80 is an exceptionally well-balanced Barrow.

We solicit your Barrow business. Our prices are right.

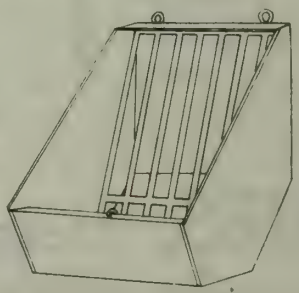
Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

A PROPHECY



We believe there is going to be a big movement throughout Canada with people developing their gardens, orchards and Poultry Yards.

Our Government Expert, Mr. Fred. C. Elford, Supt. of the Poultry Division of the Dominion Experimental Farm, Ottawa, says:—"Canada's National Debt of $1,247,000,000 could be paid in less than six years in Poultry and Eggs, so they have adopted the slogan, 'One hundred hens to every farm, ten hens to every urban lot.'"

THIS IS BIG BUSINESS. ARE YOU GOING TO GET YOUR SHARE OF IT? We make the best articles in this line, simple but effective.

Toronto, Feb. 3, 1919. Hatched 46 chicks first time. Mrs. McDougall, 1009 St. Clarens Ave.

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

Canada's National Hardware Weekly

will appear on

March 22

The advertisements in HARDWARE AND METAL'S Annual Spring Number are salesmen who are right on the job when Canadian hardware merchants are placing the biggest orders of the year.

Hardware buyers in Canada hang up their copy of HARDWARE AND METAL'S Spring Number, close beside their desk. A cord is inserted in the upper left-hand corner for this purpose.

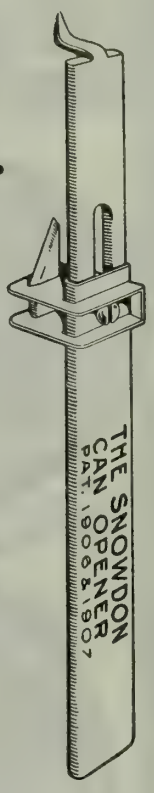
Impress buyers with the importance of your firm and the quality of your goods! Make the impression strong and lasting by using big space in the biggest and best annual issue of any Canadian trade paper.

There is scarcely a hardware store of importance in any part of Canada where you will not find HARDWARE AND METAL.

Again in Demand

The wooden tub is back—the high cost of the metal tub is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.



Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue.

The "One Minute" Washer

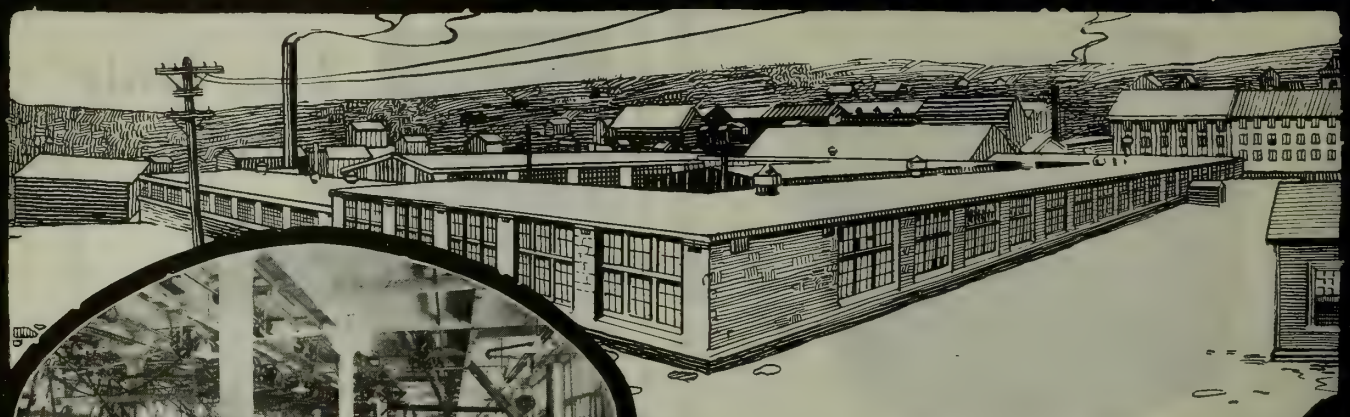
Makes a Holiday of Wash-Day

Hand, Electric, Gasoline and Water Power

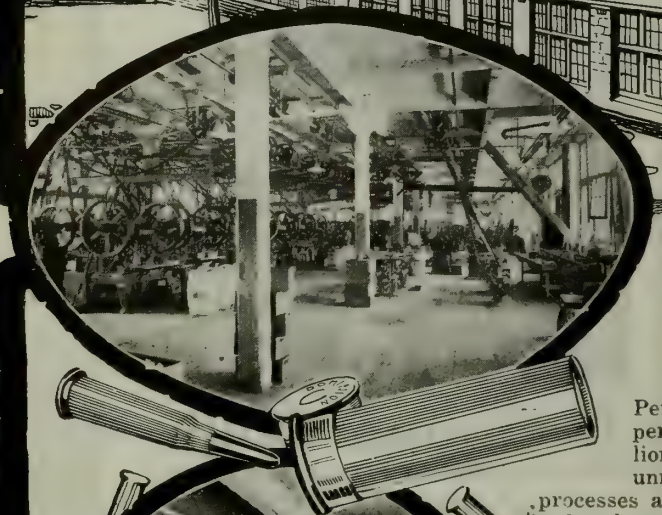
Every Retailer knows that the most profitable goods to handle are those which satisfy his customers.

The "One Minute" Washer is the most satisfactory washing machine your customers can buy and the most profitable one for you to sell.

Its claim to usefulness and extraordinary selling qualities is backed by the years of unusual service it has been rendering the Canadian Housewife.

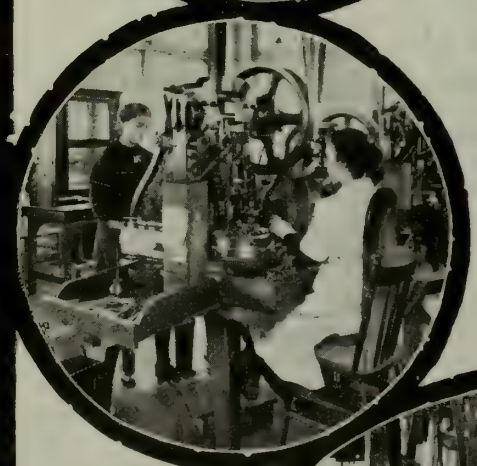


There is yet to be returned to us an unsatisfactory machine. A fact that all dealers appreciate. **The "One Minute" Washer**—saves labor—washes clean—is easy to operate—noiseless—attractive appearing (all working parts are concealed under the tub)—strongly made, durable (the tub will not rot)—and a quick seller.

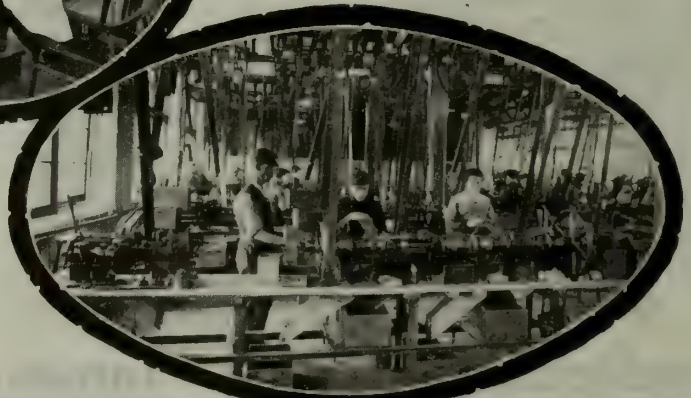


It will pay you to investigate the "One Minute Washer."

You should be selling them in your district. Write us for our agency proposition.



One Minute Manufacturing Co., - Toronto, Canada



If any advertisement interests you, tear it out now and place with letters to be answered.

Nothing Overlooked to Make Them Perfect

Perfection of manufacture is absolutely necessary to insure perfection of performance in cartridges. That is why millions of Dominion Cartridges go through processes that are unnecessary to them because they are perfect. But the processes are necessary to discover the few which are thrown out in order that you as a dealer will not sell cartridges with imperfections, even though too minute to be discovered by the ordinary eye.

The manufacture of

DOMINION

Cartridges

is a continuous series of inspections and tests—mechanical, chemical and microscopic. After these are made a certain number out of each lot of cartridges is tested by shooting—all to guarantee an ammunition to satisfy your customers.

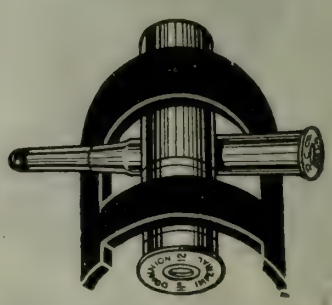
The illustrations herewith show a few of the operations which make Dominion Cartridges "dependable and accurate."

(1) Where the tiny cups of brass are drawn cartridge cases. Four or five of these draws are necessary to complete each case.

(2) The annealing furnaces which insure the proper strength and texture to the brass and copper cases after they have left the drawing presses.

(3) The careful trimming and testing as to size of cartridge cases.

(4) Piercing flash hole and inserting primer that delicate part of the cartridge which insures prompt response to trigger.



Add to this the careful testing of powder and bullet and you have but a general conception of the details which make Dominion Ammunition the best selling ammunition.

This is the ammunition which you should sell to satisfy your customers.

The Fourteenth Annual Convention

Many Important Trade Matters Dealt With at Three-Day Session in Hamilton—A. J. Wright is the New President—Large Attendance of Manufacturers, Who Gave Valuable Information to Dealers

THE fourteenth annual convention of the Retail Hardware Association of Ontario which was held in Hamilton on Tuesday, Wednesday and Thursday of this week was featured by the large amount of information of real value that was presented to the retailers. While there was a splendid representation of the manufacturers there was not as large an attendance of retailers as there should have been. This may be accounted for by the fact that the unusually mild winter has made what is usually a dull period for the hardware dealers a very busy one. Many retailers who had planned to attend found themselves so busy that it was impossible for them to get away. That the dealers of Ontario however are showing increased interest in the association and its work is evidenced by the fact that the secretary states that he expects from returns already in a jump of fully fifty per cent. in membership.

Takes New Name

It was decided to change the name of the organization to "The Retail Hardware Association of Ontario."

It was also decided to abolish the office of second vice-president and to increase the membership fee from $3.00 per annum to $5.00.

Warmly Welcomed

H. P. Hubbard, on behalf of the hardware manufacturers of Hamilton, extended a warm welcome to the visitors. He contrasted conditions now and at the meeting a year ago; then the war had still to be won, now the great struggle had ended as everyone hoped it would. Canada and other nations are facing the reconstruction period. There is every indication that the Dominion has a tremendous future.

Mayor Booker, of Hamilton, in welcoming the hardwaremen said it was a real pleasure for him to again welcome the members of the association. He paid a tribute to the late Sir Wilfrid Laurier as one of Canada's great men and a genius. (Applause).

Referring to the reconstruction period he said the only way to meet all problems was to meet them bravely. The greatest thing that has come out of the war is the cementing of the ties between England and the United States. He looked for an ever growing Dominion and for Canada to play an increasingly great part in the development of the Empire.

Value of Associations

James Hardy of Toronto, secretary of the Canadian Wholesale Hardware Association, who was to have spoken on "The Value of Associations," asked to be excused at the time saying he would talk about the matter later. He however touched upon the topic very briefly, pointing out the value of organization, not only provincial but local. Even if only two or three merchants were in a town he advised them to get together in their own interests and deal with any problems that might come up.

Col. J. B. Maclean, president of the MacLean Publishing Company, Toronto, who was to have spoken was prevented by illness. His place was taken by H. T. Hunter, vice-president of the Maclean Publishing Company. He emphasized the good work that can be done by associations in working out trade problems. The more the work can be extended into towns the better. What is needed is good, lively, keen competition. The association that is enabling us to co-operate and eliminate things that are taking away profits is unquestionably worth while and makes better business. This will develop business. The tendency in the future will be towards a bigger volume of business with greater profits although prices will be lower. The view of the general public is generally a most illogical one. All the people know is that the merchant asks them more for the goods they need.

The man who comes in contact with the public is the dealer. He has to take all the kicks that are coming and gets remarks thrown at him that the manufacturer never hears.

A. J. WRIGHT
Hamilton, elected president Retail Hardware Association of Ontario.

Outlook for 1919

Mr. Adam Taylor of the Taylor Forbes Co., Ltd., Guelph, Ont., speaking on "The Outlook for 1919," said:

The thought uppermost in all our minds to-day is the outlook for 1919.

The question which must be asked today and answered without delay, is, are we going to profit by our experience gained in the last four years or are we going on in our pre-war style? It depends upon the answer to this simple question to a large extent what our future is going to be.

The astonishing victories won by our army, the courage and daring and tenacity of our men is the finest advertisement possible the world over, as regards Canadian quality.

Are we going to turn all this into commercial value? Put the same energy into the changeover for industrial purposes. Make the words "Made in Canada" a household motto, or a necessity in every home because of its quality in every country of the world?

Are we going to be merely producers of raw materials with which to supply other countries who will return the manufactured article or are we going to be manufacturers and supply our own needs and some of the needs of others, thus receiving full commercial benefit?

Must Start Afresh

Older nations have to start afresh and reorganize as never before. We have an equal chance and in some cases better, because of the variety and the abundance of our natural resources. In this I include every branch of our raw materials.

The world has junked its war machinery,—and the boys are coming home, and just now we are having a very gratifying relief from war orders. I say "gratifying" even though it means great loss of business. We are glad that our boys are marching home.

The industrial classes in many parts of the world are at the point of revolution.

ADAM TAYLOR

Taylor-Forbes Co., Quelph, who spoke on the business outlook.

We know something of the terrible conditions in Russia, but little has been told us about the conditions in France, Italy, Japan, Holland and Great Britain. In all these countries strikes are numerous. Things are not as bad in this country. The idea, however, that these convulsions can take place in Europe and not in this country is absolutely foolish. These troubles and industrial unrest will come and we must be prepared and the one hope in the situation is to give the masses every possible help, so that reaction will not be so severe. The building industry may become such a buffer.

Should be Encouraged

Construction work—both public and private—should be encouraged by everyone. It is a check on Bolshevism, and other "isms" in this country. Everyone should use his influence in his local community, also urge their representatives in the legislature to push public work with all possible speed.

Prices will be lower "later." I say the word "later" advisedly, as there will be an increase in percentage of overhead to be charged to-day through the reduction in volume of business to be done. This overhead must necessarily be met, and in all probability will more than offset any reduction in price of metals.

Labor is not dropping in price by any means, and if we are to believe the press and follow public utterances we may expect wages to be maintained at present level, if not increased, and probably an eight hour working day adopted, but it is a good deal better to build now and head-off unrest and disorganization than to wait until it is too late for the sake of saving 5 or 10 per cent. Spend the money now to improve and expand business and charge any little difference to good will or something else.

Would Save Business

Mind you I do not pretend to say that now is the most opportune time to build, —but it is much better to build now at high cost and save business than it is to wait for lower prices and run the risk of business disruption.

We read in the daily papers that the Government intends loaning twenty-five million toward the solution of the housing problem, another twenty-five million to be spent on good roads, and twenty million to be further advanced for promotion of public works.

Let us hope that the great gap in the volume of business caused by the stoppage of munitions will be filled, not alone by the efforts of the Government, but by the resourcefulness of manufacturers, jobbers and merchants, who have endeavored to see clearly the fundamentals of reconstruction and thereby have enhanced well being.

Before resuming my seat Mr. Chairman, allow me to express the hope that the deliberations of this your Fourteenth Annual Convention may be most successful and that the benefits derived may exceed your most sanguine expectations.

Will you permit me further to quote a few articles of a creed which occurred to me worthy of adoption.

Ten Ways to Kill an Association

1. **Miss as many meetings as you can.**
2. **If you do attend, don't come on time, but late.**
3. **If the weather is fine, don't think of going.**
4. **If you attend, be sure and find fault with the work of officers and other members.**
5. **Decline all offices, as it is easier to criticize than to do things.**
6. **Get sore if you are not put on a committee, or, if appointed, don't attend meetings.**
7. **If Chairman asks for your opinion, tell him that you have none, but later tell others what should have been done.**
8. **Do nothing except what is absolutely necessary, and when others roll up their sleeves to help matters, howl because of the clique running things.**
9. **Delay your dues as long as you can, and delay answering all letters.**
10. **Don't bother about getting new members. "Let Someone Else do it."**

Royally Entertained

On Tuesday evening the visitors were the guests of Wood, Alexander & James, of Hamilton, at a banquet and entertainment held in the Royal Connaught. W. A. Wood was in the chair and in expressing a warm welcome to the delegates he also extended to them an invitation to meet in Hamilton again next year.

F. F. MacPherson of Hamilton, Normal College, in responding to the toast to Canada declared that one of the greatest things to keep in mind in connection with Canada's reconstruction problems is "revaluation." Too many people have been setting too much value on material things and not enough value on the things of real importance. Canada, he declared, owes it to every boy and girl to see that they get an education that will fit them for earning their own living and for taking care of themselves. He urged every business man to help along this work in every possible way.

In replying to the toast to "The Ontario Retail Hardware Association," President D. A. Macnab, Secretary W. F. MacPherson and ex-President Jas. MacGregor, of Oakville, thanked Wood, Alexander & James for the generous hospitality extended to the members of the association.

Brief addresses of welcome to the delegates were made by Messrs. Alexander, James, A. T. Enlow and H. L. Frost.

The evening's entertainment which followed the banquet included, beside the speeches, a delightfully varied musical program which drew much applause and was greatly enjoyed.

EXHIBITORS GIVE TALKS

Ten-minut talks were given given by exhibitors as follows: A. L. Mason, of the Standard Paint and Varnish Co., Windsor; R. K. Falkiner, of the Allith Manufacturing Co., Hamilton; W. H. Cunningham, of the Kasement Skrene Dore Co., Toronto; W. Cale, of the Alabastine Co., Paris, Ont.; F. T. Bush, of Bird & Sons, Hamilton, Ont., and J. G. Gibson, of the Oneida Community, Ltd.

President's Address

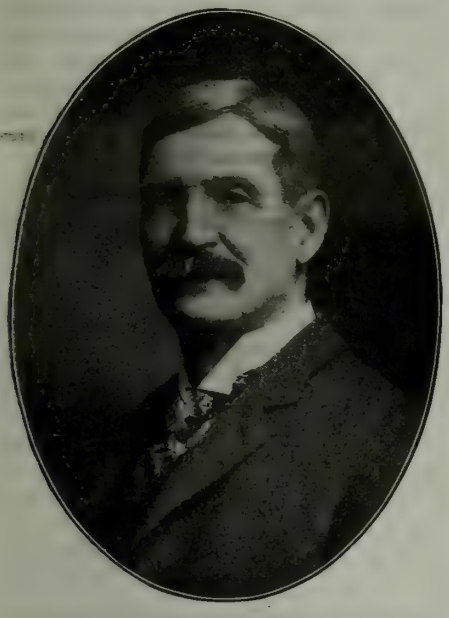
AT our last session in this most hospitable and thriving city of Hamilton, it was under the stress and strain of war, but now after four years and a half of the greatest conflict the nations of the earth have ever engaged in, the victory has been won, and in union with our Allies we can with prayer and praise thank God for the great victory achieved and a duty well done.

I desire to take this opportunity of thanking you for electing me to the highest office of the association, and I feel it an honor not only to preside at the various sessions, but to be associated with such a large and influential body of merchants whom it has been my pleasure to meet at every meeting of our association since its organization.

Had Many Problems

During the war period many problems had to be solved, and, now that we are in the time of peace, we will still find, on account of reconstruction of business affairs, both local and national, that problems still harder to solve will confront us, but I do not hesitate to say that there has been nothing too large for the people of our beloved Canada to undertake and duly accomplish, and in due time all will be back to normal conditions again. Co-operation was never required more than at the present time—it is in the air—every line of trade and labor is inviting it—and

H. P. HUBBARD



General Manager, E. C. Atkins & Co., Hamilton, who welcomed the delegates.

we can see in our association the means of instilling into the minds and hearts of those in our especial line of business a more friendly feeling, the abolition of that word competitor, as expressed by cut-throat business methods, and the adoption of a safe and sane and congenial spirit in the conduct of our

business, both to the betterment of the individual and the community.

Was Most Helpful

The convention of 1918 was the most practical and helpful we have had, and I can safely say that no effort has been spared to make the present convention maintain the standard then set, and hope that every member will

JOHN CASLOR
Re-Elected Treasurer of Ontario Retail Hardware Association

enjoy and profit by the various features of the programme.

The question of an advanced fee will be before you at this annual session, and I trust it will meet with your hearty support, as there is no doubt if this association is to prosper as it should, it must have necessary funds. Your officers have been economical, in fact they had to be, but have given you good service and if you will give them more to carry on with, you will get better service than ever before.

Praises Secretary

Before closing I would like to give due credit to Secretary Macpherson, whose untiring efforts in our behalf is and has been the mainstay of our association, and we are deeply indebted for the work and interest he has shown in its welfare.

I wish to express my appreciation for the co-operation of the officers of the association during the past year, also the trade press, manufacturers, wholesalers, and exhibitors who have done so much to make our convention a success, and trust that you will all feel at the close of this our Fourteenth Annual Convention it has not only been a pleasant outing, but one of profit—and that you will do your part in making the next still bigger and better.

Report of Secretary

TO Officers and Members Ontario Retail Hardware and Stove Dealers' Association.

Gentlemen:—I beg to submit herewith my report covering the work of this association, during the year 1918, or at least that portion of it which has been handled through the secretary's office.

Membership:—The total paid up members for 1918 was 251, a slight increase over preceding year. It was my intention to have made a special effort for a much larger membership, but owing to a considerable amount of my time being occupied with duties in connection with war work organizations, which duties I considered paramount, I was unable, in common with the other members of the executive, to carry out any wide campaign. These activities now drawing to a close will no doubt release some time and energy on the part of your new officers and executive, and be used to good purpose in strengthening the membership of our association. During the year several issues of net cost prices were mailed out. With increased membership, or increased membership fees, the price list branch of the service could be enlarged to the advantage of all members.

Numerous Offerings

Sales Bureau:—During the early part of the year there were numerous offerings through our sales bureau. From information received I am aware of a considerable quantity of goods disposed of to the mutual advantage of both seller and buyer. Isolated offerings have come to hand at different periods during the year, but not sufficient to warrant issuing special sheets, as the expense of listing one or two lines is as great as for a score. With the desire to list promptly lines when offered, arrangements have been made to list offerings in "Want and for Sale" Column of HARDWARE AND METAL—so, with the consent of this convention, or of the incoming executive, this arrangement may be ratified and all offerings listed for sale same week as your secretary is advised.

Paint Containers

During the past year the matter of elimination of certain sizes of paint containers by the Paint and Varnish Association was taken up by your executive—a questionnaire was sent all members and a decided majority favored the elimination of other sizes than those proposed by the Paint and Varnish Association. There was a large amount of correspondence in this connection, and the matter was still somewhat in abeyance, when the end of the war relieved the situation, and necessity for any elimination was removed.

Get Members' Views

It is to be hoped in the future, when radical changes such as proposed in this instance are under consideration, that the views of this association should be obtained and receive recognition. This was our contention and was conceded by individual manufacturers. I would suggest that this convention place its views on record in this matter.

Collection letters:—There has been considerable demand for these forms during the year, also for lien notes, and I would remind our members that further supplies are available on request.

1919 Convention:—The arrangements for

D. A. MACNAB
Retiring President Retail Hardware Association of Ontario

ASSOCIATION OFFICERS 1919-1920

The following officers were elected for the year 1919-20:

President.—A. J. Wright, Hamilton.

Vice-President. — Ed. Wanless, Chatham.

Secretary.—W. F. Macpherson, Prescott.

Treasurer.—John Caslor, Toronto.

Executive Committee.—Nelson Mills, Hamilton; George May, Toronto; F. B. Smith, Belleville.

the present convention have been completed by your officers and executive, and, as secretary, I must express appreciation of the ready acceptance by the manufacturers and others of our invitation to participate in our meetings.

Many Exhibits

Exhibits:—We are fortunate in having such a large number of exhibits this year, and trust that every member will make it a point to visit each and every exhibit, and where possible to show appreciation in a more tangible way. List of exhibits with names of representatives will be found on the programme.

In conclusion I would like to make an earnest appeal to every member to show his interest in the association, by an endeavor to have all dealers in his town and district members of our association. A little exertion in this way would soon bring results and double both the membership and the influence of our organization.

Yours for fuller co-operation,

W. F. Macpherson,
Secretary.

Treasurer's Financial Report

Toronto, Feb. 18, 1919.

To Officers and Members,
Ontario Retail Hardware and Stove Dealers' Association.

Gentlemen:—

I beg to submit Treasurer's Report for year ending Dec. 31, 1918, as follows:—

(Signed) Geo. Mathewson,
J. W. Peacock,
Toronto.

The Wednesday Morning Session

READY MIXED PAINTS

Address by W. S. Fallis, of Montreal, Managing Director of the Sherwin-Williams Company of Canada, Montreal.

MANUFACTURERS want to co-operate in every way with the retailers. Prepared paints have come to stay. In the early days prepared paints were made so poorly that the trade was greatly handicapped. Conditions have changed and now prepared paints are scientifically made and can be used satisfactorily and economically and a big business has been built up and is steadily expanding.

Regarding the future Mr. Fallis said people at the outbreak of the war were uncertain and this was reflected in business. This condition obtains again now that the war is over. The paint manufacturers last fall were confronted by the situation of having no raw material supplies on hand. It was at that time impossible to foresee the end of the war and raw materials in large quantities were purchased at record prices. These must be used up now and the result will be that there will be no immediate reduction in prices. All raw materials in all lines are high and the labor that is used in the production of finished products is higher than ever. This is a big factor also to consider. Canada, however, has in general been more prosperous than ever before and people are living better than before. There is nothing in conditions to warrant any uneasiness from a trade standpoint. Two of the problems of the retail trade to-day are the mail order houses and the tendency of the farmers to form co-operative societies. These are changed conditions and require all the resources of the retailers to meet them. The manufacturers are co-operating with them in every way to help them meet these difficulties. Retailers, he said, should closely follow up every opportunity for keeping their trade at home. With the resources Canada has to-day there is nothing to fear. He spoke most optimistically of Canada's future development especially in the West, and the great opportunities for business. The great crying need of the business world to-day is for capable men. Your clerk of to-day may be your partner to-morrow. Teach your clerks initiative, and courtesy and develop their latent energies. This will make them successful business men of the future. These are the men who count and become living forces in the community.

W. S. FALLIS
Managing Director, Sherwin-Williams Co. of Canada, Montreal

Referring to a question asked by a dealer regarding linseed oil prices, Mr. Fallis said supplies had to be purchased last Fall at prices $1.35 per bushel higher than now prevail. Oil manufacturers, he said, are loaded up with supplies purchased at high prices and these have to be worked up before others are secured. He advised retailers to be conservative in buying but to push for all possible trade. There was nothing to indicate any great reduction in prices but rather a gradual lowering.

WIRE AND WIRE FENCING

Address by H. L. Frost, President of the Frost Steel and Wire Company, Hamilton.

IN dealing with the fence prospects for 1919, may I be permitted to draw some conclusions as regards general conditions?

Four years of world upheaval have affected not only the destiny of the nations, but social re-organization is now undergoing changes which only a dreamer would have considered possible in 1914. War time problems have brought about a greater measure of co-operation amongst all classes. The same spirit now prevails, and Canada should be able to solve her present difficulties with the same success which attended her efforts during the War, when she had troubles both from within and without. The nation that produced our wonderful soldiers will carry on, and will not only be a bigger and more prosperous nation, but in every sense of the word a better one.

To-day we need "Peptomists." A "Peptomist" is an Optimist plus Pep.

Depends on Prices

Business is going through a waiting period, and improved conditions largely depend on the question of whether prices have become as low as present conditions warrant.

It is most unlikely that prices can go back to their old figure, because wages are never again going to be so inconsistently low. To-day there is some considerable unemployment, but with virtually no immigration during the war, and 75,000 Canadians killed or maimed, it should not be very long until we find an acute shortage of labor.

The fence situation is most promising. For two or three years there has been a great shortage of materials, which, coupled with the labor shortage on the farm, has resulted in a large amount of fence business being held over. While prices have been high, fencing has lagged behind many other metal materials, which have gone up two, three or four hundred per cent.

Were Not Excessive

The highest price asked for fence was only 114 per cent. in advance of pre-war prices. Contrast this with an advance of 132 per cent. for galvanized wire, doubled labor costs, nearly doubled freights, and the addition of 7½ per cent. war tax, together with an exchange of 2 per cent., and it is readily seen that fencing cannot re-act in price anything like other materials.

There has already been a reduction from the extreme high price of $18.75 a ton in car lots, and an even greater amount in less than car lot shipments.

These figures do not give a living profit to fence industries. During ten years no less than seven Canadian fence companies failed, and no new ventures have been started during that period. Many improvements in methods have been made, not the least of these being the standardization of heights and spacings. Whereas there were formerly 105 styles of fencing, all made in three different size bundles, there are now only 14 different combinations of all No. 9, five combinations of 9-12, and two poultry styles.

Benefit to Dealers

This should greatly benefit hardware dealers and assist them in sorting their stocks properly.

There is a largely increased demand from year to year, which will probably tax the entire manufacturing capacity this year, and we must take into account not only this year's normal demand, but every effort must be made to catch up for the two or three years when the farmers' needs could not be supplied. I am happy to note a greater spirit of co-operation between fence makers and dealers. This ought to prove very beneficial in the years to come.

In my judgment, 1919 should be a wonderful record-breaker in the fence business.

Stove Outlook for 1919

Address by F. M. Tobin of Toronto, Secretary of the Canadian Stove Manufacturers' Association.

OVERPRODUCTION in the stove business has kept prices low. American competition has also been a factor for some time, but now, however, Canadian stoves are cheaper than those made in the United States.

Speaking of export business, Mr. Tobin told what was being done in regard to securing European business and also in regard to getting trade in Siberia.

Mr. Tobin stated that there is no immediate possibility of stove prices being lower as raw materials have been purchased at high prices and labor prices are high.

WIRE NAILS AND KINDRED PRODUCTS

Address by F. H. Whitton, General Man ager of the Steel Company of Canada, Hamilton.

IN times of peace, conditions in the Steel business have been called "The Barometer of Trade," and when you add the insatiable demand for the war that has occupied us during the past four years it reaches a place of importance held by no other commodity.

The wisdom of building up and owning a steel industry in Canada was demonstrated beyond contradiction when within just a few months of war being declared, the steel plants of this country had without hesitation plunged into what was to them a hitherto unexplored field, and produced successfully munition steel in large quantities and of a quality that has from that date to this not been surpassed on this continent or in all Europe. This country's accomplishment in that line has received from all qualified quarters at home and abroad the highest commendation and the service the Canadian steel companies have rendered in this war has many times repaid to its citizens, the Mother Country, our sister Dominions and our Allies all the money that has been spent since its inception, in its upbuilding.

Important Question

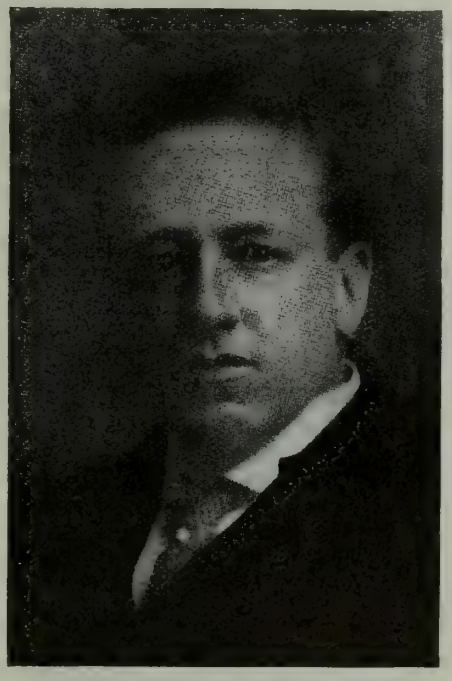
Whether it shall continue to occupy an increasingly important place in the building up of this country and be available when required for either war or peace requirements within the borders of this country or in the future interests and requirements of the British Empire, is one of the most important questions for our Government and every citizen of this country to carefully consider in relation to any future change in our fiscal policy.

The kaleidoscope of events during the past four years has been revolving with such rapidity and such momentous changes have followed one another so quickly and absorbed our most concentrated attention, that one has difficulty in finding one's feet in a commercial sense now that peace conditions and pursuits confront us once more.

Your program specifically mentions "Wire Nails and Kindred Products," as a subject on which you desire a few remarks, but your secretary issued to me personally a license to talk to you on the general steel industry, which must necessarily affect very largely the greater portion of the goods you buy and sell.

Business and Prices

In regard to volume of business and prices. If there were but the one unit to consider, viz., the "goods themselves," it would reasonably be expected that there would be a prompt demand for everything the world has run short of.



Another basic element however enters and largely demands attention, viz: Price.

The immutable law of supply and demand intensified by war conditions has raised the price or lowered the purchasing power of the dollar.

To-day the world wants goods and lots of them but there is another important factor: "The scarcity of credit for ordinary commercial purposes," having in mind the enormous war debts that have been incurred and will have to be liquidated.

Economic Necessity

It is an economic necessity to-day to get the greatest possible number of articles or value for one dollar and it is an axiom accepted by both seller and buyer that peace business cannot be maintained on a war inflated price basis, consequently the world is suddenly halted by the momentous question of how to bring about a commercial peace basis of values without panic and the least dislocation of confidence and continued employment of those

F. H. WHITTON
General Manager, Steel Company of Canada

presently occupied and at the same time provide work for those who have been engaged in war pursuits. The buyer is liable to hasten to the conclusion that with the cessation of hostilities prices must drop appreciably at once, but it is well to point out that manufacturers, especially the makers of iron and steel, on whom such an insistent demand was made, were obligated to accumulate stocks of ore and everything that enters into the manufacture of steel to secure continuous operation. The war suddenly ceases and those stocks are on hand, bought at high prices and in many respects regardless of price.

Labor at Maximum

Labor is to-day at its maximum wage and when these two elements are converted into a ton of steel for instance, a high cost results, higher than either the world or the individual buyer would like to see to-day. An absorption of these conditions is now taking place and as soon as seller and buyer have come to some understanding as to what is reasonable under the circumstances, and this is the season we are now passing through, confidence will be established and business resumed.

Commodity prices and wages should ease off in about the same ratio, but the wage scale generally, it is fairly certain, will not be reduced faster than the cost of living is cut and this will be the dominant factor in determining the future trend of prices.

May React Quickly

There may be certain values that will react more quickly than others, but that will probably apply to articles where the raw material does not involve much labor and to that extent may not be indicative of other lines.

Trade conditions as they exist in Canada to-day are more intensified in other countries and it may be well to look at them briefly as to how they may affect us, and to either a greater or less extent than in the past.

It may appear to some that the trading with European countries that ceased during the war may be expected to be resumed probably on about the same basis as before. The question is so immense and has so many sides to consider that it is quite impossible to enter into any great details. I think however that a conversation with the representative of a large English importing and exporting house recently may be of interest to you.

A Good Market

Questioned as to why he was here at this time and apparently had so large a program in hand, he replied: "Because we need a large amount of goods in England for home and export trade and that the American and Canadian markets to-day are the most advantageous to buy in," and made special mention that in regard to the quality of Canadian goods, as also American, we had nothing to fear from European competition.

In regard to price, he considered both Canada and the United States would be distinctly in a better position in future than in the past.

That the day of low European or English wages was past, that labor seemed determined to reach for and would largely obtain the same basis as on this continent or relatively so.

The Seamen's Stand

That German and Austrian goods would be largely replaced. Neither the English buyer or consumer were prepared to purchase them and that for at least a period of five years the seamen claim they will not ship on a boat that would attempt to carry them. No longshoremen would either load or unload them, and that this action would be backed up in every particular by the returned soldier in all walks of life who had fought against them and had witnessed the terrible deeds that up to now had hardly been touched on in the public press and of which we had no conception.

He strongly resisted the idea that memory would be treacherous or forgetful in this respect and that the British trading instinct would predominate.

He made special reference to the recent increases in prices indicated in the English trade papers during January and stated he was continually receiving cables of advancing quotations by which to govern his actions in this market.

British Imports

It may be of interest to you to learn that England has been importing about 50,000 tons, or one million kegs of wire nails per year, made up of 400,000 kegs from Germany, 400,000 from Belgium and France and 200,000 from Canada and the United States. He particularly stated that the Canadian and American nails clearly outclassed in quality those made in Germany, Belgium and France. That Belgium would not be able to furnish any probably for a year at least, France for many months and German nails they would not handle and could not sell, so that material tonnage in this line, as also wire, would be drawn from this side of the ocean.

In regard to bolts and nuts, he said large business was available provided we adopted the Whitworth standard and were willing to make some special patterns in which paving quantities were involved.

That English manufacturing was seriously upset by the wage question in every line and that it would probably take some time to adjust matters.

To Show Them Up

In regard to German goods, it might be mentioned Senator Lynch Staunton prepared a bill at Ottawa calling for all places handling German goods to denote that fact by a prominent sign over the main entrance of the place of business, also on all counters or places inside where exhibited, and every invoice of sale should also in-

dicate any goods that were of German make.

Senator Lodge has introduced a similar bill in the United States.

I believe Australia has actually passed a law forbidding the entrance of German goods.

When touching on European future competition, it may be of interest to give you a little information in regard to the changed conditions brought about by the war.

Great Britain entered the war with about seven and a half million tons of steel. To-day her capacity is ten or eleven. A material portion of this increase was special for war needs and a considerable percentage of it may not be continued as suitable or economical for commercial purposes. On the other hand, there is no question she has learned the value of being more self contained and will manufacture a large portion of what she hitherto bought from Germany.

Germany's Production

Germany's production of steel in 1913 was eighteen million net tons, a capacity in some years 40 per cent. greater than her own domestic demands, and for this surplus she created export markets at prices below actual or natural costs of production by granting subsidies in the shape of preferential railway rates, export bounties contributed by all engaged in making the article from the ore down to the finished product, Government shipping aid to carry the goods to destination and finally banking assistance by advancing the cash promptly to the manufacturer against shipping documents, assuming any credit as to time given the purchaser and the collection of the account. Incidentally I might mention labor also accepted less wages on goods made for export.

This will enable you to understand why German goods were so attractive in price and the extent to which all purchasers of German goods exported, contributed to the upbuilding of German manufacturing.

Germany's prominent advance into the iron and steel business was due to the acquisition of the coal properties gained in the war of 1812 and the ore properties when Alsace and Lorraine were ceded in 1871.

During the present war Germany seized last year, a large portion, nearly nine-tenths, of all the French deposits of ore and in addition 95 blast furnaces.

A Small Producer

France was a small producer of steel, making three million tons in 1913, which was the last official report issued. She has already recovered the ore fields and blast furnaces captured by the Germans in the recent war, but in a badly damaged condition.

The interesting point now is, if under present peace conditions that portion of Alsace and Lorraine lost in 1871 are returned to France she will recover the ore mines that Germany has been using for 47 years and will have a possible ore production of forty million tons and which will in turn reduce that of Germany to probably eight or ten million tons.

France lacks at present the plants and machinery to use this enormous ore tonnage and it has been suggested she may under the peace terms possibly arrange for Germany to smelt some of this ore and return the product to France as a means of paying possible indemnities.

In any event it looks as if continental competition will be less fierce, possibly French instead of German, in which case we may expect fair trading instead of subsidized dumping.

Plants Devastated

Belgium has been so devastated by war, her industrial plants demolished and machinery stolen and her mines so damaged that it will take some time before she can approximately supply her own domestic needs, to say nothing of export.

Having looked at European conditions, let us turn to:

Canada.—In Canada we produced one million tons in 1913. Each of the four large steel companies very largely increased their steel producing capacity to supply the urgent demands for munition purposes during the war, and taking into account the electric steel and cast steel production which came into existence almost entirely owing to war demands. Canada had a capacity of one and a half million tons in 1917, an increase of 50 per cent. and additions have been made since that date.

United States.—Without going into details, the facts I have set forth in regard to Canada have been duplicated in the neighboring country to the south.

Marvellous Results

The increased production of steel in Canada as outlined is representative of a great many other goods manufactured in Canada. When the call came to produce we accomplished somewhat marvellous results. More headway was made in four years, due to the necessity of war, than might have taken place in a much longer period under peace conditions. These industries are an asset to this country and every citizen a shareholder, either by direct or indirect interest, and you as distributors of the goods, together with we manufacturers representing the makers of them, are in reality the Board of Directors who must devise a means of operating them in the interest of Canada.

Let us scan the field of our operations.

Fundamentally our basis is sound. We have a wonderful future before us to develop this great heritage of territory—rich in natural products of the mine, forest and waters—a soil capable of creating a great harvest of wealth—a climate that produces both vigorous crops and manhood—an intelligent, peaceful and contented people.

Future Expansion

Our future expansion will soon absorb our present productive ability and a great deal more, but at the immediate moment there is a temporary halt in our business affairs that calls for our united attention and co-operation of effort to start moving smoothly again.

What is being done to bring this about?

England was such a large importer from enemy countries that her decision to make more goods at home will assist her materially. Her Government two years ago appointed what was known as "The Engineering Trades Committee of the Ministry of Reconstruction" to investigate and compile a list of articles which were either not made in the United Kingdom before the war, but were imported or were made in the United Kingdom but in insufficient quantities. This committee was subdivided into fifteen branch committees dealing with different groups of articles and the services of some one hundred and fifty leading manufacturers were drawn upon and a very valuable report of recommendations has just been issued.

Export Markets

It is well known that similar committees were established to deal with export markets, which are known as trade parliaments, and steps taken to immediately proceed to business when hostilities ceased. Her control of shipping and ocean rates will give her advantages in this respect.

As a further protection to her home market and to provide work for her returning soldiers she has within the past few days declared an embargo against practically all imports except under special license and in this respect she has quite outclassed all other countries in a practical method of solving this question.

In the United States where the Sherman Anti-Trust law prohibits anything in the nature of trade agreements, special legislation has been enacted under the Webb law that permits trade co-operation in regard to export business.

Suggest Conference

In regard to domestic business, fixed Government prices were adapted as a war measure and were terminated December 31st. An application by the American Iron and Steel Institute to continue them as a stabilizing influence was refused, but during the past week, Secretary of Commerce William C. Redfield has announced a plan "whereby a committee should be called into conference representing all the basic industries to examine conditions in industry with a view of formulating a scale of prices at which both the Government and public would be justified in buying freely and at which manufacturers would be willing to sell with a view of maintaining or restoring business activities to a full volume." It is understood Secretary of the Treasury Glass has cabled President Wilson supporting Secretary Redfield's plan as affecting the coming Victory Loan and the President's answer is now being awaited.

The Canadian Government have appointed a Canadian mission in Europe with headquarters in London, who will present Canada's claims for business and use their influence in bringing Canadian manufacturers and European purchasers together.

Extending Credits

They are also extending credits to devastated countries to facilitate the purchasing of goods in Canada.

With reference to our domestic business. No action has been taken at Ottawa corresponding with that of England in permitting importations into this country by licenses only, nor have we as yet learned of any similar proposal to the plan of Senator Redfield in the United States with reference to stabilizing of prices.

An Acute Question

Ottawa has arranged large orders for rails, track fastenings, locomotives and cars for the several Canadian railways. Large expenditures are contemplated for public works, good roads and similar work and the question now arises, "What are both the Canadian Manufacturers and Wholesale and Retail Distributors Going to Do?" Are they going to buy Canadian made goods, which will employ Canadian labor and keep their money in Canada to further circulate and produce new business, or are they going to continue to import foreign goods and help to give employment to the labor and manufacturing plants of some other country? We can well afford to eliminate any discussion of what has been done in the past, or why. Whatever the cause, the bald, naked necessity of the present to give employment to the citizens of this country and our presently returning soldiers, in short our "Commercial Self Preservation" calls on us, without admitting the possibility of any other decision, to buy and handle goods made in this country to the limit of every man and woman's power, and you gentlemen should unreservedly pledge yourselves to this policy during this conference. Place your decision on record and advertise it from one end of this country to the other as an example for others to follow.

Exchange so High

Stop sending $102 of good Canadian money to the States to pay for each $100 of goods you buy. New York exchange has been as high as 3 per cent. It is now 2 per cent., but may again rise to 3 per cent., or higher, if we do not purchase less goods there, and thus bring about a more favorable trade balance in this country.

Do you realize that if we band together to do this we can largely solve the question of keeping our men employed and our business houses and factories reasonably busy at this time?

Unemployment from the manufacturers' and merchants' standpoint spells "restricted business." Restricted business means a higher cost in both the production and distribution of goods and a narrowing or even a disappearing of profit.

To the employee, no matter what his occupation or station in life, absence of work

means that he ceases to earn the wherewithal to feed, clothe and take care of his family, the fundamental purposes for which as head of the family he is responsible. Wages are essential to existence and the absence of the weekly pay does not take long to produce unrest as it is called, followed by a demand for employment and which we must do everything possible to supply.

Time for Consultation

There may be justification for criticism in regard to dissatisfaction and strikes in time of plenty but when it comes down to trade conditions as at the present time, caused by no fault of either the employer or employed, it is time for a consultation to diagnose the situation seriously and call on every source of possible assistance to provide a remedy, and no one can escape the personal responsibility to play his part to the full. Our fighting men have proved their metal, our generals have led their forces to a successful issue, and I say if our Canadian citizens will do their part in the same spirit, through the whole ranks of manufacturers, consumers and distributors of Canadian products, the industrial forces, both employers and workmen, will put forth efforts that will result in Canadian commerce taking on life to a degree that will provide employment and build up business prosperity and confidence.

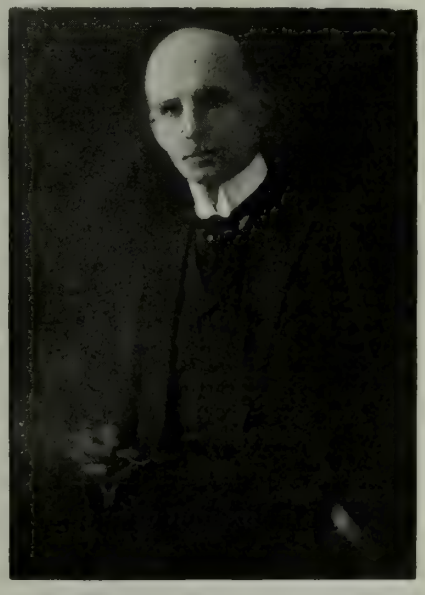
What we want is to kindle the necessary effort to awaken confidence and co-operation in ourselves. Use the services of the Government public men, so-called captains of industry and any other means available, but above and beyond all let us get into the game ourselves.

THE GLASS SITUATION

Address by Mr. J. E. Harrison, Canadian Manager, Pilkington Brothers, Ltd., Thorold, Ontario.

I DESIRE to thank your executive committee and secretary for the honor of being invited to address this Convention on the subject of "The Glass Situation."

I would first of all refer to the prospects of demand for the present year, which question affects the retail hardware dealer. It is generally agreed that there is a very serious shortage of dwelling houses, particularly of the artisan class, throughout the Dominion, owing to the cessation of building operations during the last two or three years. The Government of our own province was alert to the necessity of encouraging house-building and have recently introduced legislation whereby assistance will be afforded to small investors in the form of loans, at a low rate of interest, to enable them to build homes. Numerous other projected buildings, public and otherwise, have been held up by the authorities and owners awaiting the successful conclusion of the war, and reports from various points indicate that many of these will be proceeded with in the spring. In fact large contractors already report enquiries heavier than usual. Therefore, I think, all things considered, a feeling of optimism should prevail in the building and kindred trades.



Hard To Forecast

As in the case of other commodities, it is difficult to forecast what is likely to take place with regard to supplies and prices of glass in the current year, owing to the peculiar conditions which will prevail during the period of readjustment and reconstruction. However, I propose to analyze briefly the situation according to reports emanating from different countries, confining my remarks chiefly to window glass, which, of course, is the kind the retail hardware trade is most interested in.

Until August, 1914, Canada drew the bulk of her supplies of glass from England and Belgium, and a part of the demand was met by the output of our own factory in Canada, which, by the way, commenced operations in May, 1914, but on the outbreak of war supplies from England and Belgium were quickly cut off, and since that time the requirements of this market have been, and continue to be, supplied by the many United States manufacturers and the output of our own plant at Thorold, Ontario.

How About Supplies

Doubtless the foremost question in your minds is: WHEN WILL SUPPLIES FROM ENGLAND AND OTHER EUROPEAN COUNTRIES AGAIN BE AVAILABLE? I have no official information on this point, but reports and despatches during the last three months appear to confirm the fact that the equipment of practically all the coal mines in Belgium and the North of France, after

J. E. HARRISON
Canadian Manager, Pilkington Bros., Ltd., Thorold, Ont.

being used by the enemy during the war for his own purposes, was deliberately destroyed by the German armies at the time of the final retreat, and, worst of all, the mines were also flooded. As you may know, producer-gas plays a very important part in the manufacture of glass, being used in the melting of the ingredients and in the flattening and annealing processes. Many of the railways and steel works in those countries were also completely destroyed by the Germans, after they had taken away the metal and machinery. It is, therefore, safe to assume that it will take many months, perhaps a year or two, to get the coal mines and the other industries to which I have referred in full operation again. In the meantime Belgium and France will have to look to other countries for coal supplies.

The Labor Problem

Apart from the shortage of coal required for gas-making, the labor situation will cause concern for some time to come. The manufacture of glass calls for highly skilled labor, most of the workers serving from four to seven years apprenticeship before becoming proficient. A large number of Belgian glass makers—and this also applies to England—have been killed or disabled in the war, and during these four years there have been no apprentices in training. It may be of interest to you to know that the firm I represent in Canada has a factory in Maubeuge, on the Northern border of France, and I have news that this was used as gun-repairing shops by the Germans and that every piece of machinery was plundered or destroyed by the enemy. This condition will doubtless apply to many other factories which were all practically within the war zone for the entire period of hostilities. The conclusion is that a long time will elapse before the output is sufficient to enable these countries to export to any extent. Another feature deserving of note is the tremendous demand there will be for glass in re-building the devastated areas of the war-stricken countries of Europe.

The Chief Factors

These appear to me to be the chief factors in considering European supplies. If my observations are correct, then it would seem that Canada cannot look for large importations of glass from Europe for quite a long period, which means that it will be necessary to continue to draw your supplies from the United States and Canadian factories.

About Prices

With regard to prices, I cannot do better than quote for your guidance extracts from a recent address by the sales manager of the largest producer of window glass in the United States. His statement was:

"The combined window glass output of the entire industry for the year 1918 was approximately 275,000,000 sq. ft., as against a production of about twice that amount for 1917. The export demand for the various world's markets was equal to that of the year previous; it would have been much larger if shipping facilities had been more plentiful.

"The year closes with virtually no stock in the possession of the manufacturer and very small stocks located in distributors' warehouses or among the large consumers.

Conditions Sound

"Conditions are fundamentally sound. The world's markets are all short of stocks. Supplies have been depleted. Active business awaits the American manufacturers in the overseas markets.

"Conditions throughout the home markets are equally promising. After the business interests of this country adjust themselves to a normal peace level building operations will be resumed, including those that were under way, but subsequently deferred as a war measure, as well as new buildings that are badly needed in various sections of the country.

Expects Big Demand

"A careful survey of the situation warrants the belief that, after the dull intervening period of readjustment is safely passed, the demand for window glass for all the world's markets will be the greatest in the history of the industry.

"The cost of production continues high. There is no recession in the price of labor, fuel, or materials. Market prices for glass are firm and unchanged and are ruling on the same level as those existing since last August, when the last price-change occurred."

This gentleman's views are also confirmed in a bulletin to the trade issued by a large firm of glass brokers, who are the distributing agents for a number of the smaller manufacturing plants in that country.

Increase in Wages

Since the statements to which I have referred were made the skilled glass workers have received a 10 per cent. increase in wages. Glass manufacturers, including ourselves, have contracted for supplies of materials at high prices. The United States factories will continue on the same basis of output as during 1918, that is 50 per cent. of normal. In the case of our factory in Canada a large number of skilled workers are still in the army, consequently we are operating with a proportion of less efficient men, which of course seriously affects our output; materials and coal are contracted for at war-time prices and there is every sign of the present rates of wages being maintained. You will, therefore, see that glass is going to cost more to manufacture in 1919 than it did in 1918, and as buyers recognized the necessity for

the high prices of last year I do not see how their expectations of lower prices this year can be justified.

Will Be Maintained

In conclusion, while I think that prices have probably now reached the peak, the deduction to be drawn from the conditions as outlined is that prices will be maintained at about their present level for some time to come, especially in view of the fact that the stocks in manufacturers' and jobbers' warehouses, generally speaking, are lower than ever before known.

To help you to size up the European situation I may say that it was officially announced last week that the French Government had just placed an order for 10,000,000 feet, that is 100,000 hundred feet boxes, of window glass with the United States manufacturers. From this it looks as though there was little glass making contemplated in Belgium or France in the immediate future.

ELECTRICAL SUPPLIES FOR THE RETAIL TRADE

Address by A. S. Edgar, Canadian General Electric Co., Toronto

MR. President and members of the Ontario Retail Hardware and Stove Dealers' Association:

When your secretary requested that I should give a short talk on the subject of "Electrical Supplies for the Retail Hardware Trade" he asked that I embody in my remarks views as to the market situation and the prospects for the future. I think I am safe in saying that there are very few of us who would care to commit ourselves to any definite answer, in fact no two people seem to have exactly the same ideas on this much-discussed subject.

Everyone knows without being told that the world is seriously short of food, or at least may parts of it are. How about the other commodities, such as electrical supplies, which may be considered an item in the cost of living? Will not electrical or hardware lines decline to pre-war levels? I am afraid the answer is in the negative. I think we will all admit that prices will and should go down, in the course of time, but we will be seriously disappointed if we expect an immediate return to normal pre-war conditions.

Wages a Big Factor

We are apt to under-estimate the item of wages in the cost of any commodity. Any manufacturer will tell you that wages, to a large degree, are the determining factor in the cost of raw materials, and also a like factor in the cost of the finished product. Therefore, as long as wages remain as they are to-day, there is very little likelihood of any serious reduction in the cost of commodities.

The high cost of living has naturally influenced, to a large extent, the cost of wages, and as long as the serious shortage of food exists in other countries, the cost of living will not appreciably moderate.

If we can be guided by statistics, we can take counsel from the fact that it was two or three years after the Civil War ended before there was any appreciable drop in the prices of commodities in general. How near Canada will approach conditions of the Civil War remains to be seen.

We must not worry too much over the future course of prices if we are all to partake of the benefits derived from a period of prosperity which we feel is to follow in the near future of this country.

Shock Absorber

Public necessity is a wonderful shock absorber in the times of business transition and electrical service is just as much a peace essential as a war requirement. The manufacturers of electrical apparatus and appliances are not hesitating but are forging ahead, in the belief that general prosperity is assured. Therefore, place your order today if your stock shows signs of running low and do not wait in the timid uncertainty, which you have had since the armistice was signed. Probably you could turn over your new investment two or three times before you lose a dollar, and make enough en route to show a healthy profit.

We must discard the feeling of uncertainty and brush aside all thoughts of pessimism, for if you analyze carefully the situation of today, you have every encouragement to be optimistic. Money that has been in circulation as a result of the war contracts, will naturally now be diverted through other channels. We should aim, therefore, to go ahead immediately and endeavor to inspire confidence and prepare for the biggest year we have ever had. If everybody does this there will be no question as to the result.

The general subject of selling electrical supplies through the hardware trade, has been given a great deal of thought, not only by the distributing companies but by the hardware dealers themselves, and it is now quite evident that every manufacturer of electrical merchandise realizes that the hardware store is fast becoming an attractive outlet for the more staple electrical supplies.

Both Are Right

The question has been asked, time and time again—should the hardware store sell electrical merchandise? The electrical dealers answer "no" and the hardware dealer says "we must." And then both sides proceed with arguments and incidents to prove whatever they desire. As a matter of fact, both are wrong and both are right. It is true that some hardware dealers have carried on their electrical merchandising activities in a manner prejudicial to the electrical dealer's interest. It is also true that in many communities electrical merchandising would have become virtually stagnant if it were not for the aggressiveness of the central station and the hardware dealer.

The whole matter, as it seems to me, simmers down to this: There is no valid reason why the hardware store should not merchandise electrical appliances and other supplies provided that they deliver with each piece of electrical merchandise sold, a certain amount of electrical knowledge. The electrical merchant *has* that knowledge and if the hardware man expects to compete with him, both he and his salesmen must acquire sufficient knowledge of electrical supplies to intelligently conduct the electrical end of his business. For instance a hardware dealer sells a toaster. He tells the purchaser it can be operated for 2c a day, and the statement is believed. The purchaser takes his toaster home and places it in continuous operation to heat a small chicken coop, with the result that the following month his light bill is $32.00. Many instances might be quoted where electrical supplies are merchandised in this way by dealers unfamiliar with the appliances or the cost of operation, but if the hardware dealer would take some pains to inform himself and his salesmen regarding the more staple electrical supplies, there is no doubt that the hardware dealer with his advanced selling methods would become a big factor in the distribution of the more staple electrical supplies.

Was Not Familiar

I had occasion recently to go into a hardware store to purchase some fuse plugs and esked the clerk for several ten ampere plugs. I was informed that they did not have that particular size in stock but they had 30 ampere which would answer the purpose equally as well. When I questioned the clerk further, I found that he had no knowledge of the service required of these fuse plugs, other than they would put my lighting system back into commission. Most of us know the capacity of the fuse plug used is very important as it acts as a safety valve for trouble on the circuit, and if a 30 ampere plug is given to a customer ignorant of his requirements, where a five ampere plug was the proper thing to use, the customer loses the value of his safety valve, and is liable to have serious trouble or possibly a fire as the result. Therefore, as I have already stated, it is very important that the hardware dealer have at least a working knowledge of the more staple electrical supplies which he is called upon to supply to his customers.

During the period of the war the sale of electrical appliances in general has been seriously curtailed, due to lack of available power, but conditions have now entirely changed and the central stations, for the most part, will have plenty of power for distribution and their efforts to distribute this power will naturally stimulate the sale of electrical appliances.

An Attractive Outlet

As I have already stated the hardware store should prove an attractive outlet for the more staple electrical supplies and the dealer is sure to find a ready market for these lines, particularly the many labor-saving devices that are now offered for the household use. Perhaps it would be well to enumerate a few of the more staple lines of electrical appliances and supplies which can be sold by the dealer to the public with a minimum of electrical knowledge:

Incandescent lamps, rubber-covered wire, flexible cords, wiring devices such as fuses, plugs, sockets, receptacles, rosettes, etc., small household motors, fan motors, vacuum cleaners, washing machines, electrical cooking appliances such as toasters, coffee percolators, grills, etc., electric flat irons, electric air heaters, dry batteries, flashlights, etc.

Would Pay Dealer

It would pay the hardware dealer to get in touch with the manufacturers of small motors and electrically-operated devices used in the home. This is a time of great economy. There are many thousands of electrically-driven labor-saving devices being sold each year, and this number is increasing in spite of the increased cost of living, due solely to the fact that they are reliable labor-savers. It will be found that the sale of each new appliance, rather than exhausting the field, creates additional customers by practical education. It is to be hoped that the hardware dealer who undertakes the selling of electrical merchandise will himself become thoroughly educated to the use and operation of the many staple lines which he can handle to advantage, as a correct knowledge of these lines is absolutely essential to assure the success of his merchandising efforts in this direction.

THE LINSEED OIL SITUATION

Address by A. C. McQuaig, Manager of the Dominion Linseed Oil Company, Montreal.

ON behalf of the principals and shareholders of our company, I wish to thank your association for the privilege of addressing you for a few minutes, and I trust it is not conflicting with the subject upon which I am to address you, when first of all we desire to express our gratitude for the termination of the war, and second, that in this reconstruction period, Canada will forge ahead so that our returned soldiers shall have no grievance, nor shall we have any great period of unemployment.

Our Government at Ottawa has perhaps not done all it could possibly do to relieve

the situation, as we see it, but it is surprising that although they have outlined several programs, our various cities and municipalities are slow to respond. I refer, gentlemen, to the scheme of providing houses. If this were more closely taken in hand, it would facilitate much work, and at the same time improve business generally.

Exports of Oil

The subject, namely, the linseed oil situation, can perhaps be more easily disposed of this year than in any former years, not because of present prices so much as because of the conditions that now exist. It no doubt will surprise the majority of the gentlemen present that it is the first time in the experience of our company, which has been in business for fifty-five years, that we are able to export linseed oil to all countries of the world, and consequently from an economical standpoint Canada to-day is being favored with the lowest prices for linseed oil in the world, so that it must be that if other commodities can be produced at an equivalent cost to other countries, we must continue to become a creditor nation and bound in a short period of time to expand in every respect.

Will Not Alter

As far as we can see, we think this situation will not alter for some months to come, and excepting for a few fluctuations in market values, we cannot see that the hardware trade can look for very much more recession in values.

Important as the foregoing statement may be, I think I have also another very important announcement to make. While it does not directly benefit the hardware men in Eastern Canada, it will, I think, affect their hardware brothers in Western Canada. I refer to the opening by our company of an oil mill at St. Boniface, Manitoba. This will mean a more uniform price for linseed oil from the Pacific Coast to the Atlantic, and I feel confident in saying that nothing will be left undone to supply a quality of oil second to none.

Nothing Definite

It is an old saying that anybody's guess is liable to be correct as to what linseed oil prices will be. I assure you, gentlemen, it is not within my province to make any prediction. However, it may not be amiss to give a few facts that are recorded by our statistical department at Ottawa. These are that the last season's linseed crop of Canada was about six million bushels; the American crop was about fifteen million bushels; a total of the two countries of twenty-one million bushels. We understand the Argentine crop is in the neighborhood of 40,000,000 bushels, and that in India they have on hand large surpluses from the crop of 1917 and 1918, and we hear that the present crop is favorable. As to the supply in other parts of the world, it is perhaps a mere guess, and anyhow, since there is no means of transportation, it is not well for us to consider them. But it does appear, with the uncertainty existing, and with no knowledge of the ultimate results of the Peace Conference, that available supplies that we have mentioned will fully satisfy all requirements until the new crops arrive. Owing to shipping conditions, supplies cannot be delivered to the respective centres more rapidly than required, and consequently any recession must be gradual.

Exceptional Quality

I do not think that we should overlook the fact that in the last five years the linseed crops, although not large, gave seed of exceptional quality and as a result we have been able to market a high quality product in the oil.

We all know that it is going to be some time before shipping conditions, so far as vessels are concerned, will be restored to normal, and during this period at least, Canada will enjoy low prices, but it is regrettable that since Canada has no mercantile marine of her own, our exports are limited, which in turn means production may of necessity be curtailed.

THE MANUFACTURE AND USE OF INSECTICIDE

Address by Shirley P. Newton, Chief Chemist of the Canada Paint Co., Montreal.

THE use of insecticides to protect the nation's crops from destruction by insects, is a comparatively recent development, and even to-day few people outside of those actively engaged in the manufacture, distribution, and use, realize the vital part insecticides play, not only in saving agricultural produce

SHIRLEY P. NEWTON
Chief Chemist, Canada Paint Co., Montreal.

but also in actually increasing the quantity of it. The experts of the Dominion Department of Agriculture estimate that Canada suffers from the ravages of insect pests an annual loss of one hundred million dollars, all of which would be preventable by proper spraying with insecticides and fungicides. As an example of the increased yield to be obtained by spraying, the Department of Agriculture is authority for the statement that spraying increases the quantity of apples by at least 80 per cent., and the value per barrel of the average run of the tree by 70 per cent. In contrast with this greatly increased financial return is the fact that the cost of making four sprayings of the orchard per season amounts to but 16 cents per barrel of apples produced.

A demonstration on a small scale of the manner in which a typical product, namely, arsenate of lead, is precipitated from the chemicals used in its manufacture, was given by Mr. Newton. This experiment showed the care which must be taken in order to produce insecticides of high quality, by making from the same materials both a high grade and an inferior arsenate of lead.

Combine Chemicals

Coming back to the manufacture of insecticides as carried out in the factory he said that, in general, they are made in a manner similar to that used in making arsenate of lead—that is, by the combination of chemicals in solution to form a solid matter which can be filtered out of the water in which it is contained. In practice, 1,000 to 2,000 lbs. is made at one batch in tanks holding several thousand gallons, and equipped with mechanical stirrers. After being formed, the solid matter is pumped into filter presses, which separate it from the largest part of the water. The material comes from the presses in cakes which, nevertheless, still contain considerable water. These cakes are put into a kiln and after they have become thoroughly dry they are run through a pulverizer which grinds them to an impalpable powder. In some cases where extreme fineness is desired the material is air-floated after grinding.

Many Difficulties

In the past the production of poisonous insecticides was attended by some difficulties on account of the workmen being affected by dust and vapors and experiencing periods of ill-health. A few years ago it was quite common practice in plants making such materials, to be obliged to hire men every day to the extent of about half of the working force to replace those who were quitting. The rapid increase in the demand for spraying materials and the consequent growth of the business, has enabled us to introduce sanitary appliances which reduce to a minimum the danger to the workman. We now safeguard his welfare to such an extent that in operating the largest insecticide plant in Canada for a period of four months, we have not had a single case of occupational sickness reported.

Are Grouped

Turning to another phase of the subject, the use of insecticides and fungicides, we find that they are usually classified according to the particular group of pests they are used to combat. The latter are for practical purposes placed in three classes—chewing insects, sucking insects and fungi. Those of you who have seen the rapidity with which the leaves are stripped from a potato field by a brood of young potato bugs, or have seen tent caterpillars at work, will need no explanation of the term "Chewing Insects." Against these we use a poison such as Paris green, arsenate of lead, or kalcikill, the latter being a light gravity arsenate of lime. "Sucking insects" are those which puncture the bark of plants and trees, and suck the sap, plant lice or aphis being typical of this class. Stomach poisons are worthless for combating these, so we resort to materials which are caustic in their action and kill by contact, such as lime sulphur.

Are Not Insects

Fungi, of course, are not insects, but rather parasite growths such as mildew and potato blight. To fight these still another class of materials called fungicides is required, and the substances which have been found most efficient for this work are bordeaux mixture and sulphur, or sulphur compounds. When it is necessary to use fungicides, they are almost always applied together with a poisonous spray to kill chewing insects, thus killing "two birds with one stone," to be exact two bugs with one spray gun. This practice has led us to make up combination sprays consisting of a poison mixed bordeaux mixture or sulphur, which are effective against all three of the previously mentioned groups of pests, and which save time and labor on the part of the user by obviating the necessity of his mixing the separate ingredients. Sprayide, a combination of arsenate of lead and bordeaux mixture in the dry form is especially adapted to small garden work. Bugocide for potatoes, and dry dusting mixtures composed of arsenate of lead and superfine sulphur, are examples of such combination sprays. Dry dusting mixtures should be of great interest in this locality, as they

are particularly suited for the dry spraying beech trees.

Fake Insecticides

I would like to bring home to everyone of you here the fact that there are a number of fake insecticides on the Canadian market, products which are dangerous, products which in practice have actually burned the leaves off the plants or trees to which they were applied. Then there are worthless concoctions about which extravagant claims are being made. For instance we came across one preparation which was a liquid sold in four-ounce bottles and it was claimed for it that four ounces would do the work of two pounds of Paris green. A chemical analysis showed that the liquid contained eighty per cent. of water, and we were forced to conclude that the other twenty per cent. must have been mighty powerful stuff. In the States there is a national law governing the purity of insecticides, but unfortunately Canada has not yet taken steps to protect the consumer from unscrupulous manufacturers. How then can the dealer safeguard himself and his customers? The answer is: By buying only from insecticide manufacturers of established reputation; firms whose names mean something to you when you read them on a package.

Outlook Promising

In closing let me say that the future outlook of the insecticide business is most promising. The use of insecticides is becoming more widespread each year, with a consequent increase in the quantity consumed. It is to be regretted that figures are not available showing the total amount used annually in the Dominion; but it is safe to assume that the expansion of the business, as a whole, is in some degree comparable with the rapidly increasing output of our own plant. To use the last four years as an illustration, compared to 1915, 1916 showed an increase of one hundred and eighty per cent., 1917 three hundred per cent., and 1918 five hundred per cent. Canadian manufacturers have kept pace with the growing demand for insecticides and have built up a substantial industry, which has nothing to fear from honest competition. We would urge you, however, not to allow the American makers to use Canada as a dumping ground for their surplus products, and their off-standard goods which they are not permitted to sell at home. Buy of reputable Canadian manufacturers, and keep our Canadian dollars working for Canadian industries.

A SHORT TALK ON DRY COLORS

Address by Chester A. Holkesvig, Superintendent, Dry Color Plant, McArthur-Irwin Ltd., Montreal.

CHESTER A. Holkesvig, superintendent Dry Color Plant, McArthur, Irwin Ltd., Montreal, delivered an instructive address on dry colors, which gave many retailers an insight into this end of the business, they never before possessed. Mr. Holkesvig covered the dry color situation as follows:

In these days of miracles when old orders and old ideas are being swept away and replaced with bigger, better and brighter policies, we are apt to see only the big effects that occupy the centre of the stage. But each of us can see some new change in his particular sphere of action, which calls for different methods and higher ideals. The dry color business is no exception in this respect. Ever since getting into this dry color game, I have looked in vain for some popular articles on the manufacture of color, in magazines, technical journals or talks before such conventions as this. It seems as though the public had an aversion to it, probably thinking it was a "dry" subject, but in these days of provincial, national and even talked of international prohibition, it seems quite natural for me to be in Hamilton, Ont., talking to you about "Dry" Colors. Down in Montreal we dare not yet raise our voices.

It is a fact that although paint and paint products have been much discussed and given great publicity, the last ten years, the subjects receiving most attention have been white pigments, such as white and sublimed lead, zinc oxide, barytes, clay, etc., oils such as linseed, china, wood, and soya bean and thinners such as turpentine and petroleum spirits. Dry color and varnishes although equally important in the paint industry have been more or less shrouded in the mystery of silence. But I am sure that you men are particularly keen on increasing your knowledge of any of the many products you sell, for that makes selling easier and that after all is the big idea behind this convention. For that reason I will attempt to demonstrate and explain the fundamental principles of the art of making dry colors.

The manufacture of color is controlled absolutely by the laws of chemistry and physics. Our raw materials are the simple chemical compounds that you are familiar with such as muriatic acid, vitriol, litharge, white lead, bichrome and soda ash, and in our processes we combine these materials into more complex chemical compounds that are known to the trade as chrome yellow, Chinese blue, brunswick green, and fast red, but which are definite chemical compounds with such imposing technical names as lead chromate, ferri-ferro cyanide and metanitro pera toluidine.

By making solutions of the simple chemicals either in water or dilute acid and mixing these solutions in certain definite and weighed proportions, we get as our product a precipitate, a white, yellow or blue as wanted. This precipitate when washed thoroughly with pure water, the water drained off and the pulp pressed in filter presses, dried and ground, is the color that is used in industry.

Demonstration Here of Making Yellows. Blues and Greens

These colors which I have prepared before you are spoken of as toners or chemically pure colors. Color can be roughly divided into two groups. Those that are made without the addition of a base and those that are struck on a base. These are generally referred to as pure and reduced colors, but the term "pure" is misleading if it implies that reduced colors are "impure." No one connected with the handling of dry color should allow himself to think for an instant that a color struck on a base like barytes, clay or whiting is a "doped" product, for such is not the case. Dry color has many different uses outside of the field of paints, and in many of these, the presence of an extender is not needed or desirable. An illustration of such a use is in the manufacture of printing inks, where tinting strength is one of the most important qualities and where the final product on which the color appears does not have to withstand the effects of the weather. But we must know that a pure, dry color is usually a soft, delicate substance which has in itself no wearing qualities to withstand the destructive effects of heat and cold, rain, wind and snow. It is, therefore, to reinforce these pigments that we include in our formulae such permanent weather resisting materials as barytes, talc, silex, gypsum and China clay. But you might say "why don't you use such accredited paint materials as white lead or zinc?" The answer is simply that our tastes in color include to a large extent the darker shades of green, blue, red and yellow, and it is only too evident that the addition of such opaque white substances as lead and zinc would give us only the light greens and yellows, sky blues and pinks. It is not only the permanency of the reducers that recommends them, but it is their transparency as well. And another fortunate fact concerning them is that they occur so abundantly in nature that they are relatively low in price. It is a pleasure for me to say that the dry color business is to-day almost, without exception, conducted by men who believe only in the honest representation of their products and base their selling prices on production costs so that the consumer gets the direct benefit of any saving effected by the use of these extenders or bases.

CHESTER A. HOLKESVIG

Superintendent Dry Color Plant, McArthur, Irwin Ltd., Montreal, who delivered an address on dry colors before convention at Hamilton

And there is another thought to take away with you in this connection. The reduced colors are made with exactly as much care as are the pure toners. They are not the result of the haphazard mixing of different materials in the dry state, but are manufactured products from a definite formula, which time and experience has proved to be the best combination for the purpose.

Aside from these chemical colors which we have been considering, there are other colors which you are perhaps more familiar with, such as, ochres, siennas, umbers and oxides. These are natural earth pigments that usually require only mining, burning and grinding to make them marketable. Time will not permit a discussion of these interesting materials.

From time immemorial man has endeavored to brighten and cheer his environment by the use of colors. An ancient Egyptian's idea of a good time was to die and lie in peace as a mummy in a gorgeously decorated and highly painted casket. In one respect human nature is much the same to-day in that we still demand the colorful surrounding in our good times (painting the town red being a favorite diversion), but to-day we insist upon being very much alive in this enjoyment.

But while color is considered primarily as a decorative medium it is nevertheless a fact that certain colored pigments have intrinsic value as preservatives and inhibitors of decay and corrosion. That is why most all ships are primed with red lead and structural iron work is painted with chrome colors or chromatized pigments. Also it has been pretty well demonstrated that a house painted with a tint or solid color will wear longer and present a better surface for repainting than a straight white proposition, all other conditions being equal.

As hardware merchants, you gentlemen, are only indirectly interested in some of the uses of dry colors, but aside from the big demand of the paint grinders, who use large quantities for tinting their ready mixed paints and specialties, there are other users of dry color that consume a considerable percentage of the production. The manufacturer of bonds, bank-notes, stamps, etc., requires tons of color per year. The manufacturer of printing inks requires an amazing amount of the finest lakes and toners to prepare the inks that are used so much to-day in illustrated advertising, magazines, etc. The rubber manufacturer re-

quires color for meeting the demands of his trade in his product. The linoleum and oil-cloth industry need a variety of colors for their articles. As a matter of fact, there are very few articles of commerce that do not require dry color or closely allied substances before they are considered marketable. With this in mind it is easy to understand that the consumption of dry color in Canada amounts to several million pounds per year.

Such a volume of business in a product that is as delicate as color can only be profitably conducted when controlled during every step of its manufacture by examination and tests. To do this all leading color houses have a fully equipped laboratory and staff of technical men who test the raw materials used, test every color, through each step in its process and pass on the product before it leaves the plant. This insures uniformity of shade, exture and strength so that the consumer can duplicate his order for dry color with the same assurance of getting an identical product as he does when ordering ready mixed paint.

The product of a dry color factory comes into your store in several forms, but principally as an ingredient of the ready mixed paints and colors in oil that you carry in stock. There is also a demand for color in the dry form and most manufacturers put out a line of goods to meet this demand, in small sized packages. Other dealers prefer to buy color in bulk and I can remember when a boy, while working in a small town drug store, of filling orders for 5 and 10c worth of chrome green, burnt siennas or Chinese blue.

In closing these remarks I might add that along with a lot of other silly ideas that this war has knocked out of our heads, is the one that we here in Canada were dependent on Germany, England or the United States for our dry colors. It has been fully demonstrated that we can produce goods that are equal in merit in every respect to the best product of any other country. And it will interest you, I know, to hear that our Victory bonds, bank-notes, stamps, posters and Canadian-made paints, linoleums and rubber goods are made with Canadian color. I am sure that the dry color industry in Canada will thrive and become as helpful a business in this country as the sessions of this convention have proved the Hardware trade to be.

THE WHOLESALER'S VIEWPOINT

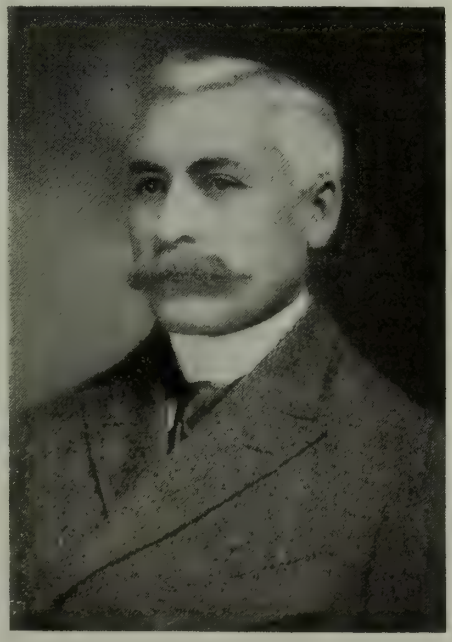
Address by C. A. Whitwam, of the Hobbs Hardware Co., London, Ont., Vice-President of the Canadian Wholesale Hard ware Association.

I AM indeed pleased to meet you all again at this, the annual meeting of your association. I am, and always have been, a firm believer in organized associations. We have just had one of the most striking examples in this way, in the association of the Allies. It is doubtful if the war would ever have been won by them if it had not been for their unity of action, and what is good for nations is also good for the parts that make up the nation, but as this is not the topic assigned to me I will get back to my subject, namely, the Hardware Business from the Wholesaler's Viewpoint.

This is rather a broad subject and doubtless all will not look at it from the same viewpoint, consequently will form probably very widely different opinions, and right here, let me remark, that in talking with a gentleman a short time ago his version was this, that one man's guess was as good as another's at this juncture. Well, be that as it may, we all form our own ideas, from what we read, what we hear and what we see, taken in comparison with events that have gone before.

A Different Situation

But this brings us to uncertain ground, because the situation that prevails now is immensely different from anything in the past. There never has been a war of such magnitude, waged by such gigantic forces on either side, where the first aim of each nation was to win the war no matter what the cost, so, with probably 30 million of men taken away from their regular calling and everything transferred to a war basis, no wonder that goods were scarce and consequently high priced. Now then as to the future. Had the war been of short duration, although prices might have, and no doubt would have, been high, still there would have been great quantities of goods in reserve; but the duration of the war and the intensity of it have cleaned the world of manufactured stock, and stocks are bare right from the most crude articles, such as ore and coal. The smelter, the rolling and sheet mills and so on down through the different lines, such as builders' and other hardware, glass and paints, farming tools and cutlery, clocks and silverware, all are in the same shape and it will take many months before old orders can be cleaned up, and while more goods are wanted than can be supplied is it likely that prices will come down?



Are Up Against It

There is also another way to look at the matter and that is this: I believe many manufacturers would very much like to reduce prices, fearing present figures may reduce the output, but here they are up against it. Labor is very high priced, owing doubtless to the high cost of living, and until that is reduced any manufacturer attempting to reduce the price of labor would only be inviting trouble, and we may well ask how long will the cost of living be high. I think we can safely say there will be no reduction to amount to anything until the peoples of Europe are supplied and can to a certain extent feed themselves, then, and not till then, may we expect any redress from the present condition.

Depends On Labor

Of course we will have reduced prices of manufactured goods some time in the future, but to what extent and how soon will depend largely on the amount of labor involved in the production. It is a well-known fact that hardware is practically all labor. After the ore leaves the mines it goes through many processes but all is labor, and to sum the whole thing up it is very doubtful if the raw material in general hardware represents 10 per cent. of the value; all else is labor. Take for instance a single case, which is perhaps extreme, but it will serve to illustrate the case. Bullnose Fence Pliers cost the manufacturer in the United States about 78c dozen for raw material, yet they cost the dealer $15.00 per dozen here, and the manufacturers and jobbers do not realize as large a percentage of profit as in pre-war days, so that should the raw material drop 25 or 50 per cent., which is not likely, it would make very little difference in the price of the finished tool under present labor conditions.

Let me here quote from a letter from John Shaw & Sons, Wolverhampton. They say prices have undergone no material change and figures obtaining to-day are likely to prevail for some time to come.

C. A. WHITWAM

of the Hobbs Hardware Co., London, Ontario.

Not For Many Months

Here is the opinion of one of the largest buying agencies in the United States. This is what they say: "True some uncertainty has existed, especially as to the immediate trend of prices, yet it is probable many months will elapse before there will be any noticeable reduction in the prices of the more finished lines of hardware."

One of the largest manufacturers of ammunition in the U.S.A. states: "So far as can be seen at the present time there is nothing to indicate an early decline. That there is no decline in the cost of labor, nor is there any likelihood that there will be such a decline in the near future."

Here is another from one of the largest manufacturers in the U.S.A. They say: "There is a general expectation that the coming of peace and the consequent release by the Government of priority claims on material will be followed by a sudden drop in prices. The idea is based on a mistaken understanding of the conditions, at least as regards products into which iron and steel largely enter. The demands of the Government did not make the prices of hardware in general, they affected merely the supply by the two factors, viz., cost of raw material and cost of labor, and in our opinion neither of these two factors will be altered for a long time to come, because we have entered upon a period of high speed in industry."

Will Be Slower

Here is another in which they say: "A careful scrutiny of the prices of various metal products shows the readjustment of the metal market is not going to be as rapid as has been presumed. Producers and buyers of metal products are going to do their own reconstructing, they are also going to make the market."

The Nicholson File Co., under date of February 4, issued the following to the jobbing trade: "Under the present conditions there may be a tendency on the part of some houses who fear a drop in prices to make some concession in prices in order to dispose of any surplus stock they may have. We wish, therefore, to say that we have no present intentions of making any change in price."

Not Before July

Some of you may sell sewing machines. This is what the Davis Sewing Machine Co., of Dayton, Ohio, says: "The greatest obstacle that our wholesale customers will have to meet is a feeling on the part of the dealer trade that the prices of all commodities will immediately be lowered. This feeling exists, but fundamental conditions at the present time make lower prices of sewing machines impossible, and prices will not be revised until after July 1st, and there is nothing to indicate that they can be lowered then."

Go On As At Present

This is from an English cutlery manufacturer: "As to any probable changes in prices in the near future, it is unfortunately impossible to say anything at present, as after the armistice was signed, the Government im-

mediately brought in a bill which provides that no war bonuses or higher rates of wages could be interfered with for at least six months after the passing of the bill. For the present, I am afraid we shall have to be content to go on as we are now doing."

Will Be Very Glad

This is a letter from another Sheffield cutlery firm: 'In view of the armistice and the prospect of an early peace, many of our customers are expecting that prices will soon come down, and materials and labor will be cheapened. We shall be very glad when this is the case, but regret to say there is no immediate prospect of this taking place. Further advances have been paid all round to labor and the prices of materials are still at very high figures. The Government have intimated that they will sanction no reduction in wages for a period of six months after the signing of peace, and then this will depend upon the decrease in the cost of living in order to tide over the difficult time of transition. Material prices are still very high and will continue to be controlled for many months ahead, until supplies get more plentiful. We are also informed by the War Office Contracts Department that the Government demands will be as large as ever for a period of at least six months, which will prevent a good deal of work being done for commercial orders. The cutlery trade is being flooded with export orders to be invoiced at current rates ruling at time of dispatch. Manufacturers here hold no stock of either raw materials or manufactured goods, and under these conditions prices are bound to hold up for a very long time as stocks all over the world are nonexistent.

"We regret prices are so high, but the matter is entirely out of our control, and we shall as heretofore do the very best for all our customers and in all cases charge lowest possible prices."

Requires Consideration

Here is another opinion of one of the highest commercial experts. This is how he puts it: "As regards the future, there never was a time when business people should more rigidly guard against thinking that the present conditions are not the result of extraordinary circumstances, nor a time when it was more necessary to make preparation to meet the reaction which is bound sooner or later to come."

Now gentlemen, I have given you the opinion of manufacturers and others, all leaders in their particular lines, and I think their opinions should have some considerable weight and reviewing their opinions should sum it all up as follows: I do not advise speculation or over buying, but be prepared for good honest wants, and as the year progresses our vision will probably be extended so that we may see more clearly ahead of us than we can from this distance.

Does Not Fill Orders

I might say in passing, the present policy of the house I have the honor to represent is to buy carefully and yet to see that stock is as complete as possible, so that orders can be well and promptly filled. We realize that waiting for lower markets does not fill orders, and if orders cannot be filled no money can be made. We believe that the readjustment to lower prices will be long drawn out and for some considerable time prices will be high, though in the long run tending to lower levels.

Gentlemen, I thank you for the attention you have given me, and if the opinions I have been able to gather and present to you will help you to any measure of success I will feel amply repaid, and will conclude by wishing the Ontario Retail Hardware Association harmony and success.

ANOTHER WHOLESALER'S VIEWPOINT

Address by S. H. Alexander of the firm of Wood Alexander and James, Hamilton.

SINCE November 11, the question of business conditions present and future has been talked of and written about from every conceivable angle. It is therefore extremely difficult to suggest anything that has not already beeen mentioned or put forth any ideas not already expressed.

The situation is more than usually beclouded because the world upheaval which has taken place so far transcends in influence and extent any previous happening in the world's history that no adequate precedent has been left to us.

No doubt both manufacturer, wholesaler and retailer are finding business a bit quieter than a year ago, but this is not to be wondered at. We must not forget, however, that we are in business to stay and must, therefore, use our very best ability to keep the wheels of commerce in motion.

No Need For Fright

In considering the future course of business we must not take undue fright at the possible quiet time extending over a month or two. Let us look to the main facts of the case, some of which are: That we in Ontario are located in the most vital part of a country which probably has greater prospects at the present time than any other on earth. With our enormously increased facilities for doing business, our greatly added wealth and many other favorable circumstances, it would appear that nothing could hold us back for very long.

It is quite true that values may have reached their highest point and gradual recessions on very many lines are more than likely, but I am quite convinced that these declines will be very gradual indeed.

Shows Little Change

It is now over three months since the armistice was signed, and notwithstanding the fact that business may have been a shade quieter there have been no reductions other than on lines wherein raw materials represented the greater percentage of the value, and even in these basic materials, the decline has in no case been more than, say, 10 or 12½%. It will be well for us when hearing of these declines to keep in our minds the number of 10 and 12½% increases which went into effect very steadily for more than 4 years, when we all had an opportunity of reaping some advantage.

Keep This in Mind

It should also be borne in mind that we are merchants and if we are to give any dignity to this title, we cannot continue in business without a stock of merchandise. The Rotary Club of which you may or may not have heard has as its motto, "He profits most who serves best." You cannot serve your customer unless you keep your stock up. My own opinion is that both jobber and retailer in order to function properly should keep this idea very prominently before him.

A customer will not appreciate it a bit to drive in five or ten miles to your store to get something which he is ready to use and be told that you are sold out and do not want to buy just now because you think the price may decline. That customer is not only disappointed, but is forced to go to your competitor in the hope that he may procure what he wants. This he will very likely be able to do. You have not only lost that sale, but have lost your standing with that man. He may have been your customer for years, and you may have given him such service that instilled in him the belief that you were an A1 up-to-date merchant. Hereafter he will likely take a discount of more than 10 or 12½% off that opinion.

Greater Supervision

It is surely true the wise merchant in these days must give his business very much greater supervision than he found necessary during war time condition. For over four years the market has been the seller's market, whether the seller be manufacturer, wholesaler or retailer. Disposing of goods during the war could hardly be considered a question of salesmanship. The real question was, Can I get the goods to sell? If so, they would sell themselves; the demand so far exceeding the supply. The situation is now changed. This to a greater or less extent is the buyer's time, and from now on the salesman will have call for all his faculties.

Keep Stocks Up

It appears to me that a merchant who keeps his stock in good shape and sorts up conservatively and often will be the man who will make the most money. A good many prophesy that after this temporary halt, when matters get adjusted a bit, that business will take on a new start and we will be busier than ever. Time alone will tell the correctness or incorrectness of this view.

Don't let us lose sight of the fact that we in Ontario are placed in the hub of this Dominion, which in the minds of the great has a most glorious future, and if this is the case the hardware man will be in for his share of that prosperity, which will be more stable and lasting than the period we have just come through.

Must Have Faith

It behooves all of us to have faith, and as faith without works is dead, let us put our faith into action.

Business has been exceptionally good, and profitable, with you all for several years. You have no doubt, as prudent business men, conserved enough to tide you over a rainy day. My opinion is that the rainy season will not likely last long. With the world-wide shortage of food and all other necessities of life, the wheels of commerce must sooner or later be again running full speed ahead.

We are hearing a great deal about the unrest among labor, and there are those who keep painting all sorts of lurid pictures of the wrath to come. Steps already are being taken to nullify the effect of the pessimism. There seems to be the sincere desire on the part of both employer and employee to have the spirit of "Come now let us reason together," and a little sanity day by day on the part of sincere thinking people will, I feel sure, set the affairs of humanity on a better basis than they have ever been.

Maintain Wages

Referring again to the matter of possible price reductions, let us remember, that setting aside any threats on the part of labor, there is a sincere and continent-wide desire on the part of employers to maintain wages as nearly as possible at their present level, and as long as this feeling obtains, there cannot be very drastic reductions in values of goods where the greater percentage of the cost lies in labor. You could readily see that a reduction of even twenty or thirty dollars a ton in pig iron would not affect the average manufactured article of hardware more than probably from 1 to 5%.

Guarantee Prices

Early in December I attended the meeting of the Hardware Manufacturers and Wholesalers in Atlantic City. Some of the largest producers of hardware in the United States were so convinced that lower prices on manufactured articles were not possible

that they undertook to guarantee their prices; some of them for three months, some of them as long as a year ahead. These manufacturers included such people as the Winchester, U.M.C., Enterprise, Landers, Frary & Clark, Fayette R. Plumb, etc. The tenor of the whole convention was one of optimism and confidence. None of these manufacturers above referred to have since made any alteration.

Prices of Rope

A reference to rope might be interesting. When the armistice was signed pure manila was selling at 39c a lb., which was probably the highest price it had been in many decades. It was then reduced to 37½c and then some one in the United States, presumably with a big stock, got cold feet and made a cut, which dropped the price 9c. The greatest individual drop in the history of the rope market. It was not long, however, before it was discovered that rope could not be manufactured on the present basis of raw material to sell at this price; it then advanced 2c and has recently again advanced 5c to 35½. This would indicate that the era of cheap goods is not yet here by any means.

In summing up these rambling remarks the thought I wish to convey is this, that every man keep before himself the idea that he is a merchant, and if he is to function properly he must have goods to sell. By keeping his stock complete he will do more business and make more money than he would by starving his stock in order to save on some possible decline which may take place.

THE WHITE LEAD SITUATION

Address by S. W. Smith, Ontario, Manager of the Brandram-Henderson Company, Ldt., Montreal.

THE subject selected for a representative of Brandram-Henderson to talk about, that of white lead, is, as you know, a very important one. It is extremely important, as far as the paint manufacturers are concerned, and it is also very important as far as the hardware dealers are concerned, because it is one of the commodities with which they are dealing every day, and in nearly every instance, when they sell a can of paint, they are handing out at the same time a certain amount of white lead.

Possible Situation

You know all this, however, and I presume, and it is quite natural too, that you are particularly interested in the white lead situation at the present time, and are interested as to what the possible situation may be in the near future.

The production of pig lead in Canada is, as you know, comparatively small, considering Canadian requirements, and for this reason, Canada has to resort to the importation of Mexican and American lead. The Canadian smelters base their prices for pig lead on American quotations, plus duty and war tax, so that you will immediately appreciate Canadian white lead corroders' position, so that for that reason Canadian corroders cannot do better than meet American prices, plus duty.

Consumption Reduced

The consumption of white lead and paints has been enormously reduced during the last three or four years for two reasons—the first of these has been the lack of labor, owing to the volunteering and conscription of our young Canadian manhood, and the second has been on account of the great unwillingness on the part of the citizens of our country generally, to spend money, except for absolute necessities and other undertakings which have had a direct relation to the prosecution of the war. Now it is a fact that the conservation of property should, in all probability, have come within the latter category, but it is a fact that it did not, and building operations and the upkeep of property, generally speaking, have fallen off to practically nothing during the past three or four years. This, of course, means that a comparatively small quantity of white lead and paints have been used, except in what might be described almost as "touching up" jobs.

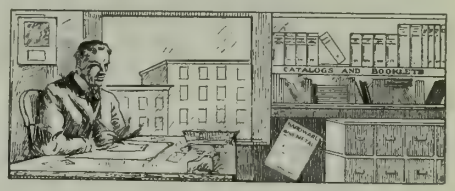
This situation, however, will not only improve a great deal during the next few years, but has already begun to improve, and white lead as well as paint is indeed moving very freely, and the manufacturers, as far as I can learn, are taking a very optimistic view of the situation, and this view is forced on them by the stand that the dealers have

S. W. SMITH

Ontario Manager, Brandram-Henderson Co., Ltd., Montreal.

taken, when it is remembered that, as a general rule, very fine paint orders have been placed for spring shipment, and there is no doubt in my mind but that there is a good harvest for both the paint manufacturer and the dealers for years to come.

Question of Advertising



It might be well right here to touch on a matter which will, no doubt, interest you very much, and that is the matter of advertising. A movement is on foot in the United States, on the part of the paint manufacturers, to carry on what may be known as co-operative advertising, and I believe that this movement has come to a point where it is about to be launched, and perhaps a word of explanation is needed here.

This co-operative advertising means that all, or nearly all, of the American paint manufacturers have gotten their heads together and pooled a certain amount of money to advertise, and advocate, paint and its general benefits; knowing this, there is a movement on foot among the Canadian paint manufacturers for a similar campaign, and this I would strongly advocate, and it is hoped that if such a campaign is launched in our country, that the hardware dealers throughout Ontario will take a live interest in it, and do everything in their power to further the movement.

Are Co-operating

It might be well to mention that the chocolate and candy manufacturers of Canada have gotten together and are doing considerable of this co-operative advertising. No doubt you have all seen some of their advertisements.

You will all admit that there is plenty of opportunity for the sale of paint in our country, and now that the soldiers are coming back by the thousands, why not advocate as a source of employment for the great numbers of them who are looking for work at present that they take up painting? All of our soldiers have spent a great deal of time in England, and have been greatly impressed by the beauty and well-kept condition of the rural communities in that country, and it would seem for that reason that NOW is the time for introducing a campaign, not only to beautify our homes and other buildings, but to provide employment for those of our boys who have returned and are capable of taking hold of the paint brush.

Use of Rope

"Plymouth Rope and the Merchant Marine," published by the Plymouth Cordage Company, North Plymouth, Mass., and Welland, Ontario, contains forty pages of attractively illustrated matter dealing with the uses of the various ropes used in the merchant marine and their manufacture. A chapter on the use and care of rope points out the value of rope and how often human life depends upon a rope in service. A copy will be sent to readers of HARDWARE AND METAL who are interested.

5,000 Facts About Canada

"5,000 Facts About Canada" for 1919, published by the Canadian Facts Publishing Co., of Toronto, is an epitome of data relating to trade, finances, manufacturing, dairying, mining and other branches. A chapter is devoted to facts and figures regarding the war.

Canadian Tool Catalogue

The Stanley Rule and Level Co., New Britain, Conn., which has a Canadian plant at South Roxton, Quebec, at which a large number of its lines are made, is issuing to the trade a catalogue of lines used in Canada and sold by the trade.

While rules, levels and planes are the prominent features to which attention is directed in this new catalogue, a showing is made of wood and metal gauges, bit braces, breast drills, screwdrivers, spokeshaves, nail sets, mallets, hammer, vises, steel squares, everlasting chisels with patent new tang extending through the handle, saw sets, dowelling jigs, jointer gauges, aluminum plumb bobs, etc. Descriptive reading matter is given throughout this catalogue, No. 34. Those wishing a copy will be supplied on request by A. Macfarlane and Co., Coristine Building, Montreal.

The McClary Mfg. Co., London, Ont., is planning alterations to one of the buildings of the York Street plant to permit of a switch being run in from the G. T. R.

FORMALDEHYDE PRICE STIRS UP WESTERN TRADE

THERE has been a further development of the formaldehyde situation in Western Canada which looks serious for the country. The T. Eaton Co. have come out with some advertising in the daily papers, offering formaldehyde at 34c a pound. They put this price in large figures, which is very misleading, both to hardware dealers and to farmers. Many retail hardware dealers have not been advised yet what the price will be this year, and seeing this price, have written their wholesalers asking if they will be in a position to compete with this. As a matter of fact, based on the price the jobbers will have to sell at, the retailer in most cases cannot sell for less than 55c or 60c. The result is that dealers are writing in cancelling their orders. The jobbers are also cancelling orders.

The advertisement of The T. Eaton Co. is very misleading. Underneath the price, 34c, are the following words in smaller type: "In barrels of about 410 lbs." This gives the farmer the impression that he is able to buy formaldehyde at 34c, whereas no farmer is able to buy in lots of four hundred and ten pounds; he might want ten pound jars, say, which would cost him around forty cents on the above basis. But even at that the retail hardware dealer has no chance to compete with the mail order house.

Writing about the above ad. to his jobber a Battleford merchant says: "You have not stated what the price of formaldehyde would be for this season. We are enclosing an ad. in the Saskatoon "Star" on the 12th, in which Eaton's advertised forty per cent. formaldehyde up to standard in purity and strength for 84c in barrel lots. We hope that your price will permit of us competing with the price above quoted."

Another dealer writing to a jobber says: "With reference to my booking for formaldehyde, I should like to cancel same, unless it can be laid down here as cheap as it is being retailed by the T. Eaton Co., of Saskatoon. Their advertised price is 90c for two pound jars, and $2.15 for five pound jars. There is absolutely no use in me stocking this, unless I can sell somewhere near Eaton's price. Kindly cancel."

Another dealer writes as follows: "I have just heard the new price which is out on formaldehyde at about 50c. Under the circumstances, I think it would be wise for me to cancel my order for 200-lb. barrel, as I could not sell it at that figure. I would thank you to do this, as I would rather not have it to carry over. I will order some more bluestone instead."

Commenting on the situation, a Winnipeg jobber said that the jobbers placed their orders early this year against open price, to be shipped later on in heated cars. The system adopted is for the manufacturer to run a car through the country, dropping off barrels at points where they have been ordered by dealers. The jobbers had no idea what they are going to pay for formaldehyde until a few days ago. In the meantime the dealer hears that mail order houses are able to undersell him, and immediately cancellations come in.

It is not difficult to see that the situation will soon become very serious. Dealers talk of buying more bluestone, whereas it is doubtful whether they can buy it. On the other hand, the farmer will go to the mail order house for his supply of formaldehyde. It is to be hoped that the mail order house can supply the demand, otherwise there is a danger of the crops being seriously impaired in that district.

As HARDWARE AND METAL goes to press, a wire has been received from Winnipeg correspondent advising of a decline in the price of formaldehyde. The storm of protest which resulted from recent sharp advances, has been largely responsible, it is felt. The wire reads:

Revise formaldehyde six hundred pound barrels to thirty-two cents per pound; two hundred pound kegs, thirty-three cents; one hundred pound kegs, thirty-four cents; ten pound jugs, three seventy-five each; five pound jugs, two dollars; two pound jugs, eighty-five cts.

Speaking of the situation a jobber said: "We would not care very much about the price being high if Eaton's had not come out with this advertisement. We believe that the merchants and farmers would have bought the formaldehyde, even at the higher price, and thus insured a good crop. If Eaton's have not got enough formaldehyde to supply the whole of that section in which they are advertising, we believe they are doing a great injustice to the West."

GEORGE A. SIMPSON

Sales Manager, Steel Company of Canada, Hamilton, who delivered an address before Retail Hardware Association. This will appear in next week's issue.

It has been necessary for the manufacturers of formaldehyde to take some action to prevent the cancellations which are now taking place. They are having announcements printed at their own expense, in which they advise merchants to take their shipments, and that if they are unable to sell their formaldehyde, that they will pay the return charges. Jobbers seem very much concerned about the possibility of this situation affecting the most important thing in Western Canada, namely, the wheat crop. They state that dealers have got to get the formaldehyde in time, and if they are delayed for a month, this means that they will miss the treatment of seventy-five per cent. of their seeding, which might mean a crop failure. The opinion of the jobbers is that Eaton's had a stock of old formaldehyde, which they did not sell last year, which they are able to offer at this figure. They are afraid that Eaton's have not got sufficient in Saskatoon to supply the demand, and that as a result many dealers will have to go without.

A number of the trade expressed the opinion that if there was anything in the earth the Government should guarantee, it was the price of formaldehyde, in fact he held the opinion that the Government should control the supply of it. Asked why the production of this thing was entirely in the hands of one company, he replied that up to ten years ago everybody used bluestone in the West. Ten years ago a change began to take place, some of the farmers finding that formaldehyde was easier and quicker to use. About four years later about ninety per cent. of the farmers were using formaldehyde, which explains why the control of this product is entirely in the hands of one firm.

The same jobber stated that an effort has been made to bring in formaldehyde from United States, but that it was found that it was almost impossible to lay down here at a price less than what it is being quoted at by the Canadian manufacturer.

MUST PAY DAMAGES

The Appellate Division has dismissed the appeal of the Imperial Steel and Wire Co., Ltd., of Collingwood, from the decision of Mr. Justice Sutherland, awarding Rownson, Drew & Clydesdale, of London, Eng., $9,600 and costs for alleged breach of contract for the sale to the plaintiffs of 1,200 tons of wire nails. The agreement was made on July 24th, 1915, and on August 20th it was repudiated by the defendants by cable. They alleged that no one with authority to make the contract had done so.

S. H. Chapman, president of the Ontario Wind Engine and Pump Company, Toronto, for 25 years, has severed his active connection with that firm and becomes president of the Hurley Machine Co., Ltd., 413 Yonge St., Toronto.

Getting the Most Out of Your Territory

The Profit That Lies in Knowing Your Field Inside Out—How Retailers Can Get to Know Their Fields Thoroughly—The Paramount Importance of Solicitation.

Text of the Address Given by J. C. Kirkwood.

TO get the most out of your territory, you must know what is in it. Knowing this, you may be stimulated to take out of it as much as you can.

To know the business possibilities of your territory, you must analyze it. You must know the number of families in it, their buying capacity, and what they will buy. Knowing all this, you are in a position to go after their trade intelligently.

A thorough knowledge of your field is at the bottom of maximum business. So I say to you, know your field, and know it inside out.

A Set of Examination Questions

My conviction is that few retailers know their fields at all well—know it, that is, in the sense that I believe they should know it. Let me submit a few questions to you for you to answer to yourself:

Have you, in your store, a record of all the factories in your local community?

Do you know how many men and women each factory employs?

Do you know the amount of wages each factory pays out every week?

Do you know how many heads of families are employed?

Do you know how many of these families own their own homes?

Do you know how these families are using their incomes? How much they spend for food, for rent, for clothing, for the general upkeep of their homes, for pleasure? And do you know how much they save?

I submit that the possession of this information concerning the factory workers in your field can be made to pay you large dividends; and that the lack of this knowledge results in your under-selling your field. In other words, unless you have a full knowledge of your field, you do not and cannot sell it all that it can and will absorb.

Where There's a Will, There's a Way

If you say to me: How can I get all the material you outline concerning the factory workers in my field? I reply, Where there's a will, there's a way. The information can be obtained, by going after it. It means leg-work and tongue-work; and every one of you possesses both legs and tongues. Of course, it means time, but time is the stuff out of which we make our incomes. I submit that you can and should take time for the procuring of the sort of information I have outlined—your own time, your employees' time, and the time of others whom you may engage to obtain for you the sort of information which I have defined.

Completing the Survey of Your Field

I have spoken particularly of factories and factory workers. The same sort of information can and should be gathered concerning other classes in your local community, all those in receipt of incomes, most of which must be spent to buy the necessities of life, and most of which is spent in your own community.

Similarly, you should have a complete or near-complete information concerning your rural field. Let me once again submit some examination questions to you, for your quiet answering:

How many farm families are there in your field, and who should do their buying in your town or city?

Who are these families?

What is the size of their individual farms?

What class or classes of farming does each farm family carry on?

What is the probable income of each family?

Who among these farmers own motor cars?

Who among them have gasoline engines, feed and litter carriers, water systems, electric power facilities and equipment, telephones, pianos, phonographs, furnaces or hot water heating systems, bath rooms, and so on?

Who among them are planning to build or renovate houses and barns, stables or sheds?

Who among them need better fences and gates?

This is the sort of information which, if possessed, can be turned into business, and profitable business. Once more I submit that

JOHN C. KIRKWOOD

Business Counsel, Toronto, who addressed Ontario Retail Hardware Association at Hamilton.

this information can and should be possessed. Again I say, where there's a will, there's a way.

Ignorance Which is Costly

Do I seem to make overmuch of this point? If I stress it heavily, it is because I find so many men, deficient in the possession of the sort of knowledge that I have been insisting must be possessed if maximum business is to be done. In Toronto—perhaps in every large city—the residents develop incuriosity, rather than curiosity. They do not know the names of their neighbors three doors from them. They do not know who live in the big corner houses on their own street. Houses notable for size and location in parts of the city they are very familiar with, so far as its streets are concerned, are occupied by families whose names they do not know, and when they ask residents of these sections, Who lives there? and Who lives here? They get over and over again the reply, I don't know.

I go back to my own home town, of only 3,000 population, and to the seven years I was a retailer in it, and I confess that I knew not half the people living in it, or where they resided. And I know still less about the owners and occupants of the farms in the rural territory surrounding my own home town, where I had lived for thirty years. Not all are as obtuse or incurious as I am, but I do know, and probably you know likewise, that the ignorance of retailers of their own fields is colossal, and I would add, costly as well.

Making Maps of Your Field

Let me suggest some ways of obtaining the sort of information needed by the retailer—information about his own field. First, we shall take the local community—town or city.

A map of this is desirable—almost essential. You can put it up to your local schools to produce this map. You can offer prizes of cash, skates, or books, or cameras, or fishing-rods, or footballs, or tennis racquets, baseball material, for the best mas. You can require these maps to be maps of districts or a group of streets. You can ask to have the churches in these sectional maps indicated, the theatres, skating rinks, schools, parks, streams, ponds, public buildings, factories, and so on. You can even ask that the locations of dwelling houses, by numbers, shall be indicated. Then you can proceed later to have the names of families filled in.

Profitable Labor

This sort of contest should commend itself to school authorities and teachers, because the labor and effort expended by the children in producing complete or neighborhood maps will be profitable labor, cultivating the qualities of observation, precision and accuracy in each contestant, and giving each child a class and amount of local knowledge of large and continual usefulness. Besides, each community needs to be well mapped, and where or how can this mapping be done better or cheaper than in the local schools by the pupils there?

The cost of the prizes awarded for the making of these maps can be shared by all the progressive retailers of the community, and the information so assembled and provided can and should be shared commonly.

In the same way, complete maps and information relating to farms and farmers can be assembled and presented by instituting similar competitions in the rural schools.

This idea, if you think well of it, must be initiated and propagated by some single merchant, and the right man to make the first step is the man who possesses and believes in the idea, and that man may be you, the man before me at this minute.

The Business Possibilities of the Retailers' Field

In your hands has been placed a graphic and tabular presentation of the sort of survey I propose you should make (Mr. Kirkwood refers to his article, entitled, "The Retailer's Field and its Business Possibilities, found on page 59 in this issue). I commend a studious examination of the material there set forth. It shows convincingly, I trust, the measure of the business which your field can and should yield you in the course of a year. (Here the speaker dealt specifically with some of the figures of the table given in the article referred to previously.)

Business Built on Information

Before I pass on from this phase of my subject, namely, the possession of full knowledge concerning your field, I want to say that very frequently newcomers who have informed themselves after the manner of my suggestion have become serious competitors of old-established resident firms. Thus the mail-order houses possess, as a rule, more definite knowledge concerning a retailer's field than does the retailer himself, and use this information for their profiting and to the retailer's disadvantage. Again, the chain store idea has been developed to the menace of local retailers as a consequence of a searching survey of the retailer's field. The United Cigar Stores

Company, whose success has been phenomenal, establish stores in cities and towns, and in the best locations in these places, only after a most thorough study of the local market. They built on exact and complete information.

Fifteen years or so ago, two young men studied a village in the Rocky Mountains, and started there a dry goods store. To-day they have over 125 such stores. Each new one has been born of knowledge, and this company, the J. C. Penny Company, have built their chain of stores where others before them had a much better start, or, at any rate, a much better opportunity.

Another Case

Take another case. From 1900-1905, a traveller for a hardware house studied analytically the towns he visited, and in the end found the right place for a country hardware store. Within ten years after opening it he sold out his business, having made enough to retire out.

In another Western town two young college men started a clothing store—this after a thorough survey of the community they proposed to serve. To-day, they have the satisfaction of knowing that they are getting about all the business their field can give them.

Illustrations of this same general kind can be indefinitely multiplied. I quote those given to clinch the point I am making, namely that a thorough knowledge of one's field and its business possibilities is essential, if one is to get out of his field all that is in it.

Soliciting Your Field for Business

Now I turn to another phase of my subject —the profitable use of information. The mere possession of the fullest information does not spell success. In use is profit.

I shall suppose that you know your field inside out—know the names of all those dwelling in it, their purchasing power, their purchasing capacity. Having all this information is an incentive to use it.

The second principal agency to employ to get out of your field all the business in it is—solicitations. ASK! ASK! ASK! Ask personally, ask by advertising in your local newspapers, ask through the mails.

We Are All Human

We all answer back to solicitation. We shop where we are invited to shop. We go to those stores which make us most welcome. We'll even pay higher prices to those who are agreeable and who serve us to our liking. This is because we are human.

I think I am safe in saying that the average retailer is a poor solicitor. He may be a good salesman, keep a good store, and stock, give a good service, but he is a poor solicitor —in person, through the mails, and through advertisements in his local newspapers.

You retailers whom I am addressing are responsive to solicitation. You give your trade to those firms which call on you regularly, and to the travellers you like best. The representatives who call on you, and whom you favor, may be very indifferent salesmen, but they may be mighty good fellows, and if they have the merchandise you want, you are likely to give them your trade. You'll spar for the best prices, but in your heart you want to give your business to the houses which send representatives to you, and to the representatives you like best. Most certainly you give very little business to those firms who never solicit you by a personal representative or in in any other way. It is the human personal factor that counts, and you want to be called on regularly and frequently.

If all this is true in your case, be very sure it is true of those private families living in your field. If you will canvass them, at their homes, regularly and frequently, you'll get a volume of business double or treble that which you now have.

The Employment of Canvassers by Retailers

I am not suggesting that you should do this work of solicitation yourself, though occasionally it would be very good for your business if you did make a canvas of your field.

My definite suggestion is that you employ one or more canvassers to solicit your field for you—one the local field, the other the rural field.

I am sorry that I may not now support my contention that personal canvassing will pay its cost—this by arithmetical illustrations. It would be interesting in the extreme if we could consider the changed aspect of your business if a large percentage of it could be done by taking the order at the customer's home rather than in your shop. You could probably do with fewer behind-the-counter salesmen, with a less showing of stock, with a less expensive location. These are contentious points and for this reason we cannot take time to consider them now.

Co-operative Solicitation

But there is a suggestion I wish to make to you. It is: Could not a number of retailers in a town employ one or more canvassers to solicit business for them in your rural field? This man or these men could get over a wide territory quickly, using a motor car. If the solicitor carried samples, or illustrated price-lists, he could get for those he represented many an order that otherwise might go to some other retailer, or to a mail-order house, or might not be given at all.

Joined to this solicitation or canvassing service might be joined a delivery service.

You may think this an impracticable service, or a service expensive to the point of total prohibition. If this be your conclusion, then I want to make a prophecy; it is that a good many of us here will live to see solicitation and delivery in rural communities by retailers; and this solicitation and delivery service, will be given and maintained, because, first, it will prove profitable, and, second, because it is desired by those served.

Another form of solicitation is printed matter and personal letters; another form is the telephone; another form is newspaper advertising. Without dwelling on these forms, it suffice for the present to but name them.

Selling More to Your Customers and Community

I close with the point that the retailer's customers can be induced by solicitation and suggestion to buy merchandise they have not been in the habit of buying. This business of enlarging the range of the customer's purchase is not only legitimate but may be praiseworthy. Apart from suggestion and solicitation the customer and his family may go for a long time without something or other whose early possession may add to the comfort and joy of living, perhaps lower the cost of living, and perhaps add years to the length of life. Money exchanged for possessions which save the time, strength and labor of human beings or which elevate the standards of living, is well-employed money.

A furnace may be more economical, and give greater comfort than a stove. A bath-room may give the life of several persons in a home a comfort and self-respect previously lacking. A water-system may save hours of time, and many a back-breaking, health-endangering walk from an inconvenient spring. Good stable equipment may enable a farmer to dispense with the labor of a hired man, and so remove a burden of labor and cost from the conduct of the home. A new gate and new fencing may not only prove a protection against breachy cattle, but may add more than their cost to the selling value of the farm. Electric aids in the city home may prolong the life of a wife or mother, and may keep sweet tempers that otherwise may grow sour, and so produce a ferment in domestic life.

The Retailer as a Public Servant

You can see how legitimate, how kind, it may be for you to persuade your customers to spend more money with you. You swell your sales and your income, of course; and it is right that you should be properly and sufficiently rewarded for all your superior service.

The point I make is: Your own aggressiveness in merchandising is needed to get out of your field all that is in it.

I am protesting against that attitude of mind and will which leads a retailer to be just a storekeeper, one who keeps a store for the convenience of those who may want the goods he sells. I plead for a higher estimate of retailing. I would have every retailer regard himself as a public servant, with an obligation on him to make more complete the life and comfort, and to lessen the labors, of those to whom he can give service. Further, I would urge on you all to do with your might—your mental might, your heart might and your physical might—the work you have undertaken to do in the world. So do you serve your day and generation creditably—profitably to them and yourselves.

Finally, I would have you all remember that the greatest factor in doing one's best is doing one's most. Getting the most out of your field means putting the most of yourself in it. If you remember this, to do it, you will be richer in dollars at the end of every year, and richer in the consciousness of having given your community a type and amount of service which has enriched it.

THE VAGARIES OF THE INCOME TAX

Address by W. H. Davis of Hamilton, Government Inspector of Income Taxes.

W. H. DAVIS, in discussing "The Income Tax," gave the details of the Government regulations and explained why they were put into effect. A widower is classed, he said, as a married man if he has dependent children. A man who has four children under 16, is eligible for an exemption of $2,800.

Any moneys received in 1917 for bills owing in 1916 are not taken into account. What the Government is concerned with is business statistics after January 1, 1917.

"We expect the tax-payer," he said, "to put his cards on the table and show the exact state of his affairs. The Government, I assure you, is out to give all a square deal. War fund contributions are a proper exemption from a man's income, but not the amount a man pays toward his minister's salary. I had a case of this kind recently where a man who had given $25 to help pay the pastor's salary wanted exemption. As you probably know there is a rising scale of taxation which increases as incomes get larger. In making up your statement telephone bills, cartage and other expenses, if large, should be put in. If small, these may be grouped under sundries. The Government allows for depreciation. On a brick house, for instance, two per cent. per annum is allowed and five per cent. on a frame building. One of the most serious things we have to contend with is the case of merchants who say it is no use to take an inventory. A man recently told me he had not taken an inventory for fifteen years. How that man protects himself I do not know. He has no record of how his stock is going. What would happen to him if he had a fire? It takes a little time to make an inventory, but it is worth while, as you know what you are doing."

Asked by a dealer if a merchant wants to change the time of ending his official year from December 31 to May 31, Mr. Davis said such a case should be taken up with the Com ission of Taxation and obtain a special ruling.

Asked where forms for making the returns required by the Government may be obtained, Mr. Davis said they will be available at all post offices.

To a query as to whether all persons must make the declarations asked for he said that if the inspector had reason to believe that any person should make returns and had not, the inspector could demand it. Any person refusing to comply after being asked in this way was liable to a fine of $100 per day until the figures are forthcoming.

"If, in 1925," he said, "we find or have reason to believe that figures that should have been handed in for 1917 have not been given to us, we can and will make the demand. If any one knows of persons who should make returns and are not making them and will furnish their names, we will make it hot for the delinquents."

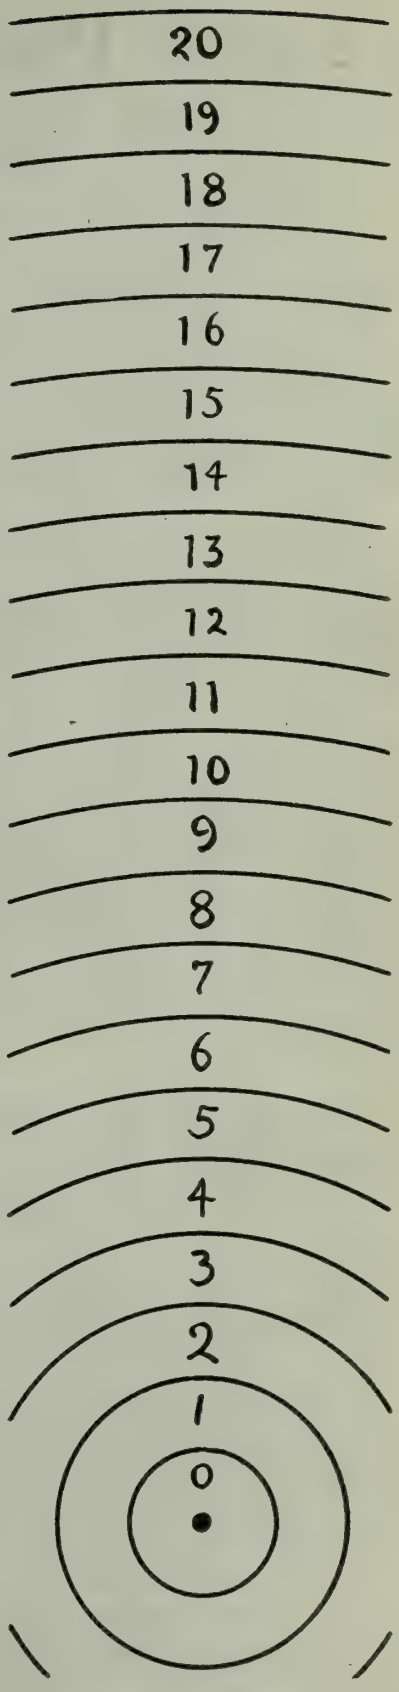
The Retailer's Field and Its Business Possibilities

By JOHN C. KIRKWOOD

THE retailer's local community, as shown by the accompanying diagram, may be confined to the area of the inner circle, designated "0," or it may overflow into the surrounding territory designated "1," "2," "3" and so on.

In the diagram, "0" represents a territory two miles in diameter, containing 3.14 square miles, or 2,010 acres. A town occupying this area may have a population of from 3,000 to 5,000, or from 600 to 1,000 families—say, on an average, 750 families.

The belts of territory surrounding "0" have a breadth of one mile. In the case of cities, their area will take in one or more of these belts. The acreage area of each belt is indicated in the accompanying table. Allowing 4 to 5 families per acre, on an average, the approximate urban population of each belt in the city area can be computed. In the table following a town of 750 families is assumed, all contained within the circle designated "0." The rural territory begins with belt No. 1, and extends, in the diagram, to a distance of 21 miles out from the retailer's store.



The retailer's field, before serious competition from other neighboring towns or cities is encountered, will almost certainly take in Belts Nos. 1, 2, 3, 4 and 5, and may take in a number more. Each retailer will know just how many of these mile-wide belts he can fairly count as his own field.

The table following will suggest to each retailer the approximate number of families residing in his field; and suggests the amount of their probable annual consumption of the particular class or classes of merchandise sold by the retailer. It is for the retailer himself to ascertain just how many of the families in his field he is serving regularly, and how close he comes to doing all the business which his field is able to yield him.

Belt or area marked	Having a breadth of one mile, contains: sq. miles		acres	And has a population, on the basis of 1 family to each 100 acres: families	Total No. of families in whole territory:	The retailer's annual business with these families on the basis of annual sales as under can be: $50 a year	$100 a year	$200 a year
0*	3.14	=	2,010	750	750*	$ 37,500	$ 75,000	$ 150,000
1	9.42	=	6,031	60	810	40,500	81,000	162,000
2	15.71	=	10,052	100	910	45,500	91,000	182,000
3	22.00	=	14,073	140	1,050	52,500	105,000	210,000
4	28.08	=	18,094	181	1,231	61,550	123,100	246,200

19	122.50	=	78,409	784	8,766	438,300	876,600	1,753,200
20	128.78	=	82,430	824	9,590	479,500	959,000	1,918,000
Totals	1385.46	=	886,656	9,590				

*Local field, containing, by assumption, 750 families.

Note: The figures indicating the amount of business possible can, and should, be divided by the number of retailers competing for the business—2, if there be two retailers in the same general line of business; 3, if there be three, and so on. The point is that these figures indicate that there is a volume of possible business for each retailer much larger than he may now be having.

The significance of this diagram is interpreted in the reading matter accompanying. The centre of the inner circle, marked "0," represents the retailer's store, or the heart of the local business community. The circular strips or belts, marked 1, 2, 3 and so on, represent mile-wide areas surrounding the local business community. The area of each of these belts, expressed in square miles and acres, is given in the table accompanying, as is also the probable population by families. The amount of business which the retailer's field should yield is likewise indicated.

How I Placed Business on Cash Basis

Secretary of the Ontario Association Shows His Methods of Introducing the Plan and Tells of the Splendid Results He Has Obtained

Address delivered by W. F. Macpherso n, Prescott, Ont.

WHEN the advisory committee met in Toronto about three months ago to make final arrangements for the program for this Convention, I was requested, in view of the fact that I had recently put my business on a cash basis, to prepare an address outlining the method I had adopted and giving in a concrete way the results I had obtained.

My conception of my relationship to, and the duty I owe, my fellow business men, and particularly to the members of this association, has led me to comply with their request, and I will endeavor to relate the reasons why I decided to change my business methods and my present realization of results obtained, as well as the experiences I have gone through in what I may call the "transformation period" of my business.

Long Experience

At the outset I may say that I have had some thirty-five years experience in the hardware business, and during that period was for twelve years in charge of the credits of my former employers, and for the past eighteen years have rolled up considerable experience in the matter of credits in the conduct of my own business. I mention this to impress on you the fact that my remarks to you are not going to be in the nature of a theoretical treatise on cash and credit, but strictly of knowledge which I have obtained through practical experience. I am not going to talk of my experience during the time when I was an employee, but only of the later period since 1901, when I went into business on my own account.

Both Gave Credit

At that time there were two first-class hardware stores in our town, both financially strong, and both giving freely credit to all who were considered worthy of being trusted —and to some others. In fact, and this I believe is only too true with the majority of firms extending credit, very many sales were unwisely forced on customers by the inducement of having settlement deferred until convenient for the customer to pay up. In the face of this opposition, and my training being all along the lines of a credit business, I never for a moment thought otherwise, but that my only way to build up a business was to follow along in the same way. In the course of a year my books showed charges equal to the original capital I had invested in my business. Then began my troubles—financing in order to meet my obligations—and having a horror of asking for extensions on notes or drafts maturing, I can assure you that I have spent many an hour on the anxious seat, hardly knowing which way to turn in order to get funds necessary in the immediate future.

Tough Sailing

With thousands of dollars left on my ledgers, even after I had sifted the accounts over, and taken notes or made drafts on those who would stand for it, I was unable to make any direct use of them. In fact to get a hundred dollars more was impossible. I have heard it stated that bankers would lend more freely on a man's character and ability than on securities which might to some seem more tangible, and to the fact that my banker had faith and confidence in my statements, is due the fact that I was always able to procure funds to keep things moving. Notwithstanding this, it was always more or less galling to approach him for credits, and you may rest assured that I left no stone unturned to "raise the funds" before I applied for more favors at his hands. But all this is only ancient history to many of you, in fact may be still current history for some, and these anxious hours may still prevail, unnecessarily so, as I will endeavor to show before I am through.

Studied the Problem

As years rolled on, as I was always a steady reader of trade papers, especially of "HARDWARE AND METAL," I took note of the many articles appearing on doing business for cash, and with that in view, have been paving the way, by taking more notes in settlement of accounts, defining the length of credit when making a sale, and making certain lines, such as bulk seed and grain, cash articles. All these restrictions have been readily met on the part of my customers, and it only remained for me to take one more step to become the manager of my business,

W. F. MacPHERSON
Re-Elected Secretary, Ontario Retail Hardware Association.

instead of my business managing me, as has been the case for many years, during which I have been far from being a free agent.

Last summer when in Toronto, I had a very interesting conversation with a couple of friends of mine, who spend all their time in trying to make "better" hardware men in Canada, and was more than ever convinced that my proposed plan was feasible, and the time was auspicious for a change.

Changed the Date

My original idea was to start on the first of New Year, but after consideration, I decided to make November 1st the date of adoption of my new terms. To make a proper start, I in confidence took the matter up with some of my best local credit accounts, and outlined the plan, giving my reasons. To a man they approved of the change, and stated it would be better all around. I also took the matter up personally with a number of my yearly farmer accounts, telling them that after all my years of business experience I was forced to admit that the farmers had the proper method of doing business, and that I was at last going to follow their plan and get cash for my goods when I sold them. Some of these, of course, had objections which I had to explain away, such as, "Suppose I telephone you for goods," or "Send with a neighbor for goods," or "Order by letter." After explanations that I had provided for all these contingencies in my new terms, the answer in nearly every case was—"Oh well, that will be all right." I, of course, had two or three instances where I was warned I was making a mistake—one case in particular I will relate.

Showed Him Why

This customer owed me an account for some goods bought the previous May, for which I was to have been paid within a month. During early part of October he came in, which was the first time since the debt was contracted, and looked at some goods which he did not buy, and was just going out of the store. I stepped out of the office and after a short friendly conversation, recalled to him that he had not paid for the goods as he had promised. He said: "I am going to pay for them to-day if you will only give me a chance." He then went to the cashier and paid the account.

On his way out he stopped and said to me very huffily: "That's the first time I was ever asked for an account."

I replied, "Is that so, Tom? Well I really have no apology to offer, but I'll try and not let it happen again."

"What do you mean by that?" he replied.

Going to Change

"Well Tom, I am going to change my terms to a cash business on November 1st. What do you think about it?"

"Well," he said, " I don't think you have any reason to kick about your business. You have a good trade, and a big stock of goods, what more do you want? I think you are making a mistake."

Now this particular customer was one of a group of families inter-related who had always been good customers, so I took him into my private office, and in confidence showed him figures bearing on credits; showed him the volume of current book accounts, and convinced him that, were I in possession of all the money the accounts represented, I could not take it and replace the goods charged in the accounts, on account of price advances in the past year. What do you think his verdict was? He said, "Well, I guess we will have to get used to it. Both the general stores in Kemptville are now selling for cash, and I guess they will all be doing it soon."

How It Works Out

Now for the sequel. A couple of weeks later he came in, bought the goods he was looking at on his previous visit and was paying the clerk when I passed by. He turned round with a grin and said, "Well you see I am paying cash to-day." I clapped him on the back and said, "Good boy, Tom, keep up the good work and you will win out in the end." Honestly, I felt rather concerned in his case on account of his connection, and I can assure you that I felt a hundred per cent. better for the rest of the day. Since then, I have sold to a number of his connections, good bills for cash.

Now, as to my plan for introducing the new system to the general public. I drafted an announcement for the weekly paper, and two weeks before the end of October, published it in large type. I have a copy of paper with me for your inspection. The announcement read as follows:

MacPherson's Hardware Store

Announcement.

Present trade conditions make it absolute-

ly necessary to make some changes in existing methods of doing business. Manufacturers and wholesale dealers have realized this, and in consequence have so shortened credit terms, that, in order to purchase goods in the right markets and at the right prices, settlements must now be made upon a cash basis. Then again, the high prices of goods now prevailing mean a much larger investment of capital, and, in an effort to keep prices within bounds, the percentage of profit now obtained is materially reduced when compared with profits now obtained under normal conditions before the war, and, in face of this reduction in profits, the overhead expense of doing business has increased.

In any healthy retail business the stock should be turned over at least three times per year, so it is self-evident that stocks of to-day are, to all intents and purposes, purchased in the high markets prevailing during the past year and with few exceptions any additional profits which might be made on goods bought when prices were lower, and sold on a basis of present costs, are a thing of the past.

During the past four years I can honestly say that no excessive profits have been taken in my business, and I am firmly convinced that the same can be said of the other retail merchants in our town.

After a most careful study of the situation and with a firm conviction that the necessity for credit no longer exists, I wish to announce that, after November 1, my business will be conducted on a CASH basis. Monthly account terms will, as usual, be given to factories, contractors and customers building or painting houses, or making electrical installations. Goods ordered by phone or letter will be due at end of month in which ordered. Settlements of monthly accounts to be made by tenth of month following purchase.

I trust that my customers and the public in general will appreciate the fact that I am taking this step in an endeavor to give them better prices and better service than would be possible under other conditions, and would solicit a continuance of the splendid patronage accorded me in past years.

W. F. Macpherson.

Put It in the Papers

The week following I had the same announcement reproduced in smaller type, and had a quantity of copies of the advertisement struck off, the use of which I will explain later.

The day after the first announcement appeared, I had numerous calls from prominent men of the town, both in business and professional life, approving of the stand I had taken, and assuring me that I was on the right track. At the present time two other business men of the town have adopted a similar system. A few days before the first of November, I had cards printed stating clearly the terms which would become effective on that date, and placed same prominently throughout the store.

The Next Step

My next step was to collect the accounts standing on my books. For the previous two months I had been actively engaged in collecting the cream of the accounts, and had on the first of November still over four hundred accounts outstanding. On that date I rendered every account on my books, enclosing with each a copy of the announcement, and also a small slip clipped to the account, reading as follows:

Having decided for reasons stated in the enclosed announcement to adopt the cash system, I am sending out all accounts on my ledgers at this date, and would request settlement within THIRTY days.

Prompt payment will provide the necessary additional capital which is required to carry on business under present conditions, and I would appreciate your assistance to that extent.

Prescott, Oct. 31, 1918. W. F. Macpherson.

287 Paid Up

During the month of November, I had two hundred and eighty-seven accounts paid in full, and these without a single grouch. On the contrary I had many of these customers state that they would prefer to buy their goods on a cash basis.

Included in these settlements were a considerable number of accounts which I had considered "dead ones"—accounts which I had been trying to collect for years without any success. I can only conclude that the announcement enclosed with each statement, and the fact that the request for payment was general to all my credit customers, must have in some way appealed to their sense of justice.

Well Cleaned Up

Since the first of November to date, I have received settlement in full of over three hundred and fifty accounts, which were on my books prior to the first of November.

I am still devoting my energies to collecting the balance—relics of by-gone days—and for the most part, small amounts.

Now as to the working out of my terms in connection with telephone and mail orders. On the last of each month, I send out all accounts contracted during the current month with a sticker on which reads:

Business Terms Effective November 1, 1918

All accounts rendered on last day of month, and are due and payable by 10th of month following.

Accounts not settled in accordance with above terms are subject to sight draft without further notice.

W. F. Macpherson.

The compliance with these terms has been satisfactory, my books on December 15 only showing two accounts rendered for previous month unpaid, being both small items. The accounts for months of December and January were also promptly paid.

Agreeably Disappointed

Naturally I expected that I would have the unpleasantness of refusing credit to quite a number of customers, but I have been most agreeably disappointed in this respect. Since the inception of my new plan, I have not turned down a dozen sales, and am now seldom asked to "charge it." Before my new terms were fully circulated and understood, I had a few applications for credit. To these I explained my new terms and agreed to let them have the goods, if they paid within the thirty days, and in every case received payment. I have placed in my store, prominently, cards stating terms—sample of which I exhibit to you. These have been effective in stopping the request for credit.

You are no doubt wondering in your own minds, what effect the new system has had on my volume of sales. Has it decreased my business? I can frankly state "No."

Sales Maintained

During the month of November my sales were fully equal to corresponding month of 1917. During last December my cash sales more than equalled my cash and credit sales combined of previous December, the thirty-day credit sales for the month being only 20 per cent. of credits of corresponding month of 1917.

My sales for January have also shown an increase.

One other good feature which I must mention is the fact that I did not have to spend half of the time I did formerly in office work, which allows me to spend more time in the store proper, and has permitted me to carry out some re-arrangement of stock and instal some new fixtures, the better to display and serve my customers. This will reap its own reward in increased business.

Can Pay Cash Now

The success of my cash system now permits me to pay cash for my goods, to earn the cash discounts, and to carry a better stock than was possible under my former method, and this without any worry.

At this present moment I cannot think of any single feature which I might mention as a drawback in the operation of the plan which I have adopted.

The conditions of business, in all lines, make the present time most opportune for the adoption of changes in business methods, particularly where credits are rural, and the firm establishment of a cash system now will place one in a position to meet whatever changes may come in the future.

In conclusion I may say that if the results I have obtained will strengthen any member of our association in a resolution to free himself from the fetters of a credit business, I feel more than repaid for having burdened you with more of my personal business affairs than is my custom.

HOW TO ADVISE A CUSTOMER TO FINISH FLOORS WITH VARNISH AND WITH WAX

Address delivered by WILLIAM HOME, Toronto, of Berry Bros., Inc.

THE subject which I have the privilege of speaking to you about is "How to advise a customer to finish a floor with varnish or with wax."

To advise a customer how to finish a floor, it is necessary that you understand the nature of the materials you have to offer, and the proper method of applying same. In other words, it is necessary that you thoroughly understand the operation yourself before you can advise a customer. With correct information given to the customer at the time of purchase, you should have fewer complaints, and will surely build up this branch of your business.

Find Out About Them

Enquire of your customers what kind or class of floor he desires to finish. Learn from him his ideas; what he expects in the way of a finish, and should he not know how to obtain the desired results, you should be in a position to advise him.

Mr. Home had with him a number of boards showing the operation of finishing a floor step by step from the natural wood properly prepared to the highest type of floor finishing.

In this section of Canada, he said, we have three woods in general use for flooring. They are oak, maple and pine, and with your permission I will describe to you the proper method of applying the varnish for finishing; also of applying wax.

Considered the Best

First we will take the oak, as it is considered the best type of wood flooring. This sample shows the natural wood, a coat of light paste filler, followed by a coat of varnish, a second coat of varnish, part of which is rubbed to an egg shell gloss, which is, to my mind the highest class of floor finishing possible to obtain, and more durable than any other method I know of.

We will review this and describe each operation in detail. The paste filler is reduced with turpentine to a proper brushing consistency. It is then brushed on the wood, brushing both ways of the grain, and when a small area has been done and had time to set—rub off the surplus filler with excelsior, rags or waste. By this means you clean up the high lights and when it is thoroughly dry, it is ready for the first coat of varnish. Apply one coat of good elastic floor varnish. When hard, rub it with curled hair, or sand paper lightly, using OO sandpapers. Apply a second coat of durable floor varnish. This may be left in the gloss or rubbed with pumice stone and raw linseed oil, or crude oil; using a piece of thick felt for rubbing. Wipe off clean, removing all trace of the oil

so that dust will not gather. This leaves the floor in a perfect, durable, dull or egg-shell finish, and will not require renewing from one annual house-cleaning to another, depending upon the wear and tear to which it is subjected.

To Renew Finish

To renew the finish wash the floor with turpentine and hot water to remove all grease, or if preferred, use benzine. Apply a thin coat of durable elastic floor varnish, rub it down with pumice stone and oil and wipe up to remove all oil, etc., as before directed.

I should mention that to keep the oak floors natural a light paste filler should be used. If a dark colored floor is desired, the filler should be preceded with a coat of stain. Then the filler colored to match the stain. Sometimes a dark colored filler may be used as stain and filler in one operation. The two samples I have here show a light paste filler, and an antique paste filler. You will note that the sample has not been stained prior to the filler.

Do Not Need Fillers

Maple and pine floors being close grained woods do not require the filler. To finish apply one coat of durable elastic floor varnish direct to the wood, and when hard follow with a second coat, which may be left in a gloss or rubbed down with pumice stone and oil—taking care to wipe up the oil to prevent dust gathering.

Many finishers recommend the use of boiled linseed oil as a priming coat on maple. I am not in favor of using oil on maple floors, because it has a tendency to darken the wood and will continue to darken the floor more than if varnish had been first applied.

Not The Right Thing

Never use so-called liquid fillers on floors, whether it is pine, maple or oak. These so-called fillers are not intended for floor finishing. They seal the pores of the wood; the varnish adheres to the filler, and the first time a rough boot passes over it, it will chip or break off. Consequently the varnish is condemned as not being of good quality when the fault is in the application of liquid filler. Apply the varnish direct to the wood; giving it an opportunity to properly adhere and you will not be troubled with chipping or breaking off.

In finishing linoleums or oil cloths, apply one coat of good thin elastic floor varnish. If the surface of the oil cloth has been worn through, apply one thin coat of shellac to seal the pores. (I might mention also shellac is used on split leather and when the seats of your auto have been worn through, touch the spots up with shellac before applying your leather finish).

Wax Finish

To finish an oak floor with wax, proceed in the same manner as for finishing with varnish, stain, fill with a good paste filler, apply a light coat of white shellac, following (when dry) with a coat of floor wax, and polish with a weighted brush.

The wax may be applied by putting a small quantity of wax inside a piece of cheesecloth and rubbing on the floor. The heat of the hand and the friction will leave sufficient wax for polishing. When hard polish with a heavy brush.

Some finishers prefer to apply wax direct to the floor, but this means more work before a satisfactory finish is obtained, and when finishing with wax, I do not believe a thin coat of shellac will interfere with the wearing qualities. I do not recommend shellac when finishing with varnish.

Must Be Removed

If the floor has been varnished, you may apply wax on top of the varnish, but if the floor has been waxed, you must not varnish until the wax has been entirely removed. To remove the wax use a good stiff scrubbing brush and benzine. Scrub vigorously, wipe up. This sounds like a lot of work, but it is necessary to obtain a satisfactory varnish finish.

With badly neglected floors it may be necessary to remove all the old varnish or wax right down to the wood. For this purpose use a good varnish and paint remover. Apply freely with a brush, brushing one way of the wood. Let stand for five minutes then follow with a second coat of remover, and after waiting another five minutes the varnish will honeycomb and soften and may be removed with a flat steel scraper or putty knife. There should be no difficulty in scraping this right down to the wood and as soon as all trace of remover has evaporated, sand paper, and the floor is ready for re-finishing.

Clean the Floor

When the floor is in very bad condition and not considered fit for refinishing in the natural wood, and not wishing to go to the trouble of removing the old finish—clean the floor, removing all grease, etc., and apply one coat of ground color or under coat. When hard apply a varnish and stain combination in any color you desire. This will give a very satisfactory finish. Or, over the ground color apply a graining color and grain with tools provided for that purpose. Give a final coat of clear varnish—but when it comes to an operation of this kind, I think it advisable to call in a practical man.

There are many other ways of refinishing floors, and I might go on telling of the possibilities, but this would use up time and not get us anywhere.

Had Five Stocks

This makes me think of a store I visited a short time ago in one of our Canadian cities—a store 15 x 35 feet. The merchant had five stocks of floor finishes, five different makers. The point I wish to draw your attention to is the amount of money invested to make a sale for finishing one floor. If the said merchant had studied the virtues of these finishes, he would have eliminated all but one. Get at the back of the one of your choice. When selling floor finishes to your customers—speak of that finish with all the confidence you have in it, and your customer will go away with the package under his arm feeling confident he has bought the right and only finish for the operation in hand.

HOW I MADE USE OF THE ASSOCIATION SALES BUREAU

Address by J. B. Archer, Vice-President of the Moore Hardware Co., Ltd., St. Catharines, Ont.

MR. PRESIDENT, and Members of the Ontario Retail Hardware Association:

The secretary of our association, Mr. Macpherson, wrote to me some time ago, asking me if I would give a short talk on, "How I Made Use of the Association Sales Bureau," and I will endeavor to explain my methods in taking advantage of this important part of the service which this association affords us.

In looking over the bulletin sent out by the secretary, you would be quite surprised to learn that less than one-tenth of our membership took advantage of this service. To be quite frank, I must acknowledge that last year was the first time that our company made use of this sales bureau.

The Best Time

I do not suppose that there is any better time to make a list of the articles which you wish to put on this bulletin than after your inventory work is done. There is no hardware merchant doing business to-day who does not find that he either has an excess stock of some lines of goods, or slow moving lines as well, and I would recommend to this association that the word "Exchange" be added to his department, and called the 'Sales and Exchange Bureau."

The first list of goods put through this bulletin by us was:—

100 kegs 3 in. nails (wire); 50 doz. O.C. sets; 1 electric washer; ½ doz. vapor oil stoves; a quantity of 2¾ and 3 in. wire nails; 4 heavy machinists' vises.

Received Many Orders

The nails were put on sale at less than the jobber's price, and three or four days after this bulletin was sent out by the secretary, orders for more than twice the quantity of goods advertised were received, and one firm, who purchased five doz. lock sets, sent an inquiry about three weeks later asking if we had any more on hand, if so to send on two cases. Needless to say, the order could not be filled.

We also had two Chicago power horse clippers, style No. 1,902, which we had carried in stock for two years. These were also cleaned out, and we could have sold a dozen sets at the price quoted. We also disposed of a few old style washing machines, and I could name a great many other lines of goods which were put on sale, but that is not necessary.

Kept in Touch

My method, during the year, was to keep in touch with a number of merchants who made inquiry for goods for sale by us on this bulletin, and to offer them, from time to time, certain lines in order to turn our stock over more rapidly. This scheme was a great success, and I can assure you that any member who does not take advantage of the service offered us is missing a great deal.

J. B. ARCHER

of Moore Hardware Co., St. Catharines.

A hardware merchant in Western Ontario, inquired from our firm if we had any steel track in stock for Meyers hay cars. We disposed of a quantity of track we had in stock, also some Meyers cars for wood track with the result of this inquiry.

Of General Use

There is no doubt that the sales bureau can be used by a much greater number of members than those taking advantage of it, especially this year when market conditions are such as they have never been in the last decade. It behooves us, therefore, as members of this association, to compare our lists of excess or slow moving lines of goods we have in stock, and move them out. This is what the hardware merchants are doing in

St. Catharines, and why not in other towns as well? If we do not work together for the good and welfare of ourselves, who else will help us?

In conclusion let me urge you, as members of the association, that if you want to get something out of this service, put something into it, and you will certainly reap the benefit therefrom. The small sum of three dollars per year has been our membership fee, and I know our secretary will coincide with me in stating that if ten dollars were the fee, that he would receive dozens of letters telling him that they had taken advantage of this sales bureau, and that it was worth twice the price. As I see it, we are too cheap. Charge more, and the members will put more vim into it and get more out of it.

The Use of Illustrations in Advertisements

Well Illustrated, Attractive Advertisements Command Better Attention—Great Improvement in Retail Hardware Advertising During Past Few Years

Portion of Address Before the Ontario Retail Hardware and Stove Dealers' Association by Geo. D. Davis, Manager Hardware and Metal

AFTER hearing the splendid address which your secretary, Mr. MacPherson, has just delivered on the introduction and great success of his new "Cash" system, and recalling that in his newspaper announcements he did not use illustrations, I am beginning to wonder just what he had in mind when he gave me the subject: "The use of illustrations in advertisements." I suppose I should state, in order to strengthen my case, that if Mr. MacPherson had used illustrations in his advertisements, the few delinquents who have not yet settled up would have rushed in to pay their accounts. It was gently hinted that short addresses would be quite acceptable this evening, and recalling the old saying that "A good illustration is worth a thousand words," I have brought along ten good illustrations of successful retailers' advertisements, hoping that they would be equally as effective as ten thousand words, and much more acceptable to my audience.

The chief point I want to make clear is that the picture in the advertisement performs a work difficult, if not impossible, for words to do in equal space or time. The message of the picture is or should be instantaneous. It gives at a glance the gist of the advertisement.

A picture in an advertisement is always the shortest way to the attention of the public. Many of our largest and most successful advertisers use pictures which flash a suggestion at a glance. The effectiveness of illustrations was amply demonstrated during the war period when campaigns were put on for the Red Cross, Patriotic Fund and other war efforts.

Telling a story or at least part of it at a glance is a most desirable effect. Particularly would I call your attention to the extensive use made of illustrations by the department stores. Their advertisements, even though they occupy full-page spaces, rely largely on the captivating property of illustrations to give them attraction and interest and along with the accompanying descriptive matter to sell the goods advertised. What the department stores find to be good practice in the preparation of their advertising, I suggest is likely to be good practice for smaller firms.

The fact is that the majority of readers want to get the advertiser's message or proposal conveyed to them swiftly—instantly. "What have you for me?" is the attitude of mind. Also, "What are the goods like and what is the price?" In this connection it has to be remembered that daily newspapers are read by the majority of persons in half an hour. The advertising columns must compete with the news columns for the attention of the reader. The advertising columns have the advantage, as a rule, of bold type—much larger type than the type used in the news columns; and commonly they have the added advantages of illustrations and white-space effects. But it is the illustration more than anything else that the eye goes to—this as a consequence of the superior attractiveness of the illustration. Hence it is prudent to use illustrations, and to make these illustrations summaries, as it were, of the advertiser's proposal or business. Illustrations are equally as good for the small town weekly paper as for the big city daily. Less than ten years ago there were not more than half a dozen or so Canadian retail hardware firms making regular use of illustrations in their newspaper advertising. Today there are scores of retail firms in all parts of Canada making extensive use of illustrations, and the advertisements here before you, by well-known Canadian retail hardware firms, are with one or two outstanding exceptions, typical of many of the advertisements which are now appearing regularly in Canadian newspapers over the names of well-known hardware firms. Perhaps the best and most effective are these advertisements by the Mills Hardware Co., of Hamilton, and the J. H. Ashdown Hardware Co., of Winnipeg. You will note that they are carefully planned advertisements, well illustrated and carrying descriptive matter giving information the prospective buyer is anxious to have.

About five years ago HARDWARE AND METAL, at considerable expense, conducted an investigation to find out why retailers were not using illustrations in their advertisements. We have in the MacLean organization a clipping department which receives newspapers from all parts of Canada. These papers are all clipped and each of our fifteen papers receives clippings in which it is interested. That is how we secure practically every advertisement that you run in your home papers, and that is how we knew that very few illustrations were being used in retailers' advertisements. Extensive inquiries were made among the retail trade and we found that the retailers desired to use illustrations but could not readily secure suitable cuts. Many retailers stated that department stores and mail order houses had an advantage over the retailer on account of being able to use small cuts in their advertisements and catalogs. We found that retailers had in their possession thousands of cuts which had been received from manufacturers, but for some reason or other could not be used. In many cases the complaint was that the cuts were too large, took up too much space, and featured only one line. As a result of this investigation we instituted a retailers' cut department with which you are all familiar and since then we have supplied to retail hardware firms in Canada twenty thousand cuts and you will note many of them are used in the advertisements before you.

There are still many retailers who apparently do not give much time or thought to their advertising, but I am glad to say they are becoming fewer each year. Here is a most exceptional example. This advertisement was clipped by our clipping department on January 15th, made inquiries and found that the same ad had been running ever since last spring. You will note that it urges the public to buy screen doors and windows and protect themselves against the fly pest. Of course it is possible that the mild winter may have prolonged the visit of the fly pest in this part of Ontario, making it necessary to advertise screen doors and windows during November, December and January, but I have my doubts. This kind of advertising is a waste of money. It serves no useful purpose, and although a few customers may refer to it in a joking manner, the majority of the customers and prospects are liable to feel that the store is like the advertising, which in many cases is only too true.

There is a distinct tendency in most of us to do as we are told. The reader of an advertisement is in a receptive mood, and as a rule his mind is in a passive state, ready to receive impressions—susceptible to positive influence. If this were not true he would not be reading the ad.

He is in the state of non-resistance so greatly desired by the professional hypnotist. And every advertiser is a hypnotist to the extent that he wishes his will to dominate and control that of his reader.

Illustrations make an advertisement attractive. They draw attention to particular features and help to give the reader a quick and better understanding of the articles advertised. Plain type is cold and uninviting within itself. Illustrations reflect warmth and sympathy and people are induced to read type through the medium of an illustration where otherwise they might turn away uninterested.

THE TROUBLES OF A MERCHANT AND HOW TO STOP THEM

Illustrated lecture by Mr. Fannon of the Lecture Bureau, National Cash Register Co., Dayton, Ohio.

ON Wednesday evening part of the program consisted of a moving picture show, "The Troubles of a Merchant, and How to Stop Them," in charge of J. H. Dowling of the National Cash Register Company.

He explained some of the latest and best methods of storekeeping—arrangement of goods, window display, how to write newspaper ads., and how to get best results therefrom, and many other interesting things relating to retail business.

The film told the story of Mr. White, a merchant, who was discouraged and disheartened because of his lack of success. The story showed the indifference of his clerk, and his bad store system, poorly arranged stock, and other causes of his troubles. How he finally rose to success and prosperity through the introduction of modern methods into his store was shown.

This moving picture show proved one of the treats of the convention, the members' interest being held till well after midnight.

Review of Gasoline Situation

The Outlook From Its Crude Stage to the Refining Covered — The Question of a Fixed Price on Gasoline

Address by F. J. Wolfe, Sales Manager, Western Ontario Division, Imperial Oil, Ltd., Toronto.

I CAN assure you I appreciate the honor of addressing you to-day and the company I represent is not unaware of the privilege you have extended to us to talk over the subject of Gasoline. It would be nothing short of speciousness if I were not convinced that the call was due to the fact that this subject is no minor one for the hardware men, whether looking at it from the angle of turnover, profit, or what is perhaps most appropriate at the present time—the situation of to-day and the future.

To get a proper perspective of the gasoline situation of to-day and tomorrow, a little retrospect is advisable. Gasoline has certainly done its part in ending the world conflict and war demands for it have been unprecedented. Earl Curzon has said that the Allied cause was floated to victory on a wave of oil, having reference to the enormous quantities of fuel oil used by the British and other navies, and of gasoline used by the huge fleet of motor trucks used in transferring men, munitions and foodstuffs. It is history how in 1914, when Paris was threatened, the reserves were sent to the Marne in trucks, busses and automobiles and civilization was saved. Next to steel perhaps no more important factor in the world's commodities as-coal as motive power on his wonderful syssisted in ending the war. The German used tem of railroads; the Allies used motor trucks and gasoline. It is a credit too to the refiners and marketers of the United States and Canada to say that they so conducted themselves and so voluntarily assisted their Governments that while many industries were absolutely under Federal control, the oil men were more or less self-governing. I cite these facts for two reasons—one to show how prodigious the war programme for oil and how necessary for the war's success it was to produce four thousand million gallons of gasoline in 1918 in the United States and Canada, and the other to indicate to you that the prices, at which gasoline was sold to the dealer, were above reproach.

Right here may I explain why I link up the United States and Canada in this gasoline discussion. It may not be news to some of you, but it is a fact that only about 5 per cent. of the crude used is produced in Canada, the greater part of the balance of the gasoline producing crudes coming from the United States. This crude is subject to a war tax of 7½ percent. Then too Canadian refineries have not been able to keep pace with the demand and whereas, no less than three years ago there were only three refineries operating in Canada and seven now, even yet these refineries cannot supply the demand and at times have to import from the United States. These importations are subject to 2½ cents and 7½ war tax. Figuring the difference between the Imperial, or the legal gallon of Canada, and the wine or American gallon, our prices are considerably lower than those quoted by the United States marketers. We are sometimes asked why is the price of gasoline in Canada so high. Gentlemen, like many other adjectives, the word "high" is relative. Compared with prices in the United States, they are not high. When in February, 1915, mid-continent crude oil was selling at the wells for 40c a barrel, gasoline was wholesaled at Toronto at 14½c per gallon. On March, 1916, crude oil sold for $1.40 a barrel, or an advance of 250 per cent.—gasoline advanced to 27c—an increase of only 87 per cent. In March, 1918, crude was selling at $2.25 per barrel, a further increase over 1916 of 68 per cent and an increase of 462 per cent. over the 40c price. Gasoline was raised to 33c, an increase of 128 per cent. over the original price. I might add that while $2.25 per barrel was the quoted list, many refiners were paying the producers a premium on top of this.

The past is gone, gentlemen, and no doubt, you are more interested in the outlook for the future. To my mind there are four factors, which largely determine the situation on any product:

1. The cost of raw material at the source of production—in the case of gasoline—cost of crude oil.
2. Cost of material at point of manufacture —the difference being cost of transportation —and in the case of gasoline a very important factor, since practically all crude oil has to be transported.
3. Labor situation.
4. Demand.

F. J. WOLFE
Sales Manager, Western Ontario Division, Imperial Oil, Ltd., Toronto.

The transportation and labor problems can very quickly be answered. There seems to be no early prospect of lower freight rates, and labor, the market of which is glutted or soon will be, has set its mark against any wages decrease and we are all agreed, I believe, that the workingman is generally justified in his attitude of what he has, he will hold.

On the question of raw material or crude oil, a few words might be enlightening. It is unanimous that production is not keeping pace with refining. Do not misunderstand me. We cannot refine more than we produce, but the unmined reserves, that is, the estimate of oil below the ground is lessened every year. Refineries have increased their capacity, production men are working harder than ever, but new fields are not equalizing in output the extra demand, due to increased use of automobile, motor truck, tractor and stationary gas engine. In addition to this, the new fields are not as rich in natural gasoline content. Take for instance, the Mexican field. The percentage of natural gasoline in that crude is comparatively small. It is a well-known fact also that old pools are not as productive of natural gasoline content as in days gone by. It is estimated the unmined reserves of crude oil in the United States is seven billion barrels. We are consuming about one-third billion barrels per year, and the demand is increasing more than the new fields are producing. Dr. White, head of the United States Geological Society, has estimated peak production in 1921—two years hence. But who will dare say that the demand will be lessened in the days to come?

But of that more later. The alternatives are that if crude oil production will not meet the natural gasoline requirements—unnatural methods—that is, cracking processes of refining—by this we mean, re-running fuel oil and coal oil, will have to be further developed. This means gasoline of lower volatility and automotive engineers will further have to meet the situation by improved carburetion principles. The situation is so grave that some authorities claim even the much sought for coal oil carburetor, if discovered, is not going to keep the ball rolling. That, gentlemen, is the crude oil situation.

Now let us turn to demand. It is always difficult, nay dangerous to prophesy, but there are certain signs by which in a general way we can gauge the prospects. One of the first effects of the armistice was the immediate contraction of fuel oil, which was made under rigid specifications to meet the requirements of the British and other Allied navies. This lessened demand for navy fuel should be more than offset by the increased demand for bunker fuel. As the world's commerce resumes its normal channels and as new factors in world trade develop, the nations with their new commercial fleets already built and large additions being planned, most of which are equipped to burn oil, will create an unprecedented demand for fuel oil. Coal oil is practically exhausted in the neutral and other European countries, and an indication of the market at home is reflected in an advance of 1c per gallon put into effect on Saturday last. The relationship between fuel oil, coal oil and gasoline is very close. In the past four years or more every drop of fuel oil available was produced for naval and munition work, refiners skimming only the gasoline and coal oil. With increased demand for fuel oil and coal oil, less available material for gasoline is left and though during war times the demand for gasoline in Great Britain, France and Italy was enormous and at the signing of the armistice was curtailed, there is every reason to believe that motor trucks, tractors, and other gasoline driven power will be large and important factors in the reconstruction of the devastated countries. It is a fact that refiners are now being asked for quotations on gasoline for export, which would indicate that European nations were about to talk business. It is the feeling of the heads of the oil industry that anyone pessimistic or prophesying decreased demand in gasoline will be greatly disappointed.

Turning to the domestic demand, the situation looks even better. Will a few statistics weary you? Registrations in the United States at the end of last year showed approximately six million automobiles in operation. There were 270,000 cars operating in Canada, 41 per cent of these in Ontario; 250,000 trucks were produced in 1918 in the United States. Of these it is estimated 137,000 have gone into commercial service on this side of the water, which means 137,000 more trucks to consume gasoline in 1919 than last year.

Then too the tractor, although many of them, coal oil burning machines, should not be overlooked for their consumption per machine is enormous. The total production of tractors in 1918, was around 125,000 and manufacturers estimate their 1919 output at the modest sum of 300,000—an increase of 140 per cent. There are no tractors built in Canada, and I regret I have no definite figures as to the number in use here. In eastern Canada their numbers are small, but increasing rapidly. The automobile manufacturer, truck manufacturer, tractor and gas engine manufacturer, now able to get steel and other raw material, and off war work, are out to make 1919 a banner year. Taking it all in all—this year is going to show big increase in domestic consumption of gasoline.

But what about gasoline substitutes, you say. Every now and then someone discovers a new colored powder or ink or alcohol that the papers take up and herald as a cure-all for high prices. At last something has been found that John Doe can mix in a pail of water and smile as he thinks of the refineries closing up. Perhaps some of you hardware men have had dreams of taking down a tin or parcel from your shelves, letting the customer do his own mixing and filling. That time is not yet, gentlemen, and old gasoline is still the daddy of the automotive energy family, and will likely continue to be for sometime to come. Benzol, alcohol, have all been tried, but are failures commercially. By the way one of our customers told me in good faith that the reason a then prominent member of the Ontario Government and now president of one of the oil companies in Canada, introduced the prohibition liquor legislation was his fear that alcohol might prove to be a serious menace to gasoline. No gentlemen, he was not a hardware dealer. I recognize your knowledge on that subject as on others.

The last claimant as a gas substitute is liberty fuel, of which you have, no doubt, read. This on official analysis was found to be 65 per cent. of benzol, 25 per cent to 30 per cent. of coal oil, and the balance amyl acetate—a camouflage—a perfume—and probably naphthalene and alcohol. Benzol is a by-product of coal and if the total production of benzol were used for liberty fuel, it would represent only 2 per cent of the amount of gasoline required. Benzol has its uses in other commercial ways, but is never likely to figure an important factor as a gasoline substitute. Many times during the war we were told that the German chemist had discovered something that kept their internal combustion engines operating, but if they had, some of it would have been left in the captured machines or equipment handed over, but investigation proved they contained the old reliable and nothing else—straight gasoline.

To sum up, there is no commercial substitute for gasoline. The demand for 1919 will be increased. These factors, combined with limited production, high wages and high transportation costs permit us to gauge the situation as one of exceptional strength and optimism.

Your executive has asked me to say a few words regarding your retail prices, and the question of the advisability of your fixing them. This is a dangerous subject, gentlemen, and I hesitate to speak. The Government tried to enforce a measure of this kind last summer and you know the result. Such a hue and cry was raised by the trade that the date of enforcement was extended, the matter became cold, and fortunately the armistice intervened. What were the objections raised? The first one was that the 10 per cent. gross profit—it actually worked out about 9 per cent in towns where oil companies had storage and 10½ per cent. at outside—was too small. The second one was that the fees were too high, and cut down the sellers' already small margin still further, and third, but not least—no real reason for the plan was given. The move was not in the conservation of gasoline as the lower selling price was an inducement to larger sales of a product, which was straining the energy of every refinery of petroleum for war purposes. It may have been for revenue purposes, but the trade viewed it as a strange means to an end. Perhaps it was to assure gasoline to some automobile owner at John's Corners at a fair price. Whatever its purpose, the proposal was unpopular with the refiners and the trade. In offering my own personal opinion, gentlemen, may I say that a fixed retail price would not be in your interests. By that I mean the same price in Hamilton, Woodstock, Boocaygeon and every other point in Ontario. While admitting it would be ideal from the auto owner's point of view, in that he could tour the Province and know what he was going to pay 200 miles, say, away from his own home—from your point of view, as I see it, it is, neither practicable, nor in your interests. In considering this subject, please bear in mind four things—gasoline is a bulk product, is marketed as a rule in large quantities; the turnover is quick and as a consequence the percentage of profit is comparatively small. No bulk, close margined staple, as far as my experience goes, has ever been successfully retailed at a fixed price. Take sugar, for instance, the grocer's percentage of margin is small, but as a rule it represents a quick turnover, and the profits in dollars and cents are considerable and while it costs one firm about the same as another—there is no fixed price. A fixed price could not be worked out. On the other hand package tea is sold at the same price for the same grade of tea the country over. Here is a case where the percentage of profit is greater and the retail price is fixed by the manufacturer. The man in the small village selling sugar and the man in the same small village selling gasoline cannot afford to sell at the same price as the man with the larger turnover in the towns or cities. It is true gasoline costs him practically the same at the present time, but it costs the small man more to do business on gasoline than the larger one. I know some of you, gentlemen, with the expensive town and city stores and large overhead will question this, but on the question of gasoline, it *does* cost the small village man more to do business. His turnover is smaller, is slower, and evaporation losses greater on the part of the consumer. Nor to my mind is there any demand for one price. The city man knows that gasoline is sold on a small margin and is willing to pay a slightly higher price for his gasoline to villages. I say slightly higher, but I believe I am addressing men, who are satisfied with a fair price. And gentlemen, always remember that, that while it is a generally accepted principle of economics, that the elimination of as many channels as possible in getting a product to the consumer—the cheaper the price will be to the consumer, the same theory says that the middleman is there for life, provided he furnishes a real service, and real service includes fair price.

I may say that my views on the fixed price question are purely my own—they have no official stamp and while I appreciate they will not be accepted in toto by all the gentlemen here present——I give them to you as if I were a hardwareman myself, and for what they are worth.

As an oil man I would be a false friend to the hardware dealer if I did not point out a real danger in that there is a tendency on the part of the hardware trade to let the gasoline business slip away from them into the hand of the garage man. By too many of the hardware men the gasoline sign has been hung up merely as a convenience, or as a drawing card for lubricating oils and greases, tires and other accessories. Gasoline *is* a big drawing card, and if handled right, should show a profit in itself. The gasoline business is as much your business as that of hammers, paints, mowers or glass. You have invested in your business considerable money, are a valued part of your community, your sign is an honored one. It has been out for years and stands for fair prices and profits and service. See to it, gentlemen, that part of your service and profits take care of and come from the proper handling of gasoline.

Use of Price Ticket in Window

Results Obtained From Use of Price Tickets and Show Cards in Windows Outlined by Hamilton Merchant

Address by Nelson Mills, Vice-President Mills Hardware Co., Hamilton.

IT was apparently the desire of your executive that several retail hardware men should be interested enough in this convention to relate their own business experience.

Being one of the chosen few, it becomes my pleasure to tell you what I know about "The Value of Price Tickets and Show Cards in the Window, and the Results They Bring."

I would prefer to have chosen my own subject, but such was not the case.

At first it puzzled me greatly to find sufficient to say in 20 minutes about so small a detail as a price ticket; but to my surprise I found 20 minutes not sufficient time to tell the story.

Since accepting your secretary's invitation, I have studied very closely just what results can be obtained by the use of price tickets, and found many interesting and some surprising methods that should be adopted.

In fact, several long-standing methods were immediately changed to secure better results and improve the general appearance; of which I shall speak later.

To get right down to brass tacks, my talk is divided into 4 parts, namely:

1. The window value.
2. The show card as a sales medium.
3. Demonstrations and impressions.
4. The kind of card to use.

The Window Value

Now let us analyze the window value. How many hardware men actually know the value of their show windows? Very few, I would judge. If you do, then you are working them overtime.

Right here I desire to demonstrate to you the value of a show window as compared to the value of a newspaper ad, in a city like Hamilton, reciting my own experience.

When Woolworth, Rexall or the United Cigar Stores seek a new location they take

a count of the traffic. Very well, if that method is essential in locating a store, then it must be a valuable asset to the show windows, which are the eyes of the store.

We know, by actual count, in the month of May, 1918, that a daily average of 55,000 people pass our windows from 8 a.m. to 10 p.m. This is a 3 day average, Thursday, Friday and Saturday.

We also know that the largest local newspaper goes into 20,000 city homes daily. Therefore, we have twice as many people passing our windows each day as compared to reading our ads.

But there is a difference. The passer-by is usually in a hurry, while the ad reader is at leisure. All the more reason the show window should be exceptionally well dressed, and have some attraction strong enough to draw at least 10 per cent. of that 55,000 to the window-pane.

Then what? The story must be told quickly.

There is your prospective customer looking right at a life size article in your window at your front door. The display has done its duty by attracting the customer. How about the card?

Does a price card tell the complete story, the cost, and does an attractive show card tell the quality and invite him inside? If not, you are the loser

So much then for the show window's pulling powers. How about its cost? Last year we spent $4,000 in advertising to 20,000 people twice a week, while our show windows told the story every day to 55,000 people at a cost of only $50.00 for the year.

Therefore, the show window has the best opportunity at the least cost, and we have also noticed far more direct sales results from windows showing a better class of goods at higher prices.

This proves to me that the newspaper ad has invariably become a bargain column.

The Show Card as a Sales Medium

In the foregoing talk, I spoke of the drawing power of the display, which attracted the customer to the window pane. Now, I wish to demonstrate the value of the price card as a silent salesman.

This humble show card is given a place in the mercantile world second to none as a direct sales medium. The price, quality, and quantity are brought directly before the prospective buyer and displayed actually on the article offered for sale. How much further could any medium go? A verbal demonstration does not carry the sales message as well. That admits of an argument, and one cannot argue with a show card.

If its general appearance is pleasing to the eye, and the price is within reach of the purchaser, it immediately conveys a mental resolution to choose that article. The facts are so complete, that desire is at once created and the purchaser goes into the store seeking more information regarding the possible uses of the article.

Now, the reverse impression is created if the window is poorly dressed, and the card unattractive and soiled.

One would hardly credit the veracity of any concern that would label a $50.00 cabinet of silver with the top of a paint box marked with a blue pencil, or use other equally unbusinesslike methods.

Cheap looking, poorly executed cards convey just the same idea they represent. They make the $50.00 article look like $4.98.

Then we have the display card decidedly important, which is the centre of attraction and tells about the quality, the quantity, and in many cases about an actual demonstration that may be going on in your store. It is a card of invitation, it is the newspaper of your window, and if it is attractive people are more apt to believe its message.

Then last, but not least, it is the link between your store and national advertising. For example, the card reads, Dear Madam, kindly accept our invitation to step inside and witness an actual demonstration of that well-known O'Cedar mop. Isn't that linking up national advertising? How can any man discredit the value of window cards and price tickets as a sales medium?

There is only one reason you would discredit it, and that is because you are actually afraid, yes, scared green, that your competitor will see your price.

Gentlemen, forget such folly, and don't be a business "ostrich," the other fellow knows your price, even if it is marked in code.

With the advent of modern lettering pens and the rigger, or so-called one stroke brush, the show card has moved into a class by itself. It is no longer a "card sign," it has become an actual sales medium.

NELSON MILLS

Vice-President, Mills Hardware Co., Hamilton, elected to Executive Committee for 1919-20.

Demonstrations and Impressions

Mr. Wills arranged an actual display of a window on the platform showing with and without tickets.

Demonstration No. 1. A well-dressed display without tickets. Now gentlemen, what impression is conveyed to the onlooker? You must admit that the display has pulling power. (A poor display would create very little attention).

Impression. Mrs. Jones says, as she approaches the window: Beautiful goods, but I imagine they are very dear. There is no invitation to come in, not even a word regarding their make, quality or price. *Result,* Mrs. Jones and friend pass on. *No sale.*

Demonstration No. 2. The same neatly dressed window and all the trimmings. The pulling power is increased. The information is complete and an invitation to come in is extended.

Impression. Mrs. Brown says as she approaches this window: Oh, look at these beautiful electric appliances. I wish we had that kind of a toaster. They are not so dear as one would imagine, and it only costs ½c per hour to run them. I must tell Joe about them; let's go in and get one of those booklets.

ED. WANLESS

Chatham, elected Vice-President Retail Hardware Association of Ontario, 1919-20.

You will notice, in this instance, that guessing is entirely eliminated. *Results.* In all probability a sale.

Not long ago we put in an exclusive mitt window, neatly priced at a slight reduction, and sold $27.00 worth the first day. It isn't what you display, it's how you display it.

An impressive display creates desire and people come back weeks after remembering the article and price when they have the money to buy.

The Kind of Card to Use

Now, regarding the kind of a card to use, it makes very little difference what color you decide on, so long as that color is used exclusively. Don't mix colors.

If you have adapted a certain color throughout your store, then link up the window also.

The main point is to use the right size of card on each individual article displayed.

Make everything balance from an artistic standpoint, many a window has the appearance of all card, and no goods.

Then again, the lettering on the card should be all the same style, and a proper proportion to the size of card used. These are details, but they all count when it comes to drawing power.

Remember the show card is a silent salesman and must be well dressed to perform its proper function.

In closing, I should like to extend an invitation to every hardware man interested, to visit our store, and advertising department.

We shall be glad to give you all the information you desire.

We can tell you where to purchase the ink, pens and brushes, necessary to do the work of this kind.

The cards shown here, were not made by an expert card-writer, but by one of our own employees, and your men can do the same work with very little practice.

My last thought is that a good window display leaves nothing to the imagination. The eyes see and the mind believes.

VANCOUVER CITY TO LICENSE WHOLESALERS, BROKERS, ETC.

Special to HARDWARE AND METAL

Vancouver, B. C., Feb. 19.—Advice from the Vancouver correspondent of HARDWARE AND METAL states that Vancouver City is attempting to pass a by-law to license all wholesalers, brokers, and manufacturers' agents; also each salesman considered. Wholesaler's fee, it is understood, is to be $100 each per year. Any salesman using car charged another $10 and one per cent. of the value of the car. Special committee met to-day and will meet again shortly.

Wholesalers and manufacturers are fighting hard against the by-law and brokers also fighting against being included. City License Commissioner Chas. Jones says he expects anticipated licensing scheme should augment city revenue $100,000. Vancouver has never had business tax and couldn't get Federal Government to give power to assess business tax. Seem to think that furore licensing kicks up will get Government action. Commissioner does not know yet whether it would catch all commercial men working the town or not, but manufacturers maintain it would cost a Montreal traveller $10,000 to work across the Dominion.

The Birmingham of Canada

Because of the Many Products Manufactured There Hamilton Has a Very Special Interest for Hardware Dealers—Sketch of the Steady Industrial Growth the City Has Made

BECAUSE of the large number of products they are handling every day, which come from Hamilton, the city has a little more than particular interest to hardware dealers. From a manufacturing standpoint, Hamilton has always occupied a prominent place in the commercial life of Canada, and in the past few years it has attracted some of the largest firms in their own particular lines in the world, to its own material advancement. The natural advantages which the city possesses geographically have been turned to excellent account in securing important factories. Added to this are the excellent railway facilities which the city has been able to provide and which are always a first consideration with a manufacturer, splendid surroundings and splendid home conditions. The country back of Hamilton is one of the richest sections to be found perhaps in all Canada from an agricultural standpoint.

Big Fruit Trade

Fruit farms, which are without question among Canada's finest, stretch for miles through the Hamilton and Niagara district. More than a million dollars' worth of choice fruit, peaches, grapes, plums and other fruits are shipped from this section each season, and a very large percentage of it passes through Hamilton.

The city itself has a population well over the 100,000 mark. It is essentially a business community and the rapid strides it has made in manufacturing have placed it among the best known of Canadian cities. "Made in Hamilton" goods are now sent from coast to coast, and in some lines in no small quantities. Among the leading industries are included hardware manufacturers, blast furnaces and steel manufacturers, plow works, agricultural implement works, washing machine and clothes wringer manufacturers, firms making silver plated ware and wire goods manufacturers.

Has Grown Steadily

It is stated that when a big industry locates in a city it very often brings other firms, which, while not making the same lines, very often make parts. This has been demonstrated in Hamilton, and one firm after another has located there and has grown steadily. Many of these deal very largely in hardware goods of one kind or another, and their combined output each year runs into many millions of dollars.

Another feature that has been well exemplified in the growth of Hamilton is the important part radial railways play in bringing business to a city. Hamilton is well served in this respect and the electric lines, which run through the rich fruit growing territory, add materially to the city's prosperity.

A Striking Feature

One of the first things that strikes a visitor to Hamilton is the large number of really attractive store windows to be found in the down town district. That Hamilton merchants are progressive and keenly alive to the importance of not only displaying their goods to the buying public, but of having large roomy windows for doing this, is soon apparent. There are not many cities in Canada where such a large percentage of stores use their window display space to better advantage than in Hamilton. As might be expected in a manufacturing centre, and a centre of radial railways, Hamilton is a busy city and a prosperous city.

Are Not Neglected

Notwithstanding the progress that they have been making industrially, Hamilton citizens have not in any way neglected the things that make life worth while, in the shape of nicely laid out streets, nice comfortable residences, parks and similar features. From a beauty standpoint Hamilton is somewhat favorably located on the Hamilton Bay, and has one of the best land locked harbors on Lake Ontario. The city is somewhat extended, covering an area of almost 8,000 acres. It has about 30 miles of asphalt roadways, over 200

A view of one of Hamilton's busy streets, showing City Hall in distance. Manufacturers, wholesalers and retailers are keen on the possibilities of Hamilton.

miles of cement walks, fifteen public parks, several of them real beauty spots, well over twenty thousand residences and nearly five hundred manufacturing industries of one kind and another.

Shipping Facilities

The city is served by seven steam railways, six steamship lines, and four suburban electric railways centre there. There are 83 miles of suburban railways and more than thirty miles of street railways. Hamilton has eighty churches and more than thirty public schools.

"The Mountain" is one of the features of the city from a scenic standpoint. From its summit one has a most attractive view of the city, and the splendid country surrounding it. Looking westward, a bird's eye view of the rich Hamilton Valley is obtained. Five miles away to the east is Burlington Beach, the summer resort of the citizens. To the north, a splendid view may be had of the waters of Hamilton Bay, while for miles to the south-east stretch the fruit gardens. The panoramic effect to be seen from the summit of "The Mountain" is said by many to be among the most beautiful to be seen in Canada.

Are Kept Together

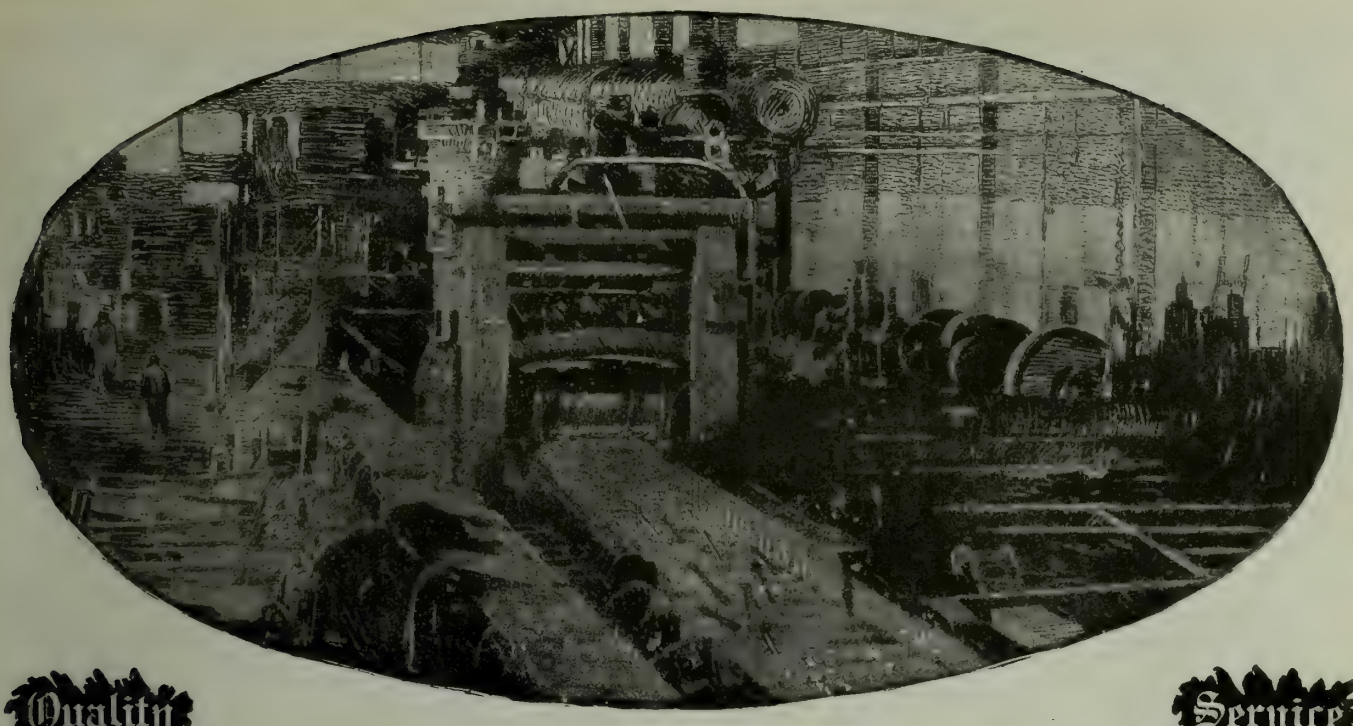
In a general way a plan has been followed which has worked out well, in that the great majority of the manufacturing plants are situated in the industrial area in the north-eastern section of the city. Many of these have been laid out in such a manner that they are models of the results to be obtained by following modern methods. Taken altogether, Hamilton, with its splendid accommodation and its wealth of manufacturing concerns, is an ideal spot for the annual convention of the Ontario Hardware and Stove Dealers' Association.

The Two Courses For Market Reconstruction

THE average person, if asked what is to be the course of prices in the reconstruction of the markets that is now in progress, or at least is being awaited, would probably reply that it is a case of prices declining until they reach the level at which purchasers will take hold, that when that time comes the period of activity and prosperity so generally predicted will begin and the "transitionary period" will have been ended.

If that is the case, it is very desirable that we should all recognize that we are expecting something altogether unprecedented in market history. Particular reference, of course, is made to the steel market, but no doubt the observation would hold good with many other markets.

The steel market has passed through many periods of reconstruction. It is its regular course to have a period of advancing prices, heavy and forward buying, a period of quietness with stationary prices and then eventually a decline to some low point from which the cycle starts over again. Beginning with the rise of 1899 the pendulum has made five and a half round trips.



After each of these former rises the steel market had to go through a process of reconstruction. Now it has to go through another. It is not different in general character—where is the difference?—though of course there is a difference in the extent. Government prices for finished steel were 114% above the top of 1912, 104% above the top of 1909 and 93% above the top of 1907. That means some difference in the extent of the decline, though how much difference no one can say for one does not know how nearly the pre-war basis of values will be reached within the next few years. That it will be touched is very improbable and that it will be closely approached is doubtful.

How it Worked

Now the invariable precedent in these readjustments has been that the steel market declined to a point below the proper level, and the buying barely began at that point. Prices began to rise and then the buying gained force. Everybody knows that no large quantities of steel are sold either at low points or high points. Always the heavy sales and purchases are made on the way up, at intermediate prices. No large part of the total business done on a round trip of the pendulum is at the high point, during the decline, or at the low point. Invariably the business has been done chiefly as the market was advancing.—"The American Metal Market."

NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was

CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

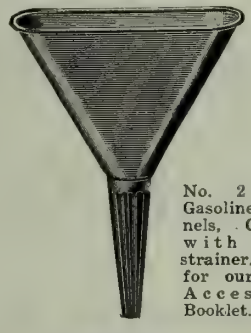
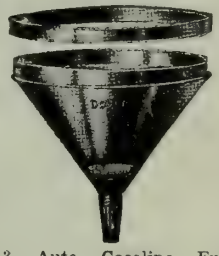
WINTER *Feb. 22nd* SPRING *March 21st*

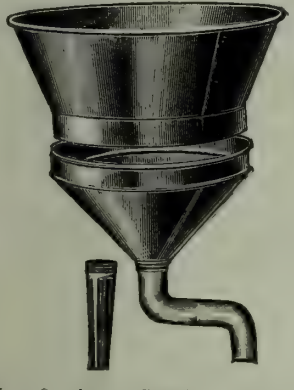


Less than three weeks off! And an early Spring predicted! Have you thought about it?

Buyers should anticipate their Spring requirements *immediately,* and order *at once,* to get prompt delivery.



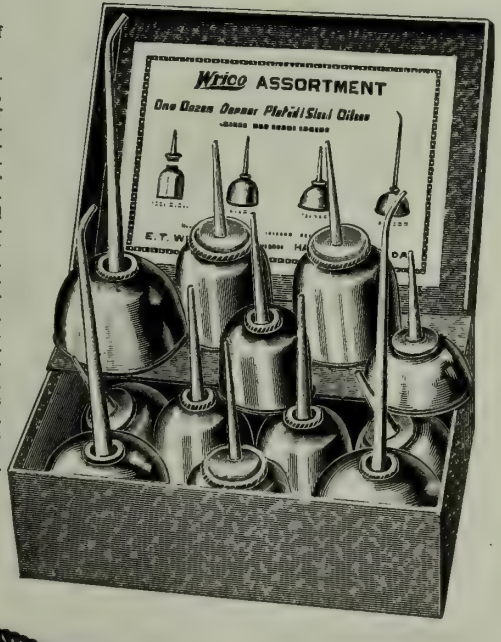
Here are a few suggestions. We can give you more on request.

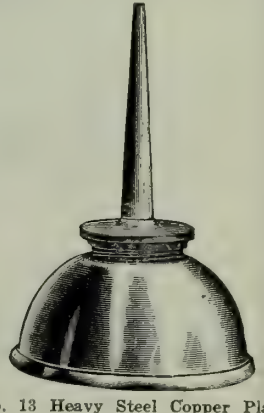


"CANUCK" Bread Mixer. Every home should have one of these labor-saving and thrifty home bread makers.

No. 2 Auto Gasoline Funnels, Oval, with brass strainer. Write for our Auto Accessories Booklet.

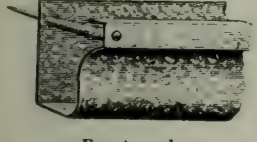
No. 3 Auto Gasoline Funnels. Round, with hoop for chamois strainer. We make all the tinware measures, funnels, etc., required by the autoist.





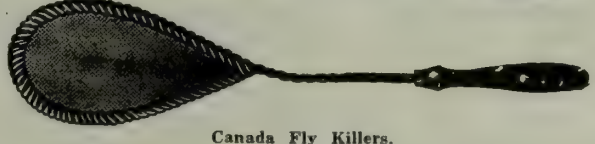
No. 3 Auto Gasoline Funnels. Round, with bent or straight outlet, and chamois strainer. Ask us about our other auto lines not shown here.

"WRICO"

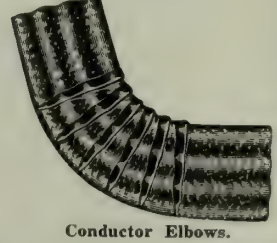


Assortment of Oilers

One dozen assorted oilers, suitable for farmers, autoists, machinists, householders, or factory purposes. Packed in an attractive display box for inspection on dealer's counter or show case. The oilers can be seen, instead of being hidden on shelves. Sells more oilers, and saves clerks' time, also customers' time.



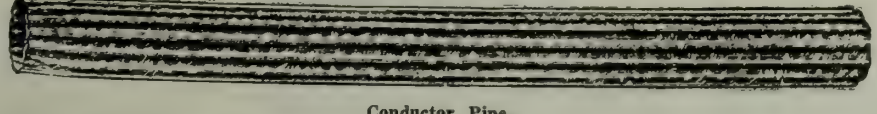
No. 13 Heavy Steel Copper Plated Oilers. One of our many fine oilers. With our increased variety we can meet all requirements in oilers. Ask for cuts and prices.



Eavetrough.

There will be no setback to spring eavetroughing and roofing this year. Get your supplies in now, as they are wanted now.

Canada Fly Killers.

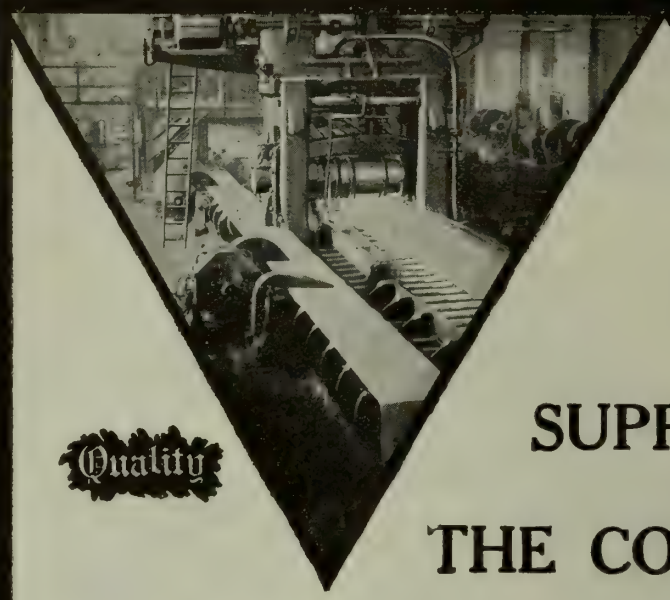


Mr. Fly will take advantage of the early spring and be on the job early. Be ready for him with a "Canada" or an "Ontario."

Conductor Elbows.

Work of this kind will proceed without a halt. Look over your stock now and keep it up to the mark.

A post card will bring you information and prices of any of our goods. Write one to us if you are interested.



Conductor Pipe.

Made in 10-ft. lengths. Plain or corrugated. For fine architectural designs we can supply the square pattern pipe, and elbows to match.

We solicit enquiries from any dealer interested in our line of manufactures.

EAGLE MFG. CO., Hamilton, Ontario

The Financial Post THIS WEEK ON STEEL MARKET CONDITIONS

SOME of those who are very close to the market claim that the present situation at the peace conference is a factor that keeps buyers from coming into the market. It does not require a very great amount of reasoning to see that there is a lot of steel needed in every country that has been at war. The disturbing reports that are coming out regarding the feeling in Germany, the planning of a new conscript army there, the attitude of some of the Allies, and the new armistice arrangements all tend to keep an element of uncertainty and doubt in the mind of the people that hinders planning and buying for anything except immediate wants.

LABOR

The suggestion is being made more in the open now than ever before that wages on their present level are doing much to keep business from moving. As has been stated before, the Steel Corporation, when they made their reduction which averaged $4 per ton, stated that it was their concession, regardless of labor costs. Now the claim is that any other reduction will come only when labor costs are cut. Naturally those who hold these views, and they are many, speak rather gingerly on the subject, fearing that anything they may say will cause unrest or open trouble in the dealings between the mills and the men.

Besides the important article from which the above quotations are made, THE POST this week deals with the following amongst

OTHER SUBJECTS OF INTEREST

Expenses Cut Into Profit of London Rails.
Asbestos Corporation at $1,253,813 Gains 123 Per Cent.

PEERLESS PERFECTION

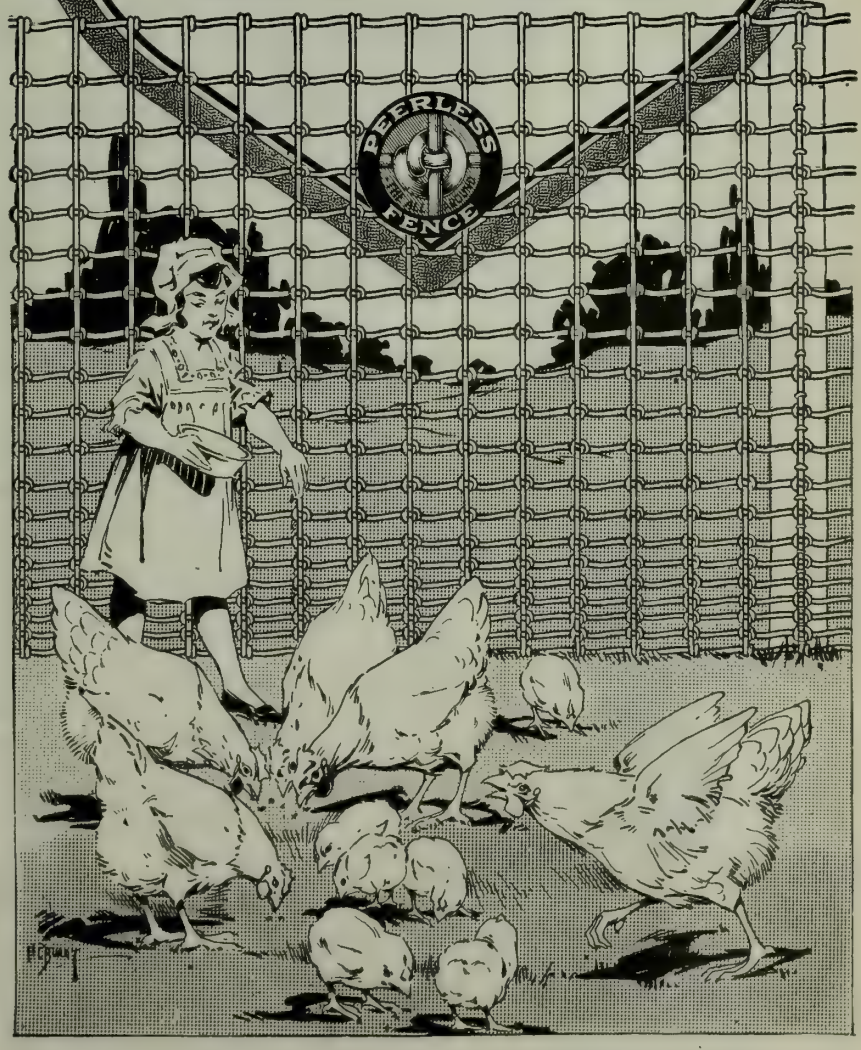
The kind that endures—in place to stay and please—because it lasts. It looks well and is always in place—"it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

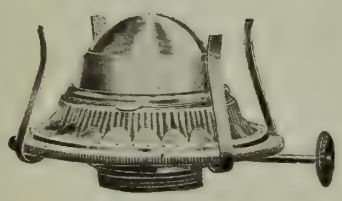
The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.



WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes.



Write for Catalog.

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

Col. Hatch Predicts Trouble For Dealers If Western Free Trade Ideas Are Adopted In Ontario

ON Thursday at noon the delegates were guests at a luncheon and entertainment provided by the Hamilton hardware manufacturers. Col. Arthur Hatch, of the Canada Steel Goods Company, who was toastmaster, in the course of his address commented particularly upon the actions of the farmers in Western Canada in regard to tariff matters. There was no question before the country to-day of more moment, he said.

"The programme which the farmers of the West have under way is simply disgraceful," he declared. I say this because I know all about this question. I have been studying it closely for the last thirty years. I am alarmed over the recent actions and what is developing regarding free trade. We have not realized what this means. Because we hear about free trade in England we do not thing much about it. But free trade in England and free trade in Western Canada are two entirely different propositions. Two of the huge steel corporations of the United States are only waiting for an opportunity to exploit their business in Canada at the expense of every one who works or has any money. The literature of the farmers is sent out from New York, and I tell you there is a pot boiling in the West that means more than most of you perhaps realize.

Says Not Patriotic

I do not want to make any special comparisons, but you might notice that Saskatchewan contributed less than any other province to the loans of Canada and was the only province which refused to contribute to the Navy League collections. These people are the men who go to the Government and say, we have twenty-nine nationalities in Saskatchewan and we want to make an agreement that the Bible will not be permitted in our schools. The Premier, I note by the papers, says they are making all their legislation in the interest of the farmers because the Government thinks the farmers know what they want. I was alarmed at seeing elected in Ontario a member of the Farmers' Institutes. The literature which has been circulated in the West has reached Ontario. They will appeal to you as business men. They will tell you that if you do not support them they will not buy in your stores. I will be surprised if you listen to these arguments. There is in Winnipeg a huge warehouse filled with the goods of these Westerners. Once they get your support it will not be your store they will buy in, but their own. Your trade will dwindle and dwindle if you permit yourselves to be led away by these people and their statements that freed trade is good fo rthe country.

There are seeds of German discontent behind all this. You must realize that in Ontario you are in business to supply the farmers engaged in mixed farming. If you have Free trade thurst upon you you merchants and manufacturers will kill the goose that laid the golden egg. Our sons have been "over there" fighting for this country. The men here who would deny these boys, are miserable skunks. What we have to look to is to keep the heritage our boys have won safe for the coming generations."

President Explains

In the course of his remarks, Col. Hatch said he had noted that the speakers at the hardware convention had made no reference to Canada. President A. J. Wright, who was next called upon, reminded Col. Hatch that he was wrong in what he had said about no mention being made of the Dominion. He pointed out that the Ontario dealers had passed a resolution unanimously declaring themselves in favor of handling "Made-in-Canada" goods as much as possible.

He commented upon the splendid relations which exist between the hardware dealers and the wholesalers and manufacturers, and urged that the same close co-operation be continued.

THE CONVENTION REPORT

In this issue you will find practically a complete report of the Convention proceedings held at Hamilton, Ont., this week, with the exception of the address by Mr. George A. Simpson, which will appear in next issue. Watch next week's issue for "Afterthoughts of the Convention." The publication in this issue, on such short notice, of practically a complete report of the many addresses is no small task, but it is in accordance with HARDWARE AND METAL'S policy to give our readers the best possible service.

PAGE WIRE FENCE CO. TO ERECT FACTORY

The Page Wire Fence Co., Ltd., according to the Montreal manager, W. C. Heron, will, as soon as weather conditions permit, erect a Canadian factory at Three Rivers, Que. It is the intention of the company, Mr. Heron states, to do all manufacturing eventually at this plant. Export as well as domestic trade will be conducted from this point and shipping and trackage facilities will be afforded. It is expected, Mr. Heron pointed out to HARDWARE AND METAL that there will be a large foreign trade with India, South Africa and other foreign countries. Already large orders have been received and other enquiries were coming to hand.

Geo. D. Davis Honored By Hardware Dealers

At the Wednesday evening session of theHamilton Convention, the members of the association presented George D. Davis, manager of HARDWARE AND METAL, with a very handsome seal club bag with toilet set. In making the presentation, Past President James McGregor, of Oakville, Ont., speaking on behalf of the members, referred to the unstinted support Mr. Davis has given the association, not only through HARDWARE AND METAL, but by personal efforts. To Mr. Davis' work, he said, was due much of the splendid success the association has achieved during the past four years.

Mr. Davis stated in reply that the presentation was a complete surprise to him, but it had been a great pleasure to him to help the association in every way he could. Speaking of HARDWARE AND METAL, he said it was the duty of a good trade paper to co-operate in every possible way with the retail trade through their conventions and in other ways. It had always been a great pleasure to meet with the executive officers of the association and assist them in the preparation of their programme and in other work connected with the activities of the association.

Association to Support Made in Canada Goods

The following resolutions were carried by the Ontario Retail Hardware Association Thursday: "That owing to the increased membership and the many additional duties of our earnest and capable secretary, W. F. Macpherson, that the salary be increased to $600 per annum.

"That this association claim recognition on the part of wholesale and manufacturing associations when radical changes in trade policy or practise are considered so that the views of the association through its executive should receive consideration.

"That the executive appoint a subcommittee to revise the by-laws and report at the next convention.

"That this association recommend the retailers to sell as far as practicable, 'Made-in-Canada' products and thereby assist in creating employment for Canadian citizens.

Catalogues and Booklets

A catalogue, which is a summary of the lines made by Beatty Bros., Limited, of Fergus, Ont., has been issued by the firm under the title of "A Souvenir of Lyons Fair." It is most attractively got up and contains many full page illustrations in colors. The firm has also issued a special catalogue listing the lines of electric washers it manufactures. It contains eight pages, and all the illustrations are in colors. Copies of both catalogues may be obtained by readers of HARDWARE AND METAL upon request.

EDITORIAL COMMENT

PROVED ITS VALUE

ONCE again the annual convention of the Ontario Retail Hardware and Stove Dealers' Association has proved its value not only to the trade at large, but to every individual who attended the sessions in Hamilton. Those who attended the various meetings, took part in the discussions, visited the factories, and met the manufacturers and their representatives will return to their business in all parts of the Province with a broader grasp of the general situation in Canada to-day, and a more thorough knowledge of conditions in the hardware trade and what is likely to obtain in the future. This knowledge has a value to them that cannot be reckoned in mere dollars and cents, although what they learned at Hamilton, will certainly have a real financial value also. In the best sense, though, the convention served the purpose for which it was held, to make the hardware dealers of Ontario better merchants. It will help them to solve their various business problems, and give them what is not always easily obtained—a view of the other fellow's difficulties and how he meets them. It will give them also what every merchant needs, an appreciation of the manufacturer's viewpoint. Gatherings such as that which has just closed at Hamilton emphasize, perhaps as nothing else can, the real and far-reaching value to the trade of close co-operation. As hardware merchants help one another and as dealers and manufacturers draw closer together and all gain a mutual understanding of one another's needs, they learn how to best adjust matters so that the very best interests of all will be served. This spirit of co-operation and understanding is one of the corner-stones of successful merchandising. The stronger the association becomes and the closer its members pull together the larger the results obtainable. The fourteenth annual meeting will live in the history of the organization as one of the best and most profitable of the gatherings held by the association.

HARDWARE AND METAL, in accordance with its policy of rendering to the hardware dealers of Canada the best service possible, presents in detail the important happenings at the meeting. The addresses by various hardware dealers and manufacturers carry a wide interest to the trade and are worthy of the very closest perusal by all who were unable to attend the sessions. While the convention was a provincial one, the questions discussed were in many cases of Dominion-wide interest, and the information that was given regarding future conditions may be applied generally by hardware men in Halifax or Vancouver. Information of this kind, coming during a period such as the present when the whole commercial world is face to face with problems it has never before known, is of unquestionable value. A particularly gratifying feature of the outlook for the future is the sound basis upon which the whole hardware trade is now established, and the spirit which merchants are showing. The general opinion seems to be that with the experience they have gained in the past five years they can face anything and see it through.

CUTTING DOWN DISTANCES

WHILE important developments are taking place in Canada in regard to the establishment of an aerial service between different points similar projects are maturing elsewhere. One of the most important is that headed by Reginald Lloyd of London, England. A company already formed by him plans an aerial route for both mail and passenger service between Australia and London. Landing sites are to be 300 miles apart. The route planned is from Sydney or Melbourne to Port Darwin, overseas 300 miles to the Island of Timor, across Java and Sumatra to Singapore and Calcutta, across India to Karachi, thence to Bagdad and Port Said. From here there is the choice of many routes to London and it is likely that several may be settled upon according to the commercial possibilities they present. It is expected that the complete journey from London to Sydney will be made in 150 hours. The importance of this from the standpoint of business men is obvious when a comparison is made between the time it now takes. There are many indications that aerial travel will work the most important revolutions in minimizing distances that have taken place in a long time. Canada, it is expected, will have one of the first services of any size that will be in operation.

EVENTS IN THE TRADE

Business Changes

Rathwell, Manitoba.—W. L. Dawkins has purchased the hardware business of W. A. Caswell.

Fire Losses

Frank H. Plant, manufacturer of wagons, sustained a loss of $5,000 in a fire which destroyed his factory. The loss is partially covered by insurance.

Obituary

The death occurred in Toronto of George E. Sales, of the Geo. E. Sales Company, manufacturers of electric lamps.

Richard H. Hodgins, aged 35, hardware merchant at Lucan, Ont., died following a short illness. He located at Lucan two years ago, and prior to that time was a resident of London, Ont., and for several years a commercial traveller. John Hodgins, traveller for the British American Oil Company, is a brother.

Death came very suddenly to William C. Coulson at his home in Leamington, Ont. While playing his gramophone, he suddenly fell over and died a few minutes later from hemorrhage of the brain. Until his appointment 17 years ago as customs officer and town clerk he was engaged in the hardware business in Leamington. He was prominent in Masonic circles and took an active part in civic affairs, being a member of the council for many years. He was 71 years old.

The death occurred at Whitby, Ont., from pneumonia, following a short illness with influenza of Frank J. Rice, aged 26. After completing his education at the Whitby school and Woodstock College he engaged with his father, George M. Rice, in the hardware business. Deceased was a clever hockey player and a member of the Whitby team. Besides his wife he leaves a four-year-old daughter.

Personals

F. W. Cottrell is in Western Canada representing the White Sewing Machine Co. for Manitoba and Saskatchewan.

Frank Revell, an employee of Ingram & Davey, Limited, hardware, St. Thomas, Ont., is ill at his home from the effects of a paralytic stroke.

P. G. Denison, traffic manager for the J. H. Ashdown Hardware Co., Ltd., Winnipeg, has accepted a position with the Board of Trade, Winnipeg, as traffic officer.

Louis McLain, president of the Louis McLain Co., Winnipeg, left last week for Cleveland, Chicago, New York, and Toledo, and will be away a month.

J. Farral has joined the staff of the Sommerville Hardware Co. at Edmonton, Alta. Mr. Farral was formerly with Ross Bros., heating and plumbing, Edmonton, and recently returned from overseas.

A. Dwight, of the sales staff in the retail department of Rice Lewis & Son, Ltd., Toronto, who went overseas with the Canadian Mounted Rifles in May, 1916, later transferring to the 102nd Battalion, C.E.F., recently received his discharge and has returned to his old position.

To Supervise Sales of Stanley Rule & Level Co.

The Stanley Rule and Level Company, of New Britain, Connecticut, have appointed Archie Macfarlane, of Montreal, to supervise their sales in Canada. Mr. Macfarlane began his career in 1888 with Caverhill, Learmont and Co., with whom he served an apprenticeship of fifteen years, leaving them in 1903 to open his own business. This growth has resulted from the intensified and close effort of Mr. Macfarlane, which secured for him sales representation for such firms as Landers, Frary and Clark, New Britain, Conn.; Canada Steel Goods Co., Ltd., Hamilton; George Wostenholm and Son, Sheffield, Eng.

A. MACFARLANE

Of Montreal, who has been appointed by the Stanley Rule and Level Co., to Supervise their sales in Canada.

With Mr. Macfarlane are associated David Brewer, Charles Adcock, Wm. Hannah, P. D. Martin and George Livingstone.

Trade Notes

A voluntary petition for a winding up order for Fauteux, Limited, Montreal, has been granted.

The Montreal Sales Co., safety razors, etc., has been registered by Milton Hammer.

The Oliver Chilled Plow Works of Canada Ltd., Hamilton, Ont., has changed its name to International Plow Works of Canada Ltd.

At the annual meeting of the Ontario Builders' and Supply Association, held at Chatham, Ont., H. Elgie of Toronto was elected president.

Alex. H. Davidson, and Jacob Bechtel, of Southampton, Ont., plan to take over the factory of the Bell Furniture Company, Ltd., at Southampton and manufacture kitchen cabinets and other wood products under the firm name of the Sellers Kitchen Cabinet Company of Canada, Limited.

Harvey Curry, formerly of the sales staff of the Adamson Hardware Company at Orangeville, Ont., has closed a deal by which he becomes a partner in the hardware business of Fred Faulkner, Orangeville. Mr. Curry gave up his position with the Adamson Company to join the Royal Air Force. The new firm will be known as the Faulkner Hardware Company.

W. L. Dawkins has purchased from W. A. Caswell the Caswell hardware store at Rathwell, Manitoba, and will combine the two hardwares. Mr. Dawkins has been in business in Rathwell for the past three years, dealing in hardware, implements, and automobiles. Mr. Caswell has been in business there for twelve years.

MOVED TO MONTREAL

L. D. Campbell, vice-president of B. & S. H. Thompson and Co., Ltd., wholesale metals, chemicals, etc., and who has been for some years connected with the Toronto office, has gone to Montreal, where he will remain permanently at the head office.

W. Beverley Robinson, president of B. & S. H. Thompson and Co., Ltd., Montreal, and H. Kearns, managing director, left on Saturday last for England, and will probably be gone for a couple of months. It is the intention of Mr. Robinson and Mr. Kearns to visit the principal industrial and manufacturing centres of Great Britain and the Continent, and where they have permanent connections. Being on the ground they expect to be able to size up many matters of interest and to gather at first hand a survey of the trade and industrial conditions that is not possible at a distance.

REGINA NEWS

Mr. Cummings, of Walter Woods Co., Winnipeg, called on the trade this week.

Marshalls Wells Co.'s auto accessory representative, Mr. Rolson, visited the hardware trade in this city recently.

D. A. Ferguson, representing Wood Vallance sporting goods, was in the city recently.

Mr. Henry, of C. S. Thompson, hardware specialty, Vancouver, was in the city this week.

Helliwell and Carter, of Moose Jaw, Sask., have sold their hardware business to A. J. Silcox.

Stanley Anderson, of the Garloch Packing Co., Hamilton, Ont., is calling on the trade in this vicinity.

Mr. H. E. Armstrong, of Armstrong, Smyth & Dowswell, is spending a couple of weeks in Calgary recuperating after an attack of influenza.

Calgary News

Pat Lacy, of the Hall Hardware Company, has returned from an eight weeks' visit to Ottawa and vicinity.

Although close upon sixty, he is a great skater, and with the right kind of hardware on his feet, is hard to beat at figure work. He led the ice carnival here, and surprised the spectators with his evolutions.

Owing to the exceptionally fine weather Calgary has been enjoying, a number of the hardware men made displays of the boys' wagon stocks. They report some rather good sales early though the season is.

G. L. Chesney, of the Crescent Heights Hardware, is making a showing of incubators, and is also finding it a convenient time to mark down his stock of winter gloves and mitts, with good results. A lower price on automobile tires is also a feature with Mr. Chesney for a few days. Hardware men in general report increasing movements in household ware.

HAVE NEW BRANCH HEADQUARTERS

The Canada Cycle and Motor Co., Ltd., Weston, Ont., now have new branch headquarters at 68 McGill St., Montreal. The firm indicate that Quebec and Maritime Province business will be handled from new quarters. The various floors have been arranged, it is stated, to handle stock expeditiously and a complete range of goods is carried.

WELL-KNOWN STEEL MAN DIES IN ENGLAND

George E. Drummond, president of Drummond, McCall and Co., iron and steel importers, Montreal, died suddenly in London on Monday last, February 17. Mr. Drummond had just been in England a very short time, having left Canada a few weeks ago, and the news of his death came as a distinct shock to his personal and business friends. His illness was of very short duration, the immediate cause of death was pneumonia.

A Well-Known Figure

The late Mr. Drummond was one of the best known steel men in Canada, and his connection with various enterprises made him a foremost figure in many activities.

Coming to Canada with his father in 1866 from Ireland, and where he was born of Scotch-Irish ancestry, Mr.

THE LATE GEO. E. DRUMMOND
President, Drummond, McCall & Co., Montreal.

Drummond early entered the business with which he was to be so closely identified for the greater part of his life, entering the employ of a steel concern at an early age, and learning the rudiments of the steel trade. His interest continued, and he became closely associated with the iron, mining, and manufacturing industries of Canada. He was regarded by many as one of the pioneers of iron and steel manufacturing in Canada. In the earlier part of his career, and in association with his brother, the late Thos. J. Drummond, he was a very large importer of iron from abroad, later becoming a manufacturer. So arduously did he work and so closely attached to business was Mr. Drummond that it is generally conceded by his friends that he did much to place the iron industry of Canada on a real strong and important basis.

His Business Career

In 1881 Mr. Drummond formed, with Mr. James T. McCall, the firm of Drummond, McCall and Co., and of which firm he was and continued to be president to the time of his death. They entered into the business in a large way of importing iron and steel from the foreign market, heavy grades of these two lines coming from Great Britain especially.

The business grew apace under Mr. Drummond's direction and that of his associates, Mr. McCall, and another brother, the late Thos. J. Drummond, and new ventures were undertaken.

At the time of the Cobalt mining development, the late Dr. Drummond and Mr. George Drummond, together with a few associates, became deeply interested in one of the rich mines of that district, and "The Drummond Mine" was one of the celebrated mines of this locality, yielding, in its lifetime, good returns, but during the past five or six years Mr. Drummond had entrusted a considerable amount of detail to others. This was necessary from the fact that his many interests had so grown that much of his time had to be given those important companies with which he was closely associated.

Active Public Life

Although his own private business required close application, the late Mr. Drummond gave much attention to public matters and was identified with the Montreal Board of Trade as its president in 1904. In the same year he also was president of the Canadian Manufacturers' Association. While at all times lending his effort in the direction of strengthening the bonds between Canada and the Motherland, he did so especially while occupying the above important offices. He made a close study of questions relating to the tariff.

It was to Mr. Drummond that much of the credit was due for the "Made-in-Canada" movement, by which Canadian-made goods were popularized in foreign countries. He urged the necessity of having Canadian factories turn out increasing supplies of Canadian-made goods, made by Canadian workmen. In extenuation of this matter he also was an ardent advocate of closer and more extended trade relations with the Mother Country, and was possessed of sincere Imperialistic ideals and tendencies.

Held Many Offices

At the time of his death, Mr. Drummond was a director of the Molsons Bank, a director of the Ogilvie Flour Mills Co., Ltd., Canada Cement Co., Sun Life Assurance Co. of Canada, vice-president of the Cockshutt Plow Co. of Brantford. He also was identified in various ways with many other organizations, and was a member of many Montreal and other clubs.

APPOINTED BRANCH MANAGER

R. G. Ames has joined the Black & Decker organization, Baltimore, Md., in the capacity of branch manager, in charge of the Chicago office.

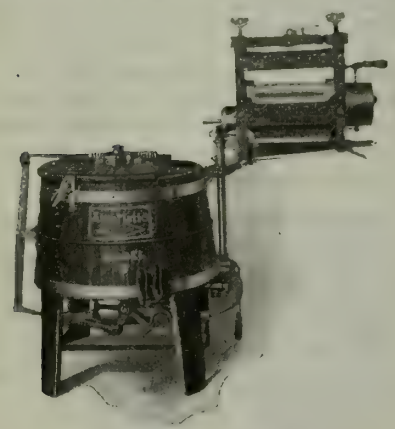
Mr. Ames is, it is said, well known in the automobile accessories trade, having been associated for the past ten years with the Edw. A. Cassidy Company of New York.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

TREAD FILLER

Dutch Brand "2 in 1" tread filler, manufactured by Van Cleef Bros., 7701 Woodlawn avenue, Chicago, is, it is stated, a liquid rubber for filling small cuts, bruises and gashes in casings. When neglected, these become big, allowing the formation of sand and water pockets, which permit fabric rotting, followed by blowouts. "2 in 1" tread filler,



Tread Filler

it is claimed, is easily applied, dries rapidly, and produces a tough resilient plug that becomes an integral part of the casing. With "2 in 1" tread filler, it is stated, no cement is needed, and it is claimed that results are obtained in one operation that ordinarily require the application of two different materials.

AUTOMATIC WASHER

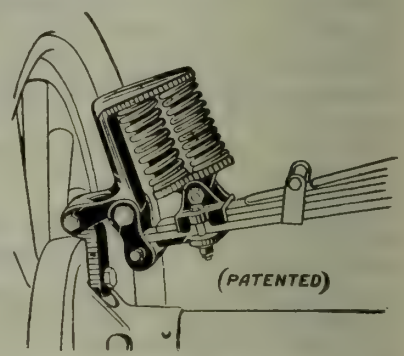
"Model 9" is the latest power machine in the automatic family, manufactured by the Automatic Electric Washer Company, of Newton, Iowa. The makers state that their reason for bringing out this machine was to provide a lower priced machine than the bench models. "Model 9," it is stated, is equipped with a swinging, reversible wringer, and is especially suitable for small families or where there is not sufficient work for a bench machine. The washer, it is claimed, will not take up any more room than an ordinary hand-power machine.

Automatic Washer

EVERLOC TIRE PATCH

The W. C. Wood Co., Minneapolis, are coming into Canada with their Everloc tire patch, which they will sell through the wholesale trade from coast to coast. The big claim made by the manufacturers is that this is a cold patch that will permanently repair any puncture or blow-out, no matter how large or how small. Once applied, they claim that the patch becomes part of the tube itself, and that it cannot be torn off.

The base or fabric part of the patch it is stated is of the best grade of khaki obtainable, and will not stretch or give. On this khaki it is stated is a layer of



Everloc Tire Patch

the highest grade cured rubber, and over this rubber is a surface of scientifically prepared pure para rubber, the latter being the sticking surface. The manufacturers point out that this para rubber becomes part of the tube itself, and claim it holds so tightly that it cannot be pulled off without tearing the tube.

Wood's Everloc is prepared in four different sized containers, each being complete with its roll of patch, cement, etc., all ready to repair any puncture or cut. The large size it is stated is enough to repair one hundred one-inch cuts or two hundred nail punctures.

SHOCK ABSORBER

"Champion" shock absorbers, built exclusively for Ford cars by the Champion Shock Absorber Sales Co., Inc., 918 North Senate Avenue, Indianapolis, are made it is stated of malleable iron, crucible and cold rolled steel. The illustration

Shock Absorber

shows the rear shock absorber. The device is so arranged it is claimed that centrifugal forces throw all shocks on the absorbing device, and simultaneously accomplish the shock absorbing work by the pivoted bearing allowing free rolling oscillation in control by two coil springs.

Incorporations

International Button Company, Limited, capital $100,000, head office Montreal, plans to manufacture and deal in buttons and novelties.

Joseph Papin, Limited, capital $75,000, head office Contrecoeur, Quebec, plans to manufacture and deal in leather goods, gloves, mitts and footwear.

The Canadian Optical Company, Ltd, head office Toronto, capital $150,000, plans to manufacture and deal in optical goods, thermometers, plated ware and photographic instruments.

Shinn Manufacturing Company of Canada, Limited, head office Guelph, Ont., capital $50,000, plans to manufacture and deal in wire, wire nails, wire cables and lightning rods.

The Fireless Cooker Company of Canada, Limited, head office Hull, Quebec, capital $100,000, plans to take over and carry on the business now carried on by Alexander R. Macdonald.

The Toronto Specialty Manufacturing Company, Limited, capital $40,000, head office Toronto, Ont., plans to carry on the business of brass founders, tool makers and metal workers, and to manufacture implements, hardware, woodenware and novelties.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A SHARP decline has been recorded this week in the price of wire nails, prices sagging 55c per 100 pounds. It is indicated this is largely on account of competition creeping in, and whether the basis will be maintained is a question just at present. Some sources feel that prices may go still lower and then react, while others seem to think bottom has been reached, and that 25c may be tacked on prices almost immediately.

Lower prices have been named on smooth steel wire as base for kindred lines, the drop amounting to 50c per 100 pounds. Smooth steel wire, hay wire in coils, and oiled and annealed wire are affected. No change has been made in wire bale ties.

Ingot metals show some variation this week in the various markets. Lead has sagged ½c per pound, and tin has come in for revision to lower levels also. Solder is unchanged this week, but lead pipe and lead waste are down 1c per pound in Eastern markets and 3c out West.

The only thing the scrap metal dealers have done this week is to proceed with the assassination of the price list in several of the leading lines. They have succeeded in removing prices a very respectable distance from the points reached during the war period. They have also put up a schedule that will not encourage offerings to come into the market.

Formaldehyde registered a sharp decline this week at Winnipeg, quotations dropping 18c per pound from high levels established two or three weeks ago. The storm of protest which high prices raised has been instrumental in bringing this about.

A new list has been issued on thermos bottles this week, but net change in prices to the trade is not very great. Ice cream freezers register an advance this week, and track hangers are also higher.

Interest centered in convention being held by retail hardware merchants of Ontario this week at Hamilton, and talks by manufacturers, wholesalers and retailers on business conditions were listened to with interest and profit.

MONTREAL MARKETS

MONTREAL, Feb. 20.—Wire nails have declined 50c per keg and are now on a $5 base. Various lines of wire are also down, smooth steel, annealed, baling and hay wire being affected.

Fishing tackle is being revised to higher levels. Tin is lower among the ingots, and spelter dropped slightly. Old rubbers, too, are quoted less, while lead pipe is reduced one cent per pound. Copper rivets and burrs have again been reduced. Several jobbers have reported sales as being better, and a general improvement noticeable.

Machine Screws On Revised Basis

Montreal.

MACHINE SCREWS.—A revised discount basis is made effective for machine screws. Flat and round head iron are quoted at 27½ per cent., and 10 per cent. discount and flat and round head brass at 15 per cent.

Fishing Tackle Up; Copper Burrs Down

Montreal.

FISHING TACKLE, RIVETS.—An advance of about ten per cent. is effective for various lines of fishing tackle, lines, poles, hooks, etc., being some of the items affected. Another change has been announced for copper rivets and burrs, the discount being 15 per cent. plus for rivets and burrs, and for burrs only, plus 40 per cent. on list.

Wares Are Steady; Sap Buckets Sold

Montreal.

STOVES. WARES.—There has been a steady sale of some lines of ware, although only on a seasonable basis. One of the most active items in the list lately has been that of sap buckets, the factories having shipped out many thousands of these lately. It is hoped there may be a good run of sap this year. Stoves are naturally quiet, but the basis is unchanged and steady.

Wire Nails at $5.00; Coil Wire Down

Montreal.

NAILS AND WIRE.—Lower prices are in effect for standard wire nails, $5 per keg now being quoted. This change has come as a general surprise to the jobbers, as all statements and indications of late did not presage a drop at this time. Smooth steel wire is down, too, $5.75 per 100 pounds being quoted, and this applies for annealed, oiled, and coppered wires. Hay wire, No. 13, is based at $5.65; No. 14, $5.75, and No. 15, $5.85.

Rope Market Firm; Hemp Advancing

Montreal.

ROPE AND CORDAGE.—There are evidences that the rope market still will hold firm. A large manufacturer stated that he had been in direct touch with the situation in the United States. There, stocks of hemp are limited, and if one wants to buy "he can only buy futures," That is to say, if he wants hemp he can get it only several months hence, and in the meantime hemp prices are climbing. The basis now is as follows: Pure manila, 35½c; British manila and New Zealand, 31c, and sisal 27½c per pound.

Steady Oil Sales; Gasoline is Held

Montreal.

OIL AND GASOLINE.—The market for refined oil is steady, and there is a steady sale right along, with Royalite grade quoted at 19c and Palacine and Electroline at 22c per gallon. Gasoline sales are seasonably good and the price is still 34c.

Iron, Steel Bars Hold Steady Basis

Montreal.

IRON AND STEEL.—The undertone of the iron and steel bar market is without change during the week. Sales are not heavy, but some orders are received right along from country points and total up fairly well.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00
Single reeled machinery steel	6 00
Spring steel	6 00
Sleigh shoe steel	4 30
Tire steel	4 50
Toe calk steel, per 100 lbs.	5 20
Band steel	4 30
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheets Now on Selling Basis

Montreal.

SHEETS.—Both black and galvanized sheets have been brought to a better basis and at the prices in effect it is expected that, if anything, selling will be stimulated. There are fair stocks of most gauges to take care of what is only a limited demand.

BLACK SHEETS—	Per 100 lbs	
10 gauge	$7 00	$7 10
12 gauge	7 10	7 15
14 gauge	6 85	7 00
16 gauge	6 95	7 05
18-20 gauge	7 10	7 25
22-24 gauge	7 15	7 35
26 gauge	7 20	7 40
28 gauge	7 35	7 50
GALVANIZED SHEETS—		
10¾ oz.		$9 75
28 gauge		9 25
26 gauge		9 00
22 and 24 gauge		8 85
20 gauge		8 65
18 gauge		8 65
16 gauge		8 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Pipe Lower; Solder the Same

Montreal.

LEAD PRODUCTS.—There is a decline of 1c per pound in the price of lead pipe. This is the only change made during the week, standard and wire solders holding and sheet lead and other lines being quite unchanged.

Lead pipe, lb.		$0 12
Lead pipe (cut lengths)		0 13
Lead waste pipe, lb.	0 13	
Lead traps and bends	Net list.	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.		0 12
Lead sheets, 4 to 8 lbs., s. ft.		0 11
Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.		
Solder, guaranteed, lb.		0 38
Solder, strictly, lb.		0 35½
Solder, commercial, lb.		0 33¼
Solder, wiping, lb.	0 31	0 33
Solder wire (8 gauge)—		
40-60		0 44
45-55		0 47¾
50-50		0 51½
Zinc sheets, casks		0 17
Do., broken lots		0 18

Old Rubbers Down; All Lines Weak

Montreal.

OLD MATERIAL.—The only change of the week is that for old rubbers. These are down ¾c to 1c per pound. Neither are country dealers anxious to sell, some assert, nor are the large wholesalers eager to buy.

Dealers' Buying Prices:		
Pipe scrap	15 00	16 00
Stove plate, per ton	17 00	18 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots		0 05½
Bicycle tires		0 04
Automobile tires	0 04	0 04½
Yellow brass	0 10	0 11
Red brass	0 14	0 15
Light brass		0 08
Scrap zinc		0 05¾
Heavy copper	0 18	0 19
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast		30 00
Heavy melting steel		15 00
Auto tires	0 04	
Bicycle tires	0 02½	
	Per gross ton.	
No. 1 railroad wrought		$15 00
No. 2 railroad wrought		8 00
Pipes and flues		8 00
No. 1 busheling		11 00
No. 2 busheling		7 50
Country mixed scrap		10 50

Tin Tumbles Again; Lead Market Held

Montreal.

INGOT METALS.—There is not a great deal of change this week in ingot metals, but tin is lower in sympathy with London. Spelter is also shaded a little from last week.

COPPER.—There is no new feature, and what limited business is done is based at 23c per pound.

TIN.—Further declines in London served to revise quotations locally, and there is a basis here of 61c. Little movement is reported.

SPELTER.—A base price of 9c per pound is quoted. The selling is not heavy, and while there was a slight firming a week or ten days ago, this has again disappeared.

LEAD.—Has lead touched its low point? Some incline to feel that there will not be much more tobogganning. Price holds at 8½c to 8c.

ANTIMONY.—At 8½c sales are being made here in small volume.

ALUMINUM.—Little interest centres around this ingot and the price basis holds at 40c per pound.

PIG IRON.—The present quotable basis on this commodity is given at $50 per ton.

TORONTO MARKETS

TORONTO, Feb. 20.—Lower prices have been established on soldering coppers this week. A decline of 1c per pound in lead pipe and lead waste has also been recorded. A new list on Thermos bottles is being issued by the manufacturers. Coal oil has advanced 1c per gallon. Tin has declined slightly and lead is also slightly lower with only a fair amount of activity in ingot metals noticeable. Jobbers report a very good inquiry for sheets and are optimistic over the outlook.

New List Issued on Thermos Bottles

Toronto.

THERMOS BOTTLES.—The manufacturers announce a new list price on Thermos bottles. This is not yet available for publication to the trade, but manufacturers intimate that the list prices which they will show will be the retail prices, and from these the discount will be 25 per cent. The net result to the retail merchant does not show any appreciable change in the cost.

Lower Prices on Soldering Coppers

Toronto.

SOLDERING, COPPERS. — Lower prices have been reached this week on soldering coppers. The base price which applies to the 3 to 8 lb. coppers is now 54½c per pound with the smaller sizes taking the usual extras.

Nails Register Sharp Decline

Toronto.

NAILS, WIRE.—There have been new developments during the week in respect to nails. A sharp decline of 55c per 100 pounds has been recorded, bringing base on the wire nails to $4.95. That they may go even lower seems quite possible. The movement to the trade is rather slow, but considered quite satisfactory in view of the present season. There is some business coming to hand all the time and indications point to a more active building season this spring than has been faced for the past two or three years. Cut nails are being quoted at $5.35 per 100 pounds base, an unchanged figure.

Changes have been made in oiled and annealed wire, smooth steel wire, hay baling wire, etc., the decline amounting to 50c per 100 pounds. The entire range of prices is not available at time of going to press.

Rope Settling Into New Basis

Toronto.

CORDAGE.—The market on rope seems to have settled down somewhat after the sharp advances recorded last week, and there are no new develop-

ments to report to the trade for the present week. Quotations which are now being named to the trade for pure manila 35½ cents per pound base; British manila, 31c; New Zealand hemp, 31c; sisal rope, 27½c; sisal lath yarn, 27½c. There has been a fair amount of business booked up for rope and the outlook is considered quite satisfactory.

Coal Oil Moves Up 1c; Gasoline

Toronto.

COAL OIL, GASOLINE.—An advance of 1c per gallon has been reported in coal oil this week. No particular reason is assigned for this move but it is understood production costs are higher and this is the main contributing factor. Royalite is now quoted at 19½c per gallon, Electroline and Polarine at 22½c per gallon. A good movement to the trade is reported.

There have been no new developments noted in respect to gasoline during the week. Sales are maintained on a very active basis and prices are holding without any change at a figure of 33c per gallon.

Wares Active; Stoves Steady

Toronto.

STOVES, WARES. — Manufacturers are quite satisfied with the amount of business which is coming to hand for the various lines of wares and feel that the trade, though only buying from hand to mouth are sending in some repeat business. This would indicate a good healthy condition throughout the trade as a whole, and whereas the business may not all come in one large order, indications are that it will come consistently during the entire year.

Stoves are without any quotable change this week, the market holding quite steadily, and business at the present time within a comparatively small compass. This is a seasonable condition and also in a measure attributable to the lack of really seasonable weather during the winter. However, manufacturers are facing the outlook with optimism and feel that 1919 will prove quite satisfactory.

Iron and Steel in Unchanged Position

Toronto.

IRON AND STEEL.—There is comparatively little moving to the trade at the present time. Stocks are in fairly good shape and indications are that replacements can be secured fairly promptly. Prices have held steadily and without change at the figures shown below.

Common bar iron	$4 75	$5 00
Common bar steel	5 00	6 25
Refined iron	5 15	5 40
Angle base	5 25	6 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Remain Unchanged

Toronto.

CORRUGATED SHEETS.—No further developments are recorded in the situation as it exists in corrugated sheets, siding, etc. The lower prices named last week are now firmly established. Manufacturers report a fair amount of inquiry which may be expected to develop into business and altogether the outlook is most encouraging. Range of prices to-day is as follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Sheets Hold at Unchanged Levels

Toronto.

SHEETS, PLATES.—An unchanged basis of prices is shown this week in quotations given below on sheets and plates. Jobbers report business for February well ahead of January and state also that inquiry coming to hand calls for a substantial tonnage which may be expected to develop into real orders at a little later date. Altogether the outlook is considered very satisfactory and encouraging.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$6 50	$6 90
12 gauge	6 05-6 60	7 00
14 gauge	6 10	6 65
16 gauge	6 20	6 75
18-20 gauge	6 80	7 30
22-24 gauge	6 85	7 35
26 gauge	6 90	7 40
28 gauge	7 00	7 50
3-16 inch plate	6 25	6 75
¼-inch boiler plate	6 00	6 50

Prices shown are for full cases. An evtra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	8 50	$9 00
U.S. 28	8 20	8 75
U.S. 26	7 90	8 45
22 and 24	7 75	8 30
18 and 20	7 60	8 30
16	7 45	8 00

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe Holds; Boiler Tubes Too

Toronto.

WROUGHT PIPE, BOILER TUBES. —There have been no new developments in respect to wrought pipe during the week. There is a very fair amount of business offering. Stocks are light but deliveries can be secured fairly promptly now.

Boiler tubes are maintaining a fair basis of activity and jobbers are satisfied with orders coming to hand. Orders for delivery from the mill are being accepted at figures below, those shown herewith which represent quotations on spot stocks from warehouse.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$32 00	$.....
1¼ inch	36 00	.....
1½ inch	39 00	32 00
1¾ inch	39 00	32 00
2 inch	45 00	32 00
2¼ inch	48 00	34 00
2½ inch	50 00	40 50
3 inch	58 00	45 00
3¼ inch	.....	52 00
3½ inch	70 00	54 00
4 inch	80 00	67 00

Lead Pipe, Lead Waste Down 1c

Toronto.

LEAD PIPE, LEAD WASTE.—A further decline of 1c per pound has been recorded in lead pipe and lead waste this week, making quotations 12c and 13c per pound respectively. There is still no change recorded in prices on lead traps and bends.

Solder rules at unchanged levels from prices recorded last week and manufacturers report a fair movement in progress. Range of prices to-day follows:

Lead pipe, lb.		$0 12
Lead waste pipe, lb.		0 13
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb.	$0 37	$0 39
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 31	0 36
Solder, wiping, lb.	0 30	0 32½
Solder, wire, lb.	0 45½	0 50
Zinc sheets, per lb.		0 20

Stagnant Condition in Old Materials

Toronto.

OLD MATERIALS.—Stagnant conditions still exist in respect to all lines of old materials and there seems no prospect of any immediate betterment. Prices are only nominal and may reach still lower levels. Dealers are not anxious to buy as there is nothing moving from their yards.

Dealers' Buying Prices—		
Tea lead		0 03½
Heavy lead pipe	0 04	0 04½
Pipe scrap	14 00	15 00
Stove plate, per ton	14 00	15 00
No. 2 busheling	8 00	9 00
Old rubbers, boots and shoes	0 07½	0 07¾
Overshoes, lumbermen's rubber boots		0 05½
Bicycle tires	0 02½	0 03½
Automobile tires	0 03½	0 04
Yellow brass	0 08	0 08½
Red brass	0 14	0 15
Light brass		0 06
Scrap zinc	0 05	0 05½
Heavy copper	0 16½	0 17½
Wrought iron, No. 1, per gr. ton	18 00	19 00
No. 1 machinery cast	24 00	26 00
Heavy melting steel		13 00

Tin is Easier; Lead Down ½c

Toronto.

INGOT METALS.—A further decline has been recorded in tin this week and lower levels have also been reached on lead. Other metals show no quotable change and business is confined to absolute requirements.

COPPER.—New developments are lacking this week in respect to copper. Prices have held at declines recorded last week and there is a little activity

reported. Quotations are around 21c to 22c per pound.

TIN.—A lower basis is again established on this metal this week. Supplies are considered ample for the demand but stocks are by no means heavy. Quotations to-day range around 58c to 60c per pound.

SPELTER.—There is no change in the price of spelter this week. Little buying interest is manifest and stocks are at a comparatively low ebb. Quotations range around 8½c per pound.

LEAD.—A decline of ½c per pound has been made in the price of lead again this week, quotations ranging from 6¼c to 6½c per pound. A very dull tone in the market is the outstanding feature.

ALUMINUM.—Quotations hold nominally at around 50c per pound, with little interest noted commercially as yet.

ANTIMONY.—Sales are kept down to a comparatively small basis and stocks are well able to meet even heavier demands from the trade. Price is unchanged at 8½c per pound.

LONDON MARKETS

LONDON, Ont., Feb. 20.—Wire nails have declined 55c, and O. & A. wire is down 50c this week. Lines which have reached higher levels during the week are wood hay fork track hangers, ice cream freezers, and one line of faucets. Declines have been recorded in charcoal, in paper bags, and tinker solder.

Business in this district is considered very good, and jobbers report that booked orders for spring lines are moving out quite freely.

Ice Cream Freezers Move Higher

London, Ont.

ICE CREAM FREEZERS.—At least one line which will be higher for the coming season is the Blizzard ice cream freezer. New prices have been issued which show a substantial advance over former figures, as will be noted by the quotations, which are made at the following figures: 2 qt., $3.15 each; 3 qt., $3.75; 4 qt., $4.60; 6 qt., $5.85; 8 qt., $7.50; and 10 qt., $9.85.

Lower Price Named on Charcoal

London, Ont.

CHARCOAL.—New prices have been established on charcoal in paper bags and these show a slight decline from figures which have been ruling for some time past. The new quotation which is being named to the trade is $1.75 per dozen bags.

Annealed Wire and Wire Nails Down

London, Ont.

NAILS, ANNEALED WIRE. — The market on wire nails is most decidedly uncertain and declines this week amounting to 55 cents per keg has been reached. This brings the base price to $4.95 per 100 lbs., and a feeling seems to prevail that lower figures will be reached before the present movement is stopped. The price of cut nails is holding without any further change, and the base price per 100 lbs. on these being $5.35.

Annealed and oiled wire is also down 50c per 100 pounds, full range of new prices not being yet available.

The market on solder is lower again this week, the line effected being the tinker, which is now quoted at $1.40 per dozen bars.

Track Hangers Register Advance

London, Ont.

TRACK HANGERS.—A change has been made this week in wood hay-fork track hangers, and the prices which are now ruling to the trade represent an advance over former figures. Quotations on the ½x10 inch are now 85c per dozen, and on the ½ x 12 inch, 95c per dozen.

Lawn Shears, Pruners Show Activity

London, Ont.

LAWN SHEARS, PRUNERS. — Steady and maintained prices are shown on hedge and lawn shears, and also on tree pruners. A fair amount of business is being done in these just now, and it is expected that the movement to the trade will be quite general within the next two or three weeks. Quotations which are ruling on the shears are for the No. 100 x 8 inch, $1.30 each, and 9 inch, $1.60; No. 101 x 8 inch, $1.50; No. 101 x 9 inch, $1.80; No. 107, $1.65; No. 105, long handle, with wheels, $2.50 each; No. 106, long handle, flat blade, $2.35 each.

Tree pruners are in much the same position and prices which are now being quoted to the trade are for the Waters 6 ft. handles, $13.50 per doz.; 8 ft. handles, $14.00; 10 ft. handles, $15.00; 12 ft. handles, $16.25; the Rochdale, No. 35, is quoted at $12.25 per doz., and the No. 38 at $15.75.

Higher Prices Named on Faucets

London, Ont.

FAUCETS.—Revised prices have been issued this week on the Perfection faucet with lockfast attachment. These provide for a higher sale of figures than those formerly in effect as quotations herewith will show: ¾ inch, $9.35 per doz.; 1 inch, $10.65; 1¼ inch, $12.30; 1½ inch, $14.65; and 2 inch, $20.00.

Spring booking orders on oil stoves are now moving forward, and this is expected to be general in the next two or three weeks. Prices have remained without any change, the Perfection oil cook stove, 2 burner, being listed at $18.75; the 3 burner at $24.25 each, and the 4 burner at $30.75 each, a discount of 25 per cent. applying to these list prices.

Linseed Oil Holds; Turpentine Steady

London, Ont.

LINSEED OIL, TURPENTINE.—The jobbers indicate that higher prices on flax seed justify higher prices on linseed oil, but no change has yet been made from figures of last week, which are as follows: 1 to 2 bbls., $1.50, raw, per gal.; boiled, $1.53. 3 to 5 bbls., $1.49, raw per gal.; Boiled, $1.52; 6 to 9 bbls., $1.47, raw, per gal.; boiled, $1.50. Less bbls. add 10 cts. gal.

Turpentine is firm, but rules without change at the following figures: 1 bbl. lots, $1.05 per Imp. gal.; 2 to 4 bbl. lots, $1.04; 5 gal. lots, $1.15.

WINNIPEG MARKETS

WINNIPEG, Feb. 20.—Market prices during the week again show numerous changes, in which declines in prices predominate. Some few lines, however, have registered advances. Among the lines to reach lower levels will be noticed soldering coppers, jack screws, solder, Perfection ankle supports, galvanized sheets, sheet copper, lead pipe and lead waste, while melting ladles, rope and welding compound have undergone revisions upwards.

Business is reported very favorable with all jobbers rushing out spring orders. With the Bonspiel in full swing many of the travellers are in the city entertaining their customers.

Soldering Coppers Down; Welding Compound Up

Winnipeg.

SOLDERING COPPERS, WELDING COMPOUND.—Following reductions in the copper market, new prices have been established on soldering coppers, making to-day's base price 55c per pound, with the following extras: ¾ lb., 7c; 1 lb., 6c; 1½ lb. 3c; 2 lb., 2c; 2½ lb. 1c advance over base price.

Prices on Climax and Cherry Heat welding compound show a slight revision upward during the week, affecting the 1 lb. size, which advances 1c per pound. To-day's selling prices are as follows: 1 lb. boxes, 17c pound; 5 lb. boxes, 12½c pound.

Jack Screws Down 5 Per Cent.

Winnipeg.

JACK SCREWS.—Jack screws have shown a slight reduction during the week of approximately 5 per cent. below former quotations. To-day's market is as given herewith: 1¾ x 8, $4.00; 2 x 10, $5.40; 2 x 12, $6.00; 2 x 14, $6.60; 2 x 16, $7.40 each.

Solder Registers Sharp Decline

Winnipeg.

SOLDER.—Solder prices show a heavy slump during the past week, dropping 10c per pound which is the greatest variation in the price of this commodity since 1914. To-day's prices are given as follows: Half and half solders, cases, 40c; less 41c per pound; wire solder, 50c.

Five to Ten Per Cent. Jump in Melting Ladles

Winnipeg.

MELTING LADLES.—Higher freight rates as well as manufacturing costs are responsible for higher prices now ruling on melting ladles. These move up from 5 to 10 per cent. on shipments just received, making to-day's market prices as follows: 4 inch, $3.50; 5 inch, $6.30; 6 inch, $7.20 per dozen.

Rope Reaches Higher Base Price

Winnipeg.

ROPE.—Following the recent slump in rope prices due to competition in the the American markets along with lower priced hemp, prices have strengthened until to-day they are up almost to the former high levels. During the past week there have been two advances, one of 5c per pound which affected only pure and British manila and later a further advance of 2c per pound applicable to all grades which makes to-day's prices as follows: Pure manila rope, 37c per pound base; British manila rope, 32¼c; African hemp rope, 32¼c; sisal rope, 28¼c; lath yarn, 28¼c.

Galvanized Sheets Down Fifty Cents

Winnipeg.

GALVANIZED SHEETS.—Galvanized sheets again register a decline of 50c per 100 pounds. These are selling to-day at the following figures: Galvanized sheets, 10¾ oz., $10.00; 28 ga., $9.60; 26 ga., $9.30; 24 ga., $9.15; 22 ga., $9.15; 20 ga., $9.00; 18 ga., $9.00; 16 ga., $8.85 per 100 pounds.

Prices on black sheets however show no change, being quoted to-day as follows: 28 ga., $8.50; 26 ga., $8.40; 24 ga., $8.35; 22 ga., $8.35; 20 ga., $8.30; 18 ga., $8.30; 16 ga., $7.75; 14 ga., $7.70; 12 ga., $7.65; 10 ga., $7.65 per 100 pounds.

Stocks of both black and galvanized sheets are reported as well assorted as shipments are now available from American mills, while the demand is reported as normal.

Ankle Supports Show Decline

Winnipeg.

ANKLE SUPPORTS. — Perfection ankle supports which advanced recently from 75c to 90c per pair have again been reduced to former levels, being now quoted at 75c.

Sheet Copper Goes Lower

Winnipeg.

SHEET COPPER.—New prices are just to hand covering sheet copper which show a reduction of 10c per pound on tinned and 15c per pound on planished. This is due to the lower market prices now ruling on the metal. To-day's ruling prices are as follows: Tinned copper, 55c per pound; planished copper, 60c per pound.

Butts Maintain Steady Levels

Winnipeg.

BUTTS.—Prices on all lines of butts continue firm at prevailing prices and a good demand is reported as considerable building is expected as soon as spring opens up. To-day's prices are given as follows: Plated butts, No. 241 A, F and D2, 3 x 3 inch, 39c; 3½ x 3½ inch, 40c; 4 x 4 inch, 52c; 4½ x 4½ inch, 75c; 5 x 5 inch, 74c per pair. Steel butts, No. 840, net list; No. 838, net list; No. 800, 5 per cent. advlance on list; No. 804, 5 per cent. off list.

Leadpipe, Waste Down 3c Pound

Winnipeg.

LEAD PIPE, WASTE.—Lead pipe and lead waste prices again declined following the break in the price of lead. Quotations show a reduction of 3c per pound below former quotations. To-day's market prices are as follows: Lead pipe, $12.40 per 100 pounds; lead waste, $13.40 per 100 pounds.

Coil, Log Chain Markets Steady

Winnipeg.

COIL, LOG CHAIN.—Prices on coil and log chain still hold firm on the local market, while good demand for all lines is recorded with stocks well assorted. To-day's ruling prices are herewith confirmed:

Coil Chain—3-16 in., $19.20; ¼-in., $16.25; 5-16-in., $13.75; ⅜-in., $12.75; 7-16-in., $12.35; ½-in., $12.25; 9-16-in., $12.25; ⅝-in., $12.00; ¾-in., $11.65; 1-in., $11.40 per 100 pounds.

Log Chain—5-16-in., $16.65; ⅜-in., $14.55; ½-in., $14.05 per 100 pounds.

Turpentine Holds; Linseed Oil Too

Winnipeg.

TURPENTINE, LINSEED OIL.—Turpentine prices show no change during the week, to-day's selling prices being confirmed as follows: Barrels, $1.25; ½ barrels, $1.28; 5 gal. lots, $1.30; 1 gal lots, $1.30 per gallon; plus the usual extras for containers.

Linseed oil prices also hold firm on the local market at unchanged quotations of $1.80 per gallon on raw oil and $1.83 gallon on boiled oil in single barrel lots.

PITTSBURG MARKETS

PITTSBURGH, Feb. 20.—The steel market has been going from bad to worse as regards demand. Thus far this month demand has been distinctly lighter than at any time in January and the past few days have shown still lighter demand than was seen early in February. Meanwhile old orders are running out at the same time so that the mills are trending to a position of having hardly any shipping orders at all to run on, while the producers who have been putting material into stock will soon find their storage facilities exhausted.

Heavy January Production

The monthly report of steel ingot production is out, and shows heavier production in January than was currently estimated. Allowing for the companies not reporting, the monthly statement being based on returns for 29 companies and showing 3,082,427 gross tons of steel ingots produced in January by the 29, the country's rate of ingot production in January was 41,700,000 gross tons a year. This is 3.8 per cent. below the average rate in November and December and 11 per cent. below the rate last September, which was the heaviest rate in the history of the industry. Production in 1918 as a whole was about 40,400,000 tons.

The official statistics showing precisely the production in 1917 have just been made public, the collection of the figures having been delayed by the war. The production of ingots in 1917 was 43,619,200 gross tons, against 41,401,917 tons in 1916, previously the record year. In a report published in "Canadian Machinery," October 17 last, the 1917 production was estimated at 43,700,000 tons.

As the January output was 85 per cent. of the estimated capacity, 49,000,000 tons a year, it was a remarkable heavy output, and one that was not supported by the current demand. If in this transitionary and unsettled period, with everyone complaining that there is practically no demand, tonnage equal to 85 per cent. of capacity could actually be absorbed, it would mean that the steel famine coming would transcend the ap-

parent famine there was during the war. In other words more steel was made in January than was needed and this month while production is at a lower rate, there is still too much. Some time there will have to be an equalization.

The Stocking of Steel

Precisely to what extent the United States Steel Corporation subsidiaries are stocking steel is not known, but it is generally known that the process is going on and covers an important tonnage, perhaps one-third of the corporation output, which is now at the rate of about 85 per cent. of capacity. Independents are operating at an average of about 50 per cent. of capacity and it is not likely that the Steel Corporation's actual orders call for shipments at much heavier rates than do the orders on which the independents are working. A few weeks, perhaps two months, would mark the limit of storage capacity.

Price Prospects

Demand for steel having decreased of late rather than increased, producers are giving more thought to the matter of making another price reduction in order to stimulate demand. It is hardly likely that much business would be brought out by a reduction, but something would of course come. All buyers have been in expectation of successive declines, and the longer the period stretches from the last decline, which occurred the middle of December, the more the buyers feel that a fresh decline is imminent and the more disposed they are to postpone buying in order to get the benefit. For several weeks there have been persistent rumors that there would shortly be a batch of price reduction, this not to interfere with reductions April 1, the date long ago mentioned as one upon which reductions would likely be made. When the war ended and the War Industries Board refused to have anything more to do with price fixing the steel trade took up with the idea that if there were to be price reductions it would be well to have them come on the quarterly dates, in continuance of the practice established by the War Industries Board of setting prices for a quarter at a time. Now it looks as though there might be two reductions per quarter instead of one. Producers are anxious to do something to stimulate demand and at the same time they do not want to overstay their welcome on present prices, for fear indiscriminate cutting might be started, and once started there would hardly be any end to this process. The current rumor is that the reduction will be $4 a ton and will apply to bars, shapes and plates, possibly to other commodities, such as pipe. Wire and tin plate might possibly escape reductions, not only at this time but also April 1.

Building Prospects

At last it has become generally realized that there cannot be much general activity unless there is building of various sorts, the ordinary everyday needs of the people not being sufficient to keep plants busy and furnish employment to all men. Private investors shrink from going ahead at the present time on account of costs being so high, as they feel they can make more money by waiting. Plans are now on foot by the federal Government and by states and municipalities for construction work of various sorts, particularly the erection of public buildings and construction of roads. It is recognized that there is a loss in doing such work at this time, but it is considered a public benefit to have the work done now and furnish the employment, hence the general public should foot the bill rather than the private investor. The federal Government is going in for many public buildings, the state of Pennsylvania has a large road building program under consideration and New York, Pittsburgh and other cities have extensive plans under advisement. These various projects will make a great deal of employment but they do not involve much iron and steel.

Steel and Labor

The steel producers are not particularly anxious to reduce the wages they pay. They realize that no attempt could be made without running the risk of starting a great deal of trouble, but even if a 10 or 20 per cent. wage reduction were made, simply in the steel industry proper, it would not greatly decrease the cost of making a ton of steel. The steel producers do feel it quite advantageous, however, to argue that as long as they cannot reduce wages they should not be expected to reduce selling prices of steel. What concerns the steel producers much more than wages they pay is the wages their customers have to pay. There is altogether too much labor cost in erecting a bridge or a building, for instance, and that is more of a deterrent influence than the high wages paid in making the steel.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

251. A correspondent in Antwerp is open to take up agencies for the sale of Canadian chemicals, leather, agricultural implements, wood-pulp, etc., in Belgium.

254. **Opal glass bottles.**—A London firm of chemical manufacturers are desirous of getting into touch with Canadian manufacturers of opal glass bottles open to accept orders.

256. **Office furniture and equipment.**—A London firm of wholesale furniture manufacturers ask to be placed in correspondence with Canadian manufacturers of office furniture and equipment, with a view to purchase if satisfactory arrangements can be made.

259. **Wood-pulp board.** — A Bristol concern who are large buyers of wood-pulp board, to weigh in the size 40-inch by 45-inch about 180 sheets to the hundredweight, desire quotations for a contract of 100 to 150 tons per annum, delivered in lots of 10 tons per month.

263. **Steel wire rods.**—A Cardiff wire rope manufacturing firm wishes to obtain high carbon steel wire rods from Canada.

288. **Wire nails.**—A Leeds firm, although not in the market for the above at present, when buying, make contracts of from 250 to 500 tons, and would like to hear from Canadian exporters.

289. **Wire rods.**—A Warrington firm who use 20 to 30 tons of the above in coil, and up to 200 or 300 tons monthly of straight lengths and bars up to about 6-inch diameter, would like to get into touch with Canadian exporters.

291. **Wire rods.**—A Warrington firm will be in the market for 200 tons mild steel rods, No. 6, S.W. g., in coils not exceeding 36-inch outside diameter, as soon as conditions permit.

292. **Roll-top desks and household chairs.**—A Liverpool firm wishes to hear from exporters of the above with a view to arranging for a buying agency with exclusive rights in the district.

293. **Linseed cakes.**—A Hull firm wishes to hear from exporters of the above with a view to business as soon as conditions permit.

294. **Hot-water heating boilers and radiators.**—A Liverpool firm who uses large quantities of the above, would like to consider the possibility of introducing Canadian lines.

295. **Linseed cake and cattle-feeding stuffs.**—A Liverpool firm wishes to hear from actual manufacturers of the above, with a view to business as soon as conditions permit.

298. **Hard and soft wire rods.**—A Halifax firm who have been large importers of the above from the United States wish to get into touch with Canadian producers with a view to business as soon as conditions permit.

299. **Broom handles, beal hoe handles, ash spade shafts, ash hay fork handles.**—A Hull firm wishes to hear from exporters with a view to business as soon as conditions permit. Broom handles, 50-inch by 1½-inch and 48-inch or 50-inch by 1 1-6 inch for cheaper line; hoe handles, 60-inch by 1-inch; hay forks, 4 feet, 4½-inch, 5 feet, 5½-inch, 6 feet; spade shafts, 30-inch, 32-inch, crutch and "D."

302. **Galvanized fencing wire, galvanized barb wire, and wire nails.**—A Leeds firm is open to buy the above in 25 to 50 ton lots as soon as conditions permit.

303. **Pulp board and strawboard.**—A Leeds firm is interested in the above with a view to future business.

304. **Picture mouldings.**—An importer in Harrowgate, England, wishes to get supplies of picture frame mouldings in gilt, composition or fancy woods, cash against documents.

308. **Asbestos sheets.** — A South African firm asks for samples, prices and literature on asbestos sheets of all kind.

309. **Agencies.** — A Durban firm with branch offices in the principal centres of South Africa is prepared to take up the representation of Canadian manufacturers in hardware, general proprietary lines, and foodstuffs, all kinds, except flour.

310. **Baling wire.** — A Pretoria firm of wholesale merchants asks for samples and prices of baling wire, with information as to quantities per reel.

311. **Electrical material.**— ADurban firm of agents who are prepared to purchase or act as local agents, ask for catalogues, price lists and samples, when possible, in electrical supplies of all kinds.

312. **White lead.**—A Durban firm asks for quotations on white lead.

313. **Agencies.** — A Durban commission agent covering all centres of South Africa is prepared to represent Canadian manufacturers in hardware, all kinds, enamelware, lanterns, kitchen utensils, smallwares, school requisites, foodstuffs, and any line suitable for the wholesale trade.

314. **Catalogues and price lists.** — An Orange Free State firm asks for Canadian catalogues and price lists on all lines of hardware, household goods, electrical goods, iron and steel, piping, wire, agricultural and

(Continued on page 120)

Charging Freight—Part Cost of Goods

Some Persistent Misunderstandings—How Many Merchants Are Unfair to Themselves By Trying to Give Unwarranted Service—The Unreasonable Fear of the Big Fellow

By HENRY JOHNSON, Jr.

A MERCHANT, busy with his inventory, wires me this inquiry: "In figuring my hardware inventory prices should freight be added to inventory or not? Freight already being charged to hardware department expense. Wire answer our expense."

I answered: "Freight is not expense but part of merchandise cost. If you have included it in expense you cannot now add it to merchandise value unless you deduct corresponding amount from expense. You should add it to cost hereafter, not to expense."

And that is about all there is to it, except that I cannot think why, with all our scientific study of the proper segregation and division of charges in business and the study we make of these problems in these columns continually, merchants persist in running this plain charge against cost in expense.

Avoid Expense Charge Wherever Possible

The best practice in any business is to avoid indefinite charges in all cases where definite charges can be ascertained and allocated, as our British brothers say. This because expense is at best an approximate, indefinite burden which is spread around on our merchandise by close approximation. But a definite, distinct charge against a given piece of merchandise has no such disadvantage. It can be charged directly to the items affected. It belongs precisely to those items. It is best absorbed by and disposed of by so charging.

Let us take a packing box, for example. Say it costs us 75c and that it contains 150 packages of screws. Let us say that the screws are billed to us at 40c a package and the 75c added as a packing charge at the bottom of till. Is it not the most obvious thing that the 75c is ½c a package on those screws? Is it not plain that our cost, at point of origin, is actually 40½c instead of 40c? Certainly, that is the way we shall regard it and figure it. But why? Because that is a plain, direct charge against that lot of screws. To so charge it not only disposes of it without further figuring or taking into account, but also most directly provides for getting it back again, with certainty, in addition to our desired blanket gross margin.

Why Make Two Jobs of One?

Suppose, now, that the freight on that box of screws is $1.00. Why not handle that the same way? Plainly, that dollar divides up into 2/3c a package on the screws. Then there is cartage from the station. We may do it ourselves, or we may have it done for us, but in any event the work costs and must be paid for. The obvious way is to figure it on a scale commensurate with its fair, going value which, let us say, is 25c.

Now, what have we altogether? We have invoice cost of 40c, ½c for boxing, 2/3c for freight and 1/6 cent for drayage. The total is 41 1/3c per package. To that it is proper to add something for wastage, shrinkage and other depreciating, so let us enter in our cost book a figure of 41½c for those packages of screws. Then the freight bill goes into the register to be figured among the petty expenditures for merchandise, and is done with at once without further handling. Best of all, we are absolutely certain that our 41½c includes every factor of cost against those screws.

Details Desirable and Instructive

Of course, there is no reason why a merchant should not keep a freight account also if he so desires. It is valuable to know all you can about your business. The only point is that, if you do so segregate freight into a separate account, let the process I have indicated be followed out just the same. Then when inventory time comes, simply close the freight into the merchandise account before you close your books and wipe out accounts into loss and gain.

When it comes to placing values on the inventory we have another problem. We have based all figures on actual cost, but now we shall revert to the practice of putting replacement figures on our goods when we inventory. When the inventory time comes, for example, those screws may be replaceable at 25c the package. In that case, then, whatever we have left of them must go in at 25c.

What I have tried to make clear is that in no legitimate way can transportation, packing expense, drayage or other clearly ascertainable direct charges against merchandise find their way into the expense account. If I have not succeeded, please ask again. This is something so elementary that it should be disposed of definitely.

Spoiling Customers

Not long ago I was waiting to see a dealer. He was a busy, bright young man whom I had known for years as one who gave a thought to his business, so this incident arrested my attention:

A little lady tendered a check to be cashed. He did not have enough currency handy. The lady said that ten dollars would be all she would need right then, and she told the merchant just to give her the ten and keep the check until later in the day when she would come in and get the remainder. He gave her the ten dollars, but also handed her back the check, saying he would make a memo of the money. Then his clerk figured up what the lady had bought and presented the ten dollar bill to pay for the goods. The dealer could not break the ten, so he charged the merchandise. So when the lady left the store, the dealer had charged to her $11.63, being ten in cash and $1.63 in merchandise, and he was without the security he had been tendered and which he might just as well have kept. In other words, he had sidestepped a sure thing and assumed a risk voluntarily—a risk he was not called upon to assume and which, in all probability, the lady will not thank him for.

I know just how it was done—so do you. I have done it many times myself—and so have you. But many years ago I awakened to the fact that I owed a lot to myself. I realized, too, that I could trust myself to be square with every customer, but I could not be so certain of the customer. From that time onward I gave myself the benefit of all doubts, and from then on I prospered perceptibly in my business. That young hardware man should have kept the check. Not only would it have safeguarded him, but it would have continued a good habit on the part of the customer. She never would have looked for other treatment. As things stand now, she is in a good way to be spoiled. She is ready to get the idea that she can ask for money from her hardware man whenever she wants it—that he is rich anyway—that it is just as safe in her keeping as in his cash drawer—that she "pays him a lot of money which he might just as well earn by a little extra courtesy"—and all that sort of thing.

Verily, many good customers are spoiled by foolish, uncalled-for over-indulgence!

Dodging the Shadow of the "Big Fellow"

Many dealers, especially in the outskirts of big cities, fail to get proper margins because of their fear that the big stores down-town sell so cheaply that they cannot get full prices. The funny thing is that such dealers are content to imagine a condition which a little real investigation would show them does not exist.

Whose fault is it that the small man works for less margin? His own—absolutely and solely his own. He can find out conditions if he will take a trip down town and visit the big store, asking a few intelligent questions. Then he can depend on his own neighborhood location to get him at least as much as the customer would pay after a trip down town.

A Starting Point for Bigger Business

How a Dealer Made Every Truck in Town a Runabout "Ad." For the Paint He Was Handling and Then Expanded the Business in Various Other Ways—Persistent Effort Brings Results.

RIVALRY is a human trait that can be turned to commercial advantage. Most paint men have witnessed and can appreciate bygone incidents something after the following fashion:

When Jake Smith, down on the Front Road, had finished breaking in his roan colt, he flourished forth with a brand new buggy and new set of harness. Tom Parsons, back on the next concession, could only stand being thus outclassed until he had scraped together enough cash for a brand new outfit, rubber tired, nickel-plated and all the rest of the trimmings. Pete Snell, on the side road leading to the Post Office, wasn't inclined towards taking any back seat to the other boys, so he swaps around till he is properly rigged out.

And then what a dust was kicked up all through the countryside!

And all, perhaps, after the same girl.

Good For Business

Did the local harness maker, and buggy agent curb this rivalry? Not they; business picked up with it.

To-day, we are somewhat advanced in means and methods, but human rivalry is the same frailty in men and women that it has been since Adam and Eve's time. "Keeping up with the Joneses" is characteristic of town and country folks alike. To-day, it is the buzz-buggy and the gas truck. There is as much rivalry in the up-keep of good trucks among the boys who drive them, as there used to be in preparation for the annual butcher boys' parade.

One man in a fairly large Ontario town saw an advantage in such rivalry for his paint department.

To have practically every truck in town a runabout "ad" for a paint department is some stunt in the way of advertising (and it costs nothing).

Billy Fleming, a clerk in this town's hardware store, chose a holiday, a can of the brightest red wagon paint in stock, and a brush, to spend with the store truck. When it blazed forth the following Monday, it proclaimed transformation without written word or placard.

Now Billy knew that Tom Watkins, driver of the People's Grocery Store truck, would get an eyeful that same day. To make sure that Tom did, he whispered a letter into the ear of the store's little blonde typist and addressed personally to Tom, telling him how it was done, how much paint it took, and how much it cost.

It Got Them All

Fact of the matter, several of the town's truck drivers got their eyes full, and the same personal letter, and it got them all.

Billy's idea of bestowing a personal letter on each of the several truck drivers in town tickled their vanity not a little. They were little used to it, but they liked it. Usually such things come to the boss, who is showered with a thousand and one other letters urging him to buy what-nots to no end; and the boss either responds or doesn't respond according to his humor for the day. Billy was working from the bottom up; he wasn't depending on the uncertainty of his business settling from the top downwards.

And then, depending on the human desire not to be outdone, Billy set each and all to out-vying the other fellow in sprucing up his truck.

The upshot was that several bosses received requests from their truck drivers to have their respective trucks painted up. The cost was not excessive, so with few exceptions the necessary permission was granted.

Made Them Salesmen

Now, Billy made each truck driver a salesman for him. He didn't have to waste his own time seeing the bosses when they were not busy. He didn't have to talk the matter up to them. He just employed the time of the typist to place a concrete proposition before each driver. They, in turn, carried it to the bosses, the men Billy really wanted to reach with the least possible resistance. Such is the power of well-directed selling letters. And this power rests within the hands of practically every paint retailer in the larger towns.

But the whole trick wasn't turned at this stage of the game.

Billy had shining examples of what his wagon paint and truck enamel would do shooting in and out of the streets every day of the week. He had a ready reference for every other truck owner in town and he used them as well for owners of passenger cars. He didn't need sandwich men to parade the streets. The motor owners in town became silent salesmen for him with their cars.

It Soon Spreads

Billy knew the fondness of motor fans to discuss this, that, and the other thing about their cars amongst themselves. Get a half-dozen or a dozen of them well started and well satisfied, and the leaven soon spreads amongst the others. A well-directed letter or circular helps some,

Get Them Thinking About Spring Painting

Forestall spring and your competitors. Don't wait until too late, but start in right now to "educate" your paint trade for spring. Keep *Moore's House Colors* well displayed where all can see. Implant the spring painting idea so firmly in the minds of your customers that when the weather does open up sales will come naturally and easily.

Start now—and keep it up. You'll be well rewarded.

If not already selling *Moore's Ready Mixed Paints* write us for our attractive agency proposition. It will pay you to investigate this high quality line.

Benjamin Moore & Co., Ltd.

West Toronto
Ontario

but a cranked-up motor fan, well satisfied with your auto finish, will set fire to dozens of others with the same enthusiasm.

It goes without saying that if an automobile involved only its first cost there would be many more of us blessed with one.

The possession of an automobile involves anything from a spring bumper and an accident insurance policy to a garage and ready cash to appease the local Justice of the Peace concerning an innocent joy-ride.

Billy took to the garage from a purely business standpoint. Now garages, to be of good service and appearance, involve paint—or should involve paint.

There were several of them in town that as yet had not been made acquainted with paint. There were frame structures, galvanized iron garages, and one or two built of cement.

Went After Bosses

This time Billy went after the bosses themselves. Again he whispered into the little pink ear of the little blonde typist a few well thought out paragraphs, the first of which read thus: "I have heard several people in town comment very favorably on the appearance of your truck since you have had it painted up with our —— wagon paints."

"Appearances, as you know, count for business, and the comment you have brought about, I am sure, has brought attention to your store.

"Your garage, etc., etc.,"

Billy rubbed in a little flattery to gain his point, then proceeded to show how much paint it would take to paint the average garage.

Where a garage was constructed of galvanized iron or cement he proceeded to give information about painting them which is not common knowledge amongst those not directly in contact with the paint business.

Special Instructions

In the case of galvanized iron, he pointed out that in the process of galvanizing the sheets a certain amount of acid was used from which the sheets were not entirely free. This, together with certain peculiar chemical actions of the spelter, was injurious to any class of paint. In order to successfully paint galvanized iron, it is necessary to use a primer specially made to withstand this action, and which would adhere to the sheets as a priming coat.

A paint salesman had explained this to Billy so that he was thoroughly posted. It had been pointed out to him that the usual vehicle oils were not able to overcome this difficulty and that it was necessary they should have a special treatment before they were permitted to enter into the paint.

Because he seemed to know what he was talking about. and likewise because he was willing to let out a little valuable information, he gained the ears of several owners of galvanized garages.

He further pointed out that after this special primer was used it was possible to use any kind of barn or house paint on sheet metal.

Any man who talks sanely about things shows that he knows what he is talking about. He is equipped to make sales much better than the man who beats up the air with generalities and vagaries.

One man, who besides owing a galvanized garage, possessed a warehouse of considerable size, and constructed of the same material, sought out Billy to know if barn paint could be used in this manner.

Billy was in a position to assure him that it could, and a barrel of barn paint went out of his paint department for this purpose.

Taking these garages as a starter paved the way to a considerable sized business in paints for other galvanized buildings. In addition to the protection afforded, painting added to the appearance of these in contrast to the cold metallic color of the bare sheet metal.

Going After Farmers

The last word I had of Billy was that he was tackling one or two farmers in the community who possessed galvanized sheet barns. I haven't heard how he came out, but I'll stake a little roll against a plugged nickel that he will sell them before he quits.

To the men who possessed the concrete garages he addressed a little special inside information on cement painting. He first drew attention to the lack of warmth in the color of uncoated cement, and suggested, by means of a color card, a choice of buff, grey or cream shades for the body of the building, with trimmings of dark red or brown. He called their attention to the fact that the alkaline nature of cement required special treatment before it was possible to apply paint successfully for good wearing service. This could be overcome by the use of specially prepared primers, which rendered the cement waterproof as well as providing a solid ground for the finishing coats. Where it was thought that the cement was excessively alkaline through too much lime, he suggested a wash of white vitriol in water, mixed in the proportion of from one to two pounds of this chemical to the gallon of water. Where the cement was not too alkaline, or if it had been standing for some length of time, he pointed out that this precaution was not necessary and that his special waterproofing primer could be directly applied.

Preserve the Texture

Billy knew that, in some instances it was desirable to preserve the natural texture of the cement. For this purpose he called attention to the use of a stain which would preserve this feature, and at the same time would give warmth of color and further protective waterproofing service.

By dint of a little perseverance he succeeded in getting his prospects to paint their cement garages. With these as examples, and a starting point, he turned his attention to other cement buildings, till the habit grew, and built up a nice little business in cement paints for his store.

He even succeeded in persuading the Town Council to waterproof and paint in a light green color the new cement bridge which crossed the river at the lower end of the Main Street.

Now any paint dealer in a town of moderate size can realize that getting mixed up in municipal undertakings is ticklish business. Getting away with it successfully means something. Billy got away with it, thereby gathering to himself a lot of free advertising in a line of paint which too many dealers cannot be persuaded to touch with a ten-foot pole.

Many Opportunities

Opportunities for cement painting exist around every community in the country. Billy simply took the opportunity that was his, grasped it by the scruff of the neck and shook business out of it, whilst many another man might have stood by, wiseacre-style, and shaken his head in doubt.

But this is getting a long way off from trucks and automobiles.

The automobile has brought in its trail a vast number of chances for business in accessories, not the least of which are paints and varnishes. War conditions and prices have made it necessary to seek longer service and appearance of the motor car and truck. Paint and varnish have been resorted to no small extent. The cost of these is insignificant as compared with the advantage in prolonging the upkeep of the cars for transportation service. Conditions which exist in connection with motors have tended to stimulate paint and varnish business rather than discourage it.

As in the case we have just cited, the automobile may be used as a starting point for extending business in a great many directions.

The moral is: You can start almost anywhere to develop paint business if you go at it earnestly and persistently.

CONFIDENCE

(New England Hardware News)

If you think you are beaten, you are;
If you think you dare not, you don't;
If you'd like to win, but you think you can't,
It's almost a cinch you won't.

If you think you're lost, you're lost,
For out of the world we find
Success begins with a fellow's will;
It's all in the state of mind.

If you think you're outclassed, you are,
You've got to think high to rise;
You've got to be sure of yourself before
You can ever win a prize.

Life's battles don't always go
To the strongest or fastest man;
But soon or late the man who wins
Is the man who thinks he can.

WHY YOU SHOULD HANDLE THE COMPLETE "ELASTICA LINE"

The Full Line has the benefit of the Reputation earned by "Elastica" Varnishes during the years they have been on the Canadian Market, and make it easy for you to build your Paint Business on THE SUREST FOUNDATION.

S. B. Andrews of Minnedosa, who has conducted a tinsmithing business there for the past eight years, is enlarging his premises and adding a complete line of hardware. He spent the greater part of the week in the city on business.

St. John, N.B., News

Retail merchants of St. John are observing Dollar Day on February 20. More merchants than ever before are joining in the movement.

The long established general business of A. Steeves & Company, Hillsboro, N.B., has been taken over by George A. Dawes and Ernest Wright, of St. John.

The Campbellton branch of the Retail Merchants' Association has elected the following officers: President, George S. McKenzie; vice-president, F. E. Shepherd; second vice-president, M. P. Moores; secretary, H. B. Alston.

The Cuban consul at St. John reports an excellent opportunity for both shelf and heavy hardware of Canadian make in Cuba. Before the war these goods were imported very largely from Norway, but both freight rates and the sympathies of the people are much more favorable to Canada.

Officers for the Moncton branch of the Retail Merchants' Association were elected recently as follows: Honorary president, L. H. Higgins; president, R. P. Dickson; vice-president, W. D. Charters; secretary-treasurer, J. S. Ross; auditor, T. B. Price; executive, David Steeves, J. J. Bourgeois, H. E. Gross, A. E. McSweeney and P. H. Fryers. The branch now has 110 members.

Credit reporting bureaus, already established in connection with the branches of the Retail Merchants' Association in St. John, Moncton and Woodstock, are to be enlarged, new bureaus are to be opened in connection with the branches at Fredericton, St. Stephen, Newcastle and Chatham before long and it is the intention of the provincial executive to have this work carried on by every branch of the association in New Brunswick as soon as arrangements can be made.

HOLD FIRST ANNUAL BANQUET

The Toronto Warm Air Furnace Dealers' Association held their first annual banquet last Thursday evening at the King Edward Hotel, acting as hosts to the manufacturers of warm air furnaces. The aims and objects of the association were discussed by many of the speakers, and it was unanimously resolved that the association take steps towards having a practical heating by-law put into

LEASE MUNITIONS PLANT

In order to facilitate the manufacture of washing machines pending the erection of a large new machine shop at London, Ont., Beatty Bros., of Fergus, Ont., have leased a factory that was, until recently, used in the making of munitions. They are putting in dry kilns that will have four times the capacity of the present kilns. The Fergus plant is also helping out the London situation by shipping dollies, washer legs, and other parts to London in carload lots.

AFTER EXPORT BUSINESS

In reporting the names for those forming the committee of paint men who were in Ottawa last week in connection with the development of export business, mention of Royal Cluxton, manager, Canada Paint Co., Montreal, was inadvertently omitted. Mr. Cluxton was a member of the delegation which interviewed the Trade Commissioners, going thoroughly into matters regarding export business, shipping facilities and reconstruction orders.

National Burners, Limited, capital $100,000, head office Toronto, Ont., plans to manufacture and deal in all kinds of appliances to consume oil, gas and other products used for heating stoves, boilers, furnaces and engines.

Varnish Selling

It is comparatively easy to make the first sale of any varnish, but there is only one real foundation for a permanent and growing demand—and that is quality. Even small and occasional buyers have learned by experience, when buying varnishes and their allied products, that it pays to discriminate.

A simple but effective selling argument for the varnish salesman is Berry Brothers' label, because of its wide recognition as a guarantee of the utmost in varnish value.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 20.—Linseed oil has been the central point of interest again this week and the basis is firmer, $1.47 being the low price for single barrels of raw. The undertone is rather firm.

Turpentine is steady and unchanged, and there is also a somewhat steadier feeling for putty and white lead in oil. The mixed paint and specialty trade are reported very fair, considering the season.

Higher Flax Firms; Linseed Oil 2-6c

Montreal.

LINSEED OIL.—The flax market has firmed again and oil prices are up from two to six cents per gallon. It is not improbable even that higher prices will obtain still. The market is an uncertain quantity, as far as seed prices go, and there has been an enhancing of the basis since last Saturday.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 47	$1 50
5 to 9 bbls.	1 46	1 50
10 to 25 bbls.	1 45	1 50
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 49½	1 52½
5 to 9 bbls.	1 48½	1 52½
10 to 25 bbls.	1 47½	1 52½

Turpentine Held Without Change

Montreal.

TURPENTINE.—There is a steadier basis for turpentine here and the market is holding at the reduction of last week, $1 per gallon being the lowest quotation made. Supplies are adequate and there is fair, though only seasonable movement.

Turpentine—		Imp. gal.
1 to 4 barrels	$1 00	$1 05
Small lots	1 07	1 20

(Packages extra).

Oil Price Will Hold Putty Firm

Montreal.

PUTTY.—The higher price of oil has not brought any change to the putty market, but the effect is one of considerably strengthening the undertone. The selling is light and seasonable on an unchanged basis.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead Steady But No Changes

Montreal.

WHITE LEAD IN OIL.—The market is ruling without change and business is coming to hand fairly well. The outlook is for a better movement in the near future, once spring orders improve. Prices are: For five tons lots, per 100 lbs., $15.50; ton lots, $16; and lesser quantities, $16.35.

Mixed Paint Orders Coming to Hand

Montreal.

MIXED PAINT.—Orders are coming to hand satisfactorily for paints and kindred products. These are not large, in the majority of cases, but there is a healthy movement and the paint men are well satisfied. The market rules steady and unchanged.

TORONTO

TORONTO, February 20.—Turpentine is slightly easier in some quarters this week, while linseed oil has held without change. Mixed paints are steady, and the same is true of white lead in oil and putty. Glass is firm and there seems to be a fairly good feeling in the trade with sorting business coming along alright.

Turpentine Prices Show Adjustment

Toronto.

TURPENTINE.—A slight readjustment in turpentine prices has been made this week, but market generally is firm. Transportation, cartage, wharfage, etc., combine to make the figure of laid down cost per gallon about 50 per cent. higher than it has been. A fair amount of orders are coming to hand.

Turpentine—	Per Imp. Gal.	
1 barrel (barrel included)	$1 04	$1 05
2 to 4 barrels (barrels included)	1 03	1 04
5 gallon lots	1 14	1 15

Linseed Oil Rules Unchanged

Toronto.

LINSEED OIL.—No change in the price of linseed oil is reported this week but indications are that should market or seed remain at present levels that higher linseed oil will be found necessary. Business is only fair, though better than it has been.

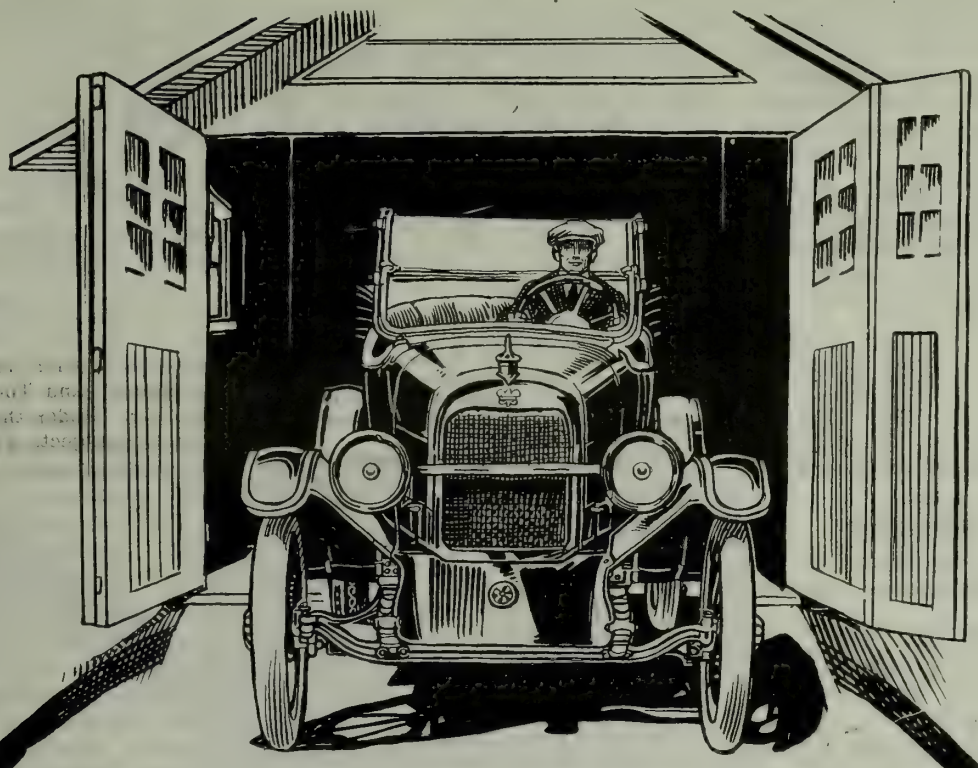
Linseed Oil—	Raw	Imp. gal.
1 to 2 barrels, gal.	....	$1 50
3 to 5 barrels, gal.	....	1 49
10 bbls. and over	....	1 47
	Boiled	Imp. gal.
1 to 2 barrels, gal.	$1 52½	$1 53
3 to 5 barrels, gal.	1 51½	1 52
10 barrels and over	1 49½	1 50

Care in Buying of Mixed Paints

Toronto.

MIXED PAINTS.—Retailers are undoubtedly showing a disposition to buy very carefully. Manufacturers are firm in their belief that prices will be maintained for some little time to come, but there is a tendency on the part of the trade to just buy from hand to mouth, and this tendency, if followed out, will work out to the benefit of all concerned. Manufacturers are not trying to load up the retailers at the present time, but are pointing out that the stocks should not be starved as loss of sales through having let stocks run to a vanishing point is a dangerous procedure for the future of the merchant.

White Lead in Oil Unchanged



Toronto.

WHITE LEAD IN OIL.—Interest this week centred in the talk on the white lead situation which was given at the convention, and from the advices given out, corroders do not look for any further recession in prices in the immediate future. The situation contains no particularly brilliant features at the present time, the demand for white lead in oil being within a rather narrow compass. A little better buying activity is expected as the spring painting season opens up. Quotations are without any change, pure white lead in oil being quoted at $16.30 per hundred pounds in ton lots; at $16.65 per hundred pounds in less than ton lots. The various brands are shown in current market quotations.

Export Glass Firms Market; Putty

Toronto.

PUTTY, GLASS.—The big export business which has come to hand for the American manufacturers of window glass has certainly tended to firm the market considerably. It seems less likely than ever just at the moment that prices can undergo any revision down-

Making It Look Like New

Very soon automobile owners will put their cars into the repair shop for a general clean-up before the fine days come again.

Engines, gears—all mechanical parts will be carefully looked over and cleaned and the car will go out on the road with last year's dirt worked into the enamel because the owner thinks he would have to pay high prices to someone for putting on a new coat.

B-H Auto Enamel can be put on by anyone. It spreads evenly and leaves no brush marks. It gives a gloss to the car that makes it look like new.

How many cars are there in your territory? *Every one of those car owners is a prospect for a sale.* Every sale of B-H Auto Enamel means a sale of sand paper and brush, as well as auto accessories. Get a display in your window—we'll send show cards and color cards. Get automobile owners interested. One order will bring another.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

wards for some months to come. Prospects of importing glass are not very bright for the present year at least, and it looks as though supplies will have to be derived from the North American Continent. Discounts appearing in the current market quotations are unchanged for the week.

There have been no features of interest in regard to putty this week. Sales are confined to very small lots and prices have held without any change. The range of quotations which is being named to the trade is as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

TRADE INQUIRIES

(Continued from page 110)

dairy implements and machinery and furniture in K.D.S.

315. **Catalogues and price lists.**—A Durban wholesale firm asks for catalogues and price lists on all lines of hardware, household utensils, lanterns and tools of all kinds.

316. **Catalogues.**—A Natal firm asks for catalogues and price lists from Canadian manufacturers in all lines suitable for wholesale distribution, and in a special way desires information from manufacturers of oil engines, agricultural implements, and heavy milk cans.

317. **Catalogues and prices.**—A Natal firm requests from Canadian manufacturers, catalogues and prices on hardware, cart and carriage material, bolts and nuts, lanterns, shovels, binder twine, brushware, handles, ammunition, wire of all kinds and agricultural and dairy implements.

318. **Agricultural machinery and implements.**—A Natal firm specializing in agricultural implements and machinery requests catalogues and price lists on all supplies suitable for sale to the farming community.

319. **Electrical irons.** — An Orange Free State firm asks for catalogues and price lists for electrical irons and other electrical household appliances.

120. **Wooden spinning tubes.**—A Bristol firm desires to get into touch with Canadian manufacturers of wooden spinning tubes as used in flax and hemp spinning. Samples can be inspected at the Department of Trade and Commerce, Ottawa.

121. **Paper spinning tubes.**—A firm in Bristol is prepared to purchase spinning tubes made of paper, the tubes required for use in the spinning of flax and hemp. Samples can be inspected at the Department of Trade and Commerce, Ottawa.

122. **Paper.**—A South Wales firm wants to import paper suitable for printing newspapers. The paper must be on reels, the width of which to be 22 and 26 inches. Quotations c.i.f. Bristol or Liverpool and time of delivery to be stated.

123. **Cardboard.**—A London firm, open to purchase large quantities of cardboard, would be glad to receive offers from Canadian manufacturers able to fill orders.

124. **Penholders and metallic tips.**—A Birmingham manufacturing company wishes to receive quotations from Canadian manufacturers who can supply red and green enamelled wooden penholders, and also metallic penholder tips. Prices are desired for 100, 500, 1,000 and 10,000 gross lots.

151. **Fir, spruce, white and yellow pine, planed boards.**—A Glasgow firm is in the market for the above; 1-inch to 1½-inch thick in quantities up to £2,000 value with a view to business as soon as conditions permit.

158. **Timber.**—A Glasgow firm wish to hear from Canadian exporters of maple logs, rock elm logs, Douglas fir in planks, soft elm boards, with a view to business as soon as conditions permit.

169. **Calcutta commercial agency.**—A Canadian business man who was employed for five years in a large wholesale importing house in Calcutta, India, proposes to leave Canada for India early in March and will start business there as a manufacturer's agent. He is acquainted with Calcutta, Bombay, Rangoon, Colombo, Madras, Karuchi, and Lucknow, has a colloquial knowledge of Hindustani and is able to conduct business without the need of an interpreter. Would like to get into communication with Canadian manufacturers who require representation in India.

170. **Lumber.**—A French lumber merchant who has fought through the war for four years is about to start business again and wishes to become representative in France of an important Canadian lumber firm. He was in the timber trade for seventeen years prior to the war.

171. **Agency.**—A Belgian merchant wishes to get into communication with Canadian exporters of brushes, handles, woodenware, sponges, mats, chamois-leather dusters, ropes, house-cloths, soap, blackings, etc.

177. **Bolts and nuts.**—An Edinburgh company asks for the addresses of Canadian manufacturers who can supply cup square Whitworth thread bolts and nuts.

178. **Agency.**—A Belgian commission merchant who was in Antwerp for nine years as importer and exporter wishes to represent Canadian houses for any lines saleable in Belgium.

180. **Leather**—A correspondent in Belgium asks for names of Canadian manufacturers of leather and leather goods, lumber and woollen goods, seeking business in that country.

186. **Powdered white lead.**—An Argentine firm of paint manufacturers would like to receive quotations c.i.f. Buenos Aires for powdered white lead in casks of 200 kilogrammes net weight.

187. **Pressure gauges, thermometers, and similar accessories for freezing plants and sugar refineries.**—A Buenos Aires machinery house would like to receive prices f.o.b. New York, and, if possible, samples.

188. **Valves for steam and water.** — A Buenos Aires machinery house would like to receive prices f.o.b. New York, and, if possible, samples.

189. **Rubber irrigation hose, plain and armored.**—A Buenos Aires machinery house would like to receive prices f.o.b. New York, and, if possible, samples.

205. **Wooden boxes.**—A London firm wish to get into touch with Canadian makers of wooden boxes willing to manufacture to their specification.

PROGRAM DOMINION BOARD OF RETAIL MERCHANTS' ASSOCIATION

The annual meeting of the Dominion Board of the Retail Merchants' Association of Canada is to be held at the Chateau Laurier hotel at Ottawa, Can., on Monday and Tuesday, March 17 and 18, 1919. Under the heading of Legislation, the subjects which will come up for consideration are in part as follows:

All merchants to keep books from the time they start in business.

That the cost of carrying parcels by mail, as well as catalogues, be paid out of the cost of the same, and no portion be charged to the letter service.

That the distribution of all catalogues when sent by mail be governed by the same rules, regulations and zones that govern the letter service.

Certain amendments to the present proposed Bankruptcy Act.

Certain amendments to the Fire Insurance Act.

Amendments to the Weights and Measures Act.

Amendments to the present Order-in-Council whereby the maintenance of selling prices on trade marked goods is made a legal offence, and amend the clauses regarding the powers given to Fair Price Enquiry Committees.

Legislation to enable retail merchants to sell any article left for repairs.

Proposed amendments to the False Advertising Act.

Legislation to have Thanksgiving Day fall on November 11 of each year.

Legislation to provide for an Inland Trade Commission for the purpose of considering all inland trade matters, similar to the manner in which the Dominion Railway Board deals with all railway matters.

Legislation to abolish the giving of coupons by manufacturers, and the abolishing of all guessing contests.

Legislation to prevent civil servants from having special protection under the Garnishee Act, especially now that the Government has taken over so many lines of railway and employ so many railway employees.

Amendment to the War Stamp Tax Act, so as to remove the present system of having war stamps placed on patent medicines and other articles by retail merchants.

Consider the present or any proposed legislation regarding the Business Profits War Tax.

Consider legislation to compel all persons who sell damaged goods to mark the same accordingly.

An amendment to the Lord's Day Act, making the purchaser of goods sold on the Sabbath day equally guilty with the seller.

Lowe Brothers Paints

Why You Can Expect a Big Demand for Paint This Year

A few reasons why you should take inventory of your paint stock now and be prepared for the business that is coming.

Very little painting has been done during the past four years—people have been too busy with war work.

But a house cannot go many years without paint and not show signs of deterioration—and many houses are showing these signs now.

The only thing that will prevent rapid decay from now on is paint—and lots of it.

In anticipation of the return of their boys from France people are now planning a great deal of inside and outside painting. They don't want their sons to come back and find the home they have been away fighting for shabby and run down for want of paint.

A more plentiful supply of labor this spring and summer—the return of thousands of painters and decorators to their trades.

A great building revival, helped along by Federal and Provincial Government loans for the building of homes. Government plans are already being put into effect.

Large Government contracts for public works—highways, harbor work, Government buildings.

All building activity has a direct effect on the demand for paint.

A general overhauling and repainting by the railways of their stations, freight buildings, rolling stock and bridges which were forced to go with very little paint during the war.

All this points to a brisk demand and steady prices, and the far-sighted dealer will look over his stock now and get it in shape to meet the demand which is coming.

"House Cleaning Days" Mean Greater Wa-Ko-Ver Sales

If you keep Wa-Ko-Ver well to the fore just now, in your windows and on your counter, the housewives' mind will become receptive to the Wa-Ko-Ver idea.

Wa-Ko-Ver beautifies all woodwork, and literally wears "like iron." Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore the old-time freshness.

Write us a card and we'll be glad to tell how you can profitably represent us in selling Stephens' paints and varnishes.

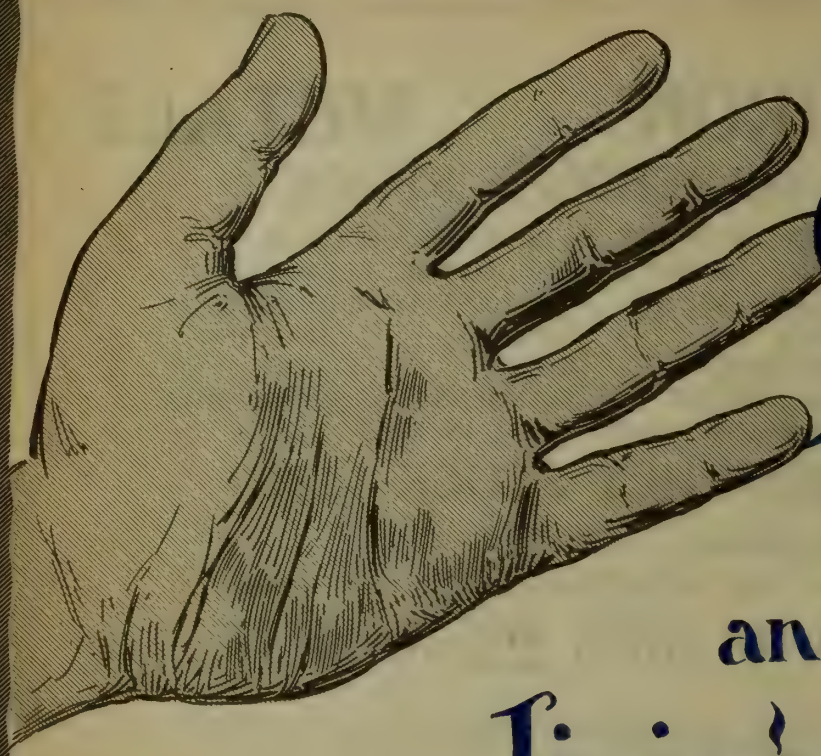
Hardware and Metal Subscribers

Buy for business as well as for p r i v a t e consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL r e a c h only the cream of the trade—the best and biggest buyers in Canada.

The Never-Fail Oil Can for Kerosene



The Never-Fail is clean and convenient. It pumps the oil into a lamp without fuss or muss, and if the lamp becomes too full the pressure of a finger draws the oil back again. The Never-Fail is made of high-grade aluminum-finished galvanized ware, has a capacity of five Imperial gallons, and is absolutely guaranteed. You can't do better than put in a few Never-Fails on trial.

Let this *Worthy* Brand Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want *you* to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will *pay* you to sell Jamieson Paints and Varnishes exclusively to your customers.

The Painters' Trade in your town belongs to you and you can get it by using our selling helps. We give $3.50 in cash or a 7" wall brush to any painter who sends us 150 clippings of the large word Alabastine from the side of the full size package, or 300 from the half size. We send any stencil in our catalogue for 10 cents and 3 coupon labels from the bottom of the full size or 6 from the half size. These stencils are worth from 40 cents to $3.00.

Alabastine mixes quickly in cold water. A painter can do a small job, get the money and be away to the next job while the other fellow is getting his hot water stuff ready. Send us a list of painters. We will do the rest.

Our policy gets them to come to you for the package goods and quit bothering with bulk goods. Why not specialize on the old reliable advertised line, maintain the regular price, and get a regular profit?

The Alabastine Company, Paris, Limited

PARIS, ONTARIO

If any advertisement interests you, tear it out now and place with letters to be answered.

OUR NEW FACTORY

There's every indication that there will be a big demand this season for paints and finishes

Glance around you and note the "rundown" condition of the majority of houses, note the need of outside paint—the inside is the same. Note the new houses that are being built and the permits which have been taken out.

The war over, people will begin to "fix up."

Lay your selling plans this year around these two gilt-edge lines—

Pearcy's Prepared Paint
Hillcrest Finishes

These are proven sales-makers and return-business getters. Put up in attractively labelled packages, they lend themselves to splendid window and counter display.

If you haven't tried out these Sanderson-Pearcy lines it will pay you to place an initial order with our representative when he calls.

Try out Sanderson-Pearcy Service.

SANDERSON PEARCY & CO.

HAS FOUND ITS PLACE IN THE SUN

By demonstrated merit, basic quality, uniformity of product, workmanship, style, balance, versatility in design, and a brush at a price to meet every requirement this trade mark has found its place in the sun.

It is stamped on the product of an organization in business in Canada for over 57 years and Canadian all through. Yes, it was born and brought up in Canada.

It serves to identify the output of a splendid factory of over 125,000 square feet of floor space; lighted by over 21,000 lights of glass. A factory equipped with every modern appliance known to the trade and a labor staff developed from years of careful training.

This trade mark has found its place in the sun through the might of right, of fair dealing and intrinsic worth and is the trade designation used on

"BETTER BRUSHES"

Fruit Growers will Demand CANADA PAINT INSECTICIDES

This year---more than ever---in their efforts to stamp out the garden and fruit-tree pests, the Farmers will call for Canada Paint Insecticides---and they will be content with *nothing else.*

The sterling qualities of C.-P. Insecticides --- the wonders they have achieved in saving and increasing the output of vegetables, fruits and flowers --- have won them an enviable place in the esteem of the grower, and you will find that substitutes *will not do.* They will patronize merchants carrying C.-P. Insecticides.

C-P Arsenate of Lead (Dry)
in powder form---1 lb. does the work of 2 lbs. paste. Saves loss from frost and evaporation.

C-P Kalcikill
Arsenate of Calcium (lime).

C-P Arsenate of Lead (Paste)
A neutral paste for Codling and Tussock Moths, Tomato and Cabbage Worms, etc.

C-P Dry Lime Sulphur---
needs only to be added to water for combination spraying.

C-P Sure Bug-O-Cide---
death to Potato Bugs.

C-P Paris Green
Strong poisoning powders---no free arsenic to injure vegetation.

C-P Srayide
A Garden Spray (Dry).

Place your order *to-day*---and insure early delivery.

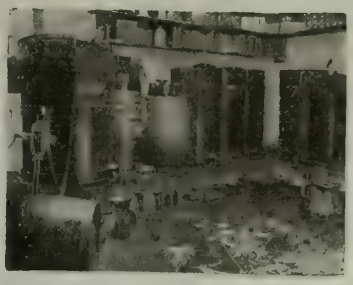
The One Best Seller

Anyone can see at a glance that the curved lance is a big feature. With it you get the nozzle under the leaves without wrenching your back all day. That point alone sells the

O-K-Spra

Its obvious advantages save you a lot of selling talk.



The efficiency non-clog nozzle has a thimble shape strainer that keeps going longer than that of any other sprayer—another big selling point.

These features make the O.K.-Spra doubly useful for all kinds of spraying.

Won't it pay you to lay in a good stock of O.K.-Spras — the easy sellers. Write us for information.

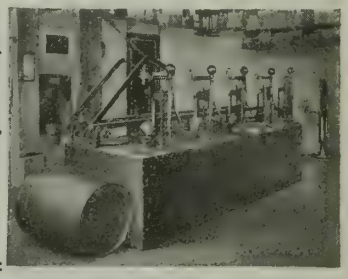
GALT ONTARIO

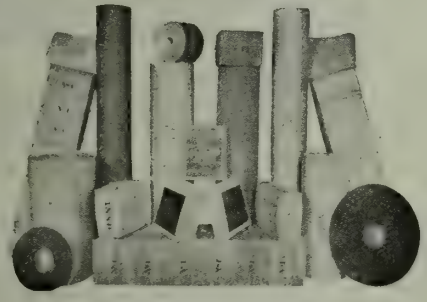
Thousands of Footsteps You Might Have Saved

Yesterday, to-day and to-morrow you and your clerks have countless customers for oils. It means thousands of steps to and from the oil shed or room. It means hundreds of petty operations, and hours of wasted time.

Contrast This Method of Oil Handling With a



BOWSER OIL SYSTEM



a system with underground or basement tanks holding ample storage—clean, safe and efficient. A system with pumps installed at your busiest corner of the store, neat and cleanly, a reminder to customers and a convenience to you and your help. A system that is self-measuring, self-computing. One that insures safety from fire, and means increased profits. Learn more about it to-day.

SAVE COAL
BY USING
BUILDING PAPER

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

"Wanted—A National Plan"

An article of unusual importance, by Sir George Bury, formerly vice-president of the C.P.R., appears in the February issue of MACLEAN'S. He points out that Canada must more definitely shape her destiny if that destiny is to be as glorious as all Canadians hope. It is a stirring demand for Canadians to get together in the formation of a national plan, accompanied by many practical suggestions from his experience in transcontinental railroad building. An article of national importance.

"Germany From Within To-day"

The funniest thing that he has perhaps written appears in February MACLEAN'S from the pen of Canada's great humorist, Stephen Leacock—an imaginary visit to Berlin under the Bolsheviks. He finds Von Tirpitz planning a new navy, an *inland fleet;* Frau Krupp, an apple woman; Von Bethmann-Hollweg, a cab driver; Bernstorff, a Bolshevik and president of the Scavengers Union. He finds a *Get From Under* committee planning a trade war on the world and half the population of Berlin in English clothing or Scotch kilts. He finds—

But read the article. There's a long laugh in every line. It is farce, however, built up on pretty shrewd truths.

You will find this a remarkably interesting number. The bold, fighting face of Admiral Beatty is on the cover and inside are the following big features:

The Campaign Against Britain, by Agnes C. Laut.
The Farmer in Politics, by J. K. Munro.
The Strange Adventure of the Thumb Tap Clue, by Arthur Stringer.
Old Times in Canada, by Walt Mason.
Lend Me Your Title, by Onoto Watanna.
The Three Sapphires, by W. A. Fraser.
Wild Miners I Have Met, by E. Ward Smith.
The Anglicization of Katrina, by Mary Josephine Benson.
Saturday's Child, by Mary E. Lowrey.
The Minx Goes to the Front, by C. N. and A. M. Williamson.
The Veins of the War God, by Corporal Herbert Forder.

The Best Articles From All Magazines

Prepare For Spring Trade

Your customers can save time and money by using our Electric Steam Radiators.

Hydro Electric P.C. Approval No. 101.

Spring and its uncertain weather will soon be here. Raining, windy or cold one day, very warm the next, warm in the day and perhaps extremely cool in the evening. It is neither convenient, comfortable nor economical to operate the furnace. One or two of our radiators will furnish all the heat when, where and as required at the minimum of cost and attention.

Clean, economical and guaranteed.

We offer attractive terms to le gitimate dealers.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

Are You Ready for the Horse-Clipping Season?

Demand for Stewart Horse Clipping Machines this spring will be extraordinary.

Already consumers are making more inquiries for catalogues and prices than ever before.

When we sold these machines to the Allied Governments, last year, we little dreamed that the "education-by-example" what they would do, in the service, at home and abroad, would bear such immediate fruitage.

But, our boys in the cavalry, artillery and commissary divisions, last spring saw such magical effects on tired animals the moment their heavy winter coats were removed, that they first **wrote** home, telling the story; and now that so many thousands have **come** home with the same testimony, the "gospel of The Stewart Clip" has taken deep root wherever horses and mules are found.

Milch-Cows, Too

Meanwhile, farmers and dairymen have become so prosperous that the seed sowed in their minds the past few years as to the importance of clipping milch-cows about the adders and flanks, to keep filth out of the milk, will bring to you a harvest of orders for this machine.

Stewart No. 1 Ball-Bearing Horse and Cow Clipping Machine

has a place on every farm and dairy where a half dozen animals are kept.

It retails at $9.75 to $10.75 West of Denver, and our liberal discount gives you a fair profit on every sale.

Are SHEEP Raised in Your Country?

If so, you will have a record-breaking demand for your Stewart No. 9 Ball-Bearing Sheep-Shearing Machine.

Even the man with only a dozen sheep will demand this machine this year, if he has not one already on hand.

For sheep-raisers have made money, and the price of wool is still high. And every sheep-raiser already knows that the "Stewart" gives him 15% more wool from each sheep than hand-shearing.

Stewart No. 9 Ball-Bearing Sheep-Shearing Machine retails at $14.00 ($15.50 West of Denver). Liberal discount to dealers.

Chicago Flexible Shaft Company

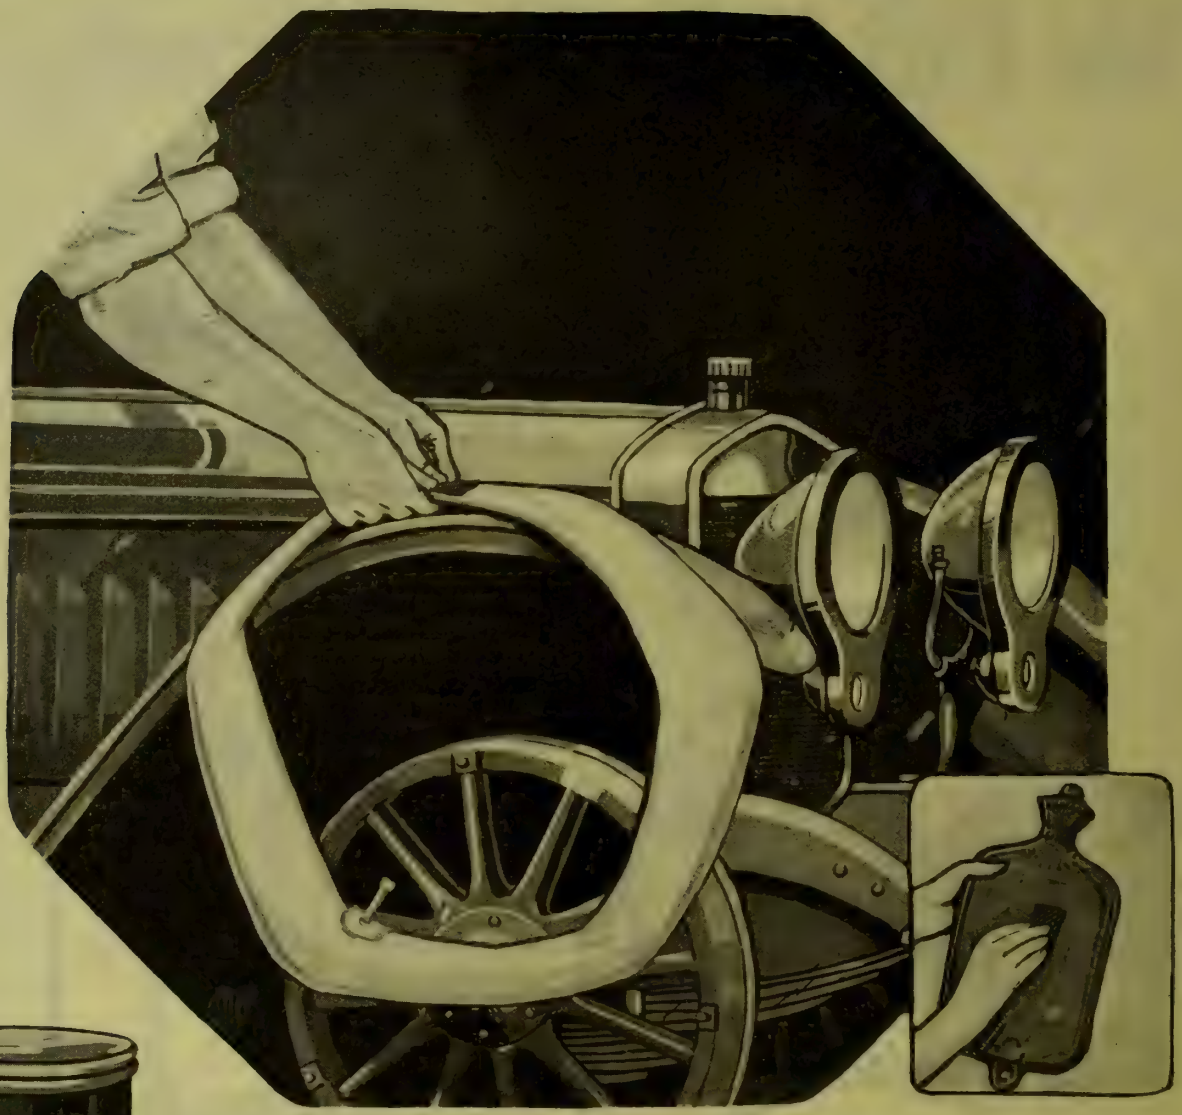
12th Street and Central Ave., Chicago, Ill., U.S.A.

We Put It To You Squarely:

"Do You think it is fair to Yourself and Business to countenance an Avoidable Waste?"

Here is a waste you can easily stop at practically no expense to yourself. The old method of handling varnishes, oils, turpentine, etc., is just as wasteful and just as antiquated as the old-fashioned horse car and the still older ox cart.

GILBERT & BARKER
Oil Storage Systems



will quickly pay for themselves in time, labor and the **saving of oil.** This is the experience of thousands of users of G. & B. equipment. THEY KNOW. Seepage, due to leaky containers, is eliminated. This equipment is proof against evaporation and reduces fire risk to the minimum. The Gilbert & Barker line of pumps and tanks is complete.

You intended to look into this—do it to-day. Send for Bulletin 52. To-day is a better day than to-morrow—write.

Educating 6,000,000 motorists to the need of better brakes

IN 88 advertisements in these publications the need of a frequent brake inspection is driven home over and over again. It is criminal carelessness to neglect brakes—the most important part of the car so far as safety is concerned.

The more keenly motorists appreciate this, the better will be your brake lining business. In the advertising which is running now in the thirteen publications shown above, we are convincing 6,000,000 motorists of the menace of dangerous brakes.

The cost of negligence is brought home sharply to them, and in every advertisement they are urged to go to their dealers and learn the exact condition of their brakes.

This creates new business for you not only in relining brakes but also in general overhauling and the sale of accessories.

Motorists believe in the superiority of Thermoid

They are shown that the fine grain of Thermoid resists wear and gives uniform gripping power all the way through, while ordinary woven brake lining wears down quickly and does not have the same gripping power when worn half way as when new.

Thermoid advertising is building a big profitable brake lining business for dealers handling Thermoid. It will pay you just as well as it is paying them.

Ordinary woven lining. Notice the loosely woven texture. Wears down quickly and unevenly, losing its gripping power as it wears.

Thermoid Hydraulic Compressed Brake Lining. Notice the compact texture. Wears down slowly. Gives uniform gripping surface until wafer thin.

Write to-day for information about the further co-operation which helps the Thermoid dealer to build big business.

Every foot of Thermoid which you sell is backed by ***Our Guarantee, Thermoid will make good—or WE WILL.***

THE ELECTRIC STORAGE BATTERY CO.

"Exide"

Starting & Lighting Battery

"Well, there's the end of that—and I've learned my lesson. Me for the best battery I can buy—which one is it?"

Does this express your state of mind? Hundreds of thousands of car owners have found that the answer is "Exide"

The Battery Without Doubts

"Exide" power and endurance have been large factors in building up the largest battery business in the world. Skilled engineers in every field of electrical activity have endorsed in advance the judgment of the car owner who equips with "Exide."

The Battery for Every Car

For whatever make or model of car you now use, or contemplate purchasing, there is a certain "Exide"—one not simply plausibly **adapted** to it, but one that will better its performance.

The Battery of Nation-Wide Distribution and Service

All over the country, in principal cities and towns, are located "Exide" Distributors. They can provide you with the "Exide" Battery that is made for your car, and they can see to it that you get from that battery all the power-performance built into it. Put your battery need before the "Exide" Distributor nearest you—whether it be a new battery, a repair, or advice and assistance in battery operation—he can and will meet it.

Exide Storage Batteries and Replacement Parts for All Makes of Cars Carried in Stock.

The Workman's Masterpiece

Partridge Tires

Made By Hand

By The F. E. Partridge Rubber Company, Limited, Guelph, Ont.

The advertisement shown above is No. 2 of a series that will appear during 1919 in newspapers and magazines from Coast to Coast. Hardware dealers can profit by this advertising by placing an order at once with any of the following distributors:

E. T. Black Tire Company	Vancouver, B.C.	The Marks-Clavett-Dobie Co., Ltd.,	Port Arthur, Ont.
Border City Auto Supply Co.	Windsor, Ont.	Marshall-Wells Co., Ltd.	Winnipeg, Man.
The Chapin Company	Calgary, Alta.	Marshall-Wells Alberta Co., Ltd.,	Edmonton, Alta.

Lamontagne, Ltd.	Montreal, Que.	Wilson Auto Specialties Co.	Hamilton, Ont.

If any advertisement interests you, tear it out now and place with letters to be answered.

Sternwear

—suppose you used a casing with eight 1¼ inch holes in it

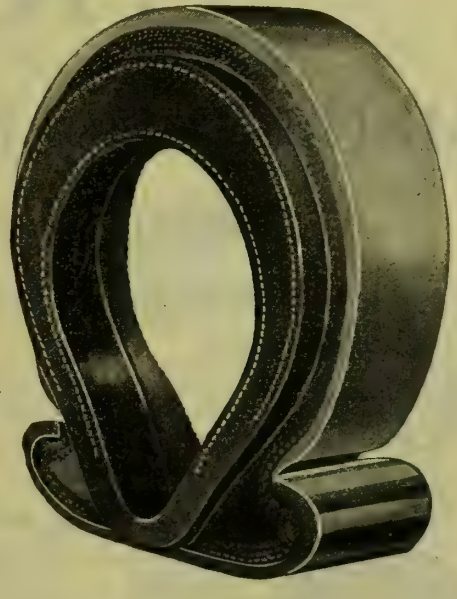
(with the ordinary inner tube), you, of course, know what would happen, and happen quick, even with only one ½-inch hole.

The fact is you would hardly get the tire inflated before it would "blow," yet look at the tire here shown. It has gone over 7,000 miles, and is still running, with the casing punctured in eight places with 1½-inch holes. The tube shows through at each of the eight holes, and it has yet to "blow out."

The reason is very clear when you size up the section of **"Sternwear"** tube shown below. The **"Sternwear"** is not only very thick, but is double reinforced with fabric. No matter how thin a spot is in the casing the pressure is distributed over the whole tire, and there's little or no chance for a blow out.

The Sternwear Reinforced Pneumatic Tube doubles the mileage of a casing.

A casing which is ordinarily discarded may be resurrected and used indefinitely when the **"Sternwear"** tube is used (this, of course, if it has not blown out and the sidewalls are good).



"Sternwear" tubes reduce the cost of motoring and the chance of accidents from blowouts.

They practically solve the puncture and blow-out problems by reducing them to a minimum.

The **"Sternwear"** tube cannot be pinched by inside of casing being cracked. Can be mended the same as any other tube.

Made in the best selling sizes.

Write, call or phone. We will be pleased to give you price list and other information.

READ THIS GUARANTEE:—

We guarantee ***EVER-TYTE*** Piston Rings to produce higher compression, develop more power, and use less fuel and lubricating oil than any other piston ring; and we will return the full purchase price to any purchaser upon the return of rings, if they fail to meet the conditions of this guarantee after six months actual service—provided the cylinders are not scored, nor badly warped and the motor is fully equipped with ***EVER-TYTE Piston Rings.***

U. S. A.
HERCULES

It is Cheaper to Prevent Trouble than to Cure it

The BOYCE MOTOMETER installed on a car insures safety in operation. No driver, not even an expert, can absolutely guess at motor temperatures. And a Boyce Motometer installed on a car absolutely demonstrates this fact the first day it is installed.

It immediately detects motor troubles, such as overheated engines, lack of oil, radiator leaks, any defects in the circulating systems, improper carburetor adjustment, and like troubles, and gives warning in ample time to avoid serious injury, with its consequent expensive repairs.

WHEN THERE IS TROUBLE THE MOTOMETER SAYS—STOP!

Send for descriptive booklet, "What Every Car Owner Should Know," and complete information.

Easy Money for Dealers

Motorists are using their tire chains every day and all day. And every single tire chain needs a Merchant's Chain Tightener. These Chain Tighteners are selling like hot cakes. They take up scarcely any room, require a very small investment, and are very profitable to handle. Send in your order *now,* while the wintry season is with us.

$1.00 a pair

MERCHANT'S ANTI-SKID CHAIN TIGHTENER

Keeps chain from pounding against the fenders, prevents it from unhooking accidentally, holds it in place so that it cannot drag or rattle, while allowing it to "creep" on the tires and carry out to the full its non-skidding action. In fact it helps the anti-skid action by preventing the chain from slipping. Note the safety hook; they can't come off. Built of best materials, carefully made, it catches the chain at five points and holds it with an even, steady tension all around. Simple, easy to attach, no trouble at all.

U.S. and Can. Pat. Pending.

Champion

Tractor Plugs

are Equipment on Fordson Tractors

The ever-increasing sales of Fordson and other tractors in itself means increased spark plug sales to the dealer who carries Champions.

With a greater necessity than ever for increased production, next year will be a tractor year, and Champion Fordson Tractor Plugs will be demanded by many of your customers.

Whether your customers own Fordsons or any other tractor using a standard half-inch spark plug, the Champion Fordson Tractor Plug will meet its requirements perfectly, and, like all Champions, is guaranteed to give a completely satisfactory service. Every farmer who owns a Ford knows the efficiency and dependability of Champion "X" Spark Plugs, and every auto owner who also owns a tractor is a prospective purchaser of Champion Fordson Tractor Spark Plugs.

Capitalize this. Make the nationally known dependability of Champion Spark Plugs help build your sales of Champion Fordson Tractor Plugs. Order from your jobber to-day.

WANTED—HARDWARE AND FURNITURE travellers to carry side lines of washing machines.

WANTED — HARDWARE AND FURNITURE dealers to handle water power, electric or hand machines. One Minute Washer Co., 74 Logan Ave., Toronto.

Forgetting

One of the things we all do well is to forget.

Names that were household words yesterday are gone to-day.

Because people knew your Name and your Line a year ago it is no sign they do to-day. They forget easily.

Keep yourself in the public mind by advertising. It is just as important to make old friends remember as it is to win new friends. Advertising does both.

THIS IS WORTH SENDING FOR

At the annual convention of the Ontario Retail Hardware and Stove Dealers' Association, held at Hamilton, Ont., last year, one of the best and most practical features of the program was an address on "Salesmanship" by Mr. George A. Simpson, sales manager of the Steel Company of Canada, Limited. By special request an additional supply of reprints of the address has been prepared, and a number of extra copies are available for free distribution. We will gladly supply copies free upon request. Address requests to

The beauty of selling the Greening lines lies not only in the good profit—the service is magnificent making repeat orders double-sure.

The B. Greening Wire Co., Limited
HAMILTON, ONTARIO

Before

After

"BEFORE"—To the stove dealer, this reproduction illustrates a familiar sight—the old stove that you allowed your customer a few dollars for in the deal for a new one.

Now, the question arises in your mind, "Shall I dump it in the junk heap, or put it in shape to sell again at an attractive profit?"

You have the extra fittings to put the inside in good order, and we have the equipment and expert workmen to put all nickel trimmings in the same condition as when new, and at a small cost.

What are the net results?

1. **You are in a position to allow your new stove customer more money for his old stove—he is thoroughly satisfied.**

2. **When you and we convert this old stove into practically a new one, as shown above as "AFTER," you will have a "most as good as new" stove to sell to a customer at a medium price—he will be absolutely satisfied.**

3. **Now you have made two sales instead of one—have two satisfied customers instead of one—have made two profits instead of one, and you are satisfied.**

4. **Now, remove all the nickeled trimmings from the old stoves you have on hand, wrap in old newspapers and pack securely in a box and send them along to us—we will make them look like new at a trifling cost, and we will be satisfied.**

5. **Up to now everybody is satisfied, and you can feel that you have conserved instead of wasted.**

We have been rendering this service for years and have scores of satisfied customers.
We have recently doubled our capacity and can give you quick delivery.
On receipt of your shipment of fittings we will quote prices for your approval.

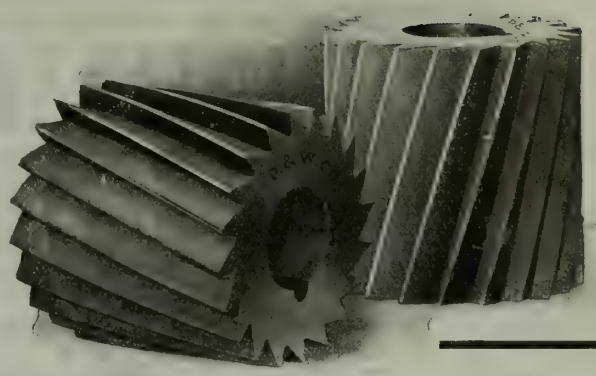
Do Your Bit!

BUY W-S S WAR-SAVINGS STAMPS

DO not think patriotic work is a thing of the past. The great need to-day is to repatriate the returned soldier, and to promote Prosperity so as to solve the problem of the War Burden.

The Dominion of Canada requires your help.



You can be a vital factor in the Government's plan to sell War-Savings Stamps by getting your customers to buy Thrift Stamps.

If they buy the Thrift Stamps from you, they will soon be War-Savers, helping themselves and the country in the great work of Reconstruction.

Put up your Thrift signs, get your stock of stamps, and push the sale among your customers.

Every Bank and Money-Order Post Office carries Thrift Stamps.

SELL THRIFT STAMPS

Vacuum Bottles and Accessories

FOR EVERY SEASON---FOR EVERY PLACE---ALL YEAR SELLERS

When you tell a customer that"UNIVERSAL" Vacuum Bottles are superior you are not spinning selling fiction. You don't have to hedge, back down or hunt for an alibi. You can prove what you say as fast as you say it. Show the exclusive patented features of the "UNIVERSAL" line—supremacy will be evident without extended argument.

Show how the spring steel holder grips the filler firmly in place and absorbs all bottle-breaking shocks. Note the absence of unsanitary felt pads, cork rings and cement fastenings. See how the rubber gasket around the neck of the bottle prevents leakage into the case. Bear in mind that thorough tests have shown the greatest temperature-retaining efficiency is found in "UNIVERSAL" Bottles.

"UNIVERSAL" Vacuum Bottle with extra cups is a patented UNIVERSAL feature. Whenever you sell a Vacuum Bottle, show the nested cup feature and you've added another selling point to your story.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible —their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

Immediate Service in Williams' Superior Drop-Forged Wrenches For Every Purpose

PURSUANT to our policy, inaugurated nearly half a century ago, of standardizing lines of Drop-Forged Wrenches, we have now developed some forty patterns in about one thousand sizes with openings running from 3/16 to 7-5/8 inches, for every purpose.

All are reliable, efficient tools, made of the best materials obtainable and manufactured by methods developed and perfected through many years' experience.

We carry them Big and Little, Bent and Straight, Thick and Thin; something *Standard* for every recognized trade need.

Specify "Williams' Wrenches" or Tools when you order and get *Superior* quality. Ask for Wrench Booklet.

Eureka Corn Planter

In one and two-hand styles, well finished, light and durable, positive and accurate in action. A seed guard determines the number of kernels to be dropped in each hill. Only one lot of seed can pass into the jaws at one time. A flat steel spring is used in place of the cheap brushes used in ordinary planters, which constantly wear out.

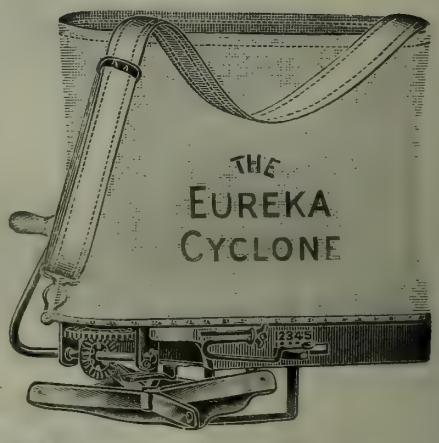
EUREKA PLANTERS

It's to your customer's advantage to use them—and profitable for you to sell them.

Eureka Planters are the best that money can buy. They soon pay for themselves in their useful, economical and labor-saving qualities.

Many dealers throughout Canada have been selling **Eureka Planters** for years, and have built up a high-quality reputation and increased sales for their stores in this way.

Do your best by your business by taking on the **Eureka Line.**



We also manufacture sprayers and many more labor-saving devices for the Farmer and Gardener.

Write for prices and complete information.

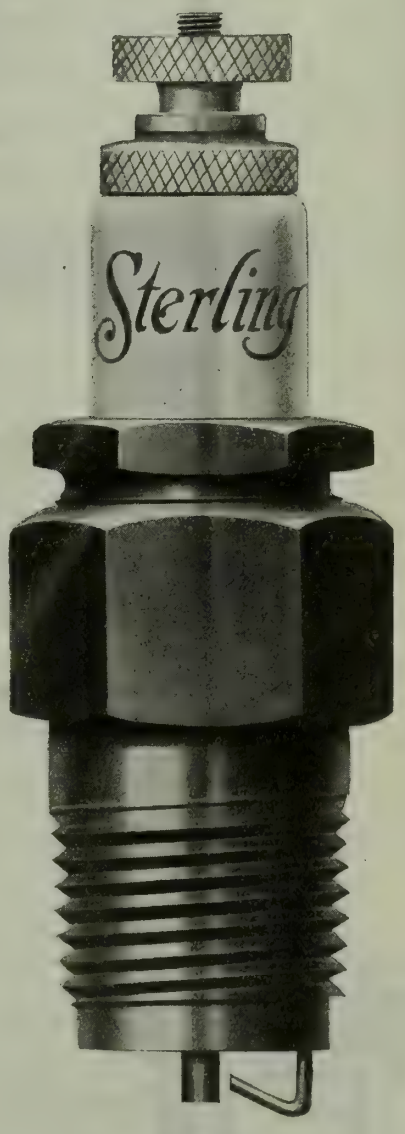
Sterling Spark Plugs

Who Sells You Sterling Spark Plugs?

In buying merchandise you appreciate the sincere advice of the man on the other side of the counter.



When you buy a shirt or a pair of shoes you like to patronize the man who understands your wants and tries to give you what you need.

So with Sterling dealers—they know your needs.

Sterling dealers are the type of business men who are willing and able to make clear to you the particular advantages of Sterling Spark Plugs.

They are the type of men, too, whose words carry weight.

When these men tell you Sterling Spark Plugs are economical because they are separable, cleanable and easily renewed by inserting a new porcelain core, they are rendering you a service you will appreciate because of what these attributes of Sterling Plugs mean to you.

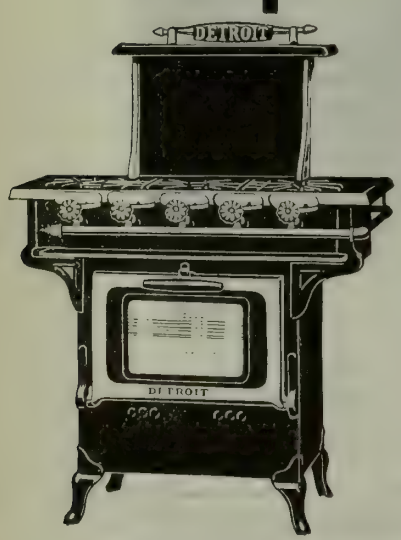
Hardware Dealers

Build Up a Sound Oil Stove Trade

Housewives everywhere are appreciative of the advantages of the wickless oil stove. More and more each year are making their oil stoves serve the entire 12 months.



And you as a dealer cannot afford to overlook this opportunity of increasing your oil stove sales. You should handle a good stove.

DETROIT VAPOR STOVES

"Work Like Gas"

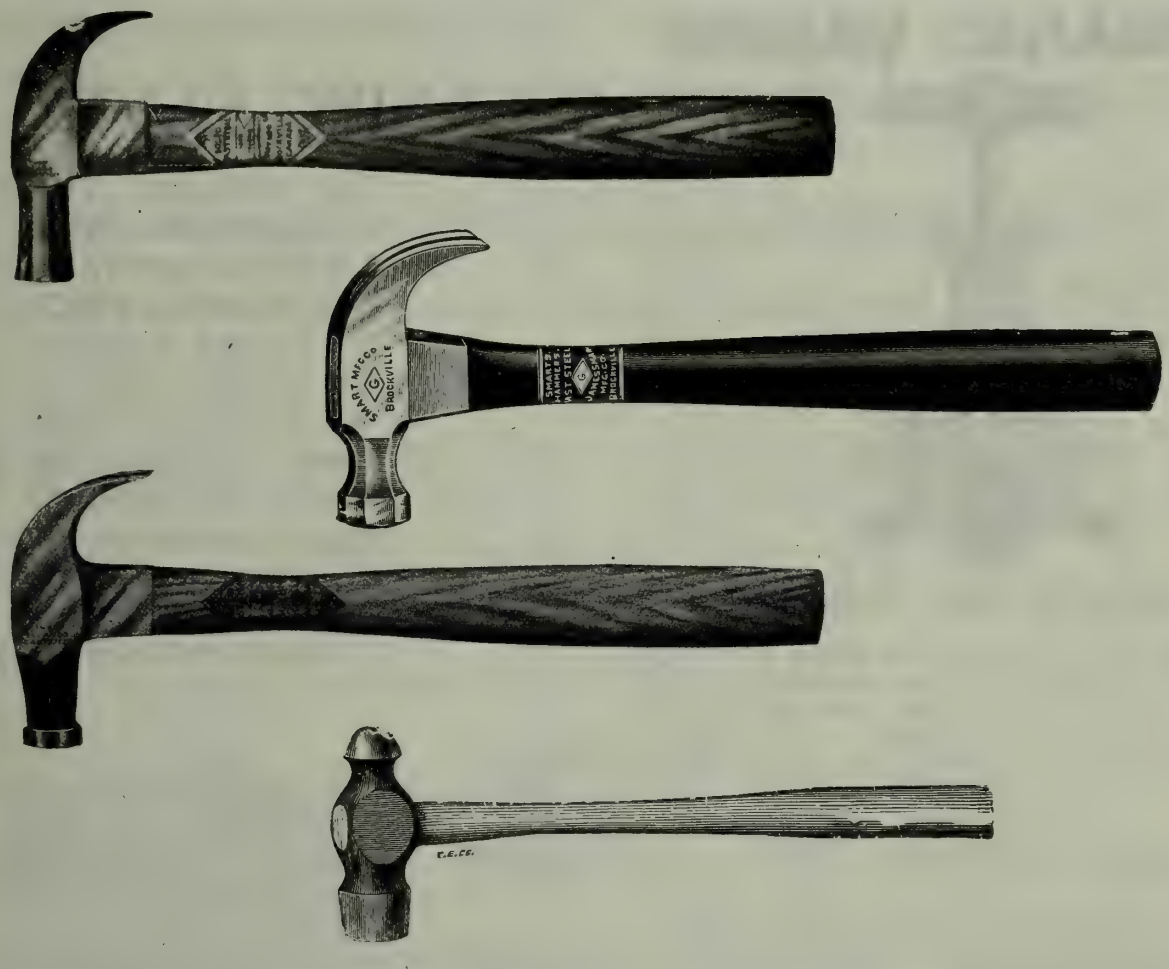
Burn Oil, Gasoline or Distillate

Oil Stove users everywhere are keenly appreciative of the sturdy gas stove construction of Detroit Vapor Stoves. For they are built on gas stove lines and operate similarly.

Detroit Vapor Stoves have no wicks or wick substitutes. Durable 8½ pound iron burners vaporize the oil so that they burn a gas instead of a liquid. The kettles go on as soon as the match is struck.

Detroit Vapor Stoves operate at a lower cost than either gas, coal or wood stoves. They are complete in themselves and can be placed anywhere.

If you have not yet been visited by our provincial representative in your territory you should write us for our exclusive agency proposition.



We have been making oil stoves for 25 years —stoves that the best dealers are proud to handle. Write us to-day.

How the Dealer Stands in the scheme of LACO SELLING

Every Dealer who handles Laco Lamps is considered by this Company as a worthy part of the machinery of distribution to users.

His efforts are appreciated, and no methods or means are adopted by the Company to lessen or avoid his Dealer Profits.

These points have a direct bearing on the splendid business relations now existing between this Company and the many Dealers throughout Canada now selling Laco Lamps.

The Laco Dealer is protected and supported in many ways

1. **Laco Lamp sales and profits are based on a sliding quantity basis—a worth-while profit remuneration for worth-while sales efforts.**
2. **Laco Lamps assure full margin of profit, as full retail price is protected.**
3. **Laco prices to Dealers are such that Dealers can handle, at a profit, business of the largest factories in their districts.**
4. **Laco Lamps have exclusive talking points:— A non-quibbling guarantee — 1500 hours individual life against 1000 hours average life of the nearest other guaranteed lamp.**
5. **Extensive Laco advertising, before a customer enters the store, makes him prefer Laco Lamps.**

These are advantages that work day and night for every Laco Dealer.

Write to-day for complete information.

Back to Business

Now that the work of the Convention is over, and everybody is home once more, we turn our attention to the business in hand.

Ideas have been discussed, progressive plans outlined, and trade conditions forecast in a way that indicates a thriving and increasing hardware business for 1919. Now if ever is the time to put into practice the valuable hints and suggestions which we have picked up during our sojourn in Hamilton. Let us make up our minds to turn them to full advantage and so reap the full rewards of our trip.

Practical Co-operation for the Dealer

To those who didn't attend the Convention, or with whom we missed the pleasure of conversing, we wish to outline our plans for 1919. A newspaper advertising campaign will first of all cover the country from coast to coast. Five hundred and nineteen newspapers altogether, are on the list, reaching a total circulation of 1,360,441 men; Mind you, this does not include magazines, weekly periodicals, such as the *Saturday Evening Post*, or special class publications ; nor does it take in street car advertising, all of which are extra.

Special forms of Advertising Help

In addition to these forms of publicity (likely to be increased during the year) there will be a direct-by-mail campaign in which our efforts to co-operate with you and back you up will be carefully outlined and explained. These pieces of follow-up matter will be so designed as when unfolded to furnish you with a striking and attractive poster in colors to put up in your window, thereby linking up the store with our advertising and enabling you to derive the greatest possible advantage from it.

Our Services are Yours

We want you to feel free to call upon us at any time for whatever assistance you may need in an advertising way. Also, we would like you to tell us just what you think of our selling plans and suggest, if you can, how the advertising which will go to you from time to time may be improved.

Though the past year has shown a big increase in the sales of Autostrop Razors, this year it is our determination to make our sum total of sales still bigger to the end that we may both benefit. Since *our* success must inevitably mean *your* success, let us work together.
